AUDITORS CERTIFICATE.

We hereby certify that we have carefully audited the books and accounts of the Central Canada Loan and Savings Company of Ontario, Limited, at Toronto and Peterborough, respectively, for the year ending 31st December, 1894. The postings and balances of the company's ledgers have been examined, and we find the whole correct, and in accordance with the above statements.

HENRY M. PELLATT,
WILLIAM MANSON, } Auditors.

INSPECTION COMMITTEE CERTIFICATE

We hereby certify that we have made a careful examination of the securities of the Central Canada Loan and Savings Company of Ontario, Limited, that we have checked the same with the mortgage register, and find them correct, and in accordance therewith.

E. S. VINDIN,
F. C. TAYLOR, } Inspection Committee.

Peterborough, 23rd January, 1895.

In moving the resolution for the adoption of the report, the chairman said: "I have pleasure in briefly directing your attention to the operations of the company for the past year. We have, after deducting all expenses of management, providing for interest on deposits and debentures, and the payment of four quarterly dividends at the rate of 6 per cent. per annum, made the substantial addition of $15,000 to the reserve fund and $12,777.92 to the contingent fund; this, I think, you will regard as satisfactory. It is also gratifying to note that the prevailing depression of the past two years has not retarded the steady progress of the company; during that time our assets have in-

creased from $4,186,673.66, on the 31st December, 1892, to $5,200,830.09 on the 31st December, 1894. The earning power of the company has also been fully maintained, the lower rates paid on our deposits and debentures covering the reductions made in our loaning rate.

The agricultural community have no doubt suffered from the sharp decline in the price of wheat, and have been more or less inconvenienced by the expenditure necessary to stock their farms, adapt themselves to the changed conditions, and enter upon more diversified farming, such as dairy products, stock raising, fruit growing, etc. Where this policy has been intelligently pursued, and where that industry and economy prevails that characterizes such a large proportion of our Ontario farmers, we find they are able promptly to meet their obligations, and our experience in that respect during the past year has been quite satisfactory.

The steady accumulation of funds seeking investment in the hands of our insurance companies, trust companies, and private capitalists, makes it more difficult, and requires increased activity upon the part of our officers to keep our funds profitably employed. The advantage that well organized loan companies have in securing applications, making valuations by their own salaried officers, the periodical inspection of the mortgaged properties, and the prompt collection of interest, is gradually leading our own people and our own financial corporations, whose chief business is other than that of loaning money, to invest in the debentures of loan companies. If this policy were more generally pursued, as it no doubt will be, it will lessen competition, lead to the more profitable employment of Canadian money, and decrease the amount now being borrowed in Great Britain on the debentures of Canadian loan companies. In the case of this company, of the $5,200,000 we have invested, over $3,000,000 is represented by Canadian capital, the interest on that amount remaining in the country to help increase its wealth.

Before closing my remarks, I desire to refer to the valuable services of Messrs. Finlayson & Auld, writers, Glasgow, the company's representatives in Great Britain. They have during the past year, as in former years, given their very best attention and care to the company's interests, and the steady growth of our sterling debenture business from the inception of the company to the present time is the best evidence of the confidence placed in them and the company they represent by the investing public of the old land. Mr. Finlayson and Mr. McKechnie are both able, from personal visits to this country and personal inspection of the company's securities, to intelligently discuss its affairs with intending investors.

I will now move, seconded by Vice-President Mr. Richard Hall, that the report be adopted and distributed among the shareholders, depositors and debenture holders of the company.

The motion was seconded by the vice-president and unanimously adopted.

The usual resolutions were carried, and the scrutineers reported the following gentlemen elected directors for the year 1895: Messrs. Geo. A. Cox, J. R. Dundas and Robert Jaffray, Toronto; Richard Hall, D. W. Dumble, Wm Cluxton and James Stevenson, M.P., Peterborough; Edmund S. Vindin, Port Hope; F. C. Taylor, Lindsay, and Hy. J. Lefevre, Lakefield. The meeting then adjourned.

At a subsequent meeting of directors Mr. Geo. A Cox was elected president, and Messrs. J. R. Dundas and Richard Hall vice-presidents.

CORK PRODUCTION IN SPAIN.

An interesting report on the production of cork in the province of Catalonia, Spain, has been sent to the State Department by United States Consul Bowen, of Barcelona, who says that more of it is purchased by the United States than by any other country. The exports of cork to the United States in 1891, 1892 and 1893 amounted to $273,393, $189,139 and $171,012 respectively. The next heaviest purchasers are the Argentine Republic, England, Italy, France and the Spanish colonies. So fully do the various grades of this cork meet with the requirements of the local trade that less than $2,000 worth of cork is imported from other countries.

The forests are almost all situated in the mountains in the province of Gerona, which is contiguous to France, and which is one of the four provinces comprising the principality of Catalonia. Some of the forests are small, but others cover many acres of land. Most of them are natural, and these are the hardiest and most productive. The planted forests never yield satisfactory results.

In the natural forests there exist trees of 300 and even 400 years of age. When the tree is 25 to 30 years old the bark can be taken off, and thereafter every twelve or fourteen years, according to the vigor of the tree. The average yield is but forty-five pounds, and the time selected is generally the month of July.

The manufacturing is done almost exclusively in the neighboring towns. The bark is divided into three qualities, according to its condition. The only instrument used in stripping is the axe. Cars are used in transporting it to the towns, and mules and oxen are also used for that purpose. The wages of cork men are about 85 cents per day, which is rather more than the average workman receives in this part of Spain. In order to protect the forests, and, incidentally, to increase the nation's revenues, an export duty of 85 cents per 100 kilograms is levied on all grades of cork.—*New York Drug Reporter.*

—One of the most important deals in Detroit real estate during the past decade was transacted a week ago. By its terms, the buildings and grounds of the Detroit Exposition Company were transferred to the Solvay Process Company, of Syracuse, N.Y., for $233,000. The grounds contain 69.76 acres, so that the price is at the rate of $3,328 per acre. The company will do business in Detroit and expects to employ hundreds of men.

PRODUCTION OF GOLD.

M. Paul Leroy-Beaulieu, the eminent French economist, states that the carefully estimated annual production of an average of $200,000,000 of gold for the next twenty-five years is probably below the actual facts. These figures should tend in some degree to calm the rage of the silver maniacs who imagine that nature in its retail plan has not provided enough of the precious metal to effect the business exchanges of the world. But it is to be feared that many of the silverites are impervious to all evidence on this subject. Instead of recognizing the opportunity afforded by the increasing abundance of gold to fix the monetary standard of the country on a solid basis, they continue their insane clamors for free silver coinage. But as the volume of gold from California, Colorado, Africa, Australia, and other regions shall accumulate from year to year, the danger and folly of their monetary schemes will become manifest to all but this band of silver fanatics.—*Phil. Record.*

FOR GROCERS AND PROVISION DEALERS.

A cheese factory will be erected this spring near Richibucto, Kent county, N.B.

The St. John, N.B., market is glutted with butter from the Province of Quebec.

Fruit wrapped in brown paper will stand 15 degrees more cold than if not thus protected.

A hop house owned by G. W. Palmer at Corbyville, near Belleville, was destroyed by fire last week, and with it 62,000 lbs of hops.

Twenty-five years ago banana-growing in Jamaica was insignificant, just enough for home wants, but during 1892-93 bananas were exported from the island to the value of over £400,000.

Mr. Geo. Sleeman, of Guelph, has made arrangements to ship a carload of his ales every week to Chicago. James Henderson & Co., of that city, will have the exclusive right to sell his brands in the United States.

—From Hamilton we get word that the Lillis Cigar Company of that city have assigned to F. W. Lamb, with small assets and large liabilities. A meeting of creditors was held on Wednesday, and adjourned to give the company an opportunity of making an offer of settlement.

—"In the *Contemporary Review* Mr. Goldwin Smith's article on the Colonial Conference is little more than a *plaidoiric* [counsel's speech] for his favorite scheme of the separation of Canada from the Mother Country. Everything said, or left unsaid, at the Ottawa Conference helps, in the Professor's able hands, to prove the worthlessness of Canada to Great Britain as a colony—everything is a fresh weapon wherewith to rout and discomfit the Imperial Federationists."—*London Economist.*

One by one our brightest idols are shattered, complains the Philadelphia *Record*. Here comes the Agricultural Bureau at Washington with the startling statement that the peanut is not a nut at all, but a bean. The hand of Boston may be seen in this insult to the proud American peanut. This is the last straw, and the great American people will not bear it. Seven cities claimed the honor of Homer, and three continents boats the title of the birthplace of the peanut—Africa, South America and Spain.

A shipment of forty tons of German refined granulated beet sugar was received in British Columbia via the steamer "Rosalie" on Jan. 20th, consigned to Lowenberg & Co., Victoria. It arrived in good condition, notwithstanding the long voyage. The immediate effect of this importation was to cause the local refinery to reduce their quotations ½c. The British Columbia Sugar Refinery now quotes prices as follows, delivered in warehouse at Vancouver or Victoria, payment by spot cash:

Granulated, in bbls. or 100-lb. bags	4⅜
Extra C	4¼
Fancy Yellow	4⅛
Yellow	4
Golden C	3⅞
Paris lumps in bbls. or 100 lb. bags	5⅜
Powdered icing and bars, in bbls.	5⅛

—A special general meeting of the Bell Telephone Company's shareholders is announced to be held in Montreal, on February 5th, 1895, at 11 a.m., to consider and approve of a by-law authorizing the issue of bonds or debentures to such an amount as may be determined at the meeting.

—According to the *Gazette's* correspondent, the customs revenue of Newfoundland to close of January for this year amounts to $30,000, as against $170,000 at the same date last year.

Commercial.

MONTREAL MARKETS.

MONTREAL, Jan. 30th, 1895.

ASHES.—The market is an easy one for both pot and pearl ashes, perhaps partly due to the fact that one of the principal buyers is now absent in England. No. 1 pots are quoted at $4 to 4.05; seconds, $3.65 to 3.70; in pearls there have been no recent transactions reported. A fair number of small lots are coming in, and receipts to date are about on a par with last year.

DRY GOODS.—We find one or two houses who report a good aggregate of orders, but the majority of the dry goods trade say that business is moderate. Country stocks, according to travellers' letters, are in good shape, and what business is being done is considered to be of healthy character. A European letter just to hand reports an advance of about 5 per cent. in some lines of silk goods, more particularly ribbons and striped blouse silks, of which latter line there have been large sales.

FISH.—For fish there is at present fair enquiry. No. 1 green cod is quoted at $4.25; No. 1 large, $5.25 to 5.50; dry cod, $4.25 to 4.50; herrings, $3.75 to 4.50, according to brand; N.S. salmon, $14 for No. 1; B.C. ditto, $10.50 to 11.00; sea trout, $9 to 10; fresh herring, 90c. to $1.00 per hundred; cod and haddock, 3 to 4c.; finnan haddies, 6 to 7c. per pound

MONTREAL GRAIN STOCKS IN STORE.

Barley, "	13,711	3,218
Total grain	974,736	969,528

GROCERIES.—Sugars continue low in price, with quite an active movement. At the refinery the regular price for standard granulated in lots is 3⅛c. per lb. Some claim to have been able to buy at 3⅜c., but this again is denied. One of the factories still produce a second grade, as a "killer" to the German article, but only in moderate lots. In yellows the range is from 2¾ to 3⅛c. per lb., with an occasional extra dark lot at 2⅝c. Of prime Barbadoes molasses the stock in first hands is under 1,000 puncheons, and advices from the island say that the crop will be short, and late in marketing, none being expected here before June. The price for lots

is now 33c. per gal., though some jobbers are still selling to the country at old prices. It is said the refiners have bought some fair lots lately for the purpose of mixing with beet root syrup, which would otherwise be hard to dispose of. Rice is in fair demand at steady prices. We quote standard B, $3.45; English style, $3.30; Patna, $4.25 to $5; Japan, $4.75 to $5. There is no special activity in teas at present. The principal enquiry is for Japans at 14 to 16c., and we hear of a few more lots selling within the last few days, some going to London, Ont. An offer has also been received from Chicago for a good sized lot at a quarter cent below asking price. Coffees are quiet at 18½ to 20c. for Rio; Java, 25 to 27c.; mocha, 26 to 28c.; maracaibo, 22c. per pound. Currants are firmer at Patras and London, and local quotations range from 3¾c. for ordinary to 6c. for fine Vostizzas in cases. Canned goods are a little more asked for, corn and tomatoes selling at 90c. to $1, according to brand; salmon is firmer; it is reported that a fair lot of horse shoe brand was sold the other day at $1.37½c., but some car lots of ordinary brands went at $1.25.

HIDES AND TALLOW.—The firmness is well maintained, with moderate sales reported of No. 1 light hide cured to tanners at 5½ to 6c., heavier, 6 to 6½c. per lb. Dealers are buyers of green at 5c. per lb. for No. 1 light; heavies, 5½ to 6c. Lambskins are quiet at 60 to 65c. each. Tallow dull and easy at 5 to 5½c. the pound.

LEATHER.—Little change can be noted in the situation. Boot and shoe dealers are not as liberal buyers as manufacturers would like to see them, and this, with the strong efforts being made to get better prices for leather, acts as a brake upon business. We hear of some moderate shipments of splits to England, from Quebec, but better prices can be got here for western stock. We quote:—Spanish sole B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 21c. No. 2 do., 17 to 18c.; common, 15 to 16c.; American oaksole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, 14 to 17c.; do. juniors, 11 to 12c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The market is inactive, all lines being characterized by slowness of movement. Scotch warrants are cabled easier at 41s. 2d. Lots of Canadian bars have been sold under $1.60 it is reported; hoops and bands are also easier, and it is said Canadian band iron has sold at $1.90. Copper is cabled easier, at £40 7s. 6d.; the product for 1894 is estimated at 330,500 tons, as compared with 309,000 tons the year previous. Tin remains weak. In tin

Hoops and bands, per 100 lbs., $2.00 to 2.15. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2 60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead; per 100lbs, pig, $2 85 to 3 00, sheet, $4 to 4 25. shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2 50; ingot tin, 16 to 16½c.; bar tin, 25c.; ingot copper, 9⅜ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2 70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ¾c., ¾ in., 3½c., ⅞ in., and upwards

OILS, PAINTS AND GLASS. There has been much cutting in the prices of white lead, ground in oil, as nominally quoted for some time past, and a meeting of the grinders was held some few days ago, when it was agreed that they should all stand by the prices as amended below. No papers were signed, or penalty mentioned, but a general verbal agreement entered into. It is much to be feared that, when an apparently cast-iron combination, such as was formed a year or so ago, with signed articles, bonds by each member, &c., could only hold for a few months, the chances for the present understanding lasting any time are very poor. Dry white lead is easier. Turpentine is advanced, as we anticipated last week it might be; single brls. are firmly held at 44c.; cost laid down is now calculated at 41½c. Castor oil is easier, owing to low rate of Eastern exchange; other oils as before. We quote:— Turpentine, 44c. per gallon for single barrels; two to four barrels, 43c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots,

"It isn't what I wanted but it will have to do,"

Is an expression often used when a man receives his printing from his printer.

It is money wasted

For people to spend money on catalogues that are not well printed as

If this be your Cat

alogue season ask us to s[illegible] you an tender. We don't disappoint

The Monetary Times Printing Co., Ltd. Toronto, Ont.

1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2, $4 to 4.25; No. 3, $3.75 to 4; dry white lead, 4½ to 4½c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

WOOL.—There is rather an improving demand for wool, though the lots being sold are in no case large. A good ordinary quality of Cape at about 14½c. is most in request. We quote Cape 13½ to 16½c.; B.A. scoured, 26 to 32c.; domestic fleece, 17 to 20c.; pulled supers, 20 to 21½c.; extra, ditto, 23 to 26c.; Nor'-West, 11 to 12c. per pound.

TORONTO MARKETS.

TORONTO, Jan. 31st, 1895.

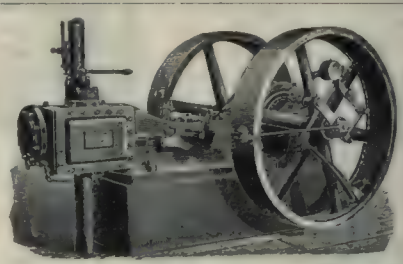
GRAIN.—The market has been quiet and uninteresting, with prices nominally unchanged during the week. The excessive snow falls have blocked the roads and deliveries at many points are very restricted. Wheat quotations are unaltered; Manitoba remains quiet. Barley is steady, and, if anything, a little firmer; some shipments to the United States are going forward. Oats are firmer, with shipments to Quebec and the Maritime Provinces. Peas are quiet, but values remain steady. Rye and corn continue nominal.

The stocks of grain in store at Port Arthur on Jan. 19th were 673,561 bushels. During the week there were received 52,948 bushels, and shipped 15,190 bushels, leaving in store on Jan. 26th, 681,319.

GROCERIES.—But for the sugar markets the month would have passed into history as an exceedingly quiet and uneventful January. Sugars during the week have been very active. The large retailers are investing heavily upon the idea that prices can go no lower, and may possibly experience a sudden advance. Undoubtedly sugars are low, but speculation, even on an apparently sure thing, is bad. It costs money to carry sugar, and a further drop in price is by no means impossible. The trade has witnessed some very material reductions in the price of sugars just at the time when such an event seemed least likely to occur. Purchases of granulated in car lots are being made at 3⅛c, and of yellow at 2⅞c. per pound. The local market is quiet and uneventful, so far as coffee is concerned. Crushed coffee, a German idea, is meeting with good demand, a blend of Java and Mocha selling at 22c. is selling well. The Dutch sales of Government Java coffee at Amsterdam were at 2½ florins above valuation, with market quoted strong and active at 54½ for good ordinary, and private advices quoted Tagal at 58½ florins. Currants are as usual at this season of the year, quiet, but the market is firm and stocks abroad are being held at advanced prices. Prunes are selling well; the "Union" brand, a Bosnia prune, at 4¾ to 5c., meets with good favor. There is only a moderate enquiry for syrups, while trade in molasses is dull. The tea movement is good, and values are firm. Japan teas are not in abundant supply. Moning Congous are scarce, and some jobbers express the view that this market will be bare before the close of the season. Canned goods are firm. We are told that the Canadian Packing Association has been strengthened by the admission of other packers, and this of course makes the situation all the stronger

HARDWARE AND METALS.—This week's trade has not been up to expectations. House orders have been fewer than a week ago. This falling off in movement is partially due to the blocked roads, many travellers having found it impossible to visit their customers and cover their usual ground. Orders for March shipment are being freely placed in heavy hardware, metals, tinware supplies and spring specialties. Tin plate for spring delivery is in good request. Business in plumbers' supplies is flat, and there is no prospect of immediate improvement; it is to be hoped that the spring will develop a better trade. Snow shovels are in good request, manufacturers finding difficulty in supplying the demand. Sleigh bells are selling well. Values are fairly steady. However, bright annealed, annealed and oiled and galvanized wires are lower, the discount off revised list, which takes effect February 1st, being 25 per cent. Barb wire is also lower, a reduction of 12½c. per 100 lbs. having been made; terms continue unaltered. Manilla rope is ½c. per lb. cheaper; sisal, however, remains as before.

HIDES AND SKINS.—Quotations on the hide market remain unaltered. It is strange that with the deterioration in quality no reduction should be made in price. Butchers are receiving more for their hides than, under present conditions, they are worth, while tanners are compelled to pay more than the price of leather warrants. The trade in consequence is slow. Most of the large tanners have good supplies, and as hides on the present basis of values are not attractive, there is no inducement to trade. The Chicago market is weak and packer hides are selling at a decline. The *Review*, which inclines to the "bull" side,



The "Robb-Armstrong" Engine

Is up to date in design and workmanship. Simplest and best governor made. Interchangeable parts. Economical in use of steam and oil.

These prices are wholesale by the car-load

says, on January 26th: "The market continues dull, and almost featureless. Texas steers are the softest spot, and a drop in prices is expected. A concession of a fraction here and there quickly results in clearance sales, and when the stocks are gone the buyers realize that after all the packers received full value, as the decline in quotations scarcely balanced the decline in quality. It has been the custom for years of many tanners to keep out of the market until spring, and then buy May hides at prices contingent upon the large stocks of winter hides. This winter the packers are not going to carry any hides over unless prices go down to a glue-stock basis, which is highly improbable to say the least. Will sheepskins advance on the first of the month? Merchants are not quite in unison as to the future of this market. On the advance to 75c. a fortnight ago it was understood that no change was to be made during February, but in the opinion of some dealers an advance of 5c. is probable. Tallow is weak, dealers paying 5¼c., and offering at 5⅜c.

LEATHER.—Some improvement has taken place in the leather market during the week. The strength which sales made on English account gave the market, noted last week, has not declined. Manufacturers, eastern and western, are making more active enquiries for stock. One house informs us that the present month is the best January they have had in years, while another reports that the only reason their January movement has been small is that they were unwilling to part with their stock except at a material advance over former prices. Stocks of Spanish, from a pretty thorough canvass of Ontario tanners, are believed to be small, although sufficient to meet requirements. Shipments of sole to the English market are going forward this week.

PAINTS AND OILS.—Orders for present delivery are only moderately good, while values are but fairly well maintained. In plate and sheet glass there is good demand. Turpentine has advanced 2c. per gallon in consequence of firm primary markets, and is now quoted at 41c. After prolonged talk of higher prices in lead the grinders have entered into an agreement to raise prices ½c. As this is verbal only and no penalties attach to its violation, jobbers are rather skeptical as to its permanency. The outlook for the spring is full of promise, although it is improbable that any "boom" in trade will take place.

WOOL.—An improved feeling exists in the wool market, in consequence of large shipments of Canadian fleece to the United States. Elsewhere we refer at length to these transactions. Pulled wools are quiet and without change. The London wool sales are still in progress, and are rather uneventful. The American market shows improvement, and the New York *Journal and Bulletin of Commerce*, Jan. 30th, says: "The gain is principally in the increased movement of supplies and apparent evidence of more business to follow, but such development, coming as it does from buyers who either through necessity or choice have voluntarily opened negotiations, has a salutary influence in giving values a steadier basis upon desirable stock, such as the low and medium grades of domestic, which seem in a measure free from direct foreign competition. The deal in pulled wools continues, and there is a tendency to stiffen somewhat in the matter of valuation."

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:
First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.
Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.
Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.
Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

WATERLOO MUTUAL FIRE INSURANCE COMPANY.

The thirty-second annual meeting of the policy-holders of the Waterloo Mutual Fire Insurance Company was held in the board room at the head office, Waterloo, Ont., on Saturday, January 19th. A fair number of policy-holders were present.

On motion the chair was taken by the president, Mr. Geo. Randall, and Mr. C. M. Taylor acted as secretary.

The directors' report, the secretary's financial statement, and the auditors' report were then read as follows:

REPORT.

GENTLEMEN,—Your board of directors beg to lay before you their report for the year ending 31st of December, 1894, being the company's 32nd annual report.

From the detailed statements of your secretary, about to be read to you, we have prepared the following abstract of the leading items of interest contained therein.

We have issued during the past year 9,382 policies. The total number of policies now in force is 20,306. The aggregate amount insured under these policies is $20,699,341. The total earnings of the company are $174,175.52 The amount of losses paid, less re-insurance, is $108,282.58.

The total assets of the company are $354,936.41. If from this amount you deduct the re-insurance reserve of $83,809.10, and the adjusted and unadjusted losses at the close of the year, computed at $5,663, you will have a balance of assets above liabilities of $265,464.31.

By taking into consideration the excessive fire losses of the past two years, in which all the insurance companies have shared to a greater or less extent, your board believe the present financial position of your company is a matter for congratulation by its members, and the insuring public generally.

In referring to the detailed statements in your hands, you will find that the premiums and assessments received from the mutual policy holders, amounting as it does to $80,961.19, is nearly one half the whole amount of the premium revenue of the company.

We account for this, first, on the ground of an increased confidence in and patronage of the mutual system by business men generally as conducted by your company; second, to the reductions in the cost of insurance, as compared with stock rates.

As all our mutual policies are issued for three years, subject to a premium for the first year and an assessment in advance at the beginning of the second and third years, we have taken the actual experience of the company for the past three years, and find that during that period we received in premiums and assessments on our mutual policies the sum of $229,756, these premiums and assessments having been based upon a calculation of 20 per cent. off stock rates, The calculation is easily made and shows a reduction of $57,439, as compared with three annual stock premiums, and a saving to the policy-holders of that amount.

In conclusion, we beg to call your attention to the two main objects of meeting, viz., the disposing of the several statements to be read to you, and the election of five directors. The retiring directors are Messrs. I. E. Bowman, John Allchin, Simon Snider, Allan Bowman and J. L. Wideman, all of whom are eligible for re-election.

On behalf of the board,

GEO. RANDALL,
President.

C. M. TAYLOR,
Secretary.

AUDITORS' REPORT.

To the President, Directors and Policy-holders of the Waterloo Mutual Fire Insurance Company.

GENTLEMEN,—We beg to report that we have carefully examined the books of account and vouchers of your company for the past year and that we find the same correct.

We submit herewith an abstract statement of the receipts and expenditures of the company for the past year and of its present assets and liabilities, as also a detailed statement of the securities for its investments.

All of which is respectfully submitted.

Yours, etc.,

J. M. SCULLY, }
BENJ. DEVITT, } Auditors.

Waterloo, 17th January, 1895.

The foregoing reports having been read and unanimously adopted, the meeting proceeded to appoint scrutineers for the reception of the ballots for the election of five directors. Messrs. J. M. Scully and Benjamin Devitt were unanimously re-appointed auditors for the ensuing year.

The scrutineers reported the unanimous re-election of Messrs. I. E. Bowman, M.P., John Allchin, Symon Snyder, Allan Bowman, and John L. Wideman as directors for the ensuing three years.

At the close of the annual meeting, the directors met and elected Mr. George Randall, president, and Mr. John Shuh, vice-president of the company.

The following are the names of the gentlemen comprising the full board of directors: George Randall, John Shuh, Chas. Hendry, I. E. Bowman, M.P., Simon Snyder, George Diebel, Wm. Snider, of Waterloo; James Livingston, M.P., Baden; Thomas Cowan, Allan Bowman, Galt; Thomas Gowdy, Guelph: John Allchin, New Hamburg; P. E. Shantz, Preston; I. D. Bowman, Berlin; John L. Wideman, St. Jacob's.

—One hears a great deal these days about the devotion of the race to money getting, and the indifference of men of wealth to the needs of their poorer brethren, but statistics just compiled show that during last year more than thirteen million dollars was bequeathed to charitable, missionary and educational institutions in the United States, to say nothing of the millions given to charity by generous persons whom death has spared to continue to do good to their fellow men.—*New York Herald.*

GOLD MINING IN BRITISH COLUMBIA

Before the Mining Association of Montreal the other day Mr. John B. Hobson, mining engineer, of Vancouver, B. C., read a paper on "The Auriferous Gravels of British Columbia," which made strong predictions about the output of gold in the future from the auriferous placers of British Columbia. We make some extracts from this paper:

"The placers of the modern rivers of California are practically exhausted. Those of British Columbia are not by any means exhausted. The shallow placers, known as bar, creek and gulch diggings, have been, so far as known, extensively worked since the Fraser river and Cariboo gold excitements about 1857. The most accessible of the above-named placers have been pretty well worked out in the districts I have examined. But the vast accumulations of auriferous gravel on the benches along the Fraser, Quesnelle, Horse Fly and other modern streams examined, are practically unexplored. These can be worked by hydraulic process. The deep placers of the modern streams, that is to say the auriferous gravels lying below the water level of the modern streams, have been worked to some extent in the vicinity of Barkerville, but immense areas remain to be explored, and will in all probability be profitably worked in the future by aid of modern appliances. The deep modern placers can be exploited either by shaft and worked by what is known in California as the drifting process, or by the hydraulic elevator process. In other words, a shaft is sunk to bedrock, and the bottom stratum of auriferous gravel is breasted out, hoisted to the surface, washed in ordinary sluices and the gold recovered. Wherever an abundant supply of water can be obtained and delivered at the mine under sufficient head or pressure, as it is called by California miners, the auriferous gravels lying below drainage can be successfully and profitably worked by the hydraulic elevator.

"The deep placers of the ancient river system of the tertiary, as seen in British Columbia, are similar in character, but, so far as I have been able to determine, far more extensive and richer in their gold tenure than those of the most favored districts in Central California, where gravel deposits which contain from three to five cents per cubic yard in gold are considered rich and yield as profit from 20 to 50 per cent. of the gross output when worked by the hydraulic process.

"Water is abundant in all the districts I have examined, and can be brought on to the deposits in shorter canals and at much less expense than is possible in California. In California there is invested one hundred millions of dollars in hydraulic mining enterprises. I have seen in British Columbia, included in the Yale, Lillooet and Cariboo districts, three times the area of auriferous deposits that are known to exist in the whole of the State of California. The British Columbia gravels that I have examined, and may be considered available for hydraulic working, yielded results varying from one cent to $1.50 per cubic yard, and as a whole average richer than any I have seen in California. In some properties examined, I sampled streaks, some of which were on bedrock, and others 150 feet above the bedrock, that yielded prospects varying from $2 to $36 per cubic yard. We have no such rich deposits in California."

Mr. Hobson goes on to say that to equip hydraulic mines is an expensive process, and that capable engineers should be employed to investigate the source, and determine the application of water supply, and the gold tenure of the gravel deposits. A company of gentlemen in Montreal have undertaken the equipment of two large hydraulic mines in Cariboo, the Horse Fly Hydraulic mine and the Cariboo Hydraulic mine, which, he believes, will soon be on a basis for profitable production

---

—A London cable of Monday last states that the regular service of the new line of steamers between Belgium and France and Canada will begin April 1st. The steamers will run to Montreal in the summer and to Halifax in the winter.

The Next Division of Profits

Of the **Canada Life Assurance Company** TAKES PLACE AS AT

31st December, 1894.

Insure Now AND SECURE o o o o

ONE FULL YEAR'S PROFIT.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

DECISIONS IN COMMERCIAL LAW.

Any subscriber desiring a fuller report of any of these decisions, which are necessarily condensed, has only to address THE MONETARY TIMES.

BURY v. MURRAY.—Verbal evidence is inadmissible to contradict an absolute notarial transfer, even where there is a commencement of proof, by writing not amounting to a full admission. A defendant cannot set up by way of compensation to a claim due to the plaintiff, a judgment purchased subsequent to the date of the action, against one who is not a party and for whom the plaintiff alleged to be a *prete-nom*. In an action to recover an amount received by the defendant for the plaintiff, the defendant pleaded *inter alia* that the action was premature, inasmuch as he got the money irregularly from the treasurer of the Province of Quebec on a report of distribution of the prothonotary before all the contestations to the report of collocation had been decided. The Supreme Court of Canada holds, affirming the judgment of the Court of Quebec, that this defence was not open to the defendant, as it would be giving him the benefit of his own improper and illegal proceedings.

FITZGERALD v. CITY OF OTTAWA.—When the plaintiff's land was part of a township he and his neighbors had, with the permission of the township authorities, constructed a box drain to the highway to carry surface water therefrom. After the locality had become part of the defendants' territory, this drain collapsed, and the earth covering of it acted as a dam, which penned back the water upon the plaintiff's land. The defendants' engineer then made a cut which carried away the water for a time. This, however, became filled up, and the water again came on the defendants' land. He notified the defendants, but they did not remedy the matter until after substantial injury was done. Chancellor Boyd decided that they were liable.

ALEXANDER v. WATSON.—A., a wholesale merchant, had been supplying goods to C. & Co., when, becoming doubtful of their credit, he insisted on their account being reduced to $5,000, and on security for further credit. W. was offered as security and gave A. a guaranty in the form of a letter as follows: "I understand that you are prepared to furnish C. & Co. with stock to the extent of $5,000 as a current account, but want a guaranty for any amount beyond that sum. In order not to impede their operations I have consented to become responsible to you for any loss you may sustain in any amount upon your current account in excess of the said sum of $5,000, including your own credit of $5,000, unless sanctioned by a further guaranty." A. then continued to supply C. & Co. with goods, and in an action by him on this guaranty, the Supreme Court of Canada holds, affirming the judgment of the Court of Appeal, that there could be no liability on this guaranty, unless the indebtedness of C. & Co. to A should exceed the sum of $5,000; and at the time of action brought such indebtedness having been reduced by payments from C. & Co., and dividends from their insolvent estate to less than such sum, A had no cause of action

OELRICHS v. TRENT VALLEY WOOLEN MANUFACTURING CO.—C. & Co., brokers in New York, sent a sample of wool to the defendants at Campbellford in Canada, offering to procure for them certain lots at certain prices. After a number of telegrams and letters between the defendants and C. & Co., the offe was accepted by the former, at the pric named, for wool "laid down in New York," and payment was to be in six months from arrival of wool in New York, without interest. Bought and sold notes were respectively delivered to the defendants and the brokers, the latter signing the sold note. The wool having arrived, the defendants would only accept it subject to inspection when it reached their place of business in Canada, to which the seller would not agree, and it was finally sold to other persons, and an action brought against the defendants for the difference between the price realized on such sale and that agreed on with the brokers. The Supreme Court of Canada holds, affirming the decision of the Court of Appeal for Ontario, that the brokers could be considered to have acted as agents of the defendants in making the contract, but if not, the company having never objected to the want of authority in the brokers nor to the form of the contract, must be held to have acquiesced in the contract as valid and duly authorized. Also, that there being no special agreement to the contrary, the place for inspection of the wool by the buyer was New York, where the wool was to be delivered, and it made no difference that the defendants had previously bought wool from the same person who had sent it to Campbellford to be inspected. Further, that the evidence of a usage of the trade as to inspection offered by the defendants was insufficient, [such usage] not being shown to have been universal and so well known that the parties would be presumed to have had it in mind when making the contract and to have dealt with each other with reference to it.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

SUMMERSIDE, P.E.I., has a population of 3,000, and seventeen of these are aged 80 or more.

CUSTOMS receipts at Halifax for January were $48,148, as compared with $41,283 in January preceding.

THE premises known for many years as Bryson's temperance hotel, at Howick, Que., have been sold to J. J. Logan, who intends altering the building and removing his store to it.

THE customs duties collected at Montreal in January amounted to $538,290, which is $110,955 less than in January, 1894. The Inland Revenue collections were $157,877, as compared with $176,257.

WE learn from the Sherbrooke *Gazette* that G. H. Kerr has leased the shoe store and business of Malcolm J. Smith, at Lake Megantic, from the first of May next, for two years. Mr. Kerr also intends to carry on auctioneering.

IN the spring of 1889 the hat and fur business of James H. Rogers, in Winnipeg, was presented to his son Joseph A. Apparently he did fairly well until overtaken by fire a week ago, when the stock was a total loss. On this there was $14,500 insurance. This not being sufficient to pay creditors, an assignment has been made.

Mercantile Summary.

THE grocery stock of Barker & Yerxa, on York street in St. John, N.B., has been sold to John Gibson & Son, who took charge on Saturday last.

THE premises at Edmundston, N.B., occupied by the branch of the Peoples' Bank of Halifax, were destroyed by fire last week. The bank lost some books and other articles. The building was insured for $2,000.

THE 1894 crop of Cuban tobacco is said to be of very good quality. Prices have advanced materially, too, according to a cigar manufacturer, who says that more recent buyers are paying from 10 to 20 per cent. more for their tobacco than December prices.

IN the fall of 1893 Smith & Stutt bought the dry goods business of the late R. Jamieson, in Seaforth, valued at about $18,000, having but a small capital. It is now evident that their means were entirely inadequate for the requirements of so extensive a business, and they have been obliged to assign.

THE Stratford Board of Trade strongly favor the building of a fire hall on the Albert street property and having the fire appliances put in such a shape that the city could be ranked in insurance class A. And a delegation was sent to the city council to press the views of the Board of Trade *re* fire hall on that body.

Mercantile Summary.

MACPHERSON & FERGUSON have bought the old church on the Huntingdon, Que., plank road from the Boyd estate for $450, and are converting it into a cheese and butter factory. The frame of the church, says the *Gleaner*, is as sound as the day it was built. The removal of the steeple takes away a landmark of 52 years' standing.

THE shareholders of the Montreal Freehold Company (limited) met on Friday last, Robert Archer, president; D. Morrice, vice-president; Robert Jaffray (Toronto), Dr. Buller, and F. J. Stewart (Toronto), managing director, being present. The annual report was submitted and adopted. The same officers and directors will hold office during 1895.

THE annual meeting of the Canadian Rubber Company was held a week ago in Montreal, when the annual report was presented. The gentlemen whose names follow were elected directors: Messrs. Andrew Allan, Hugh McLennan, H. M. Allan, And. A. Allan, Frs. Scholes, W. H. Benyon, W. Withall, Arthur Prevost and J. B. Learmont. The directors met afterwards and appointed Mr. Andrew Allan president and Mr. Hugh McLennan vice-president. Mr. J. McGill was also re-appointed manager and Mr. J. O. Gravel secretary of the company.

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

THOSE who realize that good seed, good soil, seasonable planting and intelligent care form the foundation of all good farming and profitable husbandry, are the people we want for customers. Such is the language in which the Steele, Briggs, Marcon Seed Company address their friends in their catalogue for 1895. This catalogue, of 100 pages, is not unfamiliar to us, for with the exception of the cover, it was printed at THE MONETARY TIMES office. We should like to say, however, with respect to this cover, that it does credit to the taste and skill of the lithographers. The company which issues the catalogue does not need puffery; the extent of its business speaks for its enterprise and its spirit. Those citizens who cannot visit its greenhouses at the head of Pape avenue, may at least call at the retail store, opposite the St. Lawrence hall, and see what a variety of garden and flower seed goods they keep.

—THE Montreal Rolling Mills Co. held its annual meeting last week. The report of the business done was considered satisfactory, in view of the depressed condition ruling in the iron business last year. These gentlemen were elected officers:—President, Andrew Allan; vice-president, Hugh Maclennan; directors, Hon. G. A. Drummond, E. S. Clouston, H. Montagu Allan, H. Archbald and William McMaster, the last-named gentleman being managing director.

A NEW BRUNSWICK paragraph states that nearly thirty million common bricks are used per annum in the Maritime Provinces. With these figures in view, it is proposed to form in Moncton a joint stock company, with a capital of $20,000, to make building brick under the dry process. There is an abundance of the best brick clay within short distance of the wharves in Moncton. It is said that the prospectus of the Maritime Pressed Brick and Terra Cotta Company will shortly be issued.

G. E. BUTLER, who keeps a drug store in Toronto, and Wm. Foster, doing a small grocery trade here, have both assigned. Foster's stock is sold at ninety per cent.——An offer of 25 per cent. cash is made to the creditors of James Sinclair, or 50 per cent. on time. Outside ventures is the cause of his trouble.——The creditors of W. S. Johnston & Co., printers, burned out on Melinda street, allow the business to be continued on payment of 40 per cent. on their claims.

A MEETING of the Galt and Preston Electric Railway was held the other day. The report showed that on Dec. 31, 1894, the road having been in operation a few days over five months, the gross receipts had been $5,980.27, while the running expenses were $4,155.22, making the net earnings $1,825.05. This a very promising return. The cost of the road, we are told, was $59,537.

AN interesting illustrated supplement is issued by the St. John *Daily Telegraph*, which has entered its thirty-third year, having been founded in 1862 by John Livingston. The supplement contains portraits of William Elder, who bought the paper in 1871, and of Mr. Tucker, the president of the company, and of H. H. McLean, its manager. The various members of the staff are also pictured.

THE eleventh annual meeting of the Vancouver Island Building Society was held in Victoria on Saturday evening, 26th January. The financial statement and the report of the board were received and adopted. J. M. Rear, G. A. Carlton, R. Carter, C. Booth, R. Erskine, and F. Carne were elected directors by acclamation. Ben. Williams was re-elected secretary, and A. H. Maynard was chosen treasurer.

C. A. Poirier, trader, Windsor Mills, is endeavoring to arrange his small liabilities, nearly all due locally.——Hubert Paradis, manufacturer of match splints at Levis, has assigned. He compromised liabilities of $26,000 only last April.——Napoleon Lepine, of Magog, was originally a shoemaker and started a billiard room some few years ago, from which he drifted into a liquor and bottling business, jobbing to country hotels, etc. He is now reported as having assigned, with liabilities of some $6,500.

MR. GIROUX, of the Quebec Custom House, has compiled a statement of the number and tonnage of steamers and sailing vessels entered inward and outward at that port. The decline of shipping at that port is most marked, according to these statistics. The total number of vessels which arrived in 1893 was 431, against only 389 in 1894. Great Britain supplied 234 of these in 1893 and 225 in 1894, while Norway and Sweden sent 155 in the former and 128 in the latter year. The total clearances in 1893 were 345 as against 294 in 1894. Most of these went to the United Kingdom.

THE Hall Mowing Machine Co. of Canada is being incorporated at Sherbrooke; capital, stock, $100,000. The first directors to be Samuel F. Morey, J. S. Mitchell, A. N. Thompson and Richard Smith, of Sherbrooke; M. F. Hackett, M.P.P., and G. H. House, of Stanstead; Geo. A. Hall, of Portland, Me.——It is also proposed to incorporate the Montreal Roofing Company, capital $150,000, hitherto carried on as a private enterprise. The first directors will be Enoch James, E. Bernier, T. H. Love, Samuel Burne, F. F. Powell and J. G. Duquette.

MUCH unintended cruelty is practised upon the most faithful of our dumb animals, the horse. This is often the case with persons who are merely thoughtless, and would be sorry to inflict pain on any of our brute creation. But the continuous use of the overcheck bridle and small bit has proved to be the cause of much suffering. To obviate this the Humane Bit Manufacturing Company, Newark, N.J., has done a good work, which should be appreciated by all lovers of the horse. After having fully tested this bit, we agree with all horsemen that it is the most comfortable appliance invented to control the horse. With it the animal's head may be kept in perfect position without pressure on the mouth. This year the price has been reduced so low that the use of this bit ought to become general, especially among roadsters and carriage horses. The colt, when trained with it, escapes a lot of pain and worry. Persons disposed to treat their animals kindly should discard the old bit, and the Humane Society should encourage the sale of the new one.

THE week furnishes the following list of country failures in the Province of Quebec: J. B. V. Chamberland, in general trade at Fraserville since 1886, has made abandonment of his estate. He has of late been in trouble with the authorities, owing to illicit liquor selling.——Eugene Raymond, a hotel keeper at Grande Riviere, offers 50 cents on the dollar. ——E. T. Roy, general dealer at Les Saules, a new post office back of Quebec, wants his creditors to let him off 90 per cent. of his liabilities of about $1,000.——Theophile Curodeau, a harness maker of St. George de la Beauce, went into a grocery business last year; result, disaster, and a request to creditors to take $300 for their $1,500 of liabilities.——A similar case is that of J. B. Lavallee, of St. Germain de Grantham, who was formerly a factory hand in the States. He began a small store business in 1893, and is now gazetted insolvent.——Still a third case, to prove that something more than a store, and the goods to sell in it, are requisites to success as a merchant: Octave Fredette, a farmer of St. Narcisse de Lotbiniere, lacking not only experience, but also education, finds plenty houses to stock him up on credit. The usual result follows, and his assignment is now announced; liabilities not yet ascertained.——A more notable instance, however, where long experience, education, and even some moderate capital, failed to command success, is that of L. P. Marchand, of St. Tite For ten years he clerked for an old merchant, whom he bought out in 1893 at 80 cents on the dollar and started. A want of discrimination in credits was the rock he split on. Poor collections were followed by suits entered by Montreal creditors, and now a demand of assignment has been made apon him.

IN Montreal the failures for the week are to be noted: J. Homier, in the hat and fur trade in a small way, has failed.——J. M. Dekepentigny, grocer, has assigned since our report of last week, and owes $6,313.——Robert Duclos, with a heretofore good record of some twenty odd years, has been obliged to assign. Losses by flood, and the disturbance to business first by the widening, and then by the asphalting of Notre Dame street west, have had much to do with his troubles. Liabilities are about $22,000.——A. Duperrouzel, the keeper of a French restaurant, has assigned. He owes $4,887.——J. H. Bedard, formerly an entry clerk in a wholesale dry goods house, and who started a grocery business a year ago, has called a meeting of his creditors.——F. Phillips, peddlers' supplies, asks an extension on debts of $3,500.——T. D. Vadeboncoeur, tailor, has made assignment of his estate: he owes some $3,200.——L. G. Thouvin, grocer, has made, since our last, an offer of 20 per cent. on liabilities of $20,200, which is hardly likely to be accepted. He owes besides $12,000 of a mortgage liability.

THE grocery firm of McElderry & McCrea, in Guelph, has been dissolved by reason of the acceptance, by Mr. McElderry, of the secretaryship of the Guelph and Ontario Loan Society. The business will be continued by Mr J. A. McCrea.

ASSIGNEE CLARKSON is anxious to dispose of the leasehold of a large and valuable coal dock centrally located, on our water front.

IN far western Canada are the following assignments: H. B. Shadwell & Co., dry goods, New Westminster; Hartney & Dickson, general dealers at Hartney; Ford, Lowe & Co., grocers, Winnipeg.

FOR twenty odd years Mr. Alexander Smith was the respected agent of the Merchants' Bank of Canada at Napanee. In 1893 he was superannuated, and now we hear of his death in Montreal, at the age of 70 years. His remains were sent to Napanee for burial.

THE general stock of Durns & Co. at Acton, is advertised for sale on next Wednesday.——On the same day the dry goods stock of J. W. Relyea, Brockville, and that of the Shaw Company and of J. H. Cleaves, will be sold.——Jas. Robertson's large dry goods stock at St. Thomas will be sold a day later.

A KINGSTON dry goods firm, Spence & Co., are asking an extension, in payments spread over 24 months. The liabilities are stated at $9,500, with an apparent surplus of $2,100.——Buckley & Co., of Cornwall, Ont., a concern that has had a good many ups and downs in the past, is gazetted as assigned.——Fraser & Son, who succeeded Fraser & Lloyd in the dry goods business at Pembroke last fall, have made an assignment.

AT St. John, N.B., Doherty & Foster, a tailoring firm, are seeking a compromise at the rate of 30 cents on the dollar, liabilities being, in round figures, $15,000. They are spoken of as industrious, practical men, but have shown weakness in crediting and general management. ——The Misses Romans & Vaughan, milliners, Halifax, N.S., and a small grocer of the same city, one A. H. Larder, are reported as assigned.

ASSIGNMENTS in Ontario: Thos. Johnston, crockery, Picton; Benj. Brillinger, hotel, Richmond Hill; Chas. E. Tanner, banker, Blyth; D. B. Pratt & Co., boots and shoes, Hamilton; W. J. McGinn, baker, London; Guerard Bros., hotel, Port Arthur; A. J. O'Boyle, general dealer, Brechin; J. S. Smith & Co., dry goods, Ingersoll; Jno. Fraser, general store, Lefroy; E. A. Wood, general store, Uxbridge; James Nichol, grocer, Millbank; Hoover Brothers, clothiers, Port Arthur: Stephen Syer, carpets, St. Catharines; W. Evans, general store, Flesherton; Harvey Morris, stave manufacturer, Blenheim; R. Pearce, grocer, Hamilton; R. Storey, merchant, Acton; Shaw & McClung, Sonya; G. W Helstrope, furniture, Creemore.

THE sudden death in New York of Mr. Emanuel Samuel, of the Toronto firm of Samuel, Benjamin & Co., gave a shock of surprise to many friends and admirers of that worthy gentleman. At only forty-five years of age, in apparently good health, amid surroundings of success and comfort, to be cut off instantaneously by what appears to have been an unfortunate accident, was a sad fate for any one But it was especially sad for a man like this, genial, kindly, happy in his work and in his friends Mr Samuel had lived in Canada nearly all his life, partly in Montreal, but for a long period in Toronto. Like his father and his uncle before him, who composed the firm of M & L Samuel, the deceased was a man of liberal spirit, whose word was his bond.

THE SITUATION.

Newfoundland, in petitioning the British Government to appoint a royal commission to enquire into the affairs of the colony, seeks to make a condition which is, we venture to think, unprecedented. The proposal is that the British Government should purchase the acquiescence of the islanders in the appointment of the commission by the payment of a sum of money, in return for which the petitioners will accept the recommendation of the commission, whatever it may be. That any such condition will be agreed to by the Imperial Government is improbable. Newfoundland is in serious trouble, financial and political, and she will accept of advice from people likely to be able to offer such as will be of service, if the adviser will only consent to pay for the privilege. The notion is in the last degree incongruous. To look at the other side: How could the Newfoundlanders agree in advance to accept a conclusion of which they can know nothing? The implied expectation may be that the remedy proposed will be federation with Canada; but if this is intended, it would be better to have it understood in direct terms than to take a leap in the dark. In the hour of disaster, the tendency to disintegration is general. Sir William Whiteway's party is represented as being in the throes of dissolution, at a moment when it is essential that it should hold together. There is one consolation: things in the island have reached that pass that they cannot well get worse.

At a recent public meeting attended by members of the Dominion Government, the fact that the United States is now producing pig iron cheaper than any other country was dwelt upon. The price, in Alabama, was stated to be $6.75 per ton. The statement is, we believe, correct. But as much cannot be said for the reasons given for this cheapness. It is not true that Alabama has been able to compete with the world in the production of pig iron because of any tariff policy affecting iron that has been acted upon. Alabama produces the cheapest iron, because she has the best facilities for doing so; the iron ore, the coal and the limestone, the three things necessary to the production of iron, are all found in close proximity to one another, and negro labor is not dear. In other places, coal and iron ore are sometimes found close to one another, but even then the limestone necessary for the flux, is wanting. This explains why Alabama can produce iron cheaper than it can be produced anywhere else. Alabama iron masters need no protection, because they can meet the competition of the world in foreign markets as well as at home. Their competition has troubled nobody more than the iron men of Pennsylvania, by whom strenuous efforts have been made to prevent their rivals making use of the ordinary channels of distribution, and who refused to sell their wares to men who dealt in the Alabama product. In this way, the Alabama iron has gone direct to founders and others who work it up, when it has not found its way to the retailer. And so one class of retailers have been dispensed with. Canada gives a bounty of $4.48 per ton on pig iron produced in the country, when for $1.77 more a ton can be bought in the open market of Alabama. Special advantages such as Alabama possesses have often, in the past, produced a revolution in particular industries, to the ruin of those which are handicapped by some want which is supplied at less cost by the latest triumphant rival.

During the week the Canadian public has been a little startled by the announcement from England concerning a new railway scheme, the Atlantic & Lake Superior. The news did not attract much attention, because faith in the possibility of present realization is wanting. The statement was accompanied by a story of a Government guarantee of bonds, which was a real puzzle. How and when was such guarantee given? It is now said that certain guarantees were promised to some roads some time ago, and that those who are interested in the promise or promises have been dealt with. Are the projects in question still really alive? Has there been compliance with the conditions of the guarantee, in point of time and expenditure? Or is the whole thing a shadowy reminiscence? We are told this: that the lines to which the guarantees were originally promised have made a free gift of their claim to the Atlantic & Lake Superior company. As a rule, men, and of all men, railway men, do not give anything valuable for nothing. What is the value in this case? Is the thing given capable of being transferred in this way? There will probably be time to answer these and some other questions before the wild scheme is ever put upon its feet. One of the sponsors for it is J. R. Thibaudeau, a senator of the Dominion and a well-known Montrealer. Another, less favorably known, because more visionary, is C. N. Armstrong. That Mr. Andrew F. Gault has resigned from the provisional board is significant.

A Vancouver correspondent, Mr. Nicolai C. Schon, points out some difficulties that would stand in the way of Canada joining in the British treaty with Japan. It is assumed that, in such an arrangement, Japan would insist upon the unrestricted right of her subjects to emigrate to the Dominion and make their home here. We are not, in fact, assured whether the treaty in question contains any such provision; we must therefore assume that the question, in its present shape, is only capable of being treated on a hypothetical basis. The objection brought against Japanese labor is the same as that which has largely succeeded in prospectively excluding Chinese labor: both kinds of labor are cheap. A Japanese laborer, in British Columbia, it is assumed, would be willing to work ten hours a day for fifty cents. It is natural that white laborers should object to a competition which would require them to accept a lower scale of living than that to which they have been accustomed. The immigration of cheap labor has precisely the same effect upon the labor market that an excessive natural increase in the native laboring population has, so far as the jostling of

numbers goes; but it has this further effect, that the influx of the newcomers tends to lower the standard of the comfort which has hitherto prevailed among the workmen. Ever since the days of Malthus, political economists have been telling laborers to check the natural increase of their numbers, for the purpose of preventing ruinous competition, want, starvation, or even worse. The workmen have learnt to apply the same rule to the multiplication of workmen by means of immigration. But the objection may be carried too far for the general welfare. Our correspondent touches a tender spot when he refers to the labor of Chinese and Japanese in mines; but passing over the particular instance which he mentions of mining coal at Nanaimo, the fact remains that there are certain poor mines which can be worked only by this cheap labor. Surely the white miners, who could not make a living in these mines, should not envy the Chinaman or the Japanese miner who can make such a living by working therein as corresponds with the rule of comfort which he is willing to abide by.

It is rather late in the day to talk of bonusing the business of building wooden ships. Still such a course does find advocates in British Columbia. The comparatively isolated position of the province is pleaded, so as to make a special case. This had to be done, when the decline of wooden ship-building, once an extensive industry in the east, is considered. We do not remember that, at any time, this industry was bonused in Quebec or the Maritime Provinces. The notion of bonusing, in British Columbia, may be taken as part of the current theory of protection, which has been so extensively reduced to practice in all parts of the Dominion. And of the various forms of protection, the bonus is not the most objectionable. It has something, relatively speaking, in its favor that is wanting to other forms. In giving a bonus you know the extent of the cost, which is not the case in some other forms of protection. British Columbia, we are reminded, possesses suitable materials for building wooden ships; but this facility rather tells against the claim than in its favor. Royalties paid upon increased shipments, some argue, would partly recoup the bonus. This is a question for the province. The bonus is asked as a temporary thing, as all such aids are, but experience shows that once granted they are never voluntarily surrendered. The bonus is relied on to attract foreign capital, but if it were to be only temporary, the bait would scarcely take. It is asked as a means of reaching foreign markets, vessels not being always procurable to carry cargoes abroad. If so things cannot be said to be in a satisfactory condition, but does it follow that there is not a better way out of the difficulty than resort to the bonusing of wooden ships?

SOME DRY GOODS VIEWS.

One of the most significant paragraphs in the annual report of the dry goods section of the Toronto Board of Trade is that in which the opinion is stated that Canadian stocks of dry goods, both wholesale and retail, are much smaller then they were a year ago. We agree with the conclusion drawn that the trade of 1895 must benefit by this condition, supposing the statement to be true, which there is much reason to believe. The year 1894, it is confessed, "has been an unsatisfactory one from a money-making point of view," but the chairman congratulates his auditory that they have passed through a very trying time with their ranks unbroken. Having regard to the untoward conditions prevailing all the world over, Canada has done well. "That our banking institutions, as well as our large mercantile houses, have been conducted on sound lines, and with considerable prudence and foresight," says Mr. Anderson, "is evident from the fact that at no time during the past year did any panic exist, and no failures have occurred amongst the wholesale houses." Referring to the marked decrease in failures of traders in the United States and the increase of them in Canada, the report says: "As we in Canada generally follow about a year behind the United States either in prosperity or adversity, I am hopeful that the year 1895 will show a decrease in the number of failures in Canada."

The year has been remarkable, we are reminded, for the low price of staple commodities. That this has had its effect in lessened volume of foreign purchases, measured by money value, is apparent from a comparison of the imports of dry goods at Toronto during 1894 and 1893. The value of cotton, wool and silk goods entered at this port last year was $750,000 less than 1893. Upon referring to our fyles we find the total Toronto imports of dry goods, including hats, bonnets and fancy goods, were $5,514,370 in 1893 and $4,889,812 in 1894, a decline of $1,124,558.

Reference is made to the action of the section, in concert with the similar section of the Montreal Board of Trade, in making representations at Ottawa with respect to features objected to in the tariff, as well as to inequalities in its administration at different ports. The subject of municipal taxation, as it pressed unduly upon the members of the section, is now, we are told, being dealt with by the Attorney-General of Ontario. In a concluding paragraph the report recommends the consideration during the current year of the Insolvency Bill, the rights of landlord and tenant as regards fixtures, dating goods ahead, cash discounts and better protection against fire. These are all live issues, and we may reasonably expect some improvement in the existing state of things regarding them to result from their discussion by the dry goods section of the Board of Trade.

MINERALS IN ONTARIO.

The third report of the Ontario Bureau of Mines, that for 1893, reached us last week. It was sent on 24th April last to the Commissioner of Crown Lands, and by him transmitted, apparently on the same date, to the Lieutenant-Governor. Where it has been since Providence and the printer only know. The report says of transactions in mining lands leased or sold, that while there was a noticeable increase in number, their average area was less. Most of the patents were taken out in the Rainy River region.

In the statistical portion of the book structural materials are first dealt with. Less stone was quarried and less ordinary brick made than in 1892, but pressed brick of a fancy sort shows increased production. There was, at the same time, a larger output of lime. The manufacture of cements increases steadily; four concerns in the province produce Portland and five natural rock cement. It is said of the former material that some of the home-made is superior to the imported. Terra cotta is a material the demand for which is likely to grow.

Ontario phosphate, or apatite, mines were almost entirely idle during 1893. This was because of the cheaper production of Florida and South Carolina mines. Of gypsum a reduced quantity was mined, only four out of the six companies on the Grand River working. In addition to being a fertilizer, it is now said that gypsum is serviceable as a potato-bug poison. Salt making exhibited an increased output by fifteen concerns at a greater expense, but at a reduced aggregate market value. The production of mica was 70 tons.

Coming to metals we learn that all the copper and nickel mining done in the province was in the Sudbury District, with the exception of the opening up of copper veins

at Point Mamainse, on Lake Superior. The quantity of ore raised and smelted was 63,944 tons, and the product was 7,176 tons ordinary and 452 tons Bessemerized matte, the estimated metal contents being 1,481 tons copper, 1,642 tons nickel and 19 tons cobalt; total value say $579,302. The result of Ontario gold and silver mining during the twelve months was not great, measured in dollars and cents. By reason of the depreciation of silver only development work was done at the silver mines. The total gold treated was 5,560 tons, yielding 1,695 ounces bullion, valued at $32,960.

Measured in money value the most important item in the list is petroleum and its products, the aggregate of which is placed at $2,188,681. Nearly two-thirds of this consists of illuminating oil and $215,000 of paraffin wax and fuel product. The number of persons employed in the industry is estimated at 1,500. The whole number of wells producing natural gas was 107. Eight wells in the Essex field are estimated to yield forty-two millions of feet daily. There were 117 miles of pipe line in the province. Three Essex villages, Kingsville, Leamington and Ruthven, are supplied with the gas, and an 8-inch pipe line will supply Windsor, Sandwich and Walkerville.

QUANTITY AND VALUE OF MINERAL PRODUCTION IN 1893, WITH NUMBER OF WORKMEN EMPLOYED AND AMOUNT OF WAGES PAID FOR LABOR.

RAILWAY FARES.

"The more you cheapen railway fares," said a well-known Canadian railway man years ago, "the more will people travel." And the truth of the position is shown by the great returns obtained by the railways from the excursion rates of late years made so common. Now we hear that, stimulated by the remarkable growth in third-class railway passenger travel in the United Kingdom, and struck by the fact that the receipts from first and second-class traffic have recently shown a steady decline, an Irish railway company is about to make a change. This change is that it will reduce the first and second-class fares, not a little, but considerably—so much so, in fact, that on a journey of 100 miles, there will not be a difference of more than 2s. and 8s. between third and second, second and first-class fares respectively. Needless to say, the aim is to popularize first-class travelling.

The experiment meets with the approval of an English trade paper, the Birmingham *Hardware Journal*, which calls it common sense, and says: "It has been a marked feature of late years that the receipts from first and second-class travellers have diminished in steady ratio, while those accruing from third-class traffic have proportionately increased. From which the railway officials have argued, by a process of reasoning worthy of a postmaster-general, that the two superior classes are predestined to die out. On some lines, indeed, the intermediate class has been abandoned definitely. And, of course, if the railway directors will it so, we shall in time possess but one common class. It is reserved for an Irish railway company to stem the tide where its English brethren not only float with the stream, but seem rather desirous than otherwise of making downward progress."

DEBENTURE-HOLDERS' SECURITY.

The minds of debenture-holders in Great Britain have been disturbed of late by the action of a New Zealand investment company in handing over the uncalled capital of the company as security for a bank loan. This is making a preferred creditor of the bank to the injury of the debenture-holders, part of whose security is thus taken from them. The circumstance has interest for Canadian loan societies which borrow money abroad. How can the interests of debenture-holders in our societies best be protected in case any Canadian company should take the notion to do—which prudence and good faith forbid!—as these New Zealanders have done? Different methods suggest themselves; one plan is to deed over the whole assets of the company to one or more trustees, the deed to take effect when any default is made in debenture interest or principal. Another is to get an alteration made in the charters of individual companies to accomplish the desired result of securing the British lender. A third is to have an enactment at Ottawa declaring the debentures of loan companies a first charge upon their assets. We are told that the Mortgage Loan Companies' Association of Ontario, at its meeting in January, took no united action on the matter. It was left for each company to arrange the matter as was found satisfactory to itself and its debenture creditors whenever occasion arose for action.

FLAX

A writer in the Edmonton *Bulletin* urges the farmers of that district to turn their attention to the cultivation of flax. The price of flax seed in Winnipeg ranges from $1 to $1.50 per bushel. At the same time it is four pounds less to the bushel than wheat. With the wheat market in its present condition, and no signs of permanent improvement, one would think farmers might with advantage cultivate flax. The Mennonites are the principal growers in the Northwest, and they send large quantities of the seed to Canada to the large manufacturing mills of J. & J. Livingston, of Baden, Ont. The Messrs. Livingston also have mills at Blyth, Brussels, Embro, Linwood, Listowel, Palmerston, Stratford, Seaforth, Tavistock, Thamesford, and Wellesley, in the Province of Ontario. In the year before last this firm received no less than 150,000 bushels from the Mennonites, and last year over 100,000 bushels. There is also a mill in Winnipeg which converts the seed into linseed oil and oil cake for feeding cattle. But the seed is the simplest process for the farmers to try, as it requires little attention, being a spring crop. From the sowing of half a bushel of seed the Mennonites get from 20 to 25 bushels to the acre, and they cut it with their reapers the same as any other grain.

CANADIAN HAY ABROAD

Mr John Crowe, a stock agent and hay exporter of Montreal, recently gave a rather interesting account of the development of Canada's trade in hay with Great Britain. "This export hay trade was begun to Glasgow from Montreal by a very few of us in 1889; from that time it worked its way into the other Scotch ports which had direct communication from here, Leith, Aberdeen and Dundee being tried, and I will give Scotchmen credit for knowing a good article when they see it, they took hold right away." Liverpool was the next

port in Great Britain to take hold of Canadian hay. London was conservative in its ideas up to 1892, and would not touch Canadian hay, although importing large quantities from Russia, Belgium, Germany, Holland and Algeria.

In 1892 the people of London began to buy our hay more freely, "and it was only in 1893, when the hay famine, or rather 'hay fever,' took hold of the Londoners, that they forgot their prejudices and bought all the Canadian hay offered them, and inasmuch as the permanency of the trade is concerned, we have to feel grateful to the circumstances of the season 1893 for the widespread introduction of our hay to the metropolis of the world, as London is. It did more than unfortunate exporters could have done in twenty years trying to force the sale of our stuff on prejudiced buyers, and I am pleased to tell you that we are to-day in the same position amongst the consumers in London as we occupy in Liverpool and Glasgow." Mr. Crowe, however, claims that the Montreal Harbor Commissioners discriminate unjustly against hay exporters in the matter of wharfage dues.

MONTREAL HARBOR.

An important enquiry in the interests of Montreal harbor was begun last week in the office of the Harbor Commissioners in that city, the first of the kind since 1887, at which were discussed the spring inundations, the outcome being the present guard pier. It appears that the Dominion Government pays the entire expense this time, while it bore only half the cost of the previous one. This year's Government commission includes Louis Coste, chief engineer of the Public Works Department, Ottawa, who is chairman; W. P. Anderson, chief engineer Marine and Fisheries Department, and Thos. Munro, engineer in charge of the works on the Soulanges Canal, who also acts as secretary. The enquiry is to embrace a very wide field, thoroughly investigating plan No. 6, and the proposed improvements in the east end of the city, such as a new basin there. Thus far there have been examined: Henry Bulmer. chairman of the harbor board; John Kennedy, its chief engineer; Thomas Howard, harbor master; Robert Reford, W. W. Ogilvie, Ald. Hurteau, and T. G. Shaughnessy, of the C.P.R.; representatives from the Grand Trunk, Chamber of Commerce, Corn Exchange, steamship companies and general shipping interests have yet to be heard from.

LICENSES IN MONTREAL.

The revenue derived last year by the city of Montreal from licenses amounted to $61,523.58. Some forty items went to constitute this total, the largest being traders' expresses, and next to them carts and trucks, traders' carts and dogs. We append a list of the principal items:

Traders' expresses	$14,256 82
Carts and trucks	6,746 69
Traders' carts	5,852 86
Single carriages	4,844 50
Double expresses	4,284 34
Single jobbing expresses	2,280 79
Bakers' wagons	2,405 28
Traders' double expresses	1,796 26
Dogs	5,364 00
Milkmen's wagons and carts	3,541 50
Horse and wagon peddlers	2,325 00
Public billiard tables	1,807 50
Private ditto	400 00
Peddlers with hand carts and on foot	1,010 00

Then there are bakers' and brewers' carts, market traders, two classes, hand organ players (out of whom $98 is obtained), rag pickers, coal carters, hearses ($266), carrioles belonging to private citizens—a survival of some ancient city regulation, surely—"diables" and "pigeon holes," junk stores and second-hand shops, which two last-mentioned sorts of places contribute $625 between them.

TORONTO FIRE BRIGADE.

In the death of Richard Ardagh, chief of her fire brigade, from injuries received at the late fire, the city of Toronto loses a valuable officer. Devoted to his duty, valorous, fearless, ready to go wherever he would send his men, he had the elements of a hero. And he possessed, besides, what is not always allied with intrepidity, the quality of good judgment. He died a hero's death, and his place is not easy to fill. But no sufficient excuse for delay in appointing his successor can be found in the stubborn bickerings of aldermen. Happily there are some principles laid down which should enable choice of a chief to be made. We are told that the rules governing the brigade state that in the event of a vacancy, promotion shall be in the order of length of service and fitness for the position. If the inability of the fire committee of the council to agree upon a new chief arises from a plethora of qualified men, the city is to be congratulated. But the fact should not hinder a choice. The claims of Foreman Villiers, of Lombard street fire hall, should not be overlooked in the arrangement of subordinate offices resulting from a new chief's appointment from among the present staff. Villiers was on the old fire brigade, and has been twenty years a foreman. He has been, besides, a consistently steady and serviceable fireman.

MONTREAL BOARD OF TRADE.

The adjourned annual meeting of the Montreal Board of Trade was held on Wednesday of last week, our correspondent's report of which was received too late for last issue. The retiring president, Mr. W. W. Ogilvie, was in the chair.

The scrutineers presented their report on the election of officers, the balloting for which had taken place on the previous day. The officers for 1895 are as under:

President—J. A. Cantlie, by acclamation.

First vice-president—John Torrance, by acclamation.

Second vice-president—John McKergow, by acclamation.

Treasurer—Charles F. Smith, by acclamation.

The following are members of council:

Geo. Childs, W. H. Meredith, Geo. Hague, David Robertson, G. F. C. Smith, J. T. McBride, Wm. Nivin, David Macfarlane, Wm. McNally, James E. Rendell, Archibald Nicoll, Henry Miles.

For the board of arbitration there were thirteen candidates, all of whom were elected save Mr. John Fairbairn. Their names are as follows:

E. B. Greenshields, Robert Archer, W. W. Ogilvie, Hugh McLennan, James P. Cleghorn, Edgar Judge, James Slessor, John B. McLea, H. A. Budden, John Baird, F. W. Henshaw, Charles Chaput.

The retiring president congratulated his successor on the constitution of his council. He and the outgoing council regretted the termination of two very pleasant years of work. Those who were going out of office were all comparatively young men, and might be back on the council again. He was quite sure that the retiring members of the council would not lose their hold on the work of the board, but would continue to take as lively an interest as ever in its affairs. In acknowledging a vote of thanks for his two years' services as president, Mr. Ogilvie impressed upon the new council the necessity of looking closely after the comfort of the board's tenants.

The newly elected president, Mr. Cantlie, in returning thanks for his election, paid a tribute to the abilities of Mr. Ogilvie, and assured the board of the earnest desire of himself and the council to promote its interests, relying upon the co-operation of the members. Mr. John Torrance also briefly returned thanks for his election, after which Mr. G. W. Stephens pointed out that a matter of the greatest importance to the mercantile community was a board of arbitration, which would settle in a few minutes cases that at present occupied the law courts for months. Mr. Edgar Judge, the retiring treasurer, who was duly thanked for his services, explained, in reply to the last speaker, that since the new charter of the board of arbitration was granted, some eight years ago, the board has not on a single occasion been called upon to act. This was, perhaps, because the board's powers were very limited; its decisions were not binding. The matter would be brought before the Quebec Legislature at its next session, and if the powers asked for were granted a simple mode of arbitration would result, and the expense of those interminable lawsuits with which this country was cursed would be done away with. Mr. Judge added that, although the board of arbitration's charter was granted by the Dominion Parliament, yet as the proposed amendments dealt with civil rights, they belonged to the Legislature.

ACTUARIAL SOCIETY OF AMERICA.

We have received No. 12 of the Papers and Transactions of the Actuarial Society of America, whose autumn meeting was held in New York on October 11th and 12th last, Mr. Howell W. St. John, actuary of the Ætna Life, in the chair. Among the papers submitted was one by William Hendry, manager and actuary of the Ontario Mutual Life, on "Extended Term Insurance." A paper by Mr. David Carment, on "Australian Companies' Methods of Apportioning Surplus," was read by Mr. T. B. Macaulay, actuary of the Sun Life of Canada, and gave rise to a discussion. Occasion was taken by the president to introduce to the society the editor of the *Journal of the Institute of Actuaries*, Mr. Gerald H. Ryan, a fellow of the Institute, and actuary of the British Empire Mutual Life. In the course of his address Mr. Ryan said:

". . . It is natural that there should be many points at which we feel that we touch common ground, and I should like to mention one impression which my recent visit in Canada made upon my mind. In going through Canada, I was delighted to find that the recent system of examinations which the Institute of Actuaries have established in Canada has called forth some sort of enthusiasm, if we can apply the word enthusiasm at all to life insurance subjects, which I think some people doubt. There were evidences throughout insurance circles that

people were looking to this extension of our examination system with a great deal of interest, as affording the rising generation an encouragement to acquire knowledge and opportunities for advancement which hitherto they had not possessed. And I think, sir, that is a movement which is fraught with the highest promise for the cause of life insurance business. One other point which struck me in Canada was this, that in the insurance department in Ottawa there are no fewer than three members of the Institute of Actuaries on the staff. There is Mr. Fitzgerald's assistant, who is a fellow of the Institute by examination; a second assistant has passed two examinations, and another gentleman has passed one. Now, nothing could be more satisfactory, I think, in the interests of the Institute of Actuaries, or, in fact, in the interests of actuarial societies in general, than to find a Government department recognizing its position and encouraging its clerks to become members of its body. Unfortunately, if you gentlemen were to come over to the 'old country,' and go to our Board of Trade, which, year by year, prepares in condensed form the accounts of British life insurance companies, and has charge of the administration of the Life Assurance Companies' Act, I think you might search high and low, from the president of the board to the janitor, but you would not find a member of the Institute of Actuaries on the regular staff, though I ought to add that they have as consulting adviser an actuary of great eminence. (Laughter.) Well, sir, I think that is one point where Ottawa scores and London does not." (Applause.)

OWEN SOUND BOARD OF TRADE.

The annual meeting of the Owen Sound Board of Trade was held on 1st instant. The secretary, Mr. Jas. H. Rutherford, read his statistical report for 1894. The shipping returns showed very little decline considering the dull season. The tonnage and number of vessels greatly exceeded 1892, and were but little behind 1893, and the freight handled was greatly in excess of last year. Large numbers of cattle, sheep and hogs were transported at the port during the past season. Exports amounted to $765,615 during the last fiscal year, a decided increase, and imports, too, were larger. Produce was handled by local warehouses, of grain, hogs, wool, etc., to a plainly increasing degree.

An interesting report was also presented by the acting president, Mayor Kennedy, after which the election of officers took place with the following result: President, S. Lloyd; vice-president, J. W. Maitland; secretary-treasurer, Jas. H. Rutherford; council, M. Kennedy, S. J. Parker, ex-Mayor McLaughlan W. B. Stevens, E. W. Wand, J. C. Patterson, John Wright, Robert Whitman, C. Eaton, Wm Brown.

MERCHANTS' BANK OF HALIFAX.

The annual report of the Merchants' Bank of Halifax has been issued. It shows that the net profits of the bank for last year were $158,585, to which must be added $16,875, brought over from 1893. This sufficed to pay seven per cent. dividend upon the paid-up capital of the bank, which is $1,100,000, and to add $80,000 to the reserve, making that fund $680,000. The balance of something more than $18,000 is carried forward. At the close of the year the bank had notes in circulation to the amount of $941,031.36; its deposits at call amounted to $1,333,830, and deposits subject to notice were $3,552,597. The bank has done well to show such a rate of earning as 14.41 per cent., and by means of steady additions to reserve that fund now reaches 61.8 per cent. of the capital. This bank's statement would appear to prove the allegation made by a number of business men, that trade in the Maritime Provinces has been better than those farther west have found it.

METROPOLITAN LIFE.

Our readers have heard from time to time of the enterprise of the Metropolitan Life Insurance Company, and its remarkable progress in industrial insurance. We have just seen a copy of the statement for 1894, and an astonishing one it is. The new insurance written by the company in that year was 308 millions of dollars, which is more than double that of 1893. It paid no less than 57,782 claims, amounting to $5,747,592, which is a little less than a hundred dollars per claim. Its income last year was over eighteen millions of dollars. The assets of the company, whose total is $22,326,622, consist of bonds and mortgages, $9,733,000; Government bonds, city and railway stocks and bonds at market value, $5,307,000; real estate, accrued interest, cash, etc., forming the remainder. In addition to the re-insurance fund required by law, a special reserve is maintained by the company. All liabilities being deducted, there remains the sum of $4,085,740 capital and surplus as security for policy-holders. Such splendid results as are indicated by these figures are the result of unusual skill and prudence on the part of the management and of loyal effort on the part of 15,000 agents and employes. When one hears anything of the Metropolitan one involuntarily thinks of the president And we observe with interest that on the occasion of the January meeting of directors that gentleman was pre sented by the board and the officers with a gold medal bearing a medallion of himself, and on the reverse the inscription: "A WELL-ROUNDED YEAR, 1894. SEMI-CENTENNIAL OF JOHN R HEGEMAN."

TRAVELERS INSURANCE COMPANY

The Travelers is best known as an accident company. But its life assurance business has reached very respectable dimensions, for it has written 81,300 life policies in thirty years, and its present life risks aggregate 84 millions. The total accident losses paid by this widely-known company since 1864 amount to the great sum of $16,576,000, more than half a million dollars a year; and the number of accident policies on its books reaches the large figure of 2,097,419, of which no less than 89,716 were written in the year 1894. Thirty three accident losses paid every day, a thousand every month, is its record for last year. The amount of satisfaction to the travelling American or Canadian which such a statement implies can hardly be stated in figures. And the company is prompt and business-like in its transactions, as well as strong in its position. The statement for 1894 shows total assets of $17,664,000 against total liabilities of $15,192,000, its surplus to policy-holders being increased from $2,206,000 in 1893 to $2,472,000 to-day. Truly, Hartford is a great centre for insurance business. And the Hartford school of underwriters has no better exemplars than the management of the Travelers.

MONTREAL CORN EXCHANGE

The annual meeting of the Montreal Corn Exchange was held last week, the retiring president, Mr. D. G. Thomson, in the chair, and between forty and fifty members present. The excessive shortages on grain lightered from the railway elevators into the steamers in the harbor were a subject of discussion. Messrs. D. G. Thomson, Edgar Judge and A. G. McBean were appointed a committee to wait on the railway companies in reference to the matter. They were instructed to ask the railways to agree, for a fixed charge per car, to guarantee weight of grain delivered at country stations. Scrutineers having been appointed, the election of officers took place, when it was found that all the officers had been re-elected, viz.: President, Mr. D. G. Thomson; treasurer, Wm. Stewart; committee of management, Messrs. James Allen, E. F. Craig, R. M. Esdaile, W. Hastings, Robt. Peddie, J. Robillard and A. G. Thomson. The old members of the board of review were also reappointed.

BRITISH CANADIAN LOAN COMPANY

The transactions of the British Canadian Loan and Investment Company, limited, are shown with great fulness in its annual report. The company sold and renewed £266,000 worth of sterling debentures, and redeemed £154,565 worth; sold $61,500 of Canadian, and redeemed $11,400. It received in repayment of mortgage loans $197,000, and paid out for new investments $187,000, while a smaller sum in mortgages was extended for a further term. The profit and loss account shows a balance of $47,222, of which $38,823 is net earning for the year, and $8,399 was brought from 1893. To have paid seven per cent. dividend, added $8,000 to Reserve, appropriated $5,000 for expected losses, and carried $6,328 forward, is a showing with which shareholders have no reason to be displeased.

UNION LOAN AND SAVINGS COMPANY.

A very fair exhibit is made by the Union Loan and Savings Company of the result of its transactions for 1894. The aggregate of transactions is almost exactly the same as that of 1893, but the total earning was slightly less, illustrating the universal tendency towards a lower scale of interest earning. We gather from the president's address, however, that this has been partially offset by the renewal of debentures at a lower rate. The company's usual dividend of eight per cent. has been earned and $7,450 placed to contingent account. We note with interest the paragraph in the report that the company "deems it advisable not to take credit for interest in arrears on mortgages in doubtful cases, . . . and in some other cases to write down the amounts." This is the proper thing to do. We have heard of companies that did "the other thing," in the *hope* that their interest would be paid or that their land would go up. In some cases it came out all right, but in others the truth had to become known at last. Repayments have been well met, Dr. Geikie tells us; and what he says about the improved demand here and there for Ontario farm lands for the purposes of mixed farming, agrees with the experience of mortgage loaning associations in other cities.

HARDWARE AND METALS.

The St. Thomas Car Wheel Co. is in receipt of orders from England, France, Germany, Russia and Brazil.

The Canadian Master Plumbers' Association, confined at present to Ontario and Quebec, has decided to take in the St. John and Halifax associations.

James Watson & Co., Glasgow, Jan. 25th, report "the Scotch pig iron market flat during the week, having receded 6d. per ton. We have to report a dull demand all round."

About thirty men are employed in the erection of the Hamilton smelting works plant. Considerable machinery has arrived since the first of the year. The steel smoke stack has arrived and is 125 feet long and 14 feet in diameter at its base, and cost $5,300. The steel roof for the cast house is expected next week.

The Montreal firm of H. R. Ives & Co. have lately completed successfully a noteworthy piece of foundry work. They made 440 large sections of pipe, 10 feet in diameter and five feet long, weighing between three and four tons each. Out of this large number there were only 17 defective ones from any cause whatever. These rings of pipe sections were used for culverts underneath the new Soulanges Canal, allowing two rivers to run beneath that canal.

Among the most recent and novel applications of wire, perhaps none has greater interest to the mechanical world than that presented by the new wire fly wheel lately erected at the Mannesmann Tube Company's Works in Germany. Heavy fly wheels driven at high velocities obviously present dangers of breaking asunder from the great centrifugal force developed. The wheel at the factory mentioned consists of a cast iron hub or boss, to which two steel-plate discs or checks, about 20 feet in diameter, are bolted. The peripheral space between the discs is filled in with some 70 tons of No. 5 steel wire, completely wound round the hub, and the tensile resistance thus obtained is far superior to any casting. This huge fly wheel is driven at a speed of 240 revolutions per minute, or a peripheral velocity of about 28 miles per minute, which is nearly three times the average speed of any express train in the world. The length of wire upon such a constructed fly wheel would be about 250 miles.

There have been many cases of the use of electric motors to drive lines of shafting or isolated parts of plants, which go to prove conclusively the remarkable increased efficiency obtained, especially where the conveyance of steam for a long distance was necessary. This has led to a more thorough study of the amount of power absorbed by the line shafting and countershafts. "The minimum loss that can be looked for, and this is obtained only in exceptional cases requiring constant vigilance, is 25 per cent. of the total power developed, and more frequently runs as high as 65 to 70 per cent. A safe average would be from 40 to 50 per cent., although the actual loss must be determined for each and every case. With the use of electric motors, when properly designed and proportioned for the work, as, indeed, is as necessary in electrical work as with any other problem of mechanics if the best results are desired, this percentage of loss can be materially reduced. An inefficient result must be expected with bad electric engineering just as with a poorly arranged case of millwrighting, but, the electrical proportions being once obtained, there will, within reasonable limits, be no decrease in efficiency from deterioration."—*W. E. Hall, in Cassier's Magazine.*

RETAILING DRY GOODS.

Mr. Cole, of Doon, was in Guelph last week seeking inducements for the removal of his shoddy mill to that city.

The Brantford *Courier* says that local capitalists are considering a plan to start a Brussels carpet factory in that city.

The dry goods store of Messrs. Bailey & Sutton, Brandon, Man., has been burned, with a loss of $35,000, and insurance, $26,000.

White goods should be kept in boxes, the covers of which can be easily opened. By this means the goods may be kept clean the season through. Now is the time to attend to it.

Flannagan (to Casey, who has fallen from an unfinished building) —"What's the matter wid ye, man?" Casey (feebly)—"Oh! Oi jist tuck a drap too much."—*Philadelphia Record.*

The Leamington council has offered Brown & Wigle, woolen manufacturers, Kingsville, exemption from taxation, free water and natural gas at 5 cents a thousand, if they will remove there.

There is some talk of the formation of a jobbers' association in connection with the London Board of Trade. The idea was suggested by a letter from Winnipeg, where an association exists and is doing good work in the disposal of bankrupt stocks.

Three buyers making purchases through Messrs. Heron, Dickson & Co., Glasgow, have arrived [in Manchester] from Canada, namely, Messrs. John Murphy (Messrs. John Murphy & Co., Montreal), Thomas Ritchie, Belleville, Ont., and E. K. Spenny, Yarmouth, N.S. A large number of small Ontario retailers operate in this way.—*Drapers' Record, Jan. 19th.*

FOR GROCERS AND PROVISION DEALERS.

J. H. Harris will, we are told, open up a wholesale establishment in Moncton, N.B.

The oatmeal mill at Pilot Mound recently shipped a carload of oatmeal to a firm in Australia.

Ottawa bakers have raised the price of bread, charging nine cents instead of eight for a four pound loaf.

A substantial cold storage warehouse is being erected at New Westminster, B.C., and will be completed about April 1st.

A Porto Rico letter of Jan. 16th says cod had dropped from $7 to $6.50 on heavy receipts from Halifax, Lunenburg and Yarmouth.

A London cable says that English merchants are unanimous in the opinion that Manitoba wheats are this year of a finer quality than they have been for a number of years past.

Hamilton wholesale butchers on the market talk of a petition asking for a covered shelter for their meat. In winter they are subjected to cold, snow and storm, and in summer to heat and rain.

Grocers in New Westminster, B.C., are discussing the adoption of an early closing system, and are apparently not of one mind as to its advisability. The authorities are strictly enforcing the early closing by-law recently passed in that city.

Returns received at the Canadian Department of Trade and Commerce show that during 1894 there was shipped to England 28,711 tons of Canadian hay. Shipments the preceding year, a period of fodder famine in England, amounted to 63,175 tons.

At the first annual meeting of the Georgian Bay Fish Co. at Collingwood, directors for 1895 were elected as follows: Messrs. Jas. Scott, Jas. Playfair, J. L. Burton, M. Burton, C. E. Stephens, C. S. Davis, W. A. Clark, T. J. Sheppard and H. Y. Telfer. At a meeting of the directors Jas. Playfair was elected president; J. L. Burton, vice-president, and W. A. Clark, manager.

A comparative statement of wheat (including flour) exported from Manitoba for the last nine years is as follows:

			Bushels.
The crop of	1886	was	4,000,000
"	1887	"	10,500,000
"	1888	"	4,000,000
"	1889	"	4,500,000
"	1890	"	11,500,000
"	1891	"	14,000,000
"	1892	"	14,000,000
"	1893	"	12,000,000
"	1894	" estimated	15,000,000

INSURANCE ITEMS.

Mr. William John Hammond has been appointed district manager at Glasgow, Scotland, for the Sun Life Assurance Company of Canada.

In our statement of losses by the second Toronto fire we put down the Norwich Union for $22,000 loss. We are pleased to learn now from Mr. Dixon that "the total loss of that company on that occasion was $7,600, every dollar of which was paid the day the claims were presented."

The boiler inspector of Montreal, Mr. Champagne, has made his report for 1894. In that year he inspected 1,412 boilers, hydraulic proofs being made in 1,327 cases. Thirteen boilers were condemned, and 119 found to be defective. Ten per cent. defective out of all examined is a very sufficient justification for his office.

Mr. Colin McLeod Robertson, who has for some time held the position of chief inspector at the Glasgow branch of the Standard Insurance Company, has been appointed by the directors of the British Empire Mutual Life Assurance Company their resident secretary at Glasgow, to supply the vacancy occasioned by the resignation of Mr. J. F. Lamont.

There is published annually, at price 50 cents per copy, "The Michigan Insurance Directory," containing a list of insurance agents and their companies in the larger cities and towns of the State, with names and addresses of all the companies authorized to transact business in the State, their officers, and the names and addresses of State or special agents in charge of Michigan, besides a quantity of other information, such as population of cities, description of fire department, anti-rebate law. The publisher is Edward J. Wohlgemuth, Detroit.

Sketch states that Miss C. Rogers has the honor of being the first female insurance agent in the United Kingdom. She started her enter-

prise in Dublin, greatly to the astonishment of old-fashioned folks. Now she is connected with the Norwich Union, and is as indefatigable as she is successful in a sphere which is, in more than one respect, suitable to woman. Miss Rogers, for instance, has an advantage in obtaining new clients in the heads of large drapery establishments, and in waiting upon ladies who desire insurance, but who would not care to treat with a "mere man."

The value of an adjuster who knows how to adjust fire losses so that his company shall pay no more and no less than the indemnity it has agreed to pay, is not to be estimated, says the *Insurance Herald*. It is not so much the fire loss which has put company profits to flight as it is adjuster's losses. Yet it must not be forgotten that the adjuster is frequently but the right hand of his manager, who desires haste more than accurate results in settlements; who has in view some *coup* in local agency politics which may gain him a line or two, even if it should demoralize the practice of adjustments locally for years to come.

ANSWERS TO ENQUIRERS.

L. J. G., St. Mary's, Ont., sends the following enquiries: "On what occasions did the Imperial Government guarantee Canadian bonds? Give years and amounts."—In 1869 and 1873, for the Intercolonial Railway and for the acquisition of Rupert's Land. The amounts were, we believe, £1,500,000 in each case.

"On what plea did Canada get this concession?"—The plea recited in the Public Acts relating to those transactions.

"What amount of Canadian bonds remains unsold?"—According to the Public Accounts for the fiscal year 1894, the amount is £400,000.

"How much in Imperial bonds does the Canadian Government hold against Dominion notes?"—Four hundred thousand dollars.

READER, Sydney, C.B.—By no means; "bluestone," or sulphate of copper, is not yet discarded in the formation of batteries for electric transmission. It is in fact in very general use. The battery now mostly employed is known as the Callaud gravity battery. What you have probably heard of is the employment of a combination electric machine to produce current for telegraphic purposes over long lines, as is done in several of the larger American and Canadian cities. This does away with thousands of cups of battery. The ingenious machine used by the Great North Western Telegraph Co. in Toronto for this purpose is called a motor-generator, and was designed by the company's electricians.

J. M., Winnipeg, asks "how long the Old Country life company known as the United Temperance Life Co., has been in existence, what responsibility it possesses, and what its experience has been with teetotal risks as compared with ordinary risks?" We reply that the results of the operations for 1894 of the United Kingdom Temperance and General Provident Institution were as under: New assurances were effected for 2,718 policies, assuring £814,791, and the new annual premiums amount to £34,034. £270,000 was added to the funds. The accumulated funds are now £5,800,000, the annual income £600,000, and the amount paid for claims through death £4,250,000. The company is now over fifty years old. Its experience of the last twenty-eight years, ended with 1893, has been, we understand, that where the mortality in the general section of the company's business has been 98 per cent. of the expectancy, in the temperance (*i.e.*, total abstinence) section it was only 71 per cent. of the expectancy. There is thus a difference in the mortality of 27 per cent. in favor of the teetotaller.

BOOK NOTICES.

RAILWAYS AND OTHER WAYS; with sketches of Canal and Railway men, early Railroads, Tramroads, Steamers. Sixty years ago George Stephenson said to his men: "Now, my lads, you will see the day when mail coaches will go by railway, and it will be cheaper for a working man to travel on a railway than to walk on foot." The stages through which railway development has passed to reach the point where this bold prediction has been realized are sketched by the author of this work, Mr. Myles Pennington, who had arrived at man's estate when Stephenson's words were uttered. The author is, besides, specially qualified to describe the men and the measures which have given the world its great railway systems, for he has been all his life associated with them. The oldest railway officer now living, and the first general freight agent of the Grand Trunk of Canada, he knows his subject well and handles it lovingly. The result is a most entertaining book, of generous proportions and excellent typography, historical, sketchy, statistical, and humorous by turns. One is transported from Staffordshire to Quebec, then from Portland to St. Louis, from Chicago to Vancouver, amid a running commentary of fact, incident and anecdote, which is delightfully instructive. The portraits and brief biographies of railway and other forwarders on this continent, from Ross and Hickson to Hugh Allan, Van Horne and Pottinger, are interesting in the extreme to all who desire to recall the personages and events of railway and steamboat development during half a century. And the solution of many knotty problems of transportation the world over will be found related here by one who has much right to be called an expert. There is a copious index. Williamson & Co., Toronto, are the publishers.

FIRE LOSSES IN 1894

The fire insurance business of 1894 in Canada has shown results which are, if anything better than they were expected to be. The six Canadian, eight American and twenty-one English companies operating here enjoyed no "bonanza" of profits, neither have they, with a few exceptions, need to complain very bitterly in comparison with other years. Only ten companies out of thirty got off with less losses than 60 per cent. of the premiums; fourteen lost between 60 and 70 per cent.; ten lost more than 70 per cent. According to one tabulation of the results of the year the average loss was 66.32 of the premiums. According to another it was 64.9. Either was too much, for when the amount paid for losses exceeds six-tenths of the premiums, there is no great room for dividends, as expenses go nowadays.

The losses of some of the more prominent of the companies may be given: The Royal, which did the biggest business, shows losses of $409,557, equal to 70.89 per cent. The North British next in order, suffered losses of $223,650, equal to 57.96. Third in order is the Commercial Union, whose losses are $259,529, equal to 68.1. The Imperial gets off with 57.15, while the Guardian pays 79.8. The Western gets off with $204,529, or say 60 per cent. Another large Canadian company, the British America, suffers a slightly larger proportion (61.2) by its $157,583 of net loss. The Eastern and the Mercantile have lost 66 and a fraction each. The Queen is now classified among the American companies, and its transactions in Canada have been the largest in that group. Losses $174,541, equal to 65.4. The average of the four Hartford companies is 59.3; the Connecticut and Ætna showing low percentages and the Phœnix a high one. The Hartford is nearest the average, being 63.25. The aggregate of losses of all companies is stated at $2,950,000.

—On Tuesday last there was a large attendance at Suckling & Co.'s auction rooms, when the following stocks were disposed of: Robert Darling & Co., dry goods stock of $50,000, damaged by the recent fire. Several bankrupt stocks were also sold. Eight hundred dollars worth of goods in bond, belonging to the estate of A. R. Thompson, was bought by T. A. Garland, of Rat Portage, at 40 per cent. The clothing stock at 107 King street east, amounting to $7,000, was sold at 42½c. to Scott & Flater, of Chatham. The Toronto Shoe Company's stock, $15,000, was bought in two lots by Mr. T. H. Tolfree at 54c and 70c. on the dollar respectively. "The Fair," of Leamington, amounting to $850, was sold to J. T. Bailey at 22c. on the dollar. The balance of the dry goods stock of Tod & Co., Bowmanville, amounting to about $750, was sold to Mr. A. Morell, of this city, for 10c. on the dollar.

—A good citizen was lost to Guelph when F. W. Stone passed away on Jan. 29th. His sturdy, upright English character and his long career (he was 81, and had lived sixty years in Wellington) as a Canadian merchant and stock breeder, will keep his memory green for many a day in Western Ontario. The deceased gentleman was for twenty-two years president of the Wellington Mutual Insurance Company. He had also represented the Canada Life Assurance Company in Guelph for more than forty years. His son, Wm. Alfred Stone, who has of late had the active management of the latter company's affairs in that city, has, we observe, been appointed to the agency.

—A prominent and respected citizen of Smith's Falls, Mr. Alexander Wood, died a few days ago at the age of 71, having lived nearly half a century in that place. He formed a partnership with Mr. Ebenezer Frost, in the firm of Frost & Wood, as far back as 1863, and at Mr Frost's death, in 1867, the firm Frost & Wood was continued by the sons and Mr. Wood. In 1885 he bought the Ward's Island milling property, and had planned great extensions and improvements of it when he was called away. He was a man of unusual enterprise and of good business capacity

—The statement of the Great West Life Assurance Company for 1894 shows new insurance during the year, $2,788,000; net total risks in force, $4,096,000; premium income, $109,982. These figures exhibit marked gains over the corresponding figures of 1893

CANADIAN PACKERS.

The Canadian Association of Fruit and Vegetable Packers met in Toronto in their annual session on the 6th inst. The meeting was well attended, the following members being present: W. Boulter, sr., Picton; Frank Boulter, Toronto; W. J. Flynn, St. Catharines; T. N. Dunn, J. H. Lee, Strathroy; W. Innes, Simcoe; W. A. Ferguson, Delhi; A. C. Miller, W. R. Wright, Picton; T. Owens, D. McAuley, Trenton; W. A. Carson, R. B. Morden, Belleville; H. J. Matthews, Lakeport; T. A. Montague, A. McKillop, West Lorne; W. H. Buntin, H. Carlisle, St. Catharines; J. J. Nairn, Aylmer; S. Fenton, St. Catharines; W. C. Breckenridge, Hamilton.

The election of officers was among the most important business of the meeting; the elections resulted as follows:

President—W. Boulter.

Vice-President—W. A. Ferguson.

Secretary-Treasurer—W. C. Breckenridge.

Assistant Secretary—G. A. Willis.

Executive Committee—W. Boulter, A. C. Miller, W. A. Ferguson, T. Montague, W. P. Innes.

Selling Committee—W. A. Ferguson, W. Boulter, W. P. Innes, S. Fenton, H. J. Matthews, A. C. Miller, W. C. Breckenridge.

Auditors—W. A. Carson, J. J. Nairn.

The various members of the association consider that the year has been a good one. Stocks at the beginning of the season were not large, and are now within small compass. Of fruits generally there is but scant supply, while the association is completely out of stock of strawberries. It was decided at the meeting to advance the price of staple lines of corn, peas and tomatoes 2½c. a dozen. Although there was some talk among the members as to next season's operation, no arrangements were made with reference to it. The present mode of selling through committee has not given the best satisfaction to jobbers, and it is possible that a change may be made before next season's pack is placed on the market. It is understood that the association will soon be strengthened by the addition of other packers.

OTTAWA BOARD OF TRADE.

On Tuesday evening, 29th January, the Ottawa Board of Trade held its annual meeting. Mr. Wm. Scott, president, in the chair, and between twenty-five and thirty members present. The first subject discussed was the protection of the city from fire. Then the officers' reports were read. That of the secretary, Mr. N. S. Garland, showed the membership of the board to be 181, an increase of 23 during the year. The treasurer's report showed a balance of $686 on hand at the beginning of 1895.

The president's report mentioned among the subjects considered by the board the Canada Central Exhibition, an increased grant to which was asked from the City Council; the parks question; the interprovincial bridge; the Montreal and Ottawa Counties Railway, the construction of which was sought for; private banks; the Insolvency Act; the Montreal, Ottawa and Lake Huron Canal; the sawdust question as it affected Ottawa mills; better water supply and fire appliances for the city; the Ontario Arbitration Act for the settlement of commercial disputes. The election of officers then took place with the result that the following gentlemen were chosen;

President—Joseph Kavanagh.

1st Vice-President—C. Ross.

2nd Vice-President—A. W. Fleck.

Treasurer—C. A. Douglas.

Council—Thomas Workman, W. T. Masson, P. D. Ross, George F. Henderson, George S. May, J. W. McRae, George Burn, W. E. Matthews, P. Whelan, Wm. Scott, R. M. McMorran and C. J. Booth.

Arbitrators—F. H. Chrysler, P. I. Bazin, A. Pratt, Ald. Cook, W. Northwood, A. D. Richard, G. L. Orme, P. Larmonth, P. Baskerville, H. H. Wootten, G. H. Perley and D. O'Connor, jr.

When the result was announced, Mr. Kavanagh took the president's chair and briefly thanked the members of the board for the compliment of being elected president.

Mr. R. J. Wickstead gave notice that at the next meeting of the board he would move a resolution, "That it is expedient that the colony of Newfoundland be forthwith admitted into the Union in accordance with the provisions of the B. N. A. Act of 1867.

RUBBER STAMPS IN LAW.

Is a receipt valid which is made by a rubber stamp and identified by a clerk? A Philadelphia judge decided the other day that it was not, being bad in law. So we are told by the *Bookseller and Newsdealer*. This being the case, will the signature to the correspondence of a firm or company, made by a rubber stamp, as is often done nowadays, be any more legal than the receipt just mentioned? The practice of using a rubber stamp instead of handwriting may be carried to an unwise and unbusiness like length. The journal quoted says: "The principal of a house or the manager of a department is too prone to delegate important powers and responsibilities to subordinates. The latter may be faithful, honest, and intelligent, but there are certain important duties which, in the interest of employer and employee, the former should assume. A slight mistake in the office has caused many a weary and expensive hour on the witness stand in court."

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Feb. 7th, compared with those of the previous week:

Clearings.	Feb. 7.	Jan. 31.
Montreal	$10,667,160	$10,620,344
Toronto	8,360,870	4,332,940
Halifax	1,233,261	944,341
Winnipeg	730,687	641,954
Hamilton	677,532	474,206
Total	$21,669,510	$17,013,785

Aggregate balances this week, $2,943,939; last week, $2,733,559.

—The business of the Perth Mutual Fire Insurance Company is growing. Its aggregate at risk is $8,760,081. And, warned by the untoward experience of 1893, the management is accumulating a cash reserve. The company has some $10,000 cash in bank, holds mortgages and debentures for $52,000, and behind these has $138,000 in premium notes. The total assets at 31st December, namely, $211,466, shows an increase for 1894 of more than $18,000. The proportion of the company's business done on the cash system is larger than that done on the note system. Losses are happily less than those of 1893, and the company is able to show, as the result of the business for last year, a net profit of $13,692, which shows that they have done quite as well as the average of fire insurance companies.

—In the speech from the throne the Government of Nova Scotia uses the following language about 1894: "While the past year cannot be described as one of general prosperity throughout the Dominion, it must be a gratification for us to know that a fair degree of success rewarded the industry of our people in their diversified fields of labor. A good harvest, an average fishery, marked progress in mining operations and considerable activity in other departments, combined to enable the people of Nova Scotia to avoid to some extent the depression of trade which prevailed so widely on this continent."

—The Truro Board of Trade held its annual meeting on Friday, 25th January. Officers for 1895 were elected as under: C. E. Bentley, president; E. E. McNutt, 1st vice-president; W. E. Blight, 2nd vice-president. Members of executive committee: R. T. Craig, T. G. McMullen, I. E. Bigelow, R. J. Turner, D. J. Thomas, P. McG. Archibald, W. Craig, G. Walker Smith, S. M. Bentley, F. McClure. The secretary is G. A. Hall. At the next meeting the subject of attracting new industries to the town will be taken up.

—The annual meeting of the Exchange Bank of Yarmouth has been held. The earnings of the year sufficed to pay the dividend of 6 per cent. and place $4,240 to profit and loss. The reserve remains as before at $30,000. The former board of directors was re-elected, namely: Robt. Cale, president; J. H. Killam, vice-president; N. B. Lewis, B. B. Law, Wm. Lovitt.

—We are informed that Mr. W. D. Matthews, of the Toronto firm of W. D. Matthews & Co., has been elected to a seat at the board of directors of the Canada Permanent Loan and Savings Company, to fill the vacancy created by the death of the late Mr. A. M. Smith.

—We receive, just as we are going to press, a copy of the annual report of the Toronto Board of Trade for 1894, whose 150 pages embrace reports of several of the sections of the board, as well as statistics of the port and a list of the members.

—Mr. William Ross having resigned the position of secretary of the Guelph & Ontario Investment and Savings Society, the position has been secured by Mr. J. E. McElderry, who for many years has been a merchant in that city.

—Additional reports of companies will be found on page 1,046 of the present issue.

Meetings.

UNION LOAN AND SAVINGS COMPANY.

The thirtieth annual meeting of the stockholders of the Union Loan and Savings Company was held at the company's offices, 28 and 30 Toronto street, Toronto, on Wednesday, the 6th day of February, 1895, at 3 p.m. The meeting, as usual, was largely attended.

Walter B. Geikie, Esq., president, in the chair.

The managing director, Mr. Maclean, read the notice convening the meeting, as also the following

REPORT:

The directors have the pleasure to submit their thirtieth annual report and statement of accounts for the year ending 31st December, 1894, and to report the result of another year's business.

As will be seen on reference to the statement of accounts appended hereto, the revenue from all sources amounts to $150,181.43, out of which two half-yearly dividends have been paid at the rate of eight per cent. per annum, amounting together to $54,816.20; interest on debentures, $56,436; interest on deposits, $13,669.74; cost of management, $16,762.25; which includes $4,377.18 for debenture expenses; municipal tax, $1,020.37, leaving a balance of $11,013.24 to the credit of the contingent account, in addition to the reserve fund of the company, which amounts to $260,000.

It is satisfactory to be able to report that borrowers' repayments during the past year have been met with fair regularity, amounting to $363,995.21, and that new debentures have been taken up at reduced rates of interest to the extent of $335,000, and maturing debentures amounting to $320,000 have been repaid.

A corresponding reduction in the rate of interest paid to depositors has also been made, the amount received during the year being $312,591, and $357,612 repaid.

In consequence of the full limit of the company's borrowing powers being so nearly reached, your directors have at times been compelled to refuse offers of large amounts for investment on favorable terms. The total amount held by the company on debenture and deposit from British and Canadian investors is $1,700,000.

The earning power of the company has been equal to the average of former years, yet the net profit appears less than last year, the board having deemed it advisable, in doubtful cases, not to take credit for interest earned on mortgages in arrear, owing to the depreciation now existing in the value of real estate, and in some cases to write down the amounts. With a revival of business, of which there are already distinct indications, your directors see nothing to prevent the company from realizing the full amount of its claim against any properties in default.

Your directors regret the removal by death of Mr. Henry Yates, of Brantford, one of the largest stock and debenture holders of the company, and a valued member of the board. The vacancy has been filled by the election of Dr. H. B. Yates, who will represent the large interests of his late father, and be a most valuable acquisition to the board.

It is with much satisfaction that your directors have again the pleasure to record their sense of the valuable and efficient services rendered by Mr. Wm. C. McEwen, resident-director of the company, and sole partner of the long-established firm of Messrs. J. & A. F. Adam, W.S., No. 9 South Charlotte street, Edinburgh, general agents of the company for Scotland; and likewise those of Messrs. Allan, Buckley Allan & Milne, advocates, 56 Castle street, Aberdeen, in connection with the debenture business of the company: and it is satisfactory to note that the lower rates now prevailing on mortgage loans have been fully met by the favorable terms upon which the company has been supplied with debenture money, chiefly obtained through their general agents.

W. MACLEAN, Managing Director. W. B. GEIKIE, President.

ABSTRACT OF ACCOUNTS.

We, the undersigned, have audited the books of the Union Loan and Savings Company for the year ending 31st Dec., 1894, and find them in conformity with the above statement, and have checked the vouchers and mortgage registers, and found them correct.

JAMES CARLYLE, JOHN N. LAKE, } Auditors.

The president, on rising to move the adoption of the report, said:

Another year has quickly passed since our last annual meeting, a year of considerable and world-wide business depression, which very specially affected the Mother Country, and to a much greater extent, the United States.

Britain's colonial possessions, too, have had their share of hard times, which have been so general. Yet Canada's lot has been fortunate in comparison with that of Australia, for example, where the results have been unfortunate, although it is to be hoped only temporarily so.

Canada's share of the general depression, while comparatively light, has been very generally and sensibly felt by all classes. We have had low prices for grain, and especially for wheat, arising from a too abundant supply being grown throughout the world, yet even with the low prices, a good harvest, for which there is cause for thankfulness, has materially aided us.

An improvement has already begun amongst our farmers, who in consequence of the lowered prices of grain, are wisely turning their attention to dairy farming, and to stock raising, which will be much more profitable than wheat growing, and for which nearly all Canada, and especially Ontario, is admirably adapted.

I have recently learned from prominent, practical men, who reside in different sections of Ontario, that on this account the demand for farming lands has recently become greater than for some time past, that sales are being made much more frequently and readily, and that considerably better prices are obtained. City property is in like manner improving gradually, several sales of centrally situated property at good prices having recently been effected.

The annual report is in your hands. You see that we have the goodly sum of $150,181.43 to report as our income for the year. Out of this we have paid two half-yearly dividends at the usual rate of 8 per cent. per annum, which must in itself be satisfactory to all our stockholders. The municipal tax has also been paid, as well as all interest due on debentures and deposits.

In addition there is the cost of management. In this is included, as the report states, the sum of $4,377.18, incurred during the year for debenture expenses. When this is deducted it will be seen that every care has as usual been taken to curtail expenses as far as possible. We have been able also to add the sum of $7,476.05 to the Contingent Fund, which, with the balance of $3,537.19 given in the financial statement, makes this fund stand at $11,013,24, after having made every allowance for possible shrinkage. You will notice that the Reserve Fund has not been in any way trenched upon, although it was not to be expected that this year it could be increased. It amounts to $260,000, being 37 per cent. of the paid-up capital of the company.

It is gratifying to know that repayments have been well met by borrowers during the past year, and that securities in arrear have been so carefully looked after as to yield a good return on the money invested.

A large number of new debentures have been taken up at reduced rates of interest, aggregating $335,000, while matured debentures, bearing a higher rate of interest, have been repaid, amounting, as the report shows, to $320,000. A good deal of money, and sometimes in large sums, for short periods and on favorable terms, has been offered to the company and declined, owing to the limit of our borrowing power being nearly reached. The continued and increasing confidence in the company is further shown by the fact of money having come in freely for new debentures, while with few exceptions, those due this year have been renewed for a further period of years, and on more favorable terms.

We are glad to note this tendency to somewhat lower rates of interest payable on debentures and deposits, which the reduced rates of interest now obtainable on loans renders not only desirable, but necessary.

Although the directors have not seen fit in some instances to include in the report, as they might have done, interest earned on mortgages in arrear beyond what is readily collectable, there is nothing, as is stated in the report, to prevent the company from realizing the total amount of its claim against all properties in default.

During the past year, under the careful and conservative course which has always characterized the company in the conduct of its business, the actual losses sustained have been trifling, a fact for which the company is largely indebted to increasing care on the part of their managing director. I am no prophet, and do not pretend to being endowed with such a gift, but from a pursuance of a similar, and even if possible an increasingly cautious policy, we confidently believe, especially as business is showing unmistakable signs of improvement, that very satisfactory records may be hopefully looked for in the not far distant future.

In common with other companies, we realize that with money abundant, and to be had from many quarters at low rates, it is essential to be scrupulously watchful over every loan applied for, and we have on this account declined very many that years ago would have been considered desirable. But for this, which we deem the right course to have pursued, we could have greatly increased the volume of business done during the year, and have had far less money in hand than we now have.

With the revival of business now beginning to be felt in real estate and in many other ways, while we are contented and gratified with the past, we are hopeful as to the future.

This year, also, we have to record, with much regret, the death of one of the members of the board, the late Henry Yates, Esq., of Brantford, whose name was widely known in Canada, and who always took a great interest in the company's affairs. He was one of our largest stock and debenture holders.

His son, Dr. H. B. Yates, has been elected to succeed his father on the board, and his business capacity, as well as his stake in the company, are such as to ensure his best efforts being put forth to advance all its interests

We record with pleasure the sense the directors entertain of the value and efficiency of the services of their colleague, Wm. C. McEwen, Esq., W.S., resident-director, and sole partner of the long established firm of J. & A. F. Adam, W.S., in Edinburgh, Scotland. During the past year, as indeed ever since he has been acting in the company's behalf, his zeal in advancing its interests is recorded with very great satisfaction.

Our best thanks and acknowledgments are also due to Messrs. Allan, Buckley, Allan & Milne, advocates, of Aberdeen, Scotland, for their valuable services rendered from year to year to the company as their agents in the north of Scotland.

Mr. James Caverhill, agent of the company in Cork, Ireland, has also the thanks of the board for his efforts. He has only filled the position of agent for a short time, and his work for the company has on that account been necessarily limited.

To our managing director the best thanks of the stockholders are due, and, I am sure, will be most heartily accorded. Mr. Maclean has, as you all know, long and efficiently discharged his duties, and his interest in the company's welfare shows no abatement, but rather, if possible, increases as time goes on.

Mr. Maclean reports that all the officers in the service of the company have faithfully and efficiently discharged their respective duties during the past year.

The following resolutions were passed unanimously:—

"That the report of the directors and statements of accounts, submitted to this meeting, be received and adopted."

"That the thanks of this meeting be and are hereby tendered to William C. McEwen, Esq., W.S., resident-director of the company, and sole partner of the long-established firm of Messrs. J. & A. F. Adam, W.S., 9 South Charlotte street, Edinburgh, for the very valuable and important services rendered by him, and also those of Messrs. Allan, Buckley, Allan & Milne, advocates, 56 Castle street, Aberdeen, for similar services rendered by them during the past year."

"That the thanks of this meeting be and are hereby tendered to the managing director, officers and auditors of the company, for the satisfactory manner in which they have discharged their respective duties, and that the auditors be reappointed for the current year."

"That Rev. Dr. Moffatt and Mr. H. L. Stark be and they are hereby appointed scrutineers for the purpose of determing the votes for the election of directors for the current year."

The scrutineers reported the following gentlemen duly elected directors of the company: W. B. Geikie, M.D., John Stark, Francis Richardson, Wm. N. Eastwood, H. B. Yates, M.D., J. C. McGee, Wm. C. McEwen, W.S., and W. Maclean.

At a subsequent meeting of the board, Dr. Geikie was elected president and John Stark, vice-president.

W. MACLEAN,
Managing-Director.

BRITISH CANADIAN LOAN AND INVESTMENT COMPANY (LIMITED).

The annual general meeting of this company was held at its head office, 25 Adelaide street east, Toronto, on Wednesday, the 6th February, 1895, the following shareholders being present:—

A. H. Campbell, John Burns, William Ince, Major George Greig, P. M. Clark, Dr. Ogden, Charles B. Petry, Samuel Nordheimer, George Robinson, Samuel Trees, Dr. Thorburn, J. J. Woodhouse, Charles E. Hooper, Donald Mackay, W. R. Brock, Alexander Dixon, Henry Pellatt, J. H. Mayne Campbell and Edward R. Greig.

The president, Mr. A. H. Campbell, was appointed chairman, and the manager, R. H. Tomlinson, secretary of the meeting. The annual report and the usual financial statements were submitted as follows:—

REPORT.

The directors beg to submit the seventeenth annual report of the company.

The amount of sterling debentures sold and renewed during the past year was $266,644, and the amount redeemed was $154,565, being a decrease of $58,570 upon the amount outstanding 31st December, 1893. On currency debentures there has been received $61,500 and redeemed $11,400, the balance current being $278,975. The total amount of money borrowed for investment is $1,666,337.

During the year the sum of $197,254 has been received in repayment of loans on mortgage, and $187,287 paid out for new investments, and mortgages to the amount of $37,100 were extended for further term, the securities being found unquestionable. The loans on mortgage with interest to 31st December last amounted to $2,178,359.

The amount at credit of profit and loss is $47,222.72, made up of

Balance from last year's statement		$ 8,398 80
Net profits for the year		38,823 92
		$47,222 72

which has been disposed of as follows:

Two half-yearly dividends at the rate of 7 per cent. per annum	$27,894 54	
Added to reserve fund	8,000 00	
Appropriated for anticipated losses	5,000 00	
Balance carried forward to next year	6,328 18	
		$47,222 72

Although there has been no increase in the company's business during the past year, the net profits have been somewhat larger, arising from the constant employment of the funds, the lower rate of interest paid on debentures, and a reduction in the charges on money borrowed and lent.

In addition to paying the usual dividend of 7 per cent, the directors have been enabled to add $8,000 to the Reserve Fund, which is now equal to 30 per cent. upon the paid up capital; and after making an appropriation of $5,000 for anticipated losses, to carry forward over $6,000 to next year's business.

Notwithstanding the general depression, repayments of principal and interest on mortgages have been made with fair punctuality.

The directors desire to bear testimony to the very efficient manner in which the manager and other officers of the company have discharged their respective duties.

The balance sheet and profit and loss account, duly audited, are herewith submitted.

A. H. CAMPBELL,
President.

Toronto, 1st February, 1895.

STATEMENT OF AFFAIRS FOR THE YEAR ENDING 31ST DECEMBER, 1894.

AUDITORS' CERTIFICATE.

We have made a careful audit of the books and accounts of the British Canadian Loan and Investment Company (Limited) for the year ending 31st December, 1894, and have examined the securities; and we hereby certify that the above balance sheet and profit and loss account are correct.

DAVID HIGGINS,
HENRY WM. EDDIS, F.C.A., } Auditors.

Toronto, 31st January, 1895.

The scrutineers appointed to take the ballot reported the retiring board re-elected, as follows: A. H. Campbell, George Greig, William Ince, John Burns, Samuel Trees, J. K. Kerr, Q.C., Henry F. J. Jackson and W. R. Brock.

At a subsequent meeting of the newly-elected board, Mr. A. H. Campbell was re-elected president and Major George Greig vice-president.

ECONOMICAL MUTUAL FIRE INSURANCE CO.

The twenty-third annual meeting of the Economical Mutual Fire Insurance Co. of Berlin was held in that town on Friday, the 25th January, 1895, at one o'clock p.m., at the company's office. Present were the following gentlemen, viz.: Messrs. J. Fennell, Geo. Lang, Frank Turner, C.E., P. S. Lautenschlager, F. Snyder, H. Knell, C. Babst, Hon. S. Merner, Geo. Pattinson, H. L. Janzen, L. J. Breithaupt, A. B. Powell, J. A. Mackie, W. Strong, R. B. Cook, J. J. Cook, J. A. Beaton, A. B. Brubacher, James W. Walker, A. Walker, W. Pinder, W. Stanley, J. H. Johnson, W. Tindall, N. W. Gingrich, J. Querin, T. S. Minton, Dr. H. G. Lackner, S. E. Moyer, A. Sinclair, D. Peacock, I. Hord, J. Oliver, W. Niehaus, J. S. Anthes, H. Bornhold, H. M. Schaefer, G. M. Bettschen, H. Schwenn, L. Siegmann, P. Janzen, P. E. W. Moyer, H. S. Boehmer, J. C. Breithaupt, Dr. J. E. Hett, P. Pequegnat, H. J. Hall, J. M. Weber, manager and assistants.

The minutes of the last meeting were read and confirmed. The president read the following director's report:—

REPORT.

In submitting this the 23rd annual report of the Economical, the directors are pleased to be able to present one so satisfactory in every respect.

During the year, as will be noticed by the detailed report, 5,343 policies were issued, cov-

ring $5,624,965, making the total insurance carried by the company, under 9,551 policies, $9,723,336. This is a net increase of $1,005,471

The net assets of the company now amount to $298,539, an increase of $11,555.

The company paid for 161 fire losses, $52,026, showing a decrease of $5,204.

The increase in the premium income is $17,884, which enables the company to add to its reserve $15,337.

While the re-insurance liability of the company is $23,367, we have a total cash assets of $93,614.

Although the volume of business has greatly increased, we again, with pleasure, call your attention to the agents' balances, which at the close of the year amounted to the small sum of $327.53, showing that our staff of agents are careful and prompt in remitting.

You will be called upon to elect five directors in place of those retiring, namely: Fr. Snyder, Hon. S. Merner, T. W. Thompson, L. J. Breithaupt and C. Pabst, all of whom are eligible for re-election.

All of which is respectfully submitted on behalf of the directors.

JOHN FENNELL,
President.

To the directors of the Economical Mutual Fire Insurance Company:

Your auditors beg to report that they have audited the company's books for the year ending 31st December, 1894, and found them correct.

J. S. HOFFMAN, } Auditors.
J. S. ANTHES, }

Berlin, January 8th, 1895.

On motion of the president, seconded by Mr. Lang, the above report was adopted.

Moved by Mr. Mackie, seconded by Mr. Breithaupt, that the financial statement as submitted and read by the manager and certified by the auditors, be adopted, and that all payments made by the manager during the financial year ending 31st December, 1894, be and are hereby confirmed and sanctioned; and that the action of the manager is hereby confirmed in accepting applications, issuing policies, effecting re-insurances and terminating risks as implied in the figures set forth in the said financial statement.

After the ballot was taken the scrutineers, Messrs. Anthes and Lackner, declared the following gentlemen elected as directors, viz.: F. Snyder, Hon. S. Merner, T. W. Thomson, L. J. Breithaupt, C. Pabst.

On motion of F. Turner, seconded by A. B. Powell, the retiring board of honorary directors was re-elected.

The thanks of the company were tendered to the agents for their work during the past year and for the care they have exercised in taking risks.

In return it was moved by Mr. J. J. Cook, seconded by Mr. Stanley, that a hearty vote of thanks be tendered to the management for its courteous treatment of the agents of the company.

At a subsequent meeting of the board of directors, Mr. J. Fennell was re-elected president, and Mr. G. Lang vice-president.

Correspondence.

TWO BRITISH COLUMBIA QUESTIONS.

Editor MONETARY TIMES:

SIR,—Will you suffer me as a British Columbian, acquainted with the points at issue, to comment in some detail on two interesting suggestions that are made in THE MONETARY TIMES of January 11th? The first of these concerns hop culture in B. C., in urging further development of which you say: "Why the inhabitants of B.C. have not turned their attention to growing hops, has for some time been a query with those having knowledge of this province's resources and adaptability to this particular industry?" The query can be easily answered, by reference to present prices and by consideration also of those that are fairly certain to prevail in the immediate future. The chief reason why hop-growing is little practised in B.C. lies in the fact that, as prices stand, the culture fails, as a rule, even to pay expenses, far less realize a modicum of profit. In London, England, the best Pacific coast hops realize but 11 to 13 cents a pound, whilst in New York 11 to 12 cents are the maximum quotations. Our B.C. hops are not all of course of the best quality, good as most of them doubtless are But even those that are "of the best" will be found by reference to the above New York and London prices, and allowing for broker's commission, cost of transit, and other necessary deductions, to command at most but 8 or 8¼ cents a pound net. Many of our province's hops have indeed lately brought considerably less than either of these modest sums, as I am informed by a leading buyer Yet, according to Mr. Dell, whom you quote in support of the possibilities of profits in hop growing in B.C., a minimum return of 10 cents a pound will be usually required, even to pay expenses. Nor is there much better hope in respect of the coming season, for a large surplus will be carried over from the world's hop harvest of 1894, and low prices—probably less even than those I have quoted — will, according to the *American Agriculturist*, prevail next fall. Indeed many impoverished Pacific Coast growers are already selling the 1895 crop in advance at miserable quotations. Under these circumstances it is unlikely, indeed, that 1895 will witness any large addition to the small area now under hops in a province which at best produced last year less than 500 bales. There is accordingly nothing to encourage further hop culture in British Columbia at this present, and we must reluctantly admit that we cannot, as things are, expect much of this diminutive branch of our province's general agriculture

So much for British Columbia hop culture. Now may I say something also anent an editorial in your issue of the date already mentioned. It is there hinted as probable that Canada will "find her advantage" in becoming a third party to the British treaty with Japan. Now whilst this would, as I think, be doubtfully advantageous to Canada as a whole, the unconditional acceptance of the treaty would prove fraught with dire disaster to B.C. And from what I learn, and what may be gleaned, also, from an observant study of the Japan mind at this present, it is fairly obvious that Japan will, if asked to arrange with Canada, insist on the practically unqualified acceptance of a treaty of equal rights, and based also in the main on principles of free trade and unrestricted rights of immigration and settlement. The acceptance by Canada of the treaty, therefore, means, first, the free, or almost free, admission into Canada of Japanese boots, shoes, clothes and other commodities, exceedingly cheap, made by skilled native labor, working at 25 cents a day, or little more, and with the aid of excellent machinery. It means, next, the permanently free and unrestricted immigration into B.C. of organized hordes of Japanese coolies, imported by native labor contractors, and ready to work very long hours for 50 cents a day. This these coolies can do because content to live, as a rule, in "single blessedness," on the cheapest of food that is mainly vegetables, and to remain deprived of many things which the ordinary white worker reasonably deems practical necessities of life The Japanese coolie in B.C. can and will live "harder and tougher" than the most frugal habitant of rural Quebec, and can and will—as he does—sell his labor on terms that are little higher than those exacted by his less ingenious Chinese rival.

Now we British Columbians have already in our midst some 10,000 Chinese and about 1,000 Japanese coolie settlers, as against a white population of only 70,000, including women and children, the Chinese and Japanese amongst us being almost exclusively single males of working age. Hence the Mongol labor of British Columbia stands already to the white labor in something like the large proportion of 1 to 3 The Chinese and Japs are consequently—on a working basis of little more than 50 cents per day of 10 hours—"thrusting to the wall" large and growing numbers of our own people in B.C. We cannot therefore look calmly and inactive whilst a proposal is being made that would hinder Canada from taking such steps, in the early future, as will probably become absolutely necessary to prevent British Columbia from becoming what the Sandwich Islands are already in the main, viz., a blend of Little China with Japan in miniature. Even now Mongol coolies have ousted from their employment a host of white workers at our Comox coal mines. There is also grave reason to fear that similar cheap labor—either Chinese or Japanese—may force itself, by reason of the fierce competition of Comox in the San Francisco coal market, on our other B.C. coal mines at Nanaimo and Wellington, which now provide a fair living for some 7,000 white collier folk. Hence fear of Mongol cheap labor is with us no mere bogey that is raised only to frighten children of a larger growth, but a grave social menace, for any further large displacement of white workers in B C by Mongol toilers must and will lead to widespread and dangerous disorder, that will not readily down, or indeed down at all, without violent resistance. We British Columbians therefore sincerely trust that Canada will

enter into no treaty with Japan that shall in anywise abridge the Dominion's powers of restriction in respect of a coolie immigration that is always throwing out of work hundreds of Canadian toilers in B.C., and likely to take effect yet more formidably at the close of the present contest in the Orient. With many apologies for the length of my letter,

Believe me,
Yours fraternally,
NICOLAI C. SCHON.

VALUABLE

Leasehold Coal Dock

IN THE CITY OF TORONTO,

— CANADA. —

For Sale by Tender.

Tenders will be received by the undersigned up to 3 p.m. of the 15th DAY OF MARCH, 1895, addressed to "E. R. C. Clarkson, 26 Wellington street east, Toronto," sealed and marked on the outside. "Tenders for Dock Property."

The property to be tendered for consists of the coal dock property, with plant and equipment, situate on the south side of the Esplanade, Toronto, at the foot of Church street, held under lease, from the Boulton Estate, expiring 1st August, 1896, with a right of renewal at a rental to be fixed by arbitration. The present rental is $2,035 per annum. The property has a frontage of about 213 feet on the Esplanade by a depth on the east side of 513 feet, and on the west side of 496 feet. On it are erected large, substantial and modern coal sheds, one of which is 200 feet by 100 feet; two Hunt elevators, elevated track, shed pocket, weigh scales, and boiler, and 40 horse-power engine. Fine offices and modern equipment throughout.

The property is centrally situated, and is considered the most perfect coal dock in Canada.

The property cost in 1888, $75,000, and there has been spent upon it since in permanent improvements $20,1 1.

The plant is in excellent order.

Terms of Sale:—Twenty-five per cent. down, and sufficient with that amount to make one-half within thirty days thereafter, and the balance at the expiration of one or two years at the option of the purchaser. All unpaid purchase money to bear interest at six per cent. per annum from the date of mailing of notification of acceptance of tender.

Full information, including conditions of sale, as approved by the Official Referee, can be obtained at the office of Messrs. Mulock, Miller, Crowther & Montgomery, 99 King street east, Toronto, Solicitors for Estate, or to

GENDRON MFG. CO., Ltd., Toronto, Ont.

—The United States Minister to Russia will, it is said, resign the post, the reason being that he finds the salary of $17,500 a year totally inadequate to keep up the position in the style in which it should be maintained by the ambassador from the United States. On the same day last month a bill was to be introduced in Congress by Mr. Richardson (Dem., Tenn.) appropriating $1,000,000 to provide a suitable residence for the President of the United States. If the telegraph has not put a cypher too many into the sum mentioned, what becomes of the "republican simplicity" we hear so much about in the United States?

-Who is the greatest benefactor of the legal profession? Prof. Wood, of the Edinburgh chair of conveyancing, told his students how at a dinner of English country solicitors the oldest practitioner present was asked to propose the greatest benefactor of the profession as a toast, and how he arose and said: "Gentlemen, fill up your glasses. Here's to the man who makes his own will!"

—The great quantity of 246,603 bushels of oats was loaded aboard the big steel steamer "S. S. Curry" by Chicago elevator men before removing to her winter quarters. Up to this time the "Onoko" held the record with 187,657 bushels.

Commercial.

MONTREAL MARKETS.

MONTREAL, Feb. 6th, 1895.

ASHES.—Business has been very dull of late, and the English market weaker. Shipments during January were only 59 brls pots and one brl. pearls. Receipts for January were 110 brls. pots. Values are easy at $4 to 4.05 for No. 1 pots, and $3.65 to 3.70 for seconds, of pearls there have been none sold lately

CEMENTS AND FIREBRICKS.—The season is of course not favorable to any movement in cements, and prices are more or less nominal at $2.05 to 2.15 for English and $1.95 to 2 for Belgian. There is a fair movement in firebricks for repairs at $17.50 to 22 for ordinary brands and $25 for Glenboig.

DRY GOODS.—Customers' paper was fairly provided for on the 4th inst., which is usually a "big month." Anticipations in some quarters were not altogether favorable as to the results, but after weighing reports of different merchants, it may be reasonably stated that the 4th inst. was an average one, and no notable defaults, resulting in failure, have as yet been reported. There is no particular activity in sales just at the moment, and nothing new to be said as to values.

FISH.—The Lenten demand has not yet set in very actively, and prices are not greatly altered from last week. We quote: No. 1 green cod, $4.25; No. 1 large, $5.25 to 5.50; dry cod, $4.25 to 4.50; herrings, $3.75 to 4.50, according to brand; N. S. salmon, $13 to 14 for No. 1; B. C. ditto, $10.50 to 11; sea trout $9 to 10; fresh herring, 90c. to $1 per hundred; cod and haddock, 3 to 4c.; finnan haddies, 6 to 7c. per pound.

FURS.—The results of the London fur sales are reported as follows: Muskrat skins sold 15 per cent. lower than last March, mink 10 per cent. higher, red fox same as last March, lynx 15 per cent lower, wolf 5 per cent lower, marten 60 per cent higher black bear 5 per cent lower, beaver 10 to 15 per cent lower. Receipts at the moment are small, only some odd droppings coming in Quotations, as revised for strictly prime pelts, are as follows: beaver, $3.25 to $4, black bear, $15 to $25 cub do., $5 to $10; red fox, $1.25 to $1.50, muskrat, 7 to 10c lynx, $1.50 to $2.50; marten, $1.25 to $1.75; mink, $1 to $1.50, skunk, 50c to $1.25, otter, $8 to $12; fisher, $5 to $7

GROCERIES.—The heavy storm of last week was very general, resulting in heavily drifted country roads, which has interfered somewhat with the current of business and with the movements of travellers in the interior. The local movement in teas is not very active, but we are told of a sale of 700 pkgs. of low grade Japans to Chicago, with offers from the same quarter for other fair lots. London advices report continued firmness in blacks. Raw sugars keep strengthening, but local prices for refined continue on the same low level, namely, 3½c. for standard granulated at the refinery, and from 2⅞c. up for yellows. German refined seems out of the market entirely for the present The jobbing price for Barbadoes molasses has at last been advanced to 32½c., with first hands still holding firm at 33c. in lots. Coffees are in moderate request at 18 to 21c. for Rio, Java 26 to 30c., Mocha 27 to 30c., Maracaibo 20 to 24c., Jamaica 19 to 22c. Dried fruits are dull Further advance is advised from Europe in currants, Russia being reported a heavy purchaser. For prunes there is some moderate demand at 4½ to 5½c. Dried apples are generally quoted at 5½ to 6c., and evaporated apples are in pretty full supply at comparatively low prices, namely, 7½ to 8c

HIDES AND TALLOW.—A good demand from tanners for cured hides is noted, with continued scarcity of stock, and the quality poor, owing to grubs. Dealers are buying No. 1 light hides at 5c., heavies at 5½c. per lb, with sales to tanners of cured at 5½c. and 6½c. respectively. Lambskins 60 to 65c. each. Tallow continues slow of sale at 5 to 5½c. per pound.

LEATHER.—A little more business is reported and a more active month is looked for, as shoe manufacturers will have to begin shipping spring goods in March. We hear of a contract made the other day for 5,000 sides of No. 2 Spanish sole at 17c. per pound, and there are fair exports of sole to England all the time, Splits, buff and grain all rule very firm, with low stocks. We quote:—Spanish sole B.A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 21c. No. 2 do., 17 to 18c.; common, 15 to 16c.; American oaksole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, 14 to 17c.; do. juniors, 11 to 12c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c

METALS AND HARDWARE.—The revival of trade is slow in coming, especially in the line of heavy metals. Apart from sales of a few car lots of domestic pig iron at $17, there has been little done, and foundrymen report very slack business. Scotch warrants are cabled easier at 41s. 2d. Coke tins may be called easier at $2.65 to 2.80, and we understand a 500-box lot was done a few days ago at something under the inside figure. A round lot of galvanized iron could be done at $4.15 for No. 28 Tin showed a temporary spirt in New York last week, but has fallen back again. Copper and lead are without change. Canadian band iron is selling at $1.85, English $2.00, hoops $2.10 We quote Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19.50. Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17. Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $2 to 2.15; best refined, $2.40. Low Moor, $5.00. Ca.

nada plates — Blaina, or Garth, $2.05; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.25 to $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.65 to 2.80; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes Canadian bands, per 100 lbs., $1.85; English ditto, $2.00; hoops, $2.10. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25, shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 16 to 16½c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50 to 4.75; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards

Oils, Paints and Glass.—Turpentine is again advanced to 45 to 46c.; a very strong market is reported in the South, and stocks on spot are in narrow compass. In other lines there is nothing of a novel character. We quote:—Turpentine, 46c. per gallon for single barrels; two to four barrels, 45c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2, $4 to 4.25; No. 3, $3.75 to 4; dry white lead, 4½ to 4¾c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

TORONTO MARKETS.

Toronto, Feb. 7th, 1895.

Drugs.—The new year has not brought any material improvement to the drug trade. Orders received are only for small and unimportant amounts. While this plan of trading is conservative, and not attended with any considerable degree of risk, it lessens the profit of wholesale merchants. For it costs almost as much to distribute a great many small parcels as a large quantity of goods. In values the feature of the week has been a marked advance in the price of Norwegian cod liver oil, which is now selling at $2 a gal. Muriate cocaine is firm and higher. Opium, cream tartar and tartaric acid are inclined to easiness.

Dry Goods.—Since the commencement of the year there has been the usual rush with the wholesale houses to make shipments for the spring trade. Some of the importers have been working late into the night in order to keep faith with their customers. The goods sent forward include prints, linens, dress goods, gentlemen's furnishings, and carpets. Although for the bulk of these goods orders were placed some weeks ago, still the number and amount of orders received during the week have been very satisfactory, and indicate confidence in the coming season's business. Should the present favorable conditions of snow, good roads, etc., be continued, the close of the winter season will undoubtedly see most retailers with little stock left over, which is an encouraging fact.

Furs.—The latter part of 1894 was favorable to the fur trade, but since the new year business appears to have dropped off somewhat. For fox skins about the same prices as last year are being paid, ranging from 25c. to $1.25. At the last Lampson sales raccoon sold 30 per cent. lower than in March. Dealers here pay from 10 to 60c. each for skins. Mink, on the contrary, has advanced abroad, and offerings bring from 10c. to $1.25, according to color and size. Muskrat is lower in England, local dealers paying 8c. Skunk, too, is lower abroad. Merchants are paying $1.25 for black, and 15 to 50c. for white. For marten dealers are paying $1.50 to $2.50; $1.50 to $2.50 for lynx, and $3 per lb. for beaver.

Grain.—The wheat market has been somewhat steadier this week in consequence of a firmer feeling in both English and American markets. Deliveries at outside points are not excessive, while the present movement is almost entirely confined to the supplying of local millers' wants. Barley is firm; there has been some export movement in the United States and enquiries from American brewers keep up well. Oats continue unchanged, with quotations well maintained; some enquiries for large lots have been received from the eastern provinces; there yet remains in western Ontario, it is thought, good stocks of oats. Peas are firm and cables give an advance of 1½d. per cwt. in English markets. Rye and corn find but nominal movement.

Groceries.—Nothing has happened to excite special interest in the grocery trade this week. Values are steady and very well maintained. There is nothing special to note in coffees. Only a limited movement is taking place in dried fruit. Currants are firm locally because of reported advances abroad. There are some nice selected layer raisins offering at 5 to 5½c., which are considered good value. There is a better demand for syrups, and this will probably continue through Lent; there are some cheap American syrups on the market at 21 to 23c., but they are not in good favor since thick and sharp. Sugars are selling well; country retailers continue to purchase on an extensive scale. The trade obtains no profit in the sugar trade as conducted at present. All over the country come reports of slaughter prices, and a staple article is being distributed by wholesale and retail merchants alike without remuneration for their pains. Prices of yellows have within the week declined a point, and are now quoted: Bright, $3 to 3.10; medium bright, $3; yellow, $2.80 to 2.90 per cwt. The Canadian Packers' Association is in session, and at the time of writing it is impossible to obtain information of the proceedings. It is believed that outside packers are soon to be admitted into the association. Corn is strong, with standard brands selling at 87½ to 90c.; a few "off brands" may be had at 80c. Tomatoes bring 85 to 90c. Standard brands of peas are quoted at 80 to 90c., with selected at $1 to 1.10. Canned fish are moving freely, with prices unchanged.

These prices are wholesale by the car-load.

HARDWARE AND METALS.—The trade movement, although slow and unsatisfactory, is if anything a little better than a week ago. A large number of retailers throughout the country have not yet finished stock taking, and so are not inclined to purchase in large quantities. Contracts for future delivery, however, continue of a satisfactory character. The milk can trade is very active, and jobbers are forwarding large quantities of material for manufacturing purposes. Business in metals is improving slowly, while values remain firm. Import orders of window glass, to be delivered in June, continue good. There is little or nothing doing in the plumbing business; however, a good trade is looked for next spring. Heavy hardware is not in request, partially as the result of high freight rates. There is a fairly good trade in tinware supplies, but orders are principally for small amounts. The only change in values is a reduction in iron pipe, which is now quoted at 70c., and 5 to 15 per cent., according to quantities.

HIDES AND SKINS.—In spite of a decline in the Chicago market local merchants still retain hides at their old prices. But the situation is undoubtedly weakening. The quality is deteriorating with the advancing season. Stocks do not sell very readily, and in some of the cellars there are accumulations. One important factor in the situation is that American buyers are holding aloof from the market, and with this outlet closed the position of holders is weakened not a little. As we stated last week, there was some difference of opinion as to the advisability of raising the price of sheepskins at the month's commencement. However, the bulls prevailed, and, in consequence sheepskins stand at 80c., an advance of 5c. Whether any further change will be made in prices during the month we cannot say. At present figures, values, in comparison with former years, are by no means high. At this season of the year there is so much variance in quality that it is extremely difficult to buy on a standard price. The local tallow market is weak, although quotations are no less. Some stock has been brought here from the United States recently, but we understand the results attained were not up to expectations, and it is improbable that the transactions will be repeated.

PROVISIONS.—Trade is but moderately active. The butter market remains unchanged, that means dull and slow; medium and common grades are selling at 8c., fine tubs at 14c., but for these descriptions there is only weak demand, the bulk of the trade being done in rolls at 12 to 14c. The local jobbing cheese business is very quiet, and the feeling decidedly easy. Hog products remain unaltered in regard to values; packers are not overly busy; receipts of dressed hogs are not excessive, but quite equal to all demands. Eggs are in a somewhat firmer position than they were a week ago; new laid are worth 20c., limed 11 to 12c., and cold storage 11 to 12c. per doz. Dried apples are a little firmer at 5½c., while evaporated are firm at 7½c. With the advancing season an increased quantity of this fruit is passing into consumption.

WOOL.—After the pretty thorough cleaning up which the market underwent last week, it was not to be expected that there would be much activity this week, at least so far as fleece wool is concerned. However, stocks remaining in the country are so small that they command a premium and an advance of 1c. per lb. is being paid by Toronto merchants. For pulled there is a fair demand from the United States and several carloads are going forward. The circular of a well known Philadelphia wool house, Justice Bateman & Co., says of the situation in the United States: "Although American woolen manufacturers for the present appear to be fairly well employed under the new tariff laws, the seller of wool is not so well off, as he must now divide his business with foreigners who are selling wools at such tempting prices as to secure large orders from mills which were previously supplied from the domestic staple. The wool market therefore fails to quite keep abreast of the activity in the American mills, which are better employed than they were at any time during last year in supplying goods required to restore the assortment reduced to a low point in anticipation of the new tariff laws."

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital .... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

PERTH MUTUAL FIRE INSURANCE COMPANY.

The thirty-first annual meeting of the members of the Perth Mutual Fire Insurance Company was held in the company's office, Market Square, Stratford, on Wednesday, the 23rd January last.

Among those present were Messrs. William Davidson, mayor of Stratford; Hon. Thomas Ballantyne, William Mowat, Thomas Orr, Geo. Hyde, Joseph Salkeld, Andrew Kuhry, George Leversage, J. D. Moore, W. S. Bolger, A. Frame, Nelson Monteith and G. G. McPherson.

The following report was then submitted:

REPORT.

The board of directors beg to lay before you the thirty-first annual statement of the affairs of the company, being for the year ended 31st December, 1894, and are pleased to be able to report an increase both in the amount of business done and in the amount of the reserve fund.

Our assets, including premium notes, now amount to $211,466.69, and deducting from this our liabilities, which are $4,450 losses under adjustment at the close of the year, $360.28 agents' balances (amounts overpaid), and $26,377.57, the amount of reserve required to reinsure all current risks on the cash system, we have, as our net surplus, $180,278.84.

The total income of the year was $95,611.87, and the total expenditure $77,109.05. Allowing for losses under adjustment and for agents' accounts, $4,810.28, we have as the net profit of the year's bnsiness $13,692.54, a result which we think must prove satisfactory to every member of the company.

The number of policies issued and amount of insurance written during the year was 4,879 policies for $5,789,481. The total number of policies in force and amount at risk on 31st December was 8,319 policies for $9,486,706, an increase as compared with the previous year of 1,533 for $1,916,795.

As we hold re-insurance policies for $726,625, our net liability on account of amount at risk is $8,760,081.

Detailed statements of the amount at risk, cash account, assets and liabilities, profit and loss account, agents' balances, losses paid, and the inspector's and auditors' reports are herewith submitted, and will, we trust, prove satisfactory.

The retiring directors of the year are Messrs. William Mowat, J. D. Moore, James Jones, and G. G. McPherson, all of whom are eligible for re-election. All of which is respectfully submitted.

(Signed) WM. DAVIDSON,
President.

Stratford, January 16th, 1894.

To the President and Directors of the Perth Mutual Fire Insurance Company.

GENTLEMEN,—We, the undersigned auditors, certify that we have made a detailed audit of all the books of the said company for the year ending the 31st December, 1894, and have examined all the securities, vouchers, and documents relating to the said company's financial affairs, and have compared the company's balance sheet and profit and loss account with the said books, all of which we have found correct.

Dated the 12th day of Jan., A.D. 1895.

(Signed) JOHN PEARSON,
(Signed) G. G. EWART, } Auditors.

After the adoption of the report, the retiring directors, Messrs. William Mowat, J. D. Moore, James Jones and G. G. McPherson were re-elected. At a meeting of the board held subsequent to the annual meeting Mr. William Davidson was elected president and Mr. William Mowat vice-president.

ONTARIO'S BEE INDUSTRY.

The annual meeting of the Ontario Bee Keepers' Association was held the other day at Stratford, the president. Mr. A. Pickett, of Nassagaweya, stated that the past year, from the bee-keepers' standpoint, upon the whole had been rather discouraging. The bees wintered well and came out in spring with few losses, but the cold and wet weather following drove them back to their hives, compelling them to live on their winter stores, with the result that they were exhausted before the weather became favorable for the gathering of a fresh supply, and in consequence many died of starvation. The survivors gathered but little; honey clover and other blossoms being cut short by the drought, the result was little more than half a crop. He was pleased to notice that their annual meetings were increasing in attendance and also that the Provincial Government had taken an active interest in promoting the honey-making industry by appointing a foul-brood inspector and in other ways.

THE ECONOMY OF A GOLD LOAN.

Four or five years ago the Territory of Arizona had occasion to borrow some money, about $75,000, and the Act of Congress authorizing the loan was amended upon the motion of Mr. Smith, the delegate from the Territory, to make the loan payable in gold. Eastern newspapers promptly commented upon this action by a man who was known to be an advocate of free coinage, and who purported to be the representative of free coinage people. Mr. Smith made some kind of an explanation designed to keep his record as a free silver man straight. It amounted in substance to a complaint that the "gold bugs" were demanding their pound of flesh, etc., etc., and Arizona was at their mercy. But the fact remained, and indeed was confessed in the amendment that Mr. Smith offered, that Arizona could borrow more economically if it would guarantee to repay gold than if it left the kind of money in which the bonds were to be redeemed indefinite.

Now, this is all the fact that is needful for sensible men to know. They but offend their voices when they rail at Shylocks if they cannot rail the seal from off the bond, or in modern parlance, the natural desire of the lender to know what will ultimately be repaid to him, or to those to whom he sells his bond, if he lets his money go. If men individually, or as a political or commercial corporation, find that they can borrow more cheaply on a gold bond than on a silver bond or a legal tender bond, that is a sufficient reason for borrowing on a gold bond; and if they complain and rave and curse because they cannot borrow more favorably on a bond redeemable in anything that people may choose fifty years hence to offer in its redemption, they are as foolish as the child who beats a chair over which it has stumbled.—*Commercial Bulletin.*

NEWFOUNDLAND.

The state of things in Newfoundland is critical. The unsound and effete mode of conducting affairs on that island for many years is now fully exposed, and much suffering is the result. A correspondent of THE MONETARY TIMES, writing on January 16th, says: "Our country is in desperate straits now, politically and commercially, and indeed both these are closely interwoven. There could be no remedy internally, and the structure—politics and commerce—should come to an end by failing of its own huge rottenness. The men who reared this structure and propped it by laws and customs of their own making, were the same who wrecked the banks and plundered the inhabitants. The Union's condition seems to be as bad almost as the Commercial."

We learn respecting the failure of John Munn & Co., of Harbor Grace, that the large sealing fleet of steamers and sailing vessels of this extensive concern will go to the ice as usual in March, with the permission of the court and the trustees, a step much to be desired. One of the partners in the house is already on his way to England to make arrangements for securing the last payment (in 1896) of a proposed compromise.

—Acording to the circular of Messrs. Henry R. Merton & Co., the visible supply of copper in England, France, and afloat from Chili and Australia at the close of December was 52,676 tons, an increase on the stock quoted for November 30th of 381 tons. In the same period the net improvement in price of Chili bars is 10s., the latest quotation being £40 12s. 6d.

—The meanings attached to the different precious stones are as follows: the garnet means constancy; the amethyst, sincerity; the bloodstone, courage; the sapphire, innocence; the emerald, success; the agate, long life; the carnelian, content; the pearl, tears; the diamond, purity; the opal, sorrow; the turquoise, happiness; the malachite, prosperity.—*Ladies' Home Journal.*

—The big steel schooner "Marcia," sister ship to the "Malta," built in Chicago for the Minnesota Steamship Company, was launched in January. The dimensions of the "Marcia" are 302 feet keel, 320 feet over all, 40 feet beam and 24 feet moulded depth. On a draft of 14½ feet she will carry 3,000 tons, and when the 20-foot channel is completed her capacity will exceed 4,000 tons.

—The late Robert Louis Stevenson was wont to relate the following episode connected with the time when he was a budding litterateur. One day, in his usual absent-minded fashion, he was entering the famous second-hand book shop kept by James Stillie, when he came into collision with a fuming old gentleman who was leaving the establishment. The latter called to Stenson in an angry tone, "Man, can you not look where you are going?" Stevenson apologized for his awkwardness, and was then confronted by Mr. Stillie, who was also in a state of excitement. The bookseller exclaimed, "The cratur has been trying to make out that an old book I sold him is spurious! He may be able to write, but he knows nothing about black-letter books! He's the most disagreeable customer that ever entered my shop!" "Who is he?" queried Stevenson. "Oh, that's the great Mr. Thomas Carlyle," was the answer.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

DECISIONS IN COMMERCIAL LAW

WALLACE v. UNIVERSAL AUTOMATIC MACHINES CO.—This is a judgment as to the effect of a winding-up order on the rights of debenture holders whose debentures were not payable until a future day, but which were a floating charge upon the property of the company. The Court of Appeal in England held that the supervening of the winding up had the effect of accelerating the right to call for payment of all moneys secured by the debentures, and, therefore, that the plaintiffs were entitled to judgment for the principal and interest, although the day for payment of the principal, according to the terms of the covenant, had not arrived

SKINNER v. SHEW.—This was an action to restrain the defendants from threatening the plaintiff with legal proceedings or liability in respect of an alleged infringement of a patent owned by the defendants. The injunction was granted, and an inquiry directed as to damages which the plaintiff had sustained by reason of the threats made by the defendants, and this was a motion by way of appeal from the report on the question of damages. The plaintiff, in support of his claim, had produced a letter from the agents of a company with whom the plaintiff had been in negotiation for the sale of the exclusive right to use of plaintiff's invention for three years, terminating the negotiations on the ground of alleged threats. It was contended that this latter was inadmissible as evidence, that the negotiations had, in fact, been discontinued; but North, J., held that it was evidence, though not necessarily conclusive of the fact The damages were fixed on the basis of the minimum profit which would have been made had the proposed contract been carried out, and North, J., held that that was the proper measure of damages.

ALLISON v. MCDONALD.—Two partners borrowed money, giving as security a mortgage on partnership property, and a joint and several promissory note. The partnership having been dissolved, the mortgagee gave the member of the firm who continued to carry on business, and who had assumed the liabilities, a discharge of the mortgage, on his undertaking to pay back the money borrowed, which he failed to do, but mortgaged the property again, and finally became insolvent and absconded. An action having been brought against the retiring partner on the note, the Supreme Court of Canada held that the plaintiff could not compel the retiring partner to pay the mortgage debt without being prepared on payment to re-convey the lands mortgaged, which he had incapacitated himself from doing. His action, therefore, was rightly dismissed. Also, that the relation between the partners was changed by the terms of dissolution into that of principal and surety, and the trial judge having found as a fact that the mortgagee had notice of such terms, his discharge of the continuing partner, the principal, released the surety (the retiring partner)

MONTREAL COTTON COMPANY

The annual statement of the Montreal Cotton Company has been issued. After providing for the usual dividends of eight per cent., over $85,000 is carried forward to the Profit and Loss account. The gross profits on the year's operations were over $197,000, and the reserve fund or surplus now amounts to over $800,000. The figures in detail are as under:

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE subscriptions towards a monument in the city of Montreal to Maisonneuve, its founder, amount to $13,454.

THE Granby cigar factory of Mr. J. Bruce Payne now turns out 4,000,000 of cigars annually, according to the St. John's *News* correspondent.

IT is confidently expected that the railway to connect the Cape Breton collieries with the port of Louisburg will be finished during the coming summer.

THE British Board of Trade returns for January show that the imports decreased £1,710,000 during that month, and the exports increased £70,000, as compared with January last year.

THE Halifax Board of Trade has taken action towards relief for Newfoundland. A conference between the mayor and members of the board took place on Friday last, with a view to making a shipment by Capt. Farquhar's sealing steamer to-day or to-morrow.

"FIFTY Facts about Peterboro" is the title of a vest-pocket pamphlet about that live town which might well serve as a model for any municipality wishing to advertise its advantages. The Board of Trade has done well to present so much information in a succinct way, and to furnish a map of central Ontario showing the situation of the town.

Mercantile Summary.

ST. JOHN imports for last month were of the value of $131,643 dutiable and $130,637 free. Total, $262,280, which is $62,368 more than in January, 1894. There was an increase of $44,131 in value of exports.

A JUDICIAL order has been applied for for the liquidation of the Waterloo, Que., Knitting Company, which was formed several years ago, and was bonused by the municipality to the amount of $10,000. The concern has been in hot water almost since its inception, and a meeting of shareholders and creditors has been called for the 15th inst., to appoint a liquidator

THE Winnipeg customs returns for January show the value of exports at that port to have been $123,420 as compared with $110,574 for the same month of 1894. The entries of dutiable goods for consumption were $101,517 in value, and the free, $35,687 ; in the previous January they were respectively $142,430 and $33,429.

WE learn from the *Eastern Chronicle* that the Amherst firm of Rhodes, Curry & Co. have a contract from the Dominion Coal Company of Cape Breton, embracing 300 cars, including coal hoppers, flats and box cars, a first-class passenger coach, and one combination first-class and baggage car. They have also received an order from the Dominion Atlantic Railway for thirteen box cars of the latest pattern.

CANADA PAPER CO.

15 Front St. West, TORONTO | 578 Craig Street, MONTREAL.

Mercantile Summary.

MR. J. DIX FRASER, of the Nova Scotia Iron Works, Ferrona, returned from Newfoundland last week. He had been at Belle Isle superintending the sinking of shafts and tunnels on the iron property there, owned by the N. G. Iron and Railway Company. They will commence to ship iron to Nova Scotia in July.

ZEPHIRIN GUIMOND, of Cap St. Ignace, Que., a baker by trade, who has of late years been trying his hand at storekeeping and lumbering, has got into deep water and wants an extension of time.——A. B. Prieur, a general dealer for quite a number of years at Coteau Landing, but declining of late, has had a consultation with his Montreal creditors, who are few in number, with the result that he has been granted a compromise at 35 cents on the dollar.——P. P. Martel, of St. Jerome de Chicoutimi, Que., was first a shoemaker : some years ago he engaged in general business, and has also lately been running a cheese factory. He has been sued, and creditors will have to extend some general indulgence to enable him to continue in business.——B. Leclaire & Co., general merchants, Lapigeoniere, who sold out within the last few weeks to J. A. Leclaire & Co., have been put into insolvency. The concern has failed twice previously.——Louis Bernstein, a peddler and storekeeper, of East Angus, Que., has been served with a demand of assignment.

MONTREAL & VANCOUVER, B.C.

Mercantile Summary.

O. S. POITRAS & Co., flour merchants, Quebec, recently reported as seeking a compromise, have now assigned. They show assets of $21,000, $13,000 of which is in poor accounts, while liabilities direct are $18,000, and indirect, $5,000.

THE North Shore Nav. Co. held its annual meeting in Collingwood the other day, when Messrs. Scott, J. L. Burton, C. E. Stephens, W. J. Sheppard and F. A. Lett were elected directors. The officers of 1894 were re-elected. They are: James Scott, president; J. L. Burton, vice-president; C. E. Stephens, secretary-treasurer; M. Burton, manager, and C. A. Macdonald, accountant.

LAWSON, HARRINGTON & Co., of Halifax, N.S., a well-known firm, established in the flour and fish trade since 1864, are reported in difficulties, and an insolvency declaration has been applied for. The liabilities are estimated at $30,000, of which some $20,000 are preferred. The financial difficulties in Newfoundland have probably had to do with this result.

WE note a couple of failures of traders in Kingston this week. J. C. Hardy, in the dry goods since 1886, is reported assigned. His troubles are said to be due to endorsations.——Daniel Noonan, a vessel owner, interested in steamers plying on the Rideau Canal, is also gazetted as insolvent.——Sarah Chapman, formerly living on a farm at Seeley's Bay, Ont., left there a year ago to invest her little all in a millinery business at Gananoque. Her assignment is just reported.

THE failure is reported of Edouard Morin, grocer at St. Hyacinthe, Que., who is estimated to owe about $15,000. In the spring of 1892, Mr. Morin, then a youth of about 19, and only a year or so from college, thought he would strike out for himself in business. His father had died fairly well off, and the young man's inheritance was generally reported to be some $12,000 or $13,000. Of this he is said to have got some $3,000 on starting business, and the balance later in the shape of store premises valued at about $8,000, on which he made a large expenditure in the way of improvements. He has been attempting a jobbing business, and through this and a large lock-up in bricks and mortar has become embarrassed. An offer of 70 cents on the dollar was made on his behalf, but has since been withdrawn, pending the preparation of a full inventory.

Mr. John McCormack, for many years the Quebec manager for Messrs. Shaw, Cassils & Co., leather merchants, of Montreal, died last week. He had been connected with the firm for upwards of 25 years, and was greatly respected.

The Bell Telephone Company shareholders held a special meeting on Monday last, and passed a by-law authorizing the directors to issue bonds bearing 5 per cent. interest, to the amount of $600,000. There were between thirty and forty shareholders present.

Seventy per cent. was realized out of the dry goods stock of J. H. Cleave, of Brantford. ——And of the two bankrupt stocks of J. W. Relyea, that at Brockville brought 57 per cent. and at Perth 21 per cent.——The general stock of A. D. Mitchell, Glencoe, realized 45 per cent. ——Only 41½ per cent. was obtained from the sale of L. Wartelsky's stock, Carleton Place.

The brass counter railings and screens now used so much help greatly to beautify the interior of banks and other monetary institutions. The Dennis Wire and Iron Works Co., London, have issued a calendar in which are a number of sketches showing the interior of several of their departments where these goods are manufactured.

From Ottawa we hear of the failure of O. Forest & Co., dry goods. Mr. Forest was formerly of the firm of Fournier & Forest, who failed in 1893. The stock was bought in for him by a relative, and he resumed business in his wife's name, but with little better success. ——Hillyard & Co., shoes, of the same city, are reported to be offering their creditors 50 cents on the dollar. Mr. H. used to be in the dry goods business in Prescott, and bought out the stock of S. C. Noxon, at Ottawa, in 1892.

In the city of Montreal the following failures are to be noted: Joseph Lebrun, formerly a grocer, who started in the shoe business in 1893, has made an assignment, owing $3,364.—— Pauzé & Lamouche, paints and hardware, whose affairs we lately alluded to, have arranged a compromise at 50 cents on the dollar. ——T. A. Langlois began selling groceries in December, 1893, with a small capital, made while employed as a G. T. R. news agent. He has not got this capital now. He owes about $1,500

The suspension is announced of John McGillivray & Co., jobbers of dress goods in Montreal. Mr. McGillivray was formerly buyer for J. G. Mackenzie & Co., and started in business six or seven years ago as Agnew, McGillivray & Co., which firm shortly after dissolved, the partners continuing separately. A succession of heavy losses, particularly in the west and Northwest, has wiped out McG. & Co.'s capital, and they have submitted a statement of their affairs to creditors, who are all in Europe.

A telegram of Tuesday last, from Cleveland, says a company has been organized in that city to build and operate a line of canal boats between Cleveland and New York Eighteen boats will be constructed, so as to be seaworthy on Lake Erie, and will be towed by propellers down the lake and through the Erie canal. It is claimed that the scheme will give Cleveland the control of the iron market for New York and New England, and make it possible to make all shipments far more cheaply than by rail.

The Brockville *Recorder* warns people against an insurance agent who is going through the country swindling policy-holders. His method is to find out in what company certain parties are insured, and tell them that the company which issued their policy has suspended, and that he is employed to adjust its affairs. He suggests transferring the policy to a reliable company. In order to do this he requires the victim to sign a slip of paper supposed to be a transfer, but which in a short time turns out to be a note for $35.

A somewhat chequered career is that of Francis Clarke, who failed as general storekeeper at Glen Williams some years ago Afterwards he started a knitting mill at Bolton, where he was burnt out, then made a second failure. Since the fall of 1891 he has carried on a general store under the style of J. Bradley & Co., Caledon East. A little over a month ago a furniture store was opened there, uuder the style of Clarke & Hunter, and he is believed to be the virtual owner. This firm now assigns.—— James Fleming, shoe dealer at Bothwell, has assigned.

From the Lower Provinces the following fail ures are reported: Brown & Co., general dealers at Thorburn, N.S., in business since 1885, have assigned. They are said to owe largely to a Truro firm.——W. J. Davidson, lumber dealer, St. John, N.B., reported recently as seeking a compromise, has now assigned; liabilities are about $7,000.——Alfred Morrisey, books and stationery, of the same city, has been trying to arrange a settlement at 20 per cent., but has not apparently been successful, and has also assigned.——Doherty & Foster, tailors also of St John, mentioned last week, are proposing a compromise at 20 cents

An assignment is made by W. E. Vanvelson, general storekeeper at Calton. Formerly he taught school, and had no practical knowledge of his new enterprise ——About fifteen months ago G. W. Morgan dissolved partnership with his father at Humberstone, Welland, and opened a furniture store at Port Colborne. In September last he was obliged to mortgage his assets, and his assignment has since followed ——Last July, Smith & Chambers, who were formerly clerks, started as general merchants at St. Mary's, and in November thev dissolved, Robert Chambers continuing. About that time he mortgaged his stock to his principal creditor for $4,500. Now we hear of his assignment.

Possibly there is an ecclesiastical version of the old adage about the shoemaker sticking to his last. The principle, at any rate, will apply to ministers of the gospel. Rev. Thomas Hadwin, of Kincardine, might have profited financially by adhering to the spirit of the old maxim, in which case we should not have had an opportunity of announcing his assignment as a merchant.——Nine years ago P A. Skinner began business as a shoe-dealer at Niagara Falls in a small way. But his stock and trade grew, and the profit realized thereon was invested in real estate. But lands are not nowadays the sort of assets to pay promissory notes with. Mr. Skinner feels himself compelled to ask creditors for a compromise at sixty cents in the dollar

About seven years ago R. Dunseath, blacksmith, started a grocery store at Beaverton. There was more "toiling and sorrowing" than there was "rejoicing" about it. Granting credit too freely seems to have been one of his weaknesses, and no one who knows the difficulties of storekeeping will be surprised to hear of his assignment. — Apparently A. Ryan prospered fairly well as a general storekeeper at Eau Claire until he came under the auspices of the Patrons of Industry. It did not require long to teach him that 12½ per cent. profit was not sufficient to conduct a store successfully. Short as the time was, however, he was too late in learning the lesson, and the result is an assignment.—— Being unable to affect a compromise, J. S. Macrault, of Strathroy, has assigned to Henry Barber.

Mr Geo A Stimson, of Toronto, has just purchased the $5,000 town of Bowmanville debentures, given by way of bonus to the Dominion Organ and Piano Co., in that town. The debentures bear 4½ per cent. interest, and are repayable in annual instalments.

R. S. Robinson, clothier, Stratford, assigned; W. F. Jones, dry goods, Belleville, consulting creditors; Mrs. Herrington, men's furnishings, Toronto, assigned; Maxwell Johnston & Co., printers, Toronto, chattel mortgage foreclosed; John Campbell, clothier, New Westminster, settled with creditors; Fred. Crake, jeweller, offering 50 per cent.

A few years ago J. A. Ross, who was formerly in the employ of his father, started a general store in Coboconk. He claimed, a year ago, to have a stock of $2,000, and liabilities of only '500. Now we hear of his assignment.——J. W. Cathcart, fancy goods dealer, Leamington, makes an assignment after being in business about a year. Last month he gave a chattel mortgage for $3,700 to Susan Cathcart.——At a meeting of creditors of T. G. Foster & Co. and Foster & Pender, held at E. R.C. Clarkson's office, Thursday, inspectors were appointed and the meeting was adjourned until Monday next at 3 p.m.

It is ten years or more since John A. Gill started a general store at Assessippi, Man., with a capital of $1,000. His statement showed a surplus of $7,000 in 1892. Since the first of this year, however, he has been twice sued, and now we hear of his assignment.——At Medicine Hat, W. Watkins has a grocery. He is a very plausible man, with fair ability, but not sufficient for success, for we hear of his failure at Glen Williams, Ont. He assigns with liabilities of $1,250, and nominal assets about half this sum.

A greatly improved showing is made by the Richelieu and Ontario Navigation Company. Their gross receipts, operating expenses, &c., for three years are thus tabulated:

	1894.	1893.	1892.
Gross receipts	696,015	$618,569	$633,571
Operating expenses.	541,098	602,739	581,712

The percentage earned, net, on capital of $1,350,000 was 11½ in 1894, one-half per cent in 1893, and 5½ per cent. in 1892. The number of passengers carried was 797,646. Six per cent. dividend is declared, absorbing $81,000, and $43,280 is carried to surplus account.

A meeting of the creditors of McSween & Russell, hardware dealers, Leamington, was held in this city a fortnight ago Since then the firm offered to pay 70 per cent This offer is now under consideration.——In 1887, Downey & Co. were succeeded by Robinson & Co. as dry goods dealers at Napanee. Since this firm began business they have been controlled by a Montreal house, which has sued them; now they assign.——An assignment is made by D. W. Dulmage & Co., general dealers, Palmerston, who succeeded James Johnston & Co. in October, 1892. The stock, which amounted to $4,000, was bought at 85 per cent. discount on a cash basis. After having a number of losses, they were obliged in September last to obtain an extension of time. This is followed with the result stated above.

A case which creates unusual interest in life assurance and other circles is the arrest of two brothers named Harry Place Hyams and Dallis Theodore Hyams, charged with the murder of William C Wells, on the 6th January 1893 The young man Wells was employed by the Hyams brothers who then had a warehouse at Church and Colborne streets, Toronto. On the day in question, when it is said no one was in the warehouse but Harry Hyams and Wells, the latter was found dead at the foot of the elevator shaft, his head partly crushed by the weight, which, it is said, had accidentally fallen upon him. The brothers Hyams are now in Toronto gaol, and the body of Wells is to be exhumed. Harry P. Hyams is married to one of the two sisters of Wells. The insurance company that issued the policy on Wells' life at first demurred to pay, but after investigation paid the amount, some $30,000, to the sister or her representatives. This precious pair of brothers have recently been in treaty for life assurance to the extent of $200,000 or $300,000 on the life of Harry's wife *nee* Wells. When she became aware of this she was alarmed, and little wonder, and left her husband

THE SITUATION.

There is in General Booth's plan of providing for the poor on land much that accords with the suggestions of Sismondi, sixty years ago. He thinks, instead of a man having 160 acres which he cannot cultivate, twenty acres and a cottage should suffice for the individual. The notion of both is that these cotters should simply produce for their own consumption and not to sell. But they could scarcely produce everything they need, and if they had little or nothing to sell, they would have no means of buying. An isolated cotter settled on ten acres of land would work at great disadvantage; he could not work even that much without a horse, and he could not afford to feed one on his little plot. And if he could, one horse would work at great disadvantage. But General Booth's plan evidently implies some form of co-operation. His demand for 100,000 acres of land is too ambitious; he should be content to make the experiment on a more modest scale. But he does not appear to wish to obtain an absolute grant of land, but only to secure it for ten years, at the end of which experience would give a better idea of what could be done. We should then know whether the occasional criminals found among the immigrants had been or were in a fair way of being reclaimed. If the facts gave an affirmative answer, there would be little reason to dread future additions of such materials to the colony; but if any considerable number of them relapsed and joined the criminal class, public opinion would demand that the further importation of such immigrants should cease.

West Toronto Junction's municipal condition is not at present prosperous, and an appeal will be made to the legislature to pass a Stay law for the benefit of the town. It is not proposed that the debt shall be scaled, but only that payment shall be postponed for a definite time. The right or equity of legislative interference in such a case is doubtful. Even if the constitutional right exists, the exercise of it would be a delicate matter. Far better would it be to arrange with the creditors for the desired postponement, and if that were done, legislative ratification would not be out of place. But nothing, it is clear, ought to be done without the consent of the creditors, and it is not likely that the legislature will consent to act in the absence of a warrant from them. Bonuses to manufactures, a form of local protection, is largely to blame for the trouble. This system, if extended far, recoils on itself; the non-bonused manufacturer has to pay to prop up those that are more favored. When the time comes, as it has in the case of the Junction, that no more bonuses can be given, manufacturers in search of a location are repelled from a place where they would have to assist in paying bonuses to others. It is probably useless to point to the present financial condition of the Junction as a warning against bonusing manufactures. Even Brantford, with its free trade leanings in other directions, made use of side-wind to aid a manufacturer there, not by a direct bonus, but a measure that had practically the same effect. So long as local selfishness exists, and the law permits of it, local bonuses are likely to be given.

What the Dominion Government has agreed to do in connection with the Atlantic and Lake Superior Railway Company is to act as trustee for the bondholders and pay interest on bonds with any money lodged with it for that purpose. This sort of agency led the Government into trouble in the case of the Municipal Loan Fund, the result being that Government had to assume the payment of bonds which it had originally only undertaken to pay out of the special fund. It is true that the office accepted by the Government for the Atlantic and Lake Superior Railway Company was performed by it for the Canadian Pacific, to secure the dividends to stockholders. In that case, the amount deposited was sufficient to last ten years. In all such cases time is an element, and the longer it is the more valuable the guarantee. The practice of providing in this way for payments of dividends or interest, for short periods, even where the Government was not asked to intervene, has in some periods of financial history been used on the London Stock Exchange as a dangerous decoy, notably in the perilous times that preceded the collapse of 1887. Of course the danger, in the present instance, is that the notion may get abroad that the Government guarantees to make certain payments out of the public funds. In point of fact, the first story that reached this country in connection with the attempt to float the bonds of the Atlantic and Lake Superior Railway Company, had connected with it an assertion of such a guarantee. And a cablegram states that a proof prospectus is so worded as to be likely to convey this impression. All things considered, it would be best for the Government to relieve itself of a trust which appears to have been assumed without due consideration, if it has not been designedly worked for more than it is properly worth.

Three accidents within one week measure the misfortunes of the Grand Trunk Railway during the recent storm. Two of them were made possible from the same cause: the despatch of a train from one station before it was known that the point for which it started had been passed by the preceding train. On the Midland, a number of passengers report, in writing, that previous to the time of the despatch from the station of the train which ran into another from behind, it had been ascertained that the track was clear to the next station: the first omission to exercise this caution proved fatal. This, it would seem, from the fact stated, to have been the rule, and the departure from it to have been an incidental irregularity. And if it was the rule on one section of the road, it is reasonable to assume that it must have been on the other. Any responsibility for these accidents would seem to rest on the local officials, and not to be due to a defect in the company's rules and regulations. The third accident seems to have been uncontrollable, being due to a snow plough leaving the track and dragging the engine after it. The loss of life is a matter of supreme

regret, for which no pecuniary damages can compensate. The case of Mr. Joseph is peculiarly sad, and that of Mr. Monahan is in some respects worse, as he leaves a family dependent upon him. We trust there will be no more collisions from one train overtaking another. They rank among the preventible accidents, and ought to be prevented. The fact that the snow plough is liable to leave the track makes it necessary that no train should be attached to it to share its untoward fate. These lessons are only for the future, and the future ought to benefit by them to the fullest possible extent.

It would appear, from an enquiry made in the House of Commons, that at the time of Sir John Thompson's death, no conclusion had been reached between him and the British Government on the copyright question. If the statement is not made in direct terms, it seems fairly to bear this interpretation. The terms in which the enquiry was made are such as to displace the true question. The real question is, on what terms are British authors, not resident in Canada, to be permitted to secure copyright in this country? The United States requires, for instance, as a condition of the extension of British copyright to that country that the work be printed in the Republic. Canada contends that under her constitutional authority to legislate on copyright, she is at liberty to make a similar condition. In the analagous right of patent, she rests entirely upon her own legislation. What is the extent of the power to legislate on copyright which the British North American Act confers upon Canada? The assumption of British authors that British copyright extends to the greatest of the self-governing colonies, as a part of the Empire, and therefore to Canada merely because it is part of the Empire, is not tenable. If it were merely a question of the interpretation of the North American Act, the obvious course to pursue would be a reference to the Privy Council; but above and beyond any question of interpretation, there is the right of autonomy which Canada is not likely to surrender.

UNITED STATES FINANCE.

When President Cleveland appealed to Congress to authorize a new issue of three per cent. bonds, he felt a doubt whether the authority asked would be granted, and soon after he took the precaution of making preparations for an issue of four per cent. bonds under an existing law. The amount named is $62,400,000. Now that Congress has refused facilities for issuing three per cent. bonds, the preparation for a four per cent. issue will be pursued to the end. The new bonds will bring rather more than $65,000,000 in gold, which will bring up the reserve in the treasury to a little over the legal minimum of $100,000,000. The actual rate of interest will be 3¾ per cent., a marked advance in the rate since the November loan. This depreciation of the credit of the Government is due almost entirely to the refusal of Congress to grant the facilities for which the President asked. At least half of the $65,000,000 of gold to be procured from this loan will come from abroad. The bonds are to be "payable in coin," which may mean silver. The nearer the free silver men are to getting the upper hand, the greater the danger; and they showed themselves, on Tuesday, strong enough to get something suspiciously near to a free silver declaration from the Senate. That bonds "payable in coin" are regarded by investors with more or less suspicion is clear from the statement of the President that three per cent. bonds, payable in gold, would effect a saving of $539,159 a year, as compared with the contemplated issue. The silver men even now do not propose that the new dollars which they wish to coin should contain a dollar's worth of silver. Their desire is, in fact, to palm off a dollar worth less than sixty cents in gold.

"THE LAW'S DELAY" ILLUSTRATED.

We in Ontario sometimes criticise as cumbersome or out of date certain of the methods taken by our lawyers and law courts to arrive at justice. And just now there is a cry for reform of procedure among us. Not without reason, perhaps. But our legal procedure is as a trolley car to an ox cart compared with that of the province adjoining, as an example will serve to demonstrate. At Beauharnois, Que., a trial was held in December and January, which, as a specimen of judicial processes, may well be described as antique. A firm named Boyd & Somerville had had dealings with two banks, and had made certain statement of their financial position. After an examination before a magistrate, which occupied nearly two weeks, the partners in the firm were brought to trial at the Queen's Bench for obtaining money under false pretences.

The jury was half French and half English. The questions had to be propounded to witnesses in both languages—first one, then the other. And the answers were taken down laboriously in long-hand, the earnest cry and prayer of one of the counsel for the services of a stenographer being of no avail. The presiding judge, like Artemus Ward on a certain occasion, "did not think it would be correct," and did not permit the innovation. The case being a reserved one, the judge took notes, and being a man well up in years did not take them very quickly. Nor was it his custom to make long sittings. Four or four and a half hours was his idea of the length of a working day, but he sometimes extended his labors to five hours. If he visited Toronto he would be astounded to find that even the judges of the land pay some attention to the convenience of litigants, and sit, not four or five, but eight or ten hours a day if necessary, and even sit at night to get their docket clear. They regard themselves as the honorable servants of the body politic, not its arrogant masters. The tedium of the mode de Beauharnois may be imagined, but fancy could hardly surpass the reality. Witnesses were many and the evidence was voluminous. The questioning, translating, requestioning, transcribing, condensing, went on from day to day, until a trial which would in Ontario or Manitoba have been disposed of in a week at most, spun out from the middle of one month to the end of another, when the jury rendered a verdict of guilty, with a strong recommendation to mercy.

The trial began in December, and had proceeded for fifteen days when a juryman took ill and various adjournments were made. A day or two after Christmas this man died, and the whole proceedings were begun *de novo*. The conclusion of this labored farce, as we have said, was not reached till 30th January. Judge Belanger, very possibly an honorable man according to his light, seemed a portion of the system which does not mind wasting the money of litigants and the public in thus occupying some forty days in doing what in Ontario would be done in six. The Crown attorney was apparently satisfied with his steady job and did not see any impropriety in it. And the jury, who were locked up last time for twenty-four days, and who are said to have pocketed $106 or $108 apiece for their service and board, probably thought it was a god-send at a dull season of the year.

Such a survival of mediæval customs on the verge of the twentieth century can only be described as a travesty upon judicial proceedings. Fault was found by certain bigwigs with a great writer, who, forty years ago, satirized

British chancery procedure in a memorable novel. Old Krook, the grotesque rag-and-bottle man of Lincoln's Inn, is made to say, in Bleak House: "There's no great odds between my noble and learned brother and myself. They call me Lord Chancellor and my shop chancery, and we both of us grub on in a muddle." The expression does not seem a whit too strong to characterize the procedure of this Quebec court. Any one who has read the account of the trial in the columns of the Huntingdon *Gleaner* will agree with us that steps cannot too soon be taken to avert the waste of public time and public money that such antiquated legal machinery implies.

MUNICIPAL LIABILITY.

We ask the attention of municipal officers to the terms of a decision rendered quite lately by the Supreme Court of New York State in a case against the village of Keeseville, in that State. After describing the two kinds of powers possessed by municipal corporations—one governmental and public, the other corporate or private—the judgment reminds us that as to its corporate powers and duties a municipality is regarded as a legal entity, responsible for its omission to perform its corporate duties to the same extent as a natural person. "Supplying water by municipal corporations is not a public function, it is purely a matter of private business, it is a local matter, exclusively for the benefit of a village, the general public has no interest in it. The defendant receives rent for supplying water. It has control over all the water works employes." * * * Having assumed control of the works and accepted the authority granted, "it became responsible for the proper exercise of such powers."

Discussing the arguments used in the court below as to the burdens thrown on towns and villages by holding them responsible in damages in cases like the present, the Appeal Court thinks it "going too far to hold that where a municipal corporation receives money for the support of its waterworks that it shall in no case be held liable for damages resulting from employing incompetent men or for negligently permitting its waterworks, mains and pipes to become and remain out of repair and unfit for service." It is to be treated, *quo ad* its corporate powers and transactions, exactly as a private person, according to this decision, and we suggest that Canadian town and village corporations take warning lest they be at any time made liable in damages for imperfect waterworks or fire-fighting appliances, just as this village of Keeseville has been held liable. We transcribe further portions of this important judgmen t:

CITIES AND VILLAGES RESPONSIBLE FOR FIRES DUE TO FAILURE OF WATER SUPPLY.

The water to be supplied by the defendant, and for which plaintiff and its assignor contributed to pay, was, amongst other things, for the purpose of extinguishing fires, and it seems to me that if a person can prove that by the wilfulness or culpable neglect of the defendant he was prevented from the use of water for such purpose whereby he has been damaged, that he established a cause for action. The function to be discharged by the waterworks is, among other things, to furnish water to extinguish fire. It is the duty of the defendant to keep them in such condition that they may discharge that function

As we have seen before, when a municipal corporation assumes or accepts powers and duties that are not public in their nature, it is to be treated in relation to those powers and duties the same as a business corporation or a natural person would be. If a business corporation or natural person had a charge for furnishing water and had accepted payment of that charge, we would consider that a contract to furnish water to a person paying, and if that business corporation, by sheer mismanagement and by negligence, had prevented the use of the water it had agreed to supply when it was most needed, the courts I think would hold such a corporation or person liable for the direct resulting damages. The defendant has gone into the water-supply business, conducted for its own benefit and not for the general public, and it would seem to legitimately follow, from the different responsibilities recognized by the courts of the State for the acts done by municipal corporations in the discharge of duties that are public in their nature and those that are only for the benefit of the particular municipality, that the defendant is liable for a breach of contract. . .

This duty and obligation the defendant, by its demurrer, admits that it failed to perform. It is sufficient to say that after a consideration of the views of the courts in the various cases referred to, it seems to me that in a case where the issue is purely one of negligence, the conclusion to which I have arrived as to this complaint is in consonance with the principles relating to municipal liability recognized by the courts of this State.

MORTGAGE LOAN COMPANIES.

The experience of Ontario loan companies for a year or two past has shown them, as a rule, that the rate of interest to be earned in their field is lowered, just as the possible earning power of money in most other directions is lessened. This has led to efforts, more or less successful, to reduce the cost of the money they borrow, both on deposit and debenture, and likewise to the discussion of possible reduction of dividends. For in addition to the lower interest rates, there is the reduced value of real property, both in town and country, to be taken into account. The argument has been heard that if such companies can no longer produce the usual dividends for shareholders by lending in Ontario, there is still the increasing field of Manitoba, where lending rates are larger, and where in 1894 payments of interest have been good. This is well enough as far as it goes, but it does not go very far. It is useless to fight against a universal tendency towards reduced interest earnings. The more prudent plan is to acknowlege the drift of the times and be prepared to reduce dividends when it is found they can no longer be earned. The pressure may be expected to come hardest upon those companies which pay the largest dividends, but these are at the same time among the oldest and have the largest accumulations to assist earnings. It seems indeed to be the policy of the loan companies generally, and it is a good one, to maintain their reserves by all means. The feeling is general, too, we believe, that the present reduced scale of earning is likely to continue, and that it would be folly to continue paying a rate of dividend that is not earned.

The report and statement of the Canada Permanent Loan Company show fully and with much clearness the character of the year's business and the position of the institution. With mortgages and other securities to the aggregate of $11,792,000, it has earned gross $684,271. After paying all expenses, municipal tax, and the dividend of 10½ per cent. on the paid capital of $2,600,000, there remains $111,000 at contingent fund, as against $104,000 the year before, the reserve fund being $1,450,000. It is to be noticed that this report says that "after writing off all actual as well as probable losses," the net earnings were $284,300. This thoroughness may be commended to some other companies. It is the true policy.

In addressing his shareholders, Mr. Mason, of the Canada Permanent, referred to the conditions of depression, which are world wide, and reminded them of the present period of stringency and decline in land values that the company had passed through, instancing the crisis of 1857. But he suggests that the normal conditions are likely to return to us. The present, he wisely says, "is a time for retrenchment, for the practice of industry and thrift, for the avoidance of all speculative expenditures, whether public or private, for adopting the most improved methods in agriculture, as well as other branches of labor, and for the legitimate development of the known resources our country is so richly endowed with."

There is no uncertain sound as to the future in his address. Canada, he says, like all new countries, will continue to be a borrower. And there will continue to be, as there have been these many years, sound companies borrowing money in Britain and lending it here. The margin between the borrowing and the lending rate, and the earning power of the capital stock and accumulated profits, will enable such companies to pay a reasonable return to their shareholders.

The managers of other loan companies would, we should think, be glad to be possessed of the secret by which the management of the Imperial Loan Company have arrived at the earnings for 1894, shown in their statement. A reduction of $1,000 in expenses of management is gratifying, but how the securities of the company have been made to earn seven per cent. in the year just past seems a puzzle. Both the report of the directors and the address of the president urge, in view of the existing financial depression, "the absolute necessity of extreme caution in all its [the incoming board's] business transactions." This warning might well apply to the impolicy of taking credit for a scale of earnings which may not be realized. The "great fall in rents obtainable for houses and store property, and the continued depreciation in the value of farm property," are emphasized by the president. But the figures submitted by the Imperial go to show that it has risen superior to all these conditions in the year 1894.

SPRING DRESS GOODS.

The very early spring will, if we be not deceived, witness an active demand for a line of pure wool small check dress goods in French and German weaves. Purchases made so far have been principally in black and white, but there is also a tendency to browns. Prices range from 25c. to $1.

Serges will probably win back their old place in the popular estimation. Goods for 1895 are very similar to those of last year, perhaps with a little clearer finish and greater variety of quality. Navy blues and browns will continue most favored.

Covert coatings were a big thing last season and are full of promise for the season of 1895. They are used largely in tailor-made costumes. Manufacturers have attempted to imitate these goods in cheaper textures, but their efforts have been attended with but doubtful success. Various shades of brown, from mid to light, greys and fawns, are the leading colors.

All grades and styles of crepons will be seen, towards the mid-summer, and if we are to judge by the quantity which importers have brought from abroad, we would class these goods among "the leaders." You may purchase them at 25c. or 50c. a yard, if you will, with various grades offered at intermediate prices. They are displayed in nearly all the shades. Some very handsome combinations in silk figures and stripes will be features of the season.

It is improbable that the spring of 1895 will develop any very marked styles. Popular taste promises to distribute itself pretty well over the whole range of goods which manufacturers offer for the selection of the public. But one thing is almost a certainty, small designs will reign, if not supreme, yet with powerful sway. Small checks especially promise to be good sellers.

The cheap fabrics from Bradford up to, say, 20 cents, vary but little from year to year, and there is scarcely any difference between the goods of the present season and that just past. Buyers are almost unanimous in predicting prominence in plain goods next spring, and for this reason cashmeres are bought rather more largely than usual. Good values are offered, and purchases made by the retail trade have been occasioned more by this fact than by any belief in the coming popularity of cashmeres.

Domestic manufacturers are not "out of the swim" this season, and have placed some very creditable productions upon the market. A line of 54-inch Canadian tweeds, in blacks, browns, and navy blues, have sold well. These goods are shown in the all-prevailing small checks.

With the heat of July and August duck suitings will return. While these take a more prominent place in the wardrobe of the habituants of summer resorts, they are by no means unsuited to street wear, being cool and comfortable, carrying with them as they do a suggestion of shade. The ducks which manufacturers have prepared for the summer of 1895 are more diversified than those of a year ago; the designs have been improved, and their popularity ensured.

TORONTO TRADE FIGURES.

We have received the Board of Trade bulletin for January, showing totals of foreign imports and exports. Dutiable goods were in value $1,265,561; free goods, $273,090; coin and bullion, $313,096; making the total imports for the month $1,851,747. In the previous January both free and dutiable goods were less in value, but there was $300,000 less coin and bullion. We note below as usual the principal items of import, and compare them with January, 1894:

IMPORTS.

	Jan., 1895.	Jan., 1894.
Cotton, and manufactures of	$428,588	$225,582
Fancy goods	68,473	124,269
Hats and bonnets	22,582	25,810
Silk, and manufactures of	65,016	99,410
Woolen manufactures	218,353	360,428
Total dry goods	$803,012	$835,499
Brass and manufactures of	6,275	4,420
Copper	417	709
Iron and steel	66,734	77,211
Lead, and manufactures of	2,461	3,835
Metal and composition	6,453	6,949
Bicycles, etc	5,409	11,452
Total metal goods	$87,749	$104,576
Books and pamphlets	20,519	26,914
Coal, bituminous	17,471	21,629
" anthracite	54,004	74,498
Drugs and medicines	17,657	15,447
Earthen and chinaware	15,853	16,630
Fruits, green and dried	18,120	30,277
Glass and glassware	14,238	23,543
Jewellery and watches	15,045	11,488
Leather and m'frs of	17,231	13,409
Musical instruments	8,250	10,020
Oils of all kinds	10,393	16,032
Paper and manufactures of	9,004	25,267
Seeds, field and other	11,084	.....
Wood and manufactures of	7,882	11,448

In free goods the principal decline was in hard coal and tea, other items not showing noteworthy difference from the former January. Coin and bullion, as we have said, was a large item last month, viz., $313,096. We shall now examine the exports, the total of which was last month $415,581, a great increase over the previous January. This is to be accounted for by a pronounced increase in wool ($45,459) and a large export of dead meats, $113,421. Barley also shows a good increase. Manufactures are comparatively trivial. The following is a comparative list:

EXPORTS OF CANADIAN PRODUCE.

Produce of	Jan., 1895.	Jan., 1894.
The Forest	$ 3,332	$ 1,813
" Field	176,277	160,328
Animals, etc.	173,837	70,789
Manufactures	46,451	36,498
Total	$399,897	$269,428

WINNIPEG BOARD OF TRADE.

The presidential address of Mr. Scarth before the Winnipeg Board of Trade breathes in its concluding portion the true spirit of self-reliance and progress. Alluding to the commercial depression as it affects Manitoba, he reminds his hearers that "it is not due to anything inherent in the province. It is world wide. Low as prices are here, some of our neighbors are much worse off. Nebraska has appealed to other States for aid to keep its people from starvation." Granted that the low price of grain is discouraging, "depression, low prices, hard times, are not an unmitigated evil. They teach reduction of expenses and curtailment of credit." And this lesson the farmers and merchants of Manitoba have accepted," and will come out all right."

Looking hopefully to the future, Mr. Scarth sees gratifying signs: new elevators about to be built; the growth of the cattle trade, and shipments to Europe increasing rapidly; the fisheries of Manitoba developing; the province producing bacon and hams, and new markets offering for her dairy product; immigrants coming steadily in from the United States and taking up Manitoba land. He refers to the importance of our Sault Ste. Marie Canal and the deepening of the St. Lawrence canals now in progress, and affirms the unanimous belief of the council "that the parties selected to make the standards for this western country should be Manitobans or Northwesters, who grow, handle, and ship the grain."

We should be glad to make, did space permit, some extended reference to the voluminous report of the council, which deals with some twenty-four different topics. An important one is that of the Freight Rate Commission, before which Mr. Ashdown laid, on behalf of the board, data "showing clearly that the Canadian Pacific Railway rates on this Western Division are largely in excess of those prevailing on their Eastern Divisions and other roads."

By resolution the board instructed the council to appoint a committee to enquire into the best means to be adopted to secure the settlement of the vacant lands in the vicinity of Winnipeg.

The election of officers for the year 1895 resulted as stated below:

President—R. T. Riley.

Vice-President—F. H. Mathewson.

Treasurer—Andrew Strang.

These three by acclamation.

Secretary—C. N. Bell.

Council—D. W. Bole, S. A. McGaw, K. McKenzie, G. F. Stephens, W. B. Scarth, Hyman Miller, F. W. Stobart, J. H. Ashdown, W. Georgeson, T. A. Anderson, J. E. Steen, J. Y. Griffin, D. K. Elliott, F. W. Thompson, A. B. Bethune, G. H. Webb.

Board of Arbitrators—K. McKenzie, E. L. Drewry, G. F. Galt, G. J. Maulson, S. A. D. Bertrand, J. H. Brock, R. T. Riley, S. Spink, J. Galt, W. Hespeler, J. E. Steen, W. B. Scarth.

CHATHAM BOARD OF TRADE.

The annual meeting of the Chatham, Ont., Board of Trade was held on February 7th, Mr. P. D. McKellar, president, in the chair. The secretary reported a membership of 118, only 23 of whom had paid their fees. Alderman Marx and Mr. Martin brought forward the incorporation of Chatham as a city, and it was discussed, with the result that the proposal was laid over till next meeting. Mr. Scholfield then paid a tribute to the retiring president, and moved, seconded by Mr. Waddell, that Mr. Archibald Lamont be the president for 1895, which was unanimously carried. Mr. John Waddell was then chosen vice-president and Mr. T. Scullard secretary-treasurer. The following members were appointed a council to act with the foregoing officers: Dr. Holmes, P. D. McKellar, W. D. Sheldon, J. P. Dunn, S. T. Martin, R. Martin, H. Malcolmson, J. Morton, J. E. Thomas, G. P. Scholfield, D. Glass, N. H. Stevens and Manson Campbell.

The following were appointed members of the board of arbitration: N. H. Stevens, S. T. Martin, H. Malcolmson, J. Morton, D. R. VanAllan, J. B. Stringer, T. Stone, J. Piggott, M. Campbell and A. St. L. McIntosh.

OWEN SOUND BOARD OF TRADE.

The annual report of the Owen Sound Board of Trade was presented at the meeting held on February 1st, Mr. Kennedy, the president, in the chair. Among the statistical information contained therein is the aggregate of tonnage arriving and departing in 1894, which is shown to be larger than in 1892 and smaller than in 1893. The C.P.R. traffic at that point was much larger than in 1893; and the G.T.R. figures will be included in this year's report, that road having been opened to the Sound for only four months of 1894. The report concludes: "Our industries in general have had a fairly prosperous year."

Mr. Kennedy's presidential address touches upon the dredging of the harbor, the probable increase of water borne traffic and lumber handling this year, the opening of the Grand Trunk system to the Sound, the fairly good condition of the manufacturing industries of the town, the effect of an Insolvency Act, etc., etc.

One subject he dwells upon in terms which we reproduce in full. Other Boards of Trade should take it up: "To my mind it is unfortunate that so many persons enter into the buying and selling of goods. There are certainly more engaged in this way than circumstances demand, and the prices of goods are not materially lowered by the presence of very many of them in the mercantile arena, and it is merely a question of time when the weaker and those less fitted for such a calling shall have to go to the wall." [We suspect that the word "not" in this sentence is an error.—ED. M. T.]

PEOPLE'S BANK OF HALIFAX.

The report of this bank, to be submitted to the annual meeting of shareholders on Tuesday next, has been issued. The earnings for last year were sufficient, after writing off $18,000 bad and doubtful debts, and paying the expenses of opening and equipping new agencies at Levis, Lake Megantic, and Canso, to pay the usual dividend and add $15,000 to Reserve, and carry $6,919 forward. The statement indicates a growth in deposits and circulation, also an increase of current accounts. It is noteworthy that this institution is considering the formation of an officers' guarantee fund, a grant toward which is likely to be asked next year. The death of the former president of the bank, Mr. A. W. West, is referred to in feeling terms by the report.

HALIFAX BANKING COMPANY

Comparing the figures of this corporation at the close of last year with those at close of 1893, it is seen that the total assets are increased by $300,000. An increased proportion of the bank's assets is in the shape of readily available securities, among which we observe $114,500 in United States Government 5 per cent. bonds. Circulation is maintained at about the same point as twelve months previously, while deposits are increased. The usual dividend was paid and a round amount added to the Rest, which now amounts to $275,000, besides which there is a balance of $7,687 at the credit of profit and loss

RETAILING DRY GOODS.

The stock of silk in the general stores of Lyons on January 16th last was 7,117 bales, against 7,667 bales at the same date in 1894, and 8,190 bales in 1893.

Turquoise, deep-rose and azure are the three leading shades in velvet. The latter two sell well in Paris, while turquoise is good on this side of the Atlantic, where it is scarce. Holders of turquoise velvet can easily obtain an advance in the price.—*Economist*.

The Brookfield *Republican* tells this story of a Clearfield preacher who incautiously said to his tailor: "When I want a good coat made I go to Philadelphia; they make them there." Before leaving the shop he inquired, "By the way, do you attend my church?" "No," replied the tailor. "When I want to hear a good sermon I go to Philadelphia They preach them there."

Speaking of waiting for business, the New York *Recorder* remarks that "the days when you could open a bicycle store and wait for the people to come to you, with a fair prospect of them coming, have passed away, and they won't come back." They won't come back, because they don't pay. There are a few lines of business in which by reason of etiquette the waiting plan is still pursued; but as for trade in any general sense, it can't be got in these days without advertising for it.

Onr remarks make some weeks ago as to the advisability of conducting our import trade through a few strong, well-conducted houses, were not inspired by a desire to uphold the interests of any particular class, but were made in the interest of the dry goods trade of the Dominion, retail and wholesale, alike. They, however, appear to have aroused the opposition of a journal which is very apparently not in sympathy with the Canadian wholesale trade. The following from an English correspondent of the *American Carpet Trade* is interesting as bearing out our position on this matter: "Twenty-five years ago comparatively few British manufacturers or merchants in this country cared to give credit to Canadian buyers, as the business was considered extremely risky. The trade was confined to a few firms who made it a specialty and satisfied themselves as best they could concerning the reliability of the houses they dealt with. Most of them made money, for besides charging 5 per cent. for the use of their names, a commission of 2½ per cent. was stipulated for from the manufacturer who sold the goods. This was to the merchant equal to 7½ per cent. on a four, five or six months

bill; but as a set-off to this, failures were frequent, and some of them particularly disastrous. All this has now changed. The Canadian buyer is as assiduously cultivated by merchants and agents for manufacturers, with the result that some of them have been severely bitten during the past few years. This may be largely accounted for by the references which are given from time to time. Many British merchants, eager to do business, allow Canadian buyers to refer to them, in the hope that their position with the buyers will thereby be strengthened. One large London firm, well known to many readers of *The American*, has been specially culpable in this respect during the past ten years. I will give a few instances. A house they had never done any 'direct' business with they declared themselves ready to credit 'direct.' As a result, the Canadian firm (who were actually insolvent at the time) obtained credit all over England, and in less than two months after the buyer's departure from these shores they had made an assignment in favor of a preferential creditor *in Canada*. In another case, two Manchester firms gave a good reference for a certain house, saying they had always paid promptly on the usual 2½ per cent., 60 days terms, and so on. When pressed as to how long they had done business with the firm, they replied, 'Twelve months,' and they had had two transactions, the amount involved in neither case exceeding £1,000." To encourage the appearance of the Canadian retailer abroad may tend to bring discredit upon our trade. For while the majority of our retail houses are comparatively strong and thoroughly reputable, there are some who do not possess these qualities, and English merchants are not in a position to sift the bad from the good.

FOR GROCERS AND PROVISION DEALERS.

Hay is unprecedentedly low in parts of Quebec. The best quality, pressed and delivered, only fetches $5 per ton at St. John's.

Merchants of New Westminster, B.C., are unwilling to accept an early closing agreement, and their clerks in consequence must continue to work 14 to 16 hours each day.

At Perth an engine has been fitted up in the premises of John Dettrick, who is embarking on what the *Expositor* calls "the hashing industry." This suggests mince meat, sausages and all that.

The importation of German granulated sugar into St. John was not an unqualified success. The sugar did not arrive in first-class condition, and the purchases made on a falling market did not yield the expected profit.

The alsike clover market is depressed. The season opened with farmers receiving $6 a bushel for their alsike, but prices have gradually fallen to $4.75 and $5 per bushel, or more than a dollar less per bushel than the price of red clover.

The egg market has experienced quite a "boom" by reason of the excessively cold weather. The cold, extending over the greater part of the United States, shut off the supplies of eggs from New York and other large American centres. Canadian limed eggs were called into request and sold in New York at from 20 to 22c. per dozen. This price should be remunerative to the shipper, but as a matter of fact these shipments were not attended by satisfactory profits. A duty of 3c. per dozen must be paid, while New York buyers are very strict in culling, and exporters must figure on losing from two to four dozen on each case. City limed eggs in Toronto are quoted at 14c., while country limed bring 12 to 13c. per dozen.

As the export of hay from Montreal during the past two years has assumed very large proportions, the following particulars concerning the business done with Great Britain will be found interesting and instructive:—

COUNTRIES FROM WHICH HAY WAS IMPORTED INTO THE UNITED KINGDOM IN 1894, 1893 AND 1892.

	1894. Tons.	1893. Tons.	1892. Tons.
United States	152,423	101,132	11,538
Russia	28,832	27,694	2
Canada	28,711	63,175	13,120
Holland	13,540	28,332	19,403
France	6,206	1,234	3,526
Denmark	5,042	4,252	2,291
Chili	4,070	3,614	346
Algeria	3,951	731	3,590
Belgium	3,887	3,436	90
Norway	2,969	1,674	2,225
Germany	1,929	2,188	4,290
Other countries	2,664	25,588	816
	254,214	263,050	61,237

An estimate by Cincinnati *Price Current* places the number of hogs packed from Nov. 1st to Feb. 6th as follows:

	1894-95.	1893-94.
Chicago	2,020,000	1,415,000
Kansas City	735,000	468,000
Omaha	445,000	295,000
St. Louis	309,000	204,000
Cincinnati	210,000	163,000
Indianapolis	274,000	241,000
Milwaukee, Wis	137,000	19,000
Cudahy, Wis.	162,000	97,000
Cedar Rapids	123,500	105,700
St Joseph, Mo	116,500	96,500
Sioux City, Iowa	122,000	75,000
Ottumwa, Iowa	129,000	83,000
Cleveland, Ohio	165,000	100,000
St. Paul, Minn.	152,000	102,000
Louisville, Ky	126,000	90,000
Total, all points	5,840,000	4,060,000

FOR THE SHOE MAN.

We are told that Mr. Joseph Beaupré is about to begin the manufacture of hand-made footwear on an extensive scale in the city of Quebec.

There will be many novelties for the spring and summer trade The introduction of linen footwear has given the manufacturer a great opportunity to diversify his handiwork in points of weave, texture and color.

Colored footwear did not come with a rush. It fought its way into the market in opposition to the prejudices of the trade and the public. On this account we may expect its success to be the more abiding. Certain it is that shoemen will carry larger supplies of colored footwear than ever before.

Beware of the ultra-fancy shoes. You must, of course, carry a supply of greater or less magnitude, according to the size and character of your trade. But place your orders sparingly for these goods. A shoe to sell must have something more than appearance in its favor. Fit and durability are two essentials

Retail dealers say they can never get good window effects with large sizes of shoes. Customers will admire a small, narrow shoe and come in and buy three sizes larger. In men's wear a 7½ B last makes the best appearance in a window. All the sizes are proportioned from the same model, but somehow a No. 9 shoe in men's shoes looks ugly, while exactly the same shoe in the 7½ size is attractive.—*Shoe and Leather Review*.

Variety is the distinguishing feature of the modern shoe trade. "Something new, something new," is the cry from the retail trade, and designers are at their wits' end to keep up with these demands. An American manufacturer offers fifty different shapes of toes in women's shoes alone; not long ago a half-a-dozen was thought to be sufficient While this tendency is not without its advantages to the retailer, it thus raised the cost of trade, in that it takes no small fortune to carry a moderately complete stock.

Observation of shoes in service confirms the opinion that they do not wrinkle as much at the ball joint as formerly. Of course no shoe can be absolutely smooth at this point when the foot bends in walking While the modern last has much to do with this improvement, the many widths now made help to obviate the difficulty. A shoe too broad for the foot is pretty sure to show these folds in time, even when the foot is at rest.—*Shoe and Leather Reporter*.

Goloshes, says the New York *Herald*, are very properly regarded with holy horror for anyone, except to cover evening shoes or pumps Ordinary walking boots exposed one to sudden and awful faults. It was in such a dilemma that a Montreal friend came along and showed me a wrinkle for winter footwear that has only to be known to be generally adopted by the dandy. He had on what looked to be varnished boots and brown cloth "spats," or gaiters, as Americans call them. But his apparently varnished boots were nothing but a very thin pair of rubbers, perfectly plain, with toes that fitted the light pair of walking boots over which they were drawn. The spats covered up the place where the boots left off, and the rubbers began and completed the neatest, warmest, and driest winter footwear that I have ever seen—one that won't slip, and one, too, that can always be kept clean and shiny by simply wiping the rubber off.

"Why do you not lower the price of hides," was the query we put to a hide merchant the other day. "Are they not out of all proportion to the price of leather?" "Granted," he replied. "Taking quality into consideration they are several cents higher than in September last, and when tanners are getting the worst of it at both ends of the market, no wonder they complain. But what are we to do? Our stocks do not accumulate. All offerings are readily taken at quotations. Exports to the United States have placed this market in a much better position than it occupied a year ago; and although lower prices in the near future are quite possible, tanners would make more headway by attempting to better their position on the selling market,

FIRE INSURANCE.

The statistics as to causes of fires offered yearly by the inspector of the London Mutual Insurance Company, which does business all over Ontario, form an interesting contribution to the literature of the subject. The losses of this company for the year last past amounted to $117,640, of which more than one-half ($62,120) were upon outbuildings and contents; $54,006 on dwellings and contents. The largest item in the list of causes is $34,144, attributed to defective chimneys, stovepipes and sparks. Sixty fires, swallowing up $28,202, arose from unknown causes, while lightning burned or damaged ninety-eight buildings, occasioning a loss of $21,740, and killed animals, $2,758. Other causes are: incendiarism, $9,220; lanterns and lamps, $8,388; matches, $3,276; tramps, $3,509; steam threshers, $2,485. Mr. Leitch asks the company's agents to inspect closely all chimneys and pipes when taking risks, adding that since the rules in this respect have been strictly carried out in cheese factories not one loss has occurred in 1894, where previously there were many. The number of losses inspected and reported on was 520, of which 498 were adjusted. The company's losses on commercial risks were moderate

MERCANTILE FIRE INSURANCE COMPANY.

A considerable increase of business is shown by the Mercantile Fire Insurance Company, the total in force at the close of last year being $17,678,000. The premiums on this and fees were $193,279 gross. The amount of re-insurance given at $14,851.62 being deducted therefrom, leaves the net premiums $178,427.92. Thus the proportion of losses to premiums was a little more than 61 per cent. Losses were heavy in 1894. We find that $92,940 had been paid policyholders for that year, and that $16,037 of claims were still unadjusted at date of statement. The company made a fair profit out of the year's business, and increased its assets from $152,000 to $167,000. As a consequence of the increase of premiums over those of 1893, an increased re-insurance liability is shown. The former board of directors is re-elected, and the management remains in its former hands

PATENT RECORD.

The following list of United States patents granted to Canadian inventors, January 15th, 22nd and 29th, 1895, is reported by James Sangster, Buffalo, N.Y.:

Charles R. Austin, New Westminster, Canada, machine for capping cans.

Alexander Barhite, Toronto, Canada, assignor to J. N. Barhite, Buckeye, Iowa, horse-detaching device.

Pierre Dansereau, Montreal, Canada, roller bearing.

Horace O. Farrar, assignor of two-thirds to G. H. Winegar, Oakland, Me., and T. P. Curtis, Newton, Mass., machine for beaming warps

Robert C. Moran, assignor of one-half to A. L. Coutts and R. B. Robinson, Sherbrooke, Canada, apparatus for steaming and sponging cloth.

Martin V. B. Nichols and J. A. Fraser, Port Arthur, Canada, trolley-catcher.

John H. Thamer, Roseville, Canada, adjustable bag-holder.

William Bentley, Lethbridge, Canada, sash-fastener.

William P. Cole, Montreal, Canada, machine for preparing shade-cloth.

Thomas B. Dowsley, Owen Sound, Canada, carriage-spring.

William T. Lacon, Toronto, Canada, life-saving guard for cars.

George W. Mitchell, Lunenburg, Canada, lubricator.

Thomas Parker, assignor of three-fourths to J. D. Wright, F. F. Stuart and A. M. Colquhoun, Toronto, Canada, shipping device for bricks.

William A. Phillips, Listowel, Canada, reference-book holder.

John Youngson, Hamilton, Canada, automatic fire-escape and elevator.

William G. Trethewey and R. H. Brett, Mission City, Canada, pipe or hose coupling.

INSURANCE ITEMS

Owing to the resignation of Mr. C. D. Chitty of the general agency in Ottawa of the North American Life Company, the appointment has been conferred upon Mr. A. H. Fair. We are told by those who know him that Mr. Fair has a number of the qualities requisite for a successful life insurance man. The promotion he has received thus early in life tends to show that he is appreciated.

To be successful, a life agent must have tact He must know not only how to talk, but when. Many a good application has been lost through bad judgment in this direction. Never attempt to talk insurance to a man when he is pressed by the immediate demands of his business Don't labor with him too far when he is in a sour mood Catch him, if you can, in a leisure moment and in an agreeable state of mind, and then get in your work.

The Philadelphia fire insurance patrol reports that the fires of 1894 in that city were 1,632 in number, causing a loss of $1,209,000. As to the causes of these fires, they were unknown in more than two hundred cases, resulting in fully one-half of the loss; 329 were caused by petroleum; 170 by defective flues; 147 by stoves of various kinds; 169 by matches 70 by gas jets 55 by fireworks 46 by rubbish, 35 by smoking. The other causes enumerated are candles, electric wires, friction, steam pipes, and incendiaries.

The following experience is related by Secretary Barbour, of the Cambridge Mutual: "I was adjusting a claim a little way out of Boston," said he, "and on the list submitted to me by the owner of the damaged house was this item: '8 tooth brushes at 25c. each—$2.'" "How many children have you?" asked Mr. Barbour. "Five." "Five brushes for the children, and one for your wife and one for yourself. That makes seven in all. How do you account for the eighth?" The man hesitated; then he said: "That one is—for company, sir!"

The annual meeting of the Steam Boiler and Plate Glass Insurance Company of Canada was held in London on February 5. The directors submitted the report of the business transacted during the year, which was satisfactory to the shareholders, the business in both branches showing steady progress. The company sustained no loss in the steam boiler branch of its business. The paid-up capital of the company has been increased to $40,100, and its powers enlarged by Act of Parliament. The following gentlemen now constitute the board of directors, which has been increased from five to nine: E. Jones Parke, Q.C., F. A. Fitzgerald, Hon. David Mills, T. H. Purdom, Peter Birtwistle, John McKee, Samuel Wright, London; John Morrison, Toronto, and Fred Stansliffe, Montreal. At a meeting of the directors held afterward E. Jones Parke, Q.C., was re-elected president, F. A. Fitzgerald vice-president, and Samuel Wright inspecting director.

MUNICIPAL MEMORANDA

An eastern paper says that Mr. Peter Ryan, representing a syndicate of Toronto, has secured from Mr. Viau, of Hull, the franchises for the proposed electric railway from Hull to Aylmer, and also for the electric lighting of the city of Hull for fifteen years.

A meeting of the Moncton Gas Light and Water Co. was held on 7th inst. A large majority of the total stock was represented. The amount offered by the city for expenses was accepted, as recommended by the directors, and the property will be transferred about the first of March.

The by-law to grant $30,000 to the Jenckes Machine Company was voted upon by the ratepayers of Sherbrooke last week. The by-law was carried by a large majority, there being 67 votes, representing assessments of $351,395 in favor, and two votes, representing assessments of $6,000, against it.

The authorities of the town of Chatham, Ont., appear to differ in opinion as to whether that municipality has a surplus. To settle the matter, Mr. Schofield, manager of the Standard Bank, has been asked to investigate the financial situation as disclosed by the Finance Committee, the treasurer, and the auditors, and will, by and bye, give a written opinion thereon, to be presented to the city council.

The fire which swept Coaticooke the other day was a serious blow to the town. Many of the buildings destroyed had been recently built to replace those burned four years ago. Probably now on re-building steps will be taken to provide better safeguards against fire. An ordinance prohibiting the storing of explosives within the limits is spoken of. The straightening of Child st. is already under discussion. Nearly all the business men are again located; some of them are in rather cramped quarters.

On the 5th instant the inhabitants of Knowlton, Que., voted on the by-law empowering the council to borrow $16,000 for putting in waterworks and a system of sewerage. The vote was close, but the by-law was carried by a majority of thirteen. Property owners on the outskirts of the village opposed the scheme on the ground that from their situation they could not receive any benefit, while they would be compelled to bear their share of the cost of the system for the central and populous part of the village.

In the village of Granby, Que. at the regular meeting of the council held last week, Mr. S. H. C. Miner was appointed mayor. A notice of transfer of all rights, titles, etc., held by the heirs of the late Jas. Peyton, in the water works, to the Sun Life Insurance Company, with privilege of redemption under certain conditions, was read at this meeting. The estimates, plans, etc., for a system of sewers for the village were submitted to the council and a committee appointed to examine and report upon the same at the next regular meeting

GET RICH QUICK SOCIETIES.

The Insurance Commissioner of California, in his report for the year 1894, denounces in unsparing terms the fraudulent concerns that swindle the public by their "get-rich-quick" schemes. He says:

The State is overrun with fake secret societies and wildcat fraternal organizations. In this city can be found a set of men who have organized society after society, and who in a long career have perhaps never met a death loss in one of them. Other States are afflicted in the same way. I traced the footsteps of one of these fellows through three States, and through as many State organizations, and he used the same literature in each, with the exception of a change of name, officers and location. The "Children of Zebedee" followed fast upon the "Sons of Pindu," the "Knight of the Golden Shore" pressed hard upon the "Worshippers of the Golden Gate," the "Supreme High Chancellor" vanished easily into the "Most Illustrious Benefactor," and the "Grand Admiral" soon eclipsed the "Worthy Overseer." These professional organizers are past masters in the use of seductive literature, and adepts in persuading good men to loan the use of their names to nefarious purposes.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Feb. 14th, compared with those of the previous week:

Clearings.	Feb. 14.	Feb. 7.
Montreal	$ 8,818,495	$10,667,160
Toronto	4,521,813	8,360,870
Halifax	954,132	1,233,261
Winnipeg	642,440	730,687
Hamilton	626,079	677,532
Total	$15,562,959	$21,669,510

Aggregate balances this week, $2,474,903; last week, $2,943,939.

—A noticeable feature in the report for 1894 of the Economical Mutual Fire Insurance Company is the smallness of the balances due by agents. In 1893 they were in all only $374, and last year they were $327, while the aggregate premium receipts were $17,000 greater There is a lesson here which might well be taken to heart by larger companies, which year by year return many thousands of dollars as balances due by agents. Something of this result, doubtless, arises from the character of the agents employed, but there must also be firmness on the part of the head office in insisting upon prompt remittance. The Economical did a business last year increased by more than a million dollars at risk over 1893, and shows net assets $11,555 larger, while its losses were $5,000 less, amounting in all to $52,026. The company shows cash assets of $96,262, mainly mortgages and cash in bank, and has $204,925 in net premium notes.

—The returns of revenue and expenditure of the Province of Nova Scotia for the fiscal year ended with September, 1894, were brought down on Monday last. The total revenue of the province is $888,213, of which $242,657 is derived from royalties and other payments to the mines department, $145,685 is derived from the Government railways, nine-tenths of it by the Western Counties road. But off this last item must come $50,000 refund of a loan of 1883 credited to capital account. The Nova Scotians get $54,833 revenue out of their asylum for the insane, and then there is the subsidy from the Dominion, $432,813. The main items of expenditure were for roads and bridges, $97,892; steamers and packets, $29,771; public charities, $123,604; education, $221,173; debenture interest, $122,092; agriculture, $20,041. The total liabilities of the province at the end of the fiscal year amounted to $3,167,493; assets were $1,358,182; showing the net debt to be $1,809,310.

—The prices of coal at Halifax, on February 8th, are given as under by the Canadian *Colliery Guardian* of that city:

SOFT COAL.

*Sydney	$5 50 per chaldron	= $3 66 per ton.	
*Reserve, Victoria, Glace Bay	5 00	"	= 3 33 "
*Old Bridgeport, Gowrie	5 00	"	= 3 33 "
*Slack coal	3 50	"	= 2 33 "
Acadia and Drummond, nut net	4 80	"	= 3 20 "
Albion, round	5 00	"	= 3 33 "
Drummond	5 25	"	= 3 50 "
Acadia	5 50	"	= 3 66 "

Hard coal—egg and nut, $5.25; stove, $5.50.

*These prices are subject to 25 cents per ton or chaldron discount for cash in 30 days.

—Owing to the abnormal condition of the London money market the profits of the joint-stock banks for the latter half of 1894 have been very largely cut down. With only two exceptions, these banks have been compelled to reduce their dividends. Certainly, says the *North British Economist*, lending money, as they have been obliged to, at from ¼ to ½ per cent., does not leave much profit, and in all probability it will be some time yet before business revives sufficiently to bring about a change to any extent. "We are afraid, therefore, that shareholders need not look for any increase in the distributable revenue; and if business does not improve, a still further reduction of dividend will be inevitable."

—Hamilton should be thankful for her blessings, one of which is comparative immunity from fire for a long period. But this need not make her proud—a conflagration may come at any time. The chief of the Hamilton fire department has published a list of fire losses in that city for years past, and the showing made is that in fifteen years Hamilton has lost by fire $741,000, which is equal to only an average of $49,400 a year. In 1885 the loss was $93,000, in 1881 it was $98,000, in 1893 it was $103,000, while last year it was only $25,922. To the sum last mentioned the fires of July contributed $8,914.

—In an article on the credit of the United States in the February issue, the *Banker's Magazine* has this to say of the Government of that country: "If any of the mercantile agencies should make a report upon the U. S. Government in the same matter-of-fact, business-like way that they report upon the condition of a private firm or corporation, the statement would be something like this: 'A concern of unlimited credit, boundless resources, small funded debt, large demand obligations, and very small cash assets.'"

—The conditions of the timber trade in Great Britain are not favorable. Last year's trade has proved disappointing; although the volume was considerable, neither importers nor shippers made commensurate profit. Farnworth & Jardine's circular of 1st inst. says stocks of all kinds of wood are ample, in some cases much too heavy. The building trade has been inactive throughout 1894, and there is but little indication of briskness of demand for lumber at present. Shippers from foreign countries are warned therefore not to further overload the market.

—The last financial report of the Province of New Brunswick is for ten months, instead of twelve, by reason of a change made in the date of closing the accounts. The revenue of the period was $619,290, while the expenditure was $661,520. It is possible that these proportions would be altered by the inclusion of twelve months' transactions, instead of ten. The debt of the province has been increased somewhat and is now $2,670,000. We are not yet furnished with the items of revenue and expenditure.

—National banks and savings banks in Detroit, to the number of twenty-three, have issued a circular giving notice that from and after the first day of February, they would allow interest on balances due from them to banks and bankers at the rate of 2½ per cent. per annum. This step was deemed advisable, in view of the difficulty of obtaining good loans at rates which justified the continuance of the rate of interest previously paid on balances.

—An official announcement has been made that owing to long-continued ease in the money market of London, and the low return on the funds kept by them there, the Scottish banks have after several meetings concluded to reduce their deposit rate to 1 per cent as from 1st February. On the other hand, they have lowered their rates of discount on ordinary mercantile bills by ½ per cent., the rate now ranging from 2 to 3½ according to the currency of the bills.

—According to the compilation of a New York authority, the fire losses in the United States last year were only 128 millions of dollars. The word "only" is used comparatively, for in 1893 they were 156 millions, and in 1892, even, 132 millions. Ten and a half millions of dollars a month gone up in smoke is quite serious enough a loss to the country.

—A branch of the Merchants' Bank of Halifax has been opened at St. John's, Newfoundland, under the management of Mr. F. H. Arnaud.

—For additional reports of companies, see page 1,078 and 1,055 of this issue.

Meetings.

CANADA PERMANENT LOAN AND SAVINGS COMPANY.

The fortieth annual general meeting of shareholders of this company was held on Wednesday, the 13th inst., in the company's office building, Toronto street, Toronto, the president, J. Herbert Mason, Esq., in the chair.

The report of the directors for the year 1894 is as follows:

REPORT.

At the close of the fortieth year of the company's history, the directors have pleasure in laying before the stockholders a duly audited statement of the transactions of the past year, and of the present position of the company, as exhibited in the accompanying balance sheet.

As anticipated, and in common with nearly every other kind of investment, the business of the past year has yielded less profits than formerly. This results from the well-known conditions referred to in the previous year's report.

After providing for interest on borrowed money, for all expenses, commissions and other charges, and writing off all actual as well as probable losses, the net earnings amount to $284,318, nearly eleven per cent. on the paid-up capital stock, equal to seven per cent. on the capital and Reserve fund. Of this sum $277,992 were appropriated to the payment of two half-yearly dividends, amounting to ten and one-half per cent., and to the payment of the shareholders' income tax thereon. The remaining sum of $6,326 was added to the Contingent fund, which now amounts to $111,079. The Reserve fund stands at $1,450,000.

Owing to the continued depression in business, and the low price of cereals, much forbearance has been required by mortgagors. This has been cheerfully granted when the sufficiency of the security warranted it, but the depreciation in the value of real estate has rendered necessary great care in this respect, compelling the management in many cases to enforce payment, or take possession of the rentals, always a disagreeable duty. Generally, however, interest falling due has been fairly well paid, and a large amount of principal was also repaid and reinvested. The sum outstanding on mortgage loans at the end of the year was $11,428,266.

The uses to which money can be profitably put have for the time being become so limited in Ontario and the other provinces in which the company lends, that the directors consider it inexpedient to bring in more British capital at present. Debenture money called up has been replaced by new money at reduced rates of interest.

The directors availed themselves of a favorable opportunity for acquiring office premises in a central position in the city of Winnipeg. While permanently securing suitable accommodation for conducting the company's North-West business, the larger portion of the block is available for rental, and yields a remunerative return on the investment. The situation of the company's building, together with its excellent appointments, will always secure the best class of tenants.

The directors regret to have to record the death of their esteemed and valued colleague, Mr. A. M. Smith, who for more than twenty-five years had been a member of the board, and always manifested a warm interest in the welfare of the company. Mr. W. D Matthews has been appointed to the vacant position.

In conclusion, the directors have much satisfaction in congratulating their fellow shareholders on the completion of forty years of growth and prosperity believed to be unparalleled in the annals of Canadian financial institutions. While the immediate outlook is less encouraging than it has appeared on former occasions, they enter upon the company's fifth decade with confidence in the strength and soundness of the company's position, as well as in the relatively high revenue-earning capabilities it continues to possess.

All of which is respectfully submitted.

J. HERBERT MASON,
President.

FINANCIAL STATEMENT.

Profit and Loss.

Interest on deposits, debentures and debenture stock		$306,229 26

GEO. H. SMITH,
Secretary.

We, the undersigned, beg to report that we have made the usual thorough examination of the books of the Canada Permanent Loan and Savings Company for the year ending 31st December, 1894, and hereby certify that the above statements are strictly correct, and in accordance therewith.

J. E. BERKELEY SMITH,
HENRY BARBER, } Auditors.

Toronto, 30th January, 1895.

The President said:—

GENTLEMEN,—In moving the adoption of the report of the directors, it is not necessary for me to detain you with any lengthened observations, but I ask your indulgence while referring briefly to some of the more prominent features of last year's business, and to the present position and prospects of the company.

We are passing through a period of widespread commercial and financial depression, which necessarily has a detractive effect on revenue. In the face of this depression, of diminished demand for money owing to the lack of opportunity for its profitable employment, of depreciation in the value of real estate, as well as of reduced rates of interest, the business of the year produced a net profit of nearly eleven per cent. on the paid-up capital stock, as appears in the statement of Profit and Loss. This enabled the directors to declare dividends amounting to ten and one half per cent., to pay the shareholders' income tax thereon, and left a surplus of more than six thousand dollars to be added to the Contingent Fund

Under the circumstances I hope you will agree with me in the opinion that this cannot be considered an unsatisfactory record

Before declaring these results provision was made for paying interest on borrowed capital, for expenses, commissions and charges of every description, and the usual rigid scrutiny into the company's investments was made. Not only was no interest charged in doubtful cases, but as has always been our practice, wherever there was reason to expect delay or deficiency in realizing any securities in default, corresponding deductions were anticipated and the amounts written off.

This is not the first period of commercial and ficancial stringency, accompanied by retrogression in land values, the company has passed through. After the crisis of 1857 the shrinkage in prices amounted for a few years to almost entire unsaleability. The company was then young, without any accumulated reserves, and for a time profits were considerably diminished.

The productions of the country were then comparatively small, as was also its population Toronto contained less than 40,000 inhabitants Now it has more than 180,000. Recuperation was therefore slow. The present is a time for retrenchment, for the practice of industry and thrift, for the avoidance of all speculative expenditures, whether public or private, for adopting the most approved methods in agriculture as well as other branches of labor, and for the legitimate development of the known resources our country is so richly endowed with. That the interests affected will emerge from the present depressing period, and resume their normal condition of prosperity, admits of no doubt. Already there are encouraging indications of improvement

Canada has suffered less than many other countries. It is satisfactory to note that the banks and other financial institutions of the Dominion have stood the strain, and maintained their high reputation both at home and abroad. Not one loan or land mortgage company has failed to promptly meet its obligations. I believe I am correct in saying that during the last forty years not a dollar has been lost by a creditor of one of these companies.

In the forty years of progress referred to in the report, as profits have fluctuated, so also dividends have by no means been uniform. While the rate paid on the shareholders' capital has averaged twelve per cent. for the whole of that period, for several years the dividends were ten per cent. We see no reason why that rate may not be maintained. That lower rates of interest than formerly will continue to prevail is to be expected. This has long been foreseen. As far as the company's business is concerned, the effect of the lower rates obtained is in a great measure neutralized by the lower rates paid.

Canada, like all new countries, must for many years continue to be a borrower. There should be, therefore, and doubtless will be, as in the past, a fair margin between the rates paid in Great Britain by companies of high standing and unquestionable resources, who pledge their credit there, and the rates received here on individual loans. This margin, together with the revenue derived from the investment of the capital stock and Reserve Fund, will continue to afford a remunerative return to the shareholders.

In conclusion, I desire to express to my colleagues on the board, to the officers, agents and employes of the company at the head and branch offices, to our solicitors and numerous appraisers throughout the country, as well as to our esteemed representatives in Great Britain, my grateful acknowledgments for their loyal support and devotion to the interests of the institution. It is largely to their influential efforts that the shareholders are indebted for the gratifying position the company occupies to-day.

The report of the directors was unanimously adopted, as also were votes of thanks to the president, directors, officers, and agents of the company. The retiring directors, Messrs. J. Herbert Mason, S. Nordheimer, Henry Cawthra, and John Boyd, were unanimously re-elected.

At a subsequent meeting of the board, Messrs J. Herbert Mason and Edward Hooper were respectively re-elected to the offices of president and vice-president.

IMPERIAL LOAN AND INVESTMENT CO. OF CANADA, LIMITED.

The twenty-sixth annual meeting of the shareholders of the Imperial Loan and Investment Company of Canada (Limited) was held at the offices of the company, Toronto, on Monday, the 4th day of February, 1895, for the purpose of receiving the directors' report for the year ending 31st December, 1894, and electing directors for the current year.

Among the shareholders present were: P. M. Clark, Barlow Cumberland, C. C. Dalton, Wm. Davidson, John C. Fitch, H. D. Gamble, Jas. C. Hamilton, E. H. Kertland, Rowan Kertland, Hon. George A. Kirkpatrick, Walter S. Lee, Neil McLean, Henry Pellatt, H. M. Pellatt, George Robinson, T. T. Rolph, Alderman Bernard Saunders, M. Shewan, Alexander Smith, James Sykes, Dr. Thorburn, Dr. J. C. Warbrick, Richard Shaw-Wood.

REPORT.

Your directors have pleasure in submitting for your perusal and information the audited statements of the transactions of the company for the year ending 31st December, 1894.

Notwithstanding the financial depression which has affected Canada, as well as all other parts of the world, the interest on your investments in Ontario has been satisfactorily met, and from Manitoba a larger amount of interest has been received than in 1892 or 1893 in proportion to the amounts invested in that province in those years.

Mr. Daniel Lamb, one of your directors, accompanied the manager in his yearly inspection of Manitoba securities, and, notwithstanding the continued low price for grain and the temporary lull in the tide of immigration, their faith in the future of the province remains firm and unshaken.

The profits for the year, after deducting all charges for Ontario and Manitoba, amount to the sum of $73,173.21, from which has to be deducted for losses ascertained during the year ..... $ 6,776 79

And the balance has been applied thus:

Two half-yearly dividends at 7 per cent	49,698 55
Carried to reserve fund, which now amounts to $160,000, and which added to contingent fund amounts to over 25 per cent. on paid-up stock	5,000 00
Carried to contingent account, a fund which is specially designed to provide for possible unforeseen losses, and which now amounts to $20,752.14	11,697 87
Total	$73,173 21

Your directors would earnestly impress upon the incoming board the advisability of exercising extreme caution in accepting applications for loans until the present depression has passed away.

E. H. KERTLAND, Manager. JAMES THORBURN, President.

Toronto, 23rd January, 1895.

STATEMENT OF LIABILITIES AND ASSETS OF THE IMPERIAL LOAN AND INVESTMENT COMPANY OF CANADA, LIMITED, 31ST DECEMBER, 1894.

AUDITORS' REPORT.

To the Imperial Loan and Investment Company of Canada, Limited:

GENTLEMEN,—We beg to report that we have carefully examined the books, accounts and vouchers of the Imperial Loan and Investment Company of Canada, Limited, for the year ending 31st December, 1894, and find them correct.

We have also verified the balances of the subsidiary ledgers.

We have also seen the securities in the hands of the managing director, and find them as enumerated.

ROBERT SEWELL, WM. E. WATSON, F.C.A., Auditors.

Toronto, 23rd January, 1895.

In moving the adoption of the report, the president said:—

GENTLEMEN,—I beg to move the adoption of the report you have just heard read, and, in doing so, congratulate you upon the success which has attended the transactions of the company during the year, one of the most critical through which loaning companies have passed.

The financial depression which has affected the whole civilized world, has, I think, visited Canada more lightly than any other country, yet its influence here has been keenly felt by men in every grade of life. By the laboring and mechanic classes work has been very hard to obtain, thereby causing a considerable diminution in the receipts of the retail storekeepers, and a consequent lessening in the profits of the wholesale dealers.

Capitalists and investing companies have suffered from lower rates of interest to be had for loans, the great fall in the rents obtainable for houses and store property, and the continued depreciation in the value of farm property, owing to the low prices ruling for grain and other produce. But, notwithstanding all this, it is gratifying to observe that by economizing expenses and exercising even more than usual caution in loaning, we have been able, after writing off all ascertained losses and paying two half-yearly dividends at 7 per cent., to add $5,000 to the Reserve, and nearly $12,000 to Contingent Fund, thus bringing our reserve funds to over 25 per cent. on the paid-up capital.

Your directors have, as I have said, endeavored by all possible means to curtail expenses so far as might be done without impairing the efficiency of the staff.

The cost of management in 1894 is $1,000 less than in 1893, and $1,400 less than in 1892.

The financial depression to which I have referred is, I have no doubt, merely temporary, and I think there are many indications of its having reached its lowest limit, nevertheless the actual term of its continuance no man can clearly foresee, and until it has completely disappeared I would most earnestly impress upon the incoming board the absolute necessity of extreme caution in all business transactions.

Your agents in Edinburgh, Messrs. Torrie, Brodie & Maclagan, continue to give untiring attention to the interests of the company, and their transactions during the year have been, as heretofore, satisfactory

In conclusion, I am glad to be able to testify to the good conduct and efficiency of the company's staff of officers, and have great pleasure in moving the adoption of the report.

The motion for the adoption of the report was seconded by Hon. George A. Kirkpatrick and carried.

Moved by Mr. Walter S. Lee, seconded by Alderman Saunders, "That the thanks of the shareholders are due and are hereby tendered to the president, vice-president and directors for their services during the year, and that the sum of $2,500 be paid them for their services, to be divided among them as they may decide." Carried.

Mr. W. S. Lee, managing director of the Western Loan and Savings Co., in speaking to the motion, complimented the directors on the excellent statement they were able to present to the shareholders.

Moved by Mr. Alexander Smith, seconded by Mr. George Hallen, "That Messrs. W. E Watson and Robert Sewell be paid $250 each for their services during the past year, and that Mr. Wm. Watson and Mr. Robert Sewell do act as auditors for the current year." Carried.

Moved by Mr. George Robinson, seconded by Dr. Warbrick, that the poll be now open for the election of directors, and that the same be closed whenever five minutes shall have elapsed without a vote having been entered, and that Mr. Henry Pellatt and Alderman Saunders be scrutineers, and that they shall hand the result to the manager, and that they be paid the sum of four dollars each for their services. Carried.

The scrutineers handed to the manager the following names as the result of the vote for the election of directors for the current year: Dr. Thorburn, Hon. George A. Kirkpatrick, Ald. Daniel Lamb, Richard Shaw-Wood (London), E. H. Kertland, C. C. Dalton, H M. Pellatt.

At a subsequent meeting of the directors, Dr. E. H. Kertland in the chair, James Thorburn, M.D., was re-elected president, and Hon. Geo. A. Kirkpatrick, vice-president for the current year.

MERCANTILE FIRE INSURANCE COMPANY.

The annual meeting of the stockholders of this company was held at its head office, town of Waterloo, Ont., on Saturday.

The president, Mr. I. E. Bowman, M.P., occupied the chair, and Mr. James Lockie acted as secretary of the meeting.

The minutes of the previous annual meeting were read and adopted. The nineteenth annual report and subjoined financial statements were read:

REPORT.

Your directors beg to submit the following as their report of the business of the company for the year ending December 31st, 1894: During the past year 11,459 policies and renewals were issued for insurance amounting to $14,544,278, on which we received the sum of $193,279.54.

We also received the sum of $5,950.01 for interest on our investments, which makes our total receipts for the year $199,229.55.

Our expenditures for the year are as follows:

Paid losses for the year 1894 ..	$ 92,940 10
Agents' commissions and bonuses .	38,708 21
Salaries and directors' fees	5,991 20
Adjusting losses and inspecting risks	2,128 22
Re-insurance and cancelled premiums	29,963 45
Books, stationery, postage, printing and advertising	2,472 85
Government charges	170 91
Rent, taxes, fuel, light and care of office	610 30
Dividend No. 21 for six months ending 30th June, 1894	2,000 00
All other charges	1,212 76
	$176,198 00

The total insurance in force on the 31st December, 1894, was $17,678,006, and re-insurance liability thereon, $81,862.16

The year's business shows an increase of nineteen per cent. on the previous year in the amount of insurance granted and premiums received.

The secretary's statements of receipts and expenditures, assets and liabilities, the certified report of your auditors and a list of the stockholders of the company, are herewith submitted for your information.

On behalf of the board,

I. E. BOWMAN, President.

FINANCIAL STATEMENTS.

The amount deposited with the Dominion Government is $50,079.76, being municipal debentures, of which the face value is $55,-644.18.

Audited and found correct.

ISRAEL D. BOWMAN, }
THOMAS HILLIARD, } Auditors.

Waterloo, January 15th, 1895

AUDITORS' REPORT.

To the Stockholders of the Mercantile Fire Insurance Company:

GENTLEMEN.—We have the honor to report having made a careful examination of your company's books of account for the year 1894, auditing the same quarterly.

We have checked the application register, verifying the premium entries with the applications themselves, and checking the additions and the posting of the same into the ledger.

We have also compared the expense account with the vouchers for the items thereof, and have examined the securities and computed the accrued interest thereon to Dec. 31st, 1894

As a result of our examination, we have much pleasure in stating that the books of account are very neatly and clearly kept, that the balance sheets and statement of assets and liabilities are correct, and present a clear and accurate statement of the company's financial position at the close of the year

All of which is respectfully submitted.

ISRAEL D. BOWMAN, }
THOMAS HILLIARD, } Auditors

Waterloo, Jan. 19th, 1895.

The president, in moving the adoption of the reports, dwelt at some length on the condition and prospects of the company, and after some discussion the motion was seconded by Mr. John Shuh and carried.

On motion of Mr John Shuh, seconded by Mr. Wm Young, Messrs. L. Peine and S Snyder were appointed scrutineers of the ballot for the election of directors. The scrutineers reported the old board of directors, viz., I. E Bowman, M.P., D S. Bowlby, M.D., J. H. Webb, M.D., George Moore, John Shuh, Robert Melvin and E. W. B. Snider, ex-M.P.P., unanimously re-elected.

On motion of D S Bowlby, M D, seconded by Mr Chas Hendry, Messrs. Israel D Bowman and Thomas Hilliard were appointed auditors for the current year.

It was then moved by Mr Chas Hendry, seconded by Mr. Thomas Hilliard, that a vote of thanks be tendered to the president, directors, officers and agents of the company. The motion carried,

The board of directors met at the close of the annual meeting and re-elected Mr I. E. Bowman, president, and Mr. John Shuh, vice-president of the company.

JAS. LOCKIE,
Secretary.

Correspondence.

THE "BALANCE OF TRADE."

Editor MONETARY TIMES:

SIR,—The following figures have been handed to me by one of the most eminent statisticians in Canada. I would ask you to print them, and either yourself or one of your numerous correspondents to verify them.

Foreign commerce of Canada for the eleven years, 1868 to 1878, and the fifteen years, 1879 to 1893, including coin and bullion:

1868 to 1878 (11 years.)

Imports	$1,062,052,375
Exports	841,623,764
Bal. in favor of Canada	$ 220,428,611
Duties paid	132,468,684
Balance, less duties paid, in favor of Canada	$ 87,959,927

1879 to 1893 (15 years.)

Imports	$1,572,969,520
Exports	1,420,414,864
Bal. in favor of Canada	$ 152,554,656
Duties paid	306,859,108
Balance against Canada	$ 154,304,452

1. In the first period under a revenue tariff every $100 of exports exchanged for $126.20 gross, or for $110.45 net after payment of Customs duties.

2. In the second period under a protective tariff every $100 of exports exchanged for $110.74 gross, or for $89.14 net after payments of Customs.

Yours very truly,
THOS. DUNNET.

Toronto, 5th Feb., 1895.

CANNING FACTORIES

Editor MONETARY TIMES

SIR,—I notice in a recent issue that parties were contemplating starting a new canning factory at Forest, Ont. If they do I trust they will receive more returns for their capital than some of us around here who were led to believe that it was a great paying industry, and would pay large dividends. Our experience is that it pays no dividends, and shows no chance of returning even a small per cent. of the capital invested.

But doubtless there is a reason for this; the demand for this line of goods is limited, and the market is also limited, and the factories now running can doubly supply all the market will take, and of course as long as such is the case they will be run at a loss. It is simply the truth that whoever invests in a new canning factory in the present congested state of the business will most assuredly lose money

AN ACTUARY'S DUTIES.

At the opening meeting for 1894-95 of the Actuarial Society of Edinburgh, November, 1894, Mr. David Deuchar, F.I.A., general manager of the Caledonian Insurance Company, president for a third term, delivered an address. The conclusion was as follows:

In the case of widows' funds, as in the case of life assurance companies, it is the duty of the actuary to collect, arrange, and select his facts with care and accuracy, and to apply these facts with intelligence, impartiality and judgment in framing his estimates as to the future. The proper discharge of such duties and responsibilities necessitates attainments not inferior to those required in other professions; and in this connection I may remind you of the qualifications of the physician, as given by Dr. John Brown in *Horæ Subsecivæ*. He summed up in these four words, CAPAX, PERSPICAX, SAGAX, EFFICAX, and gave the following interpretation:—*Capax*—there must be room (in the brain) to receive, arrange, and keep knowledge; *Perspicax*—the senses and perceptions must be keen, accurate, and immediate to bring in materials from all sensible things; *Sagax*—there must be a central power of knowing what is what, and what it is worth; of choosing and rejecting, of judging; and, finally, *Efficax*—there must be the will and the way to turn all the other three (capacity, perspicacity, sagacity) to account in the performance of the thing in hand, and thus render back to the outer world, in a new and useful form, what you had received from it.

Gentlemen, I hope and believe that it is the aim of the Institute of Actuaries, and the Faculty of Actuaries, and in its own sphere of this society also, to maintain a high estimate of the qualifications requisite for the practice of our profession to the end that the actuary may be recognized as *Capax, Perspicax, Sagax, Efficax*.

SINCE the spring of 1885, Ole Simonson has carried on the hotel business in Winnipeg. For some years he was extensively patronized by his own nationality, the Scandinavian, but lately this has fallen off, and his assignment is announced.

Commercial.

MONTREAL MARKETS.

MONTREAL, Feb. 13th, 1895.

ASHES.—A dull market is still reported, and shipments so far for 1895 have been only 77 brls. Receipts are also 50 brls. less than last year to date. We quote first quality pots $4 to 4.05; seconds, $3.70; pearls nominal, last sale of a couple of barrels for local consumption was at $6.50. Stock in store 162 pots and 4 barrels pearls.

BOOTS AND SHOES.—Travellers are about all through their trips. Lower Province orders have come in well, Quebec orders fairly, but in the West business is not so very brisk, dealers as a rule having bought sparingly. Payments during January and on the 4th inst. are reported as having been met rather better than in other lines of business.

DAIRY PRODUCTS.—In butter there is nothing doing beyond filling local wants. We quote creamery 20 to 21c., Townships dairy 16 to 18c., western 13 to 15c. per lb. Cheese also is dull, and English quotations are lower; ten cents is now an outside quotation for the finer grades. The stock in store on Jan. 31st is estimated at 105,000 boxes, against 122,800 boxes on Dec. 31st, 1894. Owing to heavy storms of last week eggs have advanced materially, and fresh boiling stock is quoted at 25 to 30c., limed 14 to 14½c. per dozen.

DRY GOODS.—The week has been a quiet one as regards orders, the below-zero weather and the heavy storm having hampered the movements of travellers very seriously. The warehouses, however, show activity in packing and shipping goods. City retail trade manifests comparatively little stir as yet. A few buyers have already left the city for Europe to make selections for fall trade.

FISH.—The enquiry is a little more active, and stocks of pickled fish are in quite moderate compass. We quote: No. 1 green cod, $4.50; No. 1 large, $5.75 to 6; large draft, $7; dry cod, $4.25 to 4.50; herrings, $3.75 to 4.50, according to brand; N. S. salmon, $13 to 14 for No. 1; B. C. ditto, $10.50 to 11; sea trout $9 to 10; fresh herring, 90c. to $1 per hundred; cod and haddock, 3 to 4c.; finnan haddies, 6 to 7c. per pound.

FURS.—Trade is quiet; there are only small mixed lots offering, receipts being much lighter than they were before January. The dates of the next London sales are from March 18th to 21st for the Hudson Bay Co., March 18th to 29th for Lampson & Co. The latter firm will also offer collections at auction from June 10th to 14th and Oct. 16th to 18th. Prices meanwhile remain as revised last week, which are as follows: Beaver, $3.25 to $4; black bear, $15 to $25; cub do., $5 to $10; red fox, $1.25 to $1.50; muskrat, 7 to 10c.; lynx, $1.50 to $2.50; marten, $1.25 to $1.75; mink, $1 to $1.50; skunk, 50c. to $1.25; otter, $8 to $12; fisher, $5 to $7.

VALUABLE
Leasehold Coal Dock
IN THE CITY OF TORONTO,
— CANADA. —
For Sale by Tender.

Tenders will be received by the undersigned up to 3 p.m. of the 15th DAY OF MARCH, 1895, addressed to "E. R. C. Clarkson, 26 Wellington street east, Toronto," sealed and marked on the outside, "Tenders for Dock Property."

The property to be tendered for consists of the coal dock property, with plant and equipment, situate on the south side of the Esplanade, Toronto, at the foot of Church street, held under lease, from the Boulton Estate, expiring 31st August, 1896, with a right of renewal at a rental to be fixed by arbitration. The present rental is $2,035 per annum. The property has a frontage of about 213 feet on the Esplanade by a depth on the east side of 513 feet, and on the west side of 496 feet. On it are erected large, substantial and modern coal sheds, one of which is 200 feet by 100 feet; two Hunt elevators, elevated track, shed pocket, weigh scales, and boiler, and 40 horse-power engine. Fine offices and modern equipment throughout.

The property is centrally situated, and is considered the most perfect coal dock in Canada.

The property cost in 1888, $75,000, and there has been spent upon it since in permanent improvements $20,101.

The plant is in excellent order.

Terms of Sale:—Twenty-five per cent. down, and sufficient with that amount to make one-half within thirty days thereafter, and the balance at the expiration of one or two years at the option of the purchaser. All unpaid purchase money to bear interest at six per cent. per annum from the date of mailing of notification of acceptance of tender.

Full information, including conditions of sale, as approved by the Official Referee, can be obtained at the office of Messrs. Mulock, Miller, Crowther & Montgomery, 99 King street east, Toronto, Solicitors for Estate, or to

E. R. C. CLARKSON,

GROCERIES.—Country trade has been virtually "paralyzed," as one traveller puts it, by the terrible storms of last week. Shipments of goods sent to the city railway stations last week are in many instances still unforwarded, and it will be some days before trade resumes its normal conditions. Brokers also report city trade as very quiet. We hear of nothing new with regard to prices. Sugars are just where they were a week ago, granulated being 3¼c. per lb. for standard at the factory, yellows from 2⅞ to 3⅛c. Stocks of Barbadoes molasses in first hands are now stated at under 500 puncheons, and holders are firm at 32c. per gal. in quantity. Syrups are rather dull at 1⅞c. to 2¼c. per lb. for Canadian, 20 to 24c. for American per gallon. Further enquiries for samples and prices of Japan teas are being received from the West, but no further transactions are reported. A lot of some 700 to 800 pkgs. of Congous, which the Government refused to pass, have been shipped back to New York. An advance in gunpowders is reported from England. There is some improvement in the demand for canned goods; we quote tomatoes 87½ to 95c., corn 90 to 95c., peas 90 to 95c., gallon apples $2 10, strawberries $2 75, salmon $1 35 to 1.40, lobsters $1.75 to 2.00.

HIDES AND TALLOW.—The demand from tanners is a very fair one, and the late advance in prices is well held, the supply being but moderate. A few calfskins are now coming in, and are quoted at 5c. per lb. Light hides are bought green by dealers at 5c. per lb. for No. 1, sales to tanners of cured being made at 6c.; lambskins 60 to 70c. each. Tallow unchanged and easy at 5 to 5¼c. per pound.

LEATHER.—There is a little more doing than in January, as some houses are working out of certain lines, but most of the large houses laid in liberal supplies before the advance, and are yet light buyers. There is a steady movement in slaughter sole, and fair sales of Spanish. Fine splits also find ready sale locally, but Quebec stock is still being shipped to England, where there is a good demand reported. We quote:—Spanish sole B.A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 21c. No. 2 do., 17 to 18c.; common, 15 to 16c.; American oaksole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, 14 to 17c.; do. juniors, 11 to 12c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Trade in these lines is still without any life, and we cannot hear of any transactions of moment transpiring. Pig iron prices are without change, Summerlee quoting at $21 in car lots, No. 2 American $18, and domestic at figures given below. Canadian bars have been cut below $1 60, it is said. Round lots of Canada plates have been offering considerably below our quotation. For tin plates there is no special enquiry and the leaning is towards easy values. Ingot tin is weak, and it is said sales have been made in lots at 15½c.; sheet zinc, $4 50; copper, lead and spelter remain without change. While the price for barb and twisted wire is 3c. in this province, the quotation for Ontario is $2 87½ per hundred, and $2 80 to border towns to meet the competition from American manufactures. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19 50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No 3, $17. Niagara No 2, $18 00 to 18.50; Siemens, pig, No 1, $16 75 to

$17 00 ; Ferrona, No. 1, $16.50 to 17.00 ; machinery scrap, $14 to $15 ; common do., $12 ; bar iron, Canadian, $1.60 ; British, $2 to 2.15 ; best refined, $2.40 ; Low Moor, $5.00 ; Canada plates — Blaina, or Garth, $2.05 ; all polished Canadas, $2.75 ; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30 ; No. 26, $2.15 to 2.20 ; No. 24, $2.10 ; tin plates—Bradley charcoal, $5.25 to $5.50 ; charcoal I.C., $3.25 to $3.50 ; P.D. Crown, $3.75 to 4.00 ; do. I.X., $4.75 to 5.00 ; Coke I.C., $2.65 to 2.90 ; coke wasters, $2.65 ; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c. ; No. 26, 4c. ; No. 24, 3¾c., in case lots ; Morewood, 5¾ to 6c. ; tinned sheets, coke, No. 24, 6 to 6¼c. ; No. 26, 6½ to 6¾c. ; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85 ; English ditto, $2 ; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal ; American steel plates, $1.90 to $2 ; ditto, three-sixteenths inch, $2.60 ; common tank iron, $1.65 to 1.75 ; tank steel, $1.80 ; heads, $2.85 ; Russian sheet iron, 10 to 10½c. ; lead, per 100lbs., pig, $2.85 to 3.00 ; sheet, $4 to 4.25 ; shot, $6 to 6.50 ; best cast steel, 10½ to 12c. ; toe calk, $2.50 ; spring, $2.50 to $2 75 ; tire, $2 to 2.25 ; sleigh shoe, $2 ; round machinery steel, $2.50 ; ingot tin, 16 to 16½c. ; bar tin, 25c. ; ingot copper, 9¾ to 11c. ; sheet zinc, $4.50 ; Silesian spelter, $4 to 4.25 ; American do, $4 to 4.25. Antimony 10½ to 12c. ; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs. ; annealed do, $2.70 ; galvanized, $3.35 ; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c. ; ⅜ inch, 4½c. ; 7-16 in.. 4¼c. ; ½ in., 3¾ to 4c. ; ⅝ in., ½c. ; ¾ in., 3½c., ⅞ in., and upwards

Oils, Paints and Glass.—Immediate business is quiet, but orders for shipment when spring freight rates come into force are being booked in fair number. There have been some reports of a strengthening in linseed oil in Britain, but local prices remain on the same basis that has prevailed all winter. Turpentine is still firming up in the South, and there seems a general expectation of further advance here. Castor oil easy ; fish oils very dull. Leads and paints show no change. We quote :—Turpentine, 45 to 46c. per gallon for single barrels ; two to four barrels, 44c. Linseed oil, raw, 57c. per gallon ; boiled, 60c. ; 5-barrel lots, 1c. less ; olive oil, machinery, 90c. ; castor, in lots, 6c. ; single cases, 6¼ ; tins, 6½c. ; Nfld. cod, 38 to 40c. per gal. ; Gaspe oil, 38c. per gal. ; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75 ; No. 1, $4.25 to 4.50 ; No. 2, $4 to 4.25 ; No. 3, $3.75 to 4 ; dry white lead, 4½ to 4¾c. ; genuine red do., 4¼c. ; No. 1 red lead, 4c. ; putty, 2c. in bladders per brl. ; London washed whiting, 40 to 45c. ; Paris white, 90c. ; Venetian red, $1.50 to 1.75 ; yellow ochre, $1.50 to 1.75 ; spruce ochre, $2.25 to 2.50 ; window glass, $1.20 per 50 feet for first break ; $1.30 for second break ; third break, $2.80. These prices are shaded 5c. for 50-box lots.

Wool.—While the market is not at all active, sales of some moderate lots are reported, principally Capes, at 14 to 15c. Stocks are moderate, and a cargo of Cape is reported to be on the way for this market, but it will be some weeks hence before it gets here. We quote Cape 13½ to 16c., though we hear there is some inferior to be had as low as 13c. ; there is a little fine Australian here, held at 16 to 18c. ; B. A., scoured, 26 to 32c. ; domestic fleece, 17 to 20c. ; North West, 11 to 12c. per pound.

TORONTO MARKETS.

Toronto, Feb. 14th, 1895.

Grain.—A distinctively better feeling was noticeable in the operations of the week, and this improvement displayed itself in advanced quotations. The visible supply of wheat decreased 1,054,000 to 82,232,000 bushels, as expected. Oats also decreased some 547,000 ; while corn increased 163,000 bushels. The passage wheat was more than expected, and this, of course, meant lower Continental cables. Although the local market received little or no help from the export trade, it strengthened its position by active trading for domestic milling purposes. Winter wheat at 56 to 61c. shows an advance of 1c. per bush. Spring wheat is quoted 59 to 65c., or two cents the bushel higher than a week ago. Manitoba wheat is steady and firm, gaining several points during the course of the week. Barley is firm, scarce, and wanted. The market has advanced 1 to 2c. since our last report, and 40 to 47c. cover quotations over the various grades. There is good movement to the United States ; however, we do not hear of any large transactions, the trade being confined to individual car lots. Oats are firm and higher at 33 to 44c. Corn and rye remain nominal, with buckwheat unchanged. The snow blockades which exist in so many parts of the country have seriously interfered with deliveries, as well as impeding the progress of buyers.

The stocks of grain in store at Port Arthur on Feb. 2nd were 669,708 bushels. During the week there were received 20,099 bushels, and shipped 8,901 bushels, leaving in store on Feb. 9th, 680,907.

Groceries.—This has been a quiet week in grocery circles. In dried fruits raisins are quiet and without change ; currants are firm and prices well maintained. The demand for syrups shows material increase, and from the present time until the end of the Lenten season a good trade is looked for. Sugars have not moved so actively this week and the movement is falling off. The "plungers" have evidently secured all they can afford to carry, while the immediate wants of the trade are limited. Canned goods remain without much change "Horseshoe" salmon has advanced, however, and stocks are scarce.

Hides and Skins.—While no features of special interest have occurred the market has been fairly active. There is rather an active demand for hides, and in spite of weakness in Chicago local prices are being well maintained. Offerings now are not of the best quality, and should the weather turn at all soft, they must continue to show increased deterioration. Stocks are not accumulating, and taking everything into consideration the market is in a much better condition than it was a year ago. Sheepskins remain at 80c., and it is not probable that any change will be made until the 1st of March. Although there is no accumulation of

These prices are wholesale by the car-load.

stock, values are thought to be fully equal to the state of the market. Tallow is weak at 5c. Importations of tallow from the United States have, we are told, ceased, but manufacturers are bringing over a grease for the making of soap, which has been placed on the free list, and this of course has the tendency of weakening the tallow market here.

PROVISIONS.—The roads are in many parts blocked with snow, and it is difficult, in some instances impossible, for farmers to market their produce. This has had the effect of adding a little strength to that long depressed and weakened market, butter. Receipts of rolls are limited, and the tendency is firmer with quotations at 13 to 14c.; tubs remain unaltered, with medium qualities selling down to 4c. and even lower. The local cheese market is quiet and easy. For hog products no change in quotations has been made, and the local market has an easy aspect. The Cincinnati *Price Current*, Feb. 7th, says: "Western packers have handled 315,000 hogs the past week, compared with 310,000 the preceding week and 265,000 for corresponding time last year. From Nov. 1 the total is now 5,840,000, against 4,060,000 a year ago—an increase of 1,780,000, or 44 per cent. While the aggregate current marketing is of fairly liberal proportions, it is falling short of the calculations a month ago, and it now appears reasonably sure that the season on March 1 will close with a considerably smaller number than the estimates a month ago suggested." The cold weather has had a bracing effect upon the egg market. The supplies of the New York market and other large American centres have been curtailed, and shipments of Canadian limed eggs have in consequence been sent over the border line. Limed eggs are quoted 20 to 22c. per doz. in New York. Canadian eggs are charged with a duty of 3c. a dozen. American receivers are very strict in their classifications, and exporters here say that they must figure upon losing from two to four dozen eggs in every case, so that the export trade to the United States has not proved as remunerative as one might have expected. In Toronto city limed are quoted at 14c. and country lots at 12 to 13c. Held stock find slow sale at 13c.

SEEDS.—There is practically at the moment no jobbing trade, and none is expected until the middle of March. Some people buy early by way of speculation, but this class of trade for the most part is finished in January, which leaves February a quiet month. However, merchants are not idle, and purchases are being made from first hands. The alsike clover market is very depressed. The foreign trade are unwilling to take our stock unless they secure it at exceptionally low prices. Last season, it will be remembered, Canada produced what was probably the largest crop of alsike seed in her history. The market, however, did not feel the effects of these enormous supplies, and opened with farmers realizing in the neighborhood of $6 per bushel for their fine qualities. But as soon as trading commenced to assume extensive proportions the market settled into the inevitable condition attending large stocks. Quotations gradually declined, until at present the grower does not realize more than $4.75 to $5 per bushel, and exporters who have been trading on a falling market, we may be sure did not find their operations very remunerative. The red clover market is in a better condition, and for choice Canadian grown stock from $6 to $6.25 per bush. is being paid. This is more than a dollar a bushel more than the price paid for alsike, an unusual circumstance. Merchants are importing quite freely from the United States. Purchases are made at from $5.25 to 5.30 a bush., which, adding a duty of 10 per cent. and freight charges, and making allowance for the inferior quality of this seed, brings it on much the same basis as the home grown seed. All the season through the timothy seed market has been firm, and continues so at present. For machine threshed growers realize from $2.50 to 2.75 per bush., while $3 is being paid for choice flail threshed seed.

WOOL.—Since the extensive purchases reported two weeks ago little or nothing has taken place to excite unusual interest in the fleece wool market. Dealers could make sales if they had stock, but having no considerable amounts on hand they are not anxious to push business. The domestic mills are apparently well supplied, and are not making any active enquiries for fleece. We may consider the movement for the year as practically completed. Of pulled wools there continues to be some export movement to the United States, while trade with the Canadian mills during the last ten days has witnessed a slight improvement, although unattended by any advance in quotations. In foreign wools, while there are no special transactions to report, the outlook is considered very satisfactory. Some large lots are in transit to this place, and upon their arrival active trading may be expected. In the United States the outlook favors a fair business, without much change in prices during the remainder of the season. Messrs. Coates Bros., Philadelphia, offer the following quotations: Canada washed, choice selected, 23 to 24c.; quarter blood, 22 to 23c.; coarse, 20 to 21c. per lb.

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

LONDON MUTUAL FIRE INSURANCE COMPANY.

The London Mutual Fire Insurance Company of Canada held its 35th annual meeting in the offices of the company, London, on the 6th Feb. Among the members and agents present were Capt. T. E. Robson, president, Ilderton; A. Campbell, Appin; Jos. H. Marshall, London; John Geary, London; Richard Gibson, Delaware.

Capt. Robson, president, read the review of the board as follows:

REPORT.

This is the thirty-fifth annual report of your company, and the directors take pleasure in chronicling the fact that the volume of business has increased during the past year by the largest issue of policies since the establishment of the company in the year 1859, thus showing that the confidence of the public in the "old London Mutual" strengthens with age, no fewer than 15,962 policies having been issued, insuring property to the amount of $18,042,906.42, which, added to the sum theretofore insured, amounts to $45,597,436.62 at risk on the 31st day of Dec., 1894, covered by 41,940 policies. This may be called the bright side of our report, but we must now turn to the other.

Our table of losses, which have far exceeded the average, amounted to the sum of $126,734.57, of which $117,640.87 occurred during the year, and $9,093.70 that were carried from the previous year, either not having been reported or inspected or fallen due at the end of 1893. The table of losses appended hereto, together with the inspector's report, will point out the causes of fire as nearly as could be ascertained. It will be found that lightning has again been a leading factor, the claims from this cause amounting to $24,498.25—nearly one-fourth of the whole bill of losses. It is a remarkable incident that the yearly claims for loss from lightning have for the last few years approached so closely. In 1892 we paid $25,266.39; in 1893, $26,817.08; and for 1894 the figures stated above, while for 1890 the lightning claims amounted to but $11,698.03, which was then considered a high average. For 1891 they had increased to $16,218.52, but the heavy increase occurred in the years above stated. Our experience in this respect has been that of all other companies, but as we carry many millions of dollars more insurance on farm property than any other company, we suffer correspondingly. Lightning claims may therefore to a great extent be the principal reason for farm insurance becoming so unpopular with all underwriters, many withdrawing from the business altogether, but other causes exist as set forth in the inspector's report. Many of these, however, are within the reach of prevention, particularly in the close inspection of risks by persons specially qualified for the task, and your board have already experienced the good results by falling off in losses in agencies that have been gone over, and this in such a marked degree that the board feel themselves justified in continuing the good work.

Your directors have not lost faith in the idea that farm insurance may yet be afforded at low rates, with profit, and with this conviction they made an arrangement of a satisfactory nature with the Agricultural Insurance Co., of Watertown, N.Y., to take over the farm business of that company in Western Ontario, the principal object of this arrangement being to retain the best of their risks, to weed out those objectionable and permit us to apply the pruning-knife to our own, and with a combined select class of business to increase up the average so as to equalize the losses and expenses, and afford insurance, if at all possible, at lower rates in in the future. This applies not only exclusively to the farm business, but also to the general insurance business as well, our experience having shown that with care the latter can be introduced with profit.

FINANCIAL STATEMENT.—A full financial statement of receipts and expenditures, assets and liabilities is shown in the tables annexed hereto, and here it is perhaps as well to draw the attention of the members to the fact that for years past nothing was collected from the members at the time of insuring, but was held over until the end of the second year. This necessitated the borrowing of money in anticipation of the assessment, a method your board found met the disapproval of many members. So a change was wisely determined on, and now a sum of at least one-half the probable cost of insuring will be collected within the first year of the policy. The change could have no practical effect last year. Now month by month the premiums will be coming in, which will wipe off all existing liabilities, and in the end meet all demands without the necessity of borrowing money.

LEGISLATION—In previous years' reports we pointed out that not only in the interests of insurance companies, but for the public good, a fire marshal, with experienced detectives under him, should be appointed to check the increasing crime of incendiarism. This officer could be attached to the Department of Insurance, and thus make that office of some practical utility, but hitherto the Government have turned a deaf ear to the question. Now that new blood has been introduced into the House by the election of Patrons of Industry, something may be done, as also with the question of regulating the running of steam threshers, etc., and we hope by another year to have something favorable to report on the subject.

ECONOMY IN MANAGEMENT—As in the past, it has been the aim of the directors to practice economy as far as possible, and a comparison with other companies, taking into consideration the business done by us, will show in our favor.

Your board cannot close their report without referring to the death of the late vice-president, Daniel Black, Esq., which occurred on the 6th of January. Mr. Black was the last survivor of the original board of directors. He died at a ripe old age, retaining his fidelity to the company, and it was his constant boast that in over thirty years, excepting during a brief visit to his native land, he had never missed a board meeting. His familiar face will ever be remembered by his old colleagues.

It will be necessary to elect three directors in the place of J. H. Marshall, M.P., and Angus Campbell, Esq., and who are eligible for re-election, and to fill the vaaancy caused by the death of Mr. Black.

All of which is respectfully submitted.

D. C. MACDONALD, Secretary. T. E. ROBSON, President.

London, Feb. 6th, 1895.

The financial report was read by Treasurer D. McMillan, as follows:

President Robson moved the adoption of the reports. They would observe that the losses had been very heavy, and it was very important that agents should thoroughly inspect fire risks. During the past year inspectors of agencies had been sent out, and a number of dangerous risks had been cut off. About 2,000 policies had been returned to agents for more complete information regarding risks. And in this way it was expected that policy holders would be benefited. Business had never been so large as during the year just closed.

Mr. C. C. Hodgins seconded the adoption of the reports, which were received and adopted.

The business of filling the place of the two retiring directors and that left vacant by the decease of Mr. Daniel Black was taken up.

Mr. John Morgan moved that Messrs Joseph Marshall, M.P., Angus Campbell and J. W. Cameron be the directors.

The motion was carried unanimously.

RICHELIEU AND ONTARIO NAVIGATION COMPANY.

The annual statement of the Richelieu Company, whose boats ply Lake Ontario and the St. Lawrence from Hamilton to the Saguenay, is now in the hands of the directors. It shows the net earnings during the past year to have been $164,000, or about 11.64 per cent. on the capital. After the dividend of 6 per cent has been paid, and interest and fixed charges allowed for, the amount carried to profit and loss is $43,000. In 1893 the total traffic receipts were $610,971.65, the expenses $583,702.99, leaving a balance of $27,286 66. The amount carried forward to profit and loss was $60,286-24.

The insurance companies interested have paid over the amount claimed by the Richelieu company, $40,000, on account of the burning of the steamer "Corinthian," and also paid all costs.

The bonds of the company have all been sold. Word has been received that Messrs. Coates & Co., London, have purchased the whole amount. The issue was $600,000 twenty-year bonds at 5 per cent. The price realized was 95.

—The annual meeting of the Keystone Fire Insurance Company was held in St. John, N.B., on the 4th inst. According to the report for 1894 the gross premiums received were $63,556.44, from which deduct re-insurance, $5,660.30; cancellation, $8,609.38; leaving balance of net premiums, $49,280.76. The losses paid were $21,426.76, of which $3,286.06 was for losses occurring in 1893, leaving the net losses of 1894, including $1,149 unadjusted, $19,290, a low ratio. The total expenses, including commissions, were $15,773.44, or a shade less than 32 per cent. of the total. The balance to the credit of profit and loss was $17,610.60 on 31st December. The assets have increased $13,000 during the year, and now amount to $70,760.25. No dividend was declared, the prudent object of the directors being to accumulate a reserve. Some who were disappointed with the passing of dividends suggested the winding up of the company, but no motion to that effect was made, so the election of directors proceeded, with the following result: Howard D. Troop, Charles W. Weldon, Thomas A. Temple, Hon. A. F. Randolph, Jas. C. Robertson, John Berryman, M.D., Major Markham, Alexander Macaulay, Edward L. Temple.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

WILLIAM McCABE,
Managing Director.

DECISIONS IN COMMERCIAL LAW

HORSFALL v. BOISSEAU.—The Court of Appeal holds that a description in a chattel mortgage of after-acquired goods as "all other ready-made clothing, tweeds, trimmings, gents' furnishings, furniture and fixtures, and personal property, which shall at any time during the currency of this mortgage be brought in or upon the said premises, or in or upon any other premises in which the said mortgagor may be carrying on business," is sufficient, and binds goods of the kinds mentioned in premises to which mortgagor moves after making the mortgage.

THE SHIP "MINNIE" v. THE QUEEN.—The Admiralty Court is bound to take judicial notice of an Order-in-Council from which the court derives its jurisdiction issued under the authority of the Act of the Imperial Parliament, the Seal Fishery (North Pacific) Act, 1893, without proof. A Russian cruiser manned by a crew in the pay of the Russian Government, and in command of an officer of the Russian navy, is a "war vessel" within the meaning of the said Order-in-Council, and a protocol of examination of an offending British ship by such crusier, signed by the officer in command, is admissible in evidence in proceedings taken in the Admiralty Court in an action for condemnation under the said Seal Fishery (North Pacific) Act, 1893, and is proof of its contents. The ship in question in this case having been seized within the prohibited waters of the thirty-mile zone around the Kormandorsky Islands, fully equipped and manned for sealing, not only failed to fulfil the onus cast upon her of proving that she was not used or employed in killing or attempting to kill any seals within the seas specified in the Order-in-Council, but the evidence was sufficient to prove that she was guilty of an infraction of the statute and Order-in-Council

WALSH v. TREBILCOCK.—W. and another man made a bet on the result of an election for the House of Commons, and each deposited the sum bet with T. By the result of the election W. lost his bet and the money was paid by T. to the winner. W. then brought an action against T. for the amount he had deposited with him, claiming that the transaction was illegal, and the contract to pay the money void. The Supreme Court of Canada decided that T in becoming the depository of the money, was guilty of a misdemeanor under the criminal code, that W. was an accessory and that the parties being *in pari delicto*, and the illegal act having been performed, W. could not recover.

BULMER v. THE QUEEN.—The claimant applied to the Government of Canada for licenses to cut timber on timber berths situated in the territory lately in dispute between that Government and the Government of Ontario. The application was granted on the condition that the applicant would pay certain ground rents and bonuses, and make surveys and build a mill. The claimant knew of the dispute, which was at the time open and public. He paid the rents and bonuses, made the surveys and enlarged a mill he had previously built, which was accepted as equivalent to building a new one. The dispute was determined adversely to the Government of Canada, and at the time six leases or licenses were current, and consequently the Government could not renew them. The leases were granted under the provisions of the Dominion Act respecting public lands relating to timber berths, and the regulations made under the Act of 1879 provided that "the license may be renewed for another year, subject to such revision of the annual rental and royalty to be paid therefor as may be made by the Governor in Council." On a claim for damages by the licensee it was held by Exchequer Court of Canada that Orders in Council issued pursuant to the Public Lands Act, authorizing the Minister of the Interior to grant licenses to cut timber, did not constitute contracts between the Crown and proposed licensees, such Orders in Council being revocable by the Crown until acted upon by the granting of the licenses under them. And that the right of the renewal of the licenses was optional with the Crown, and that the claimant was entitled to recover from the Government only the moneys paid to them for the rents and bonuses.

ROBERTS v. BANK OF TORONTO.—A brick-maker who makes bricks for another person in a brickyard belonging to that person, and has possession of the brickyard while engaged in making the bricks, is entitled to a lien upon the bricks as against an execution creditor or chattel mortgagee of the owner, according to the Court of Appeal.

O'CONNOR v. HAMILTON BRIDGE CO. - The absence of a guard to a projecting screw in a revolving spindle is a violation of the provisions of the Factories' Act, the spindle being a moving part of the machinery, within the meaning of that Act, and it is also a "defect in the condition of the machinery" within the meaning of the Workmen's Compensation for Injuries Act, and in either view damages may be recovered for an accident caused by its absence, according to the Court of Appeal.

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE ball of the Western Commercial Travellers, held in the Tecumseh House, London, on Friday evening last, was a brilliant gathering.

THE Steel Clad Bath Company, with agencies in Toronto, Montreal, Winnipeg and Detroit, has issued a catalogue of its wares, which is a very neat piece of printing.

SOME twelve years ago Fred Doggett succeeded Cripps & Doggett as marble cutters, in St. Thomas. For several years afterwards he did a good trade, but latterly, dabbling in municipal affairs, he has lost ground, and now makes an assignment.

LAST week we noted the assignment of Thos. Johnston, dealer in crockery, at Picton. Since then his creditors have kindly agreed to accept 25 per cent. as in full of their claims.——The landlord has sold out the flour and feed business of Peter Campbell, a young farmer at Ripleys who became tired of tilling the soil and wanted to "keep store" in some way.——H. H. Pollock, a general storekeeper at Trent Bridge, has assigned after five years in business. He has had a good record, but appears to have been ambitious to carry too much sail.

THE Cornwall furniture firm, Buckley & Co., whose failure we noted lately, are offering their creditors 50 cents in the dollar.——D. G. Gray, hats and furs, Brockville, who two years ago bought the $2,000 stock in the branch store there of T. Mills & Bro, Kingston, is reported as failed.——J. Shepherd, rather prominent in the Ottawa paint trade, is reported as being embarrassed, but no particulars are at hand.

THE special issue of the Montreal *Herald* of Saturday last, consisting of 24 pages, was termed the Commercial Travellers' Edition, and a most creditable piece of work it was. On four of the pages were half tone portraits of some scores of the "Mercuries of commerce," their past presidents and the interior of their rooms in the Board of Trade building. Among the reading matter was to be found a sketch of the rise and growth of the Dominion Commercial Travellers' Association, founded in 1875, and brief biographies of the past presidents, from Andrew Robertson, the first, to David Watson, the latest.

IN 1891 Sweet & Co., general storekeepers at Victoria Harbor, succeeded McLeod & Co., in which firm Charles Sweet was a partner, the present owners of the business being his two sons, who had but little business training, and were somewhat careless business men. Now the assignment of the concern is something of a surprise, for it turns out that the mother is not interested. They owe $5,500, and have nominal assets of $4,000.——The creditors of J. Gilmore, furniture dealer in St. Catharines, have accepted his 50 per cent. offer made last week.——About fourteen years ago, Thomas W. Moffatt, Orillia, resigned his position as bailiff, etc., and started a grocery with a capital of $1,000. Not being a very popular personage, he had to be content with a small trade and small profits, and in May, 1893, he assigned and settled at 35 per cent., resuming business, the $1,000, we presume, being gone. Not succeeding, he again assigns.

MUSICAL circles in Victoria, B.C., have no doubt done their share of gossipping respecting the failure of C. A. Lombard, dealer in musical instruments, who claimed a couple of years ago to be worth over $11,000. Apart from the sale of instruments, both he and his wife had a considerable income from teaching, etc. He has assigned, but we are not told the reasons of his failure.——George Cavin, saloon keeper in the same city, has been sold out.——About thirteen months ago Samuel B. Kelly purchased the insolvent stove and tinware stock of S. L. Kelly & Co. in Victoria, securing the purchase by mortgaging the stock for $2,200. Now this mortgage has been foreclosed and the stock advertised for sale.

Mercantile Summary.

ACCORDING to the Hamilton treasurer, the receipts of that city from all sources amounted to $3,254,390 90, and of this sum $3,199,110.77 was expended, leaving a balance of $55,280.13 in the bank to the city's credit.

THE line of the Galt & Preston Street Railway Company is proposed to be extended from Preston to Hespeler, and the capital stock of the company to be increased from $50,000 to $100,000.

BRACEY BROS. & CO., who have a contract from the Dominion Construction Co. on the Toronto, Hamilton & Buffalo Railway, have been obliged to assign. Their laborers had not been paid for some time and went on strike. The firm's lack of capital is the cause of the trouble; the 50 per cent. that Bracey Bros. were permitted to draw on the estimated work completed not being sufficient for their needs, resulted as above stated. It is understood that the trustees will be in a position to go on with the work.

THE annual meeting of the Ottawa River Navigation Company was held in Montreal last week. The following directors were elected: R. W. Shepherd, president; J. J. Gibb, vice-president; G. W. Simpson, H. W Shepherd, R. Bolton. The company is building a fine new steamer to replace the steamer "Prince of Wales." The record of this steamer is unique. She began running in 1860 and ran uninterruptedly for thirty-five seasons. She never had a serious accident or breakdown, never a passenger injured or life lost. She carried on her first trip H.R.H. Prince of Wales, and has also carried Prince Alfred and Prince Arthur and several Governors-General.

DURING his career as a merchant in Beamsville over half a century, Alexander Allan has made only two changes. In 1887 he admitted Hugh Sinclair a partner. Two years later he retired and his son James was admitted. The style of the firm was afterward changed to James Allan & Co. At that time the firm was in good standing and the senior retired from the active management. A statement issued about a year ago showed them to be worth over $50,000. Evidently the son has not been able to take care of his father's hard earned money, and reckless granting of credits has been the main cause of his early assignment.——Thos. G. McCracken, a small dealer in cigars, etc., at Harriston, makes an assignment.

NOTICE of the incorporation of the Germania Life Insurance Company has been filed in the Tutelle Office, Montreal.

THE St. John firm of Charles E. Scammell & Co., ship-chandlers, are reported as having assigned, but no figures of liabilities are available yet.

A LONDON newspaper says that the private bank at Blyth has passed into new hands. James McMurchie, son of the reeve of Clinton, and H. T. Rance, long in Farran & Tisdall's bank in Clinton, have taken possession.

A TORONTO grocer on a small scale, Arthur E. Davey, has assigned. He had been only about fifteen months in business.——Last August, Arthur S. Hopkins purchased the old established drug business of H. A. Knowles for $3,000, paying $1,200 cash on account of the same, the balance being secured by a chattel mortgage. Now he is compelled to assign.

IN the latest calendar sent to this office, a golden-haired young woman, in canary-colored gown and slippers, sits, in surroundings of purple—and, presumably, fine linen—having the Union Jack as a curtain to her mansion, and sings to a zither accompaniment, "We are the largest radiators under the British flag." The words of the song don't sound much like poesy, but then the authors say, "It is facts we are after." The donors of this work of Canadian, art are the Toronto Radiator Manufacturing Co., Limited.

A DRY GOODS retailer in the northern suburbs of Montreal, J. P. Lanoix, who was burned out a few days ago, has arranged a compromise at 60 cents on the dollar cash. He owes just about $5,000, and he gets $2,650 insurance, and has some moderate salvage.——J. Homier, furs and hats, Montreal, reported failed last week, has arranged with creditors at 50 cents, on liabiiities of $3,730.——Joseph Lebrun, shoes, of the same city, recently assigned, proposes to pay his creditors 25 cents on the dollar. He owes $3,300.

WE note the following failures in Montreal: Amable Desautels, formerly a working shoemaker, who began manufacturing hand-made goods three years ago, has assigned on demand. He owes $1,618 direct, indirect $1,500.——A. G Gaucher, a recent beginner in the jewellery trade, has been asked to assign.——Moise Richard, a grocer in the eastern suburbs, has made an assignment, and owes $2,749.——J. W. McKeen, grocer, barely a year in business, has not been able to make a success, and the assignee has taken over his estate.——J. W. Blanchet, dealer in men's furnishings, has been served with a demand of assignment, at the instance of Messrs. Gault Bros. & Co.; liabilities are not ascertained.——P. F. O. Charlebois, doing a small dry goods trade in St. Henri suburbs, is seeking a compromise.

MR. J. MARIO LAURE, of the firm of J. B. & A. Artaud Freres, of Marseilles, France, is in Montreal. He visits Canada in view of the French treaty, and to establish an agency for the sale of their products in wines and olive oils. Messrs. Artaud is a well-known firm in Southern France.

GEORGE STEELE, who has been a dealer in cigars, etc., at Lethbridge, Alberta, for a little over a year, has assigned.——Since October, 1889, J. Corbett & Co. have carried on a clothing trade in Winnipeg, with only moderate success, as they attempted too much. Owing to keen competition, they concluded it best to dispose of their stock, and since then we hear of their assignment.——M. W. Minthorne, a dealer in shoes in a small way at New Westminster, also places his affairs in an assignee's hands.

AN offer of 60 per cent. has been made to the creditors of T. G. Foster & Co., dealers in cabinetmakers' supplies, for the assets of the firm. If the security is satisfactory, this will probably be accepted.——Five years ago J. T. Showler arrived in Arkona and purchased the general stock of B. Learn at $2,000, making a small payment at the time, his father granting some assistance. For a couple of years he has found collections difficult, and we presume has got behind. He now calls a meeting of creditors to consider the situation.

THE general stock of Smith & Steel, at Seaforth, will be sold on Wednesday next. On the same date the general stock of J. Fraser, Lefroy, will be disposed of. D. B. Pratts', Hamilton, shoe stock will be sold on the day previous.——The grocery stock of Wm. Precious, Hamilton, realized 56 per cent. at sale. In the same city, James Robertson's dry goods fetched ten per cent. more.——At London, Hunter & Caldwell's shoe stock was sold at 41 per cent. discount.——Thos. Dayas' general stock, Charing Cross, realized 57 per cent.——Two per cent. less was made out of the dry goods stock of J. S. Smith & Co., Ingersoll.

AT a recent meeting of the Ottawa finance committee, it was decided to issue debentures for $300,000 to meet that amount of debentures which fall due in London in June. The new issue will be 4 per cents. Hitherto the city has issued 4½ per cents.—*Ottawa Journal.*

IT is reported that George Crealock, cattle dealer in this city, has taken his departure, leaving some creditors in the lurch. About two weeks ago he borrowed $700 from H. Mullins to pay for two car loads of cattle in Montreal; after selling them he was traced to Buffalo.

THE most recent invention of the Dominion Paper Company is a folding box, either telescopic or with lid attached. These boxes have reached a high stage of perfection and will apparently soon supplant the present style of hand-made boxes. They are made at less cost, of more durable construction, take less room in storage and can be transported at one-third the cost of the ordinary box. Manufacturers or others using large quantities of boxes would do well to enquire into the merits of this new style of box-making.

THE following country failures in Quebec Province are to be noted since our last issue: Mrs. Louis Gagnon, dry goods and millinery, St. Hyacinthe, has made an assignment. She got an extension of time in 1892, and then claimed a surplus of some $4,000.——N. Lepine, the Magog liquor dealer, is before his creditors with an offer of compromise at the rate of 60 cents on the dollar.——Barney Mullin, hotel keeper at Pigeon Hill, near the scene of the Fenian raid of 1870, where General O'Neill was made prisoner by the United States marshal, after his troops had been sent flying across the line by a few well-directed volleys from one company of Montreal volunteers - a small body of hardy Missisquoi farmers - has assigned. He suffered a serious loss by fire in 1893.——Antoine Courchene, a storekeeper on Isle Dupas, an island in the St. Lawrence near Berthier, has failed, owing, it is said, some $5,000.——E. Bourgouin, general dealer, St. Flavie, already reported insolvent, is offering 25 cents on the dollar.——A demand of assignment has been made upon Telesphore Demers, general store, Ste. Sophie de Levrard, who, it is said, recently made a transfer of his property. He failed before just ten years ago.——Napoleon Courtemanche, a hotel keeper at Chambly, has failed, owing $9,336; he is said to show assets of $8,000.

MONTREAL FIRE INVESTIGATIONS.

Three hundred and fifteen fires occurring in Montreal during 1894 were investigated by Messrs. Perry & Poirier, fire marshals of that city, who have sent us a printed report thereon, printed in both English and French.

In only twenty-five of the cases was there no insurance, and the aggregate damage done to buildings or goods in these 315 fires was little less than half a million—$497,774. The marshals examined 647 witnesses. They decide that a large share of the fires originated through explosion of coal-oil lamps and a lesser number through the use of lucifer matches.

We were quite prepared to find in a list of more than three hundred fires a dozen or a score of accusations of incendiarism; but the report says that only two persons were charged before the marshals with that crime; one was acquitted by these officers, and the grand jury acquitted the other. Still, it is a good and proper thing, as a deterrent for the people to be found in every community who will "beat an insurance company" if they can, to have officers whose duty it is to investigate every fire. In the list here given of losses incurred on the respective premises and amount of insurance thereon, we find the following items:

Properties.	Insurance.	Losses.
Boot and shoe shops	$137,400	$11,636
Cigars and tobacco	21,451	5,951
Clothiers' stores	115,850	14,034
Dwellings	142,260	45,585
Dry goods stores	47,700	25,210
Electric company	330,400	37,473
Fancy goods	116,950	62,700
Furniture stores	22,300	20,012
Groceries	164,600	95,851
Hotels and restaurants	43,934	13,934
Laundries	47,000	34,631
Millineries	11,700	9,000
Paper boxes	43,150	5,350
Provisions	144,200	31,097
Stables and sheds	37,895	15,075
Sewing machine factory	162,455	29,662
Warehouses	9,000	14,680

The aggregate of insurance upon the properties investigated is given by the report at $1,505,605, the loss amounting in all to about one-third of this sum.

MONTREAL TRADE FIGURES.

The imports at Montreal last month were a good deal less than in January, 1894, the dutiable goods being $1,743,000 in value as compared with $2,108,000; and the free goods only $499,000 against $954,000, being last month mainly raw cotton, chemicals, hides, furs, crude rubber, tobacco leaf, hemp, tea and coffee. The exports, which are small in winter at our chief city, were $479,000 in value last month, of which all but $79,000 was the product of Canada, consisting of cheese ($257,000), leather, horses and sheep, hay, wood, minerals, &c. The products of fishery or forest were hardly represented in the list of exports. The "coin and bullion" shipped was American gold passing through Canada

Dry goods imported show a much reduced aggregate, $939,016, where in January, 1894, they were $1,154,448; the only increase is in cotton goods, all others are reduced. Metal goods drop from $230,025 down to $127,983, the great bulk being of course iron and steel and manufactures of, which were only $108,000 in value, where in the previous January it was $196,719. There are reductions in the items of books and pamphlets, paper and envelopes, spirits, wines and fruits, gutta percha goods, paints, oils, and wood goods, jewellery and watches. The articles which show an increased import last month are leather and its manufactures, drugs and medicines, glass and glassware.

THE SITUATION.

For the anarchy which exists in University College, it is difficult for outsiders to find any adequate cause. The boycotting of the professors is an act that recoils on the students by whom it is resorted to. They alone suffer. The professors are in no respect the worse for the absence from lectures of the students. It is surprising that this has not occurred to the students themselves. If, as in some English universities, the students relied more on private tutors than on the professors, the strikers might not suffer much from the boycott, but where private tutors play but so small a part as they do in University College, there is nothing to take the place of the lectures. The attempt to draw Victoria College into the mysterious embroglio has happily failed. Professor Burwash, speaking as an old college boy merely, pointed out that the connection between the two colleges is very slight. If it is ever to be made closer than is marked by the federation to a common university, it is to be hoped that it will be in the direction of preventing a waste of power and not in a rivalry in boycotting professors. The germs of the present anarchy were sown in intrigues which took place, some time ago, when Vice-Chancellor Mulock was subjected to unreasonable censure. The hopes of those who believe that the University should be left to govern itself, free from Government control, will scarcely be advanced by the present tactics of the students. The strong arm of the Government has been found useful in asserting authority, the authority of professors which had been assailed. The boycott collapsed when 200 students made it known that they intended to go back to lectures. If, as now alleged, Professor Dale's intent was to object to the present mode of appointing professors, as a matter of policy, he would have been quite within his rights if he had taken this line and strictly adhered to it, without objectionable digression.

A postponement of the bringing into force of the new rules of the road at sea, which were to have gone into operation on the 1st March, has been agreed upon by most of the nations which were parties to their adoption. These rules were recommended by the International Maritime Conference, which sat at Washington in 1890. Among the nations which consented to act upon these recommendations were Great Britain, the United States, France, Germany, Norway and Holland. The experience of Great Britain, as the greatest of the maritime nations, was largely availed of at the Conference. But on some points, especially fog signals, considerable difficulty was experienced. The work of the Conference, adopted by so many governments, did not fully meet the views of sea-faring men, and at the urgent solicitation of the latter, especially the British, a halt has been called for a time. A committee of the British Parliament is to investigate the whole subject, pending a suspension of the operation of the new rules. If any changes be proposed by the committee and sanctioned by the British Government, they will require the consent of other nations before they go into effect. This operation will take time, and it is impossible now to say when the new rules will go into force. Changes in the mode of navigation have made it desirable to discard the regulations which were framed to meet conditions of navigation which no longer exist. The delay in making the change is regrettable, but it is inevitable.

Since the full text of the judgment of the Privy Council on the Manitoba school question arrived in this country, it has been made clear that, in the belief of this tribunal of last resort, the Dominion authorities possess power to afford relief to the advocates of Separate schools. The Government of Manitoba, without waiting to be asked to alter the law, as desired by the minority, has made it known that it declines to do so. That may, perhaps, not be a reason for the Dominion Government not asking it to make the change in question. But in the last resort, the question will be what the Government proposes to do in the premises, and before this point can be decided, the Government must first ascertain what it can do. One thing is clear: the Government can do nothing except in the exercise of constitutional authority. Can it relieve the Catholic minority from contributing to the Public schools? Clearly not, for the Privy Council has decided that the local legislature had authority for passing the Act which requires such a contribution from them. Can it divert any portion of the school lands, which it donated to the province and of which it is the trustee? The Government may find some way of coming to the relief of the minority which is not patent to us. The general election, whenever it occurs, will find this question to the front; and it will complicate matters that the electors will be asked to decide upon it and the tariff issue, at the same time.

A long-standing dispute over accounts, involving claims and counter-claims, between the Dominion and the Provinces of Ontario and Quebec, has at last been settled by the award of the arbitrators to whom it was referred. So long as the accounts were open, neither of the provinces concerned nor the Dominion knew where it stood, and any of them was liable to be disappointed by counting upon what might never be realized. Thus obligations on one side, and a surplus on the other, were continually called in question and made matters of dispute. No one, so far as we have seen, has yet figured out the award in all its details, and shown the net results to the three parties interested; but it is understood that there are no very large sums required to adjust the balances found to be due. One of the questions decided arose under the Robinson treaty with the Indians. Ontario got the land in respect to which the annuities to the Indians were payable, and these payments must be made by the party to which was assigned the land in consideration of which they were promised; in other words, Ontario, which got the territory, is held to be liable for the annuities, which are analogous in effect to a mortgage upon it. The award removes most of the causes

of difference between these two provinces and the Dominion, and any that may remain are likely to be amicably settled in the same way. The removal of difference may tend to introduce the practice of political neutrality between the provinces and the Dominion. The desirability of such neutrality has sometimes been held by public men in the neighboring republic, but as a rule it has been absent. The case is one in which the aspiration is more deserving of honor than the practice which contravenes it.

The free silver advocates at Washington have beaten a retreat, on the pretext that their bill in the Senate, if not dropped, would interfere with the Appropriation Bill. This free silver bill, fathered by Senator Jones, of Arkansas, provided for free coinage of silver dollars of the present size, the Government buying the silver at the market price, and keeping the difference between what it paid a dollar for and gave out as a dollar, under the name of seignorage. The honest thing would have been to put the dollar's worth into the dollar.

THE TRUE STOREKEEPING IDEA.

What is the sense, will anybody tell us, of storekeeping when the storekeeper does not make a living?

What is the good of putting money into a stock of merchandise which you sell at too small a profit?

What is the use of giving away on credit the wares you have paid money for, when you cannot collect one-half your outstandings?

Where is the benefit of the hard work, the long hours, the canvassing, the advertising, the cutting of prices, the coaxing, done to get custom when there is not trade enough in your village to afford an honest living to three general stores—whereas you have six?

If there is anything in the doctrines of the economists there is no utility, but a loss, in the labors of the man who wastes capital. The merchant who does not get profit enough to pay his expenses and yield a living is wasting somebody's capital—his own, if he had any; his creditors' if he had not.

As to the two last questions, the benefit of your storekeeping labors goes to those who got your goods on credit and paid for only half of them. But wrong was done to you in the transaction. If, through foolish crediting and selling goods too cheap, you had to make assignment, a wrong was done to your creditors. No one was benefited save the customers who got your sugar, your nails, your cotton, your shoes, at less than the proper market price. And business should not be done for philanthropy, but for profit.

FINANCIAL REVIEW.

The winter is passing over us quickly, and the country has certainly had some taste of what winter amounts to in earnest, when the storms gather their forces in this country. It has been stated repeatedly that our winters now are very different from those of former days, which is true enough of the average winter of these times. But we do now and then have an exhibition of winter in all its strength, such as has lately passed over us. There is this, however, to be said, that the great railways of the country have put us in an entirely different position with regard to winter from that we occupied formerly. In the days when it took two full days in winter to get from Quebec to Montreal, and four or five days from Montreal to Toronto, business shrank to the very smallest dimensions during the whole season. But now winter business goes on almost as actively as summer, and the distribution of products of all kinds is scarcely interrupted by the closing of navigation. The effect of all this upon our methods of business, and especially on banking, is almost incalculable. All the movements that characterize banking, viz., deposits, discounts, note circulation, the transmission of money from one point to another, payments of wages, disbursements for purchases, payment of duties, and so on, now go on just as actively in winter as in summer. And even after great storms the worst that happens is a delay of a few hours, instead of an absolute stoppage of traffic for days and weeks together, as formerly.

During the month of January it has been customary for most business houses to take stock, and endeavor to ascertain the results of the business of the year. There can be little doubt that the result in very many instances has been disappointing, not to say vexatious. In some lines of business, notably in the lumber and timber trades, the result of last year's operations was fairly satisfactory, indeed, in some cases, highly satisfactory. But generally, our importers have ended the year with little to reward them for the toil and risks they have run.

The course of competition operates adversely in two ways. On the one hand it diminishes gross profits, and, on the other, it increases expenses and bad debts. The last is a very sore subject, and we know we are touching many of our readers on a raw spot in referring to it. In fact the diminution of gross profits is a sore spot also, and so is the increase of expenses. It rests with our wholesale merchants themselves to apply the remedy. It is difficult to see what the remedy should be, except by some mutual understanding as to length of credit—range of salaries of employes—ratio of gross profit, etc. Some foolish people would no doubt begin to talk about combination and oppression, and denounce any action looking in that direction. But if those who find so much to say against combination could experience a little of the heartbreaking anxiety of men who can only do business at a loss, and who find themselves with less and less capital every year, the hard earnings of former years steadily depleted by adverse conditions, they would perhaps cease to talk in a manner which shows so much practical ignorance of the subject. In most instances of combination in this country necessity was the moving cause of it.

If we turn our eyes to what is transpiring on the other side of the line, we shall not find the condition of business one whit more favorable. A dragging, dull, heavy period is being slowly passed over. The nation has not recovered from the miseries of 1893, and the late action of Congress in the matter of an additional loan is almost calculated to shake one's faith in the value and advantages of representative institutions. That a deliberative body, once so highly respected as the Senate of the United States, could descend to such a depth of folly as to saddle the country with a burden of $750,000 a year, purely for the sake of refusing to use the word "gold" instead of "coin" as a medium of payment, is a melancholy comment on what some would call the downward tendency of democratic institutions, unless checked by influences of a higher nature. It has come to pass that in the United States nothing is certain at present but the utter uncertainty of the financial future. One day the advocates of the only feasible standard appear to have the advantage, and the next the silver cranks are spoken of as being in the ascendancy.

The bi-metallic convention which is to be held in Europe will probably be the first influential factor in settling the wavering and dissentient factions which have control of large divisions of the American legislature respectively. That it will not satisfy all parties goes without saying. The

silver people want too much, and want it so quickly that the balance would be more seriously affected than ever if they got their desires. The practical result of a previous convention was to deal with small amounts and by monthly purchases of silver, aggregating perhaps two or three millions for Great Britain, gradually leading to a similar policy on the part of other continental nations. This was a slow but sure method, and would inevitably have produced a salutary effect by this time, but it was too slow for the silver people, and was rejected, thus nullifying any benefits which might have resulted from the conference. No safer method could have been suggested, and the cure must of necessity be one which will not abruptly or violently disturb existing conditions.

There is nothing in the banking position to call for special remark. Circulation is being redeemed as usual at this time of the year, and as usual discounts are decreasing; but deposits continue to augment, and we fancy many banks are rather burdened than otherwise by the amount of money on which they have engaged to pay interest. Banking profits are probably running on much lower lines than usual. The annual meetings, which will be taking place in the course of a few months, will tell the tale with certainty. But it would be well for shareholders to be expecting little, in which case they will not be disappointed.

We call attention to our usual summary of the banking position by provinces:—

ABSTRACT OF BANK RETURNS.

31st January, 1894. [In thousands.]

Description.	Banks in Quebec.	Banks in Ontario.	Banks in other Prov's.	Total.
Capital paid up	34,722	17,670	9,711	62,103
Circulation	15,148	10,470	4,953	30,571

ONTARIO LOAN COMPANIES.

The economic condition of the farmer, the shrinkage in value of real estate in town and country, the decline in rates of interest on loans, the prospects of a change for the better in land values and sales—all these have been discussed in our midst of late by such authorities as Mr. Mason, of the Canada Permanent; Mr. Blaikie, of the Canada Landed and National; Mr. McClary, of the Ontario Loan and Debenture Company. To these utterances must now be added the remarks of Hon. Senator Allan, at the meeting of the Western Canada Loan Company this week.

In discussing the question whether the world-wide financial depression is beginning to pass away, and town lots or farm lands will resume former values, and whether prevailing low rates of interest will rise, Mr. Allan goes back to the dark days of 1857 and 1858 in what is now Ontario. At that period, he reminds us, land values were hopelessly depressed and the pessimists of the time prophesied they would never rise again. But the tide did turn; business of all kinds revived and so did real estate. There exist to-day in Canada, Mr. Allan contends, with truth, "elements of strength and powers of recuperation which did not exist in '57 and '58." For instance, the resources of the country are infinitely greater and more varied; there is much more wealth—more free capital ready to be employed now than there was then; our farms are yielding a wider range of products; so, he might have added, are our mines, our fisheries, our forests. And there are still undeveloped resources in this great land. Therefore, he appears to suggest, as in years after 1858 recovery set in and the country went forward in a career of fairly steady progress, so there is every reason to suppose that the prevailing conditions will alter for the better. On the other point, the rate of interest, Mr. Allan's remarks are guarded, it being one upon which the best opinions differ. It depends, as appears to us, in some degree at least, on circumstances exterior to Canada. If interest rates rise in other countries, they will naturally improve here. But so long as they continue low, thereby reducing the earning power of money-lending corporations, it is obvious that reduced dividends are a natural outcome.

It is proper, in discussing Ontario loan companies, to call attention to a matter which we have mentioned on previous occasions, namely, the difference in the conditions under which these institutions work from those prevailing in other countries, Australia for example. On the other side of the world we have seen companies lending on wool, or on cattle and sheep, acting as agents for the sale of field products, and doing a variety of business foreign to our notions of a land mortgage company's functions. The result to some of these institutions was disaster. Canadian mortgage loan companies are prohibited by law from such transactions as these. Moreover, they are restricted in the aggregate amounts they may lend on land in proportion to capital, a salutary provision that might have saved some of the Australian companies that cost the British investor so dearly. It is something to be proud of that no one in Britain has ever lost by lending to an Ontario loan company.

With investments amounting to $6,668,000, the Western Canada shows gross earnings of $409,802, equal to 6.127 per cent. After writing off to cover depreciation and loss, and paying all charges, its net earnings are shown to be $172,197, sufficient to pay ten per cent. dividend and tax on same, and to place $19,811 to contingent account. Reductions are shown in cost of management as well as in interest on debentures, presumably by reason of the lower rate upon which it borrows money, for the aggregate of debentures and deposits is practically the same as twelve months ago. Analyzing the contingent account, it is seen that the sum of $27,827 has been taken from that fund in the process of "cleaning house," and to this the president refers, not apologetically, but as a measure implying a

desire to present only sound assets. It is a policy, too, that offers a beneficial example to other companies of a like kind.

The statement of the Huron & Erie Loan Company shows a still further increase of business, its funds having been well employed, we are told, and its mortgage securities now exceeding six millions. These consist of 3,466 mortgages, of an average amount of $1,690 each. That the company does not find it seriously necessary to tout for business, even in a generally dull year, appears from the amount of applications made to it for loans ($2,099,000) during the year, of which less than forty per cent. were accepted. The result of this business, as regards profit, is at the rate of about 5.56 per cent. on the total assets, and, if we take the earnings upon the mortgages alone, say, 5.87 per cent. The general good character of the loans of this company, made as they are in the main upon farms in the best part of Ontario, accounts for the comparatively small amount ($5,950) it has found necessary to write off. The company pursues, it appears, the policy of realizing promptly on such real estate as falls into its hands, for it had only $13,457 worth of land on hand at the close of the year, according to its statement.

Enough was earned from interest to pay nine per cent. dividend and the tax thereon, to pay $14,000 towards the cost of premises, and to carry $15,798 forward. Besides this, the sum of $29,870 was realized from sale of new stock at a premium, which swells the Reserve Fund to $700,000, or fifty per cent. of the paid capital. The president in his address takes a natural pride in the character of the company's assets, in the reduced proportion of its percentage of expenses, and in the character of its staff. The arrears of principal and interest amount, he tells us, to 1½ per cent. of the cash value of the securities. Everybody admits that the Huron & Erie is a sound and successful company. At the same time, it might have been politic in the president to be a trifle less roseate in his painting of its affairs. One cannot but regard as extraordinary the statement that matters which appear to have most troubled all other loan companies, great and small, have not troubled his, and yet this is what he declares in the very first paragraph of his address.

The circumstances of dulness and depression in financial circles, and depreciation of merchandise as well as land, are referred to in the address of the president of the Ontario Loan and Debenture Company. That gentleman dwells in some detail upon the causes of existing conditions amongst us and concludes that, as things have got to about their worst in respect of land values, we may begin to look for improvement. The present is a waiting condition, he says, and upon the whole we in Canada can afford, quite as well as other peoples, to wait. The Ontario Loan Company has had a very fair year's business, and shows net earnings slightly greater than in 1893 or 1892. It puts $18,000 to Reserve after paying dividend and carries forward a small balance. Sterling debentures are less these two years past and currency debentures more, indicating, we trust, that more Canadian money is being procured in that shape rather than in deposits. The company has the pluck to show plainly the figures of its real estate owned and on hand unsold. Few societies of the kind do this; but every one conversant with lending money on land for hese few years past knows quite well that it has not been possible for any one, private lender or company, even the most careful and close, to escape lock-ups or losses of the kind.

The earnings of the Dominion Savings and Investment Society for 1894 were just sufficient to cover dividend and a few hundred dollars over, and this in spite of the closest economy. The total of the company's loans is $2,279,000, of which $817,000 is new loans of the year, and the gross earnings thereon are shown to be 5.671 per cent. In a discussion of the small margin of net earnings and the desirability of an increased reserve, Mr. Purdom doubted whether the present rate of dividend could be maintained, and Mr. Kent recommended the reduction of interest to depositors in order to the maintenance of dividend.

The figures in the statement of the Building and Loan Association correspond in the main with those of 1893, except that earnings are somewhat less. The company has declared its usual dividend, but it is evident from the address of the president and vice-president that there is some question whether a reduction in dividend may not come. Both agree, however, in the resolution to pay no more than what is earned. The terms of the report are brief and plain. Earnings are lessened—interest accrued on some of the loans has not yet been paid, and there is doubt whether it will be. Under these circumstances the unusual but needful entry finds place in the company's statement of profit and loss: "Interest earned but unpaid and not credited," which is accordingly deducted from the net earnings of the year.

THE ROYAL TEMPLARS.

In two of our December issues we endeavored to give our readers some information about the quasi-life insurance furnished by the Select Degree, as it is called, of both the United States and Dominion branches of the Royal Templars of Temperance. Several tables were given showing the membership of the United States branch, whose headquarters are at Buffalo, and of the Canadian branch, head office at Hamilton. Nearly two months have passed, and though both branches have newspaper organs, the accuracy of the main portion of the information thus compiled and furnished has remained unchallenged. But in the course of our remarks thereon, noticing that by one table the membership of the largest body—the American, from which the Canadian one emanated—had dwindled from 15,791 in January, 1890, to 12,957 in January, 1894, and that the surplus funds of the smaller body had dropped in four months from $72,533 to $60,517, and that there was a decrease in the collections, we said, "The membership of both of them seems to be on the wane at present."

Now appears Rev. Wm. Kettlewell, Grand Councillor —a title which, when interpreted, probably means President of the Dominion Council of the R.T. of T.—and pours out a whole column in the organ of the Order at Hamilton, not commending THE MONETARY TIMES for collating and presenting to its readers so much valuable information, but accusing us of "deliberate falsehood," and downright "dishonesty." Also, it seems that by having unfortunately mentioned the bare fact that the receipts of the then "past month were only $5,412, while the outgo for death losses was no less than $13,300," we have committed the "acme of commercial dishonor," whatever that awful thing may be, as viewed through the spectacles of our reverend critic. And there is more of the same sort of denunciation of the imputed personal motives of this journal's editor, and setting up men of straw whose outlines we never thought of, instead of dealing directly with the well authenticated figures THE MONETARY TIMES furnished.

We should like to say to Rev. Mr. Kettlewell, whom we highly esteem as a Methodist minister, that it would be much more becoming his profession as a Christian teacher if he would not forget on Monday the principles he is supposed to inculcate on Sunday. The very words he has deliberately

written down in ink, and published broadcast, concerning the editor of this paper, if spoken in his presence, are such as have frequently been met with blows, subsequently held to be quite justifiable in police courts. What a bad example does a man furnish to the young in his congregation, who teaches them charity from the pulpit, and, so soon as the clock strikes twelve, feels at liberty to accuse one of his brethren of uttering either a d—— f—— or a d—— l——. Lest the case might be thought to be too strongly stated, we will carefully quote what our reverend detractor has written and put into print, and scattered among the brethren: "The articles are dishonest and dishonorable. The M. T. states a deliberate falsehood. It says of the Royal Templars, the membership seems to be on the wane at present. The M. T. must have known this to be a falsehood." And then, to prove it so, our righteous critic appeals to the bare figures of the Canadian branch, as to membership only. But we were making a general statement in view of all the figures before us, those relating to the Order on both sides of the line, and those with dollar marks to them as well as without. The statement was: "The membership of both of them seems to be on the wane at present." If Rev. Mr. Kettlewell had stated that this was an error as to the Dominion branch membership, though quite correct as to the larger and older parent branch, no one could complain. But here are some of the items that were before us at the time, and this is still the position, not one of these figures having been disputed:

DOMINION BRANCH.

Date.	Members.	Income.	Fund.
Aug., '94	5,257	$5,472	$72,533
Oct., '94	5,231	4,965	68,498
Dec., '94	5,334	5,412	60,517

AMERICAN BRANCH.

Date.	Members.	Cost per $1,000.
1884	15,113	$ 7 00
1891	13,698	15 88
1893	12,957	19 86

There is fairly good evidence here to justify a remark about a "seeming" decline having struck both societies, even though some of the figures of one of them show a slight, a very slight, increase between August and December. In another portion of his reply Mr. Kettlewell has to admit that the "abnormal experience of a single month" is unreliable. And then he says "The dishonesty of the articles is further shown by assuming that the Royal Templars make provision for a Reserve Fund." If Mr. Kettlewell will read the articles once more he will withdraw that statement or stand a self-confessed falsifier. Not once does the word "Reserve" appear, nor any other word or expression to that effect. Therefore the "dishonesty" is not ours. And then Mr. Kettlewell denies, what we did not assert, that the special levy of one dollar per member was "to relieve the pressure growing out of the death-rate of 1894." He says it "was a levy to enable the board to employ agents to extend the Select or Insurance Department." We spoke of it as an assessment, and it appears to have been only a "levy," but it seems to have footed up to $1 per member, no matter which name is applied to it; and it gets there, all the same, whether it is applied for "mortuary purposes," or is used "to employ agents to extend the Insurance Department." We only mentioned the fact that "no assessments were needed, or even called for," without being needed, before "about a year ago."

Mr. Kettlewell thinks the fact that some societies conducted on the assessment system have come to grief is no proof that others will, any more than the failure of some regular companies discredits the security of others conducted on that basis. We differ from him here. Regular companies have a correct and scientific basis for their business, and none have ever failed where the proper Reserve fund has been maintained intact. But such societies as the Insurance Branch of the Royal Templars must fail, if they depend upon mere assessments, or the bare cost of the death losses, as they occur, for their means of meeting claims. Everybody but a hopeless dunce now knows that death claims increase with increasing age, and that healthy young lives cannot be induced to submit permanently to assessments double and treble what they now are in most young societies.

THE PACIFIC CABLE.

Between Mr. Sandford Fleming's estimate of the cost of constructing the proposed Pacific cable and its maintenance for three years, and tenders for the work, the difference is so great that it must prove a great encouragement to the promoters of the project. His estimate was £2,000,000, while tenders for none of the seven possible routes exceed £1,517,000. This is the highest, the route being from Vancouver to Norfolk Island, and thence by one line to New Zealand and by another to Australia. The lowest tender, £1,243,000, was for the route from Vancouver, *via* Honolulu and Fiji, to New Zealand only, and was therefore incomplete, since it left Australia to be otherwise provided for. Two of the other offers were similarly incomplete, one connecting with Queensland and the other with New Zealand only. The choice would seem to lie among the other four routes, which provide a service both for Australia and New Zealand. And one of these four may have to be left out of the account, if Necker Island cannot be utilized. Still all deductions made, the tenders must be considered as encouraging. The saving of nearly a quarter of a million of capital on which to provide dividends, almost 25 per cent. on the amount of Mr. Fleming's estimate, puts a new face on the whole business. This is on the assumption that these test tenders are from responsible parties, able to carry out what they are ready to undertake. As there will be less capital to raise than the original estimate called for, the contribution of each colony should be capable of reduction from the original figure, The prospect of a fair return on the capital is, of course, improved by the reduction of the cost. It would be well to hear from Mr. Fleming whether he believes that the reduced figures can be made to accomplish the work.

MUNICIPAL INSURANCE.

Another attempt is to be made—one was made some five years ago—to get a municipal insurance bill through the Ontario Legislatures Such a bill has been drafted, proposing to enact that a bureau of fire insurance, if any municipality vote to burden itself with such a dangerous luxury, shall consist of three commissioners, two to be appointed by the municipal council and one by the local board of trade in each place. These to be a corporation, with powers. It is proposed by section 17 of this precious bill to *compel* the insurance in the municipal bureau of all property in the town or village—except otherwise provided—to two-thirds the assessed value, at such rate as the commissioners shall fix. The "otherwise provided" seems to refer to the exclusion of erections of a hazardous nature, which risks presumably will be left to the wicked and tyrannical insurance companies to cover.

The powers proposed to be conferred by this bill are tolerably comprehensive: The councils of such places as have the blessing of a Bureau "*shall* establish and maintain" water hydrants wherever the commissioners tell them; they "*shall* pay" what the commissioners deem requisite for engine houses, reels, horses, equipments; they *shall* pay the fire brigade what salaries the commissioners say; all by-law. the Bureau passes *shall* supersede the by-laws of the municipality which conflict with the wisdom of the commissioners, and so on. We have not space to-day to refer to the 56 clauses of the bill. We can only call attention to the fact that these proposed commissioners are to *fix their own salaries*, as per paragraph 16, the chairman to have not more than $5,000 and the other two not more than $3,000 per annum Then they have power to appoint solicitors, inspectors, managers, etc.,

etc. A hundred dollars a week is a nice plum for a chairman, sixty dollars a week is not so bad ; and there are sleigh loads, train loads, of good politicians who want such posts, and who would even be content with a secretaryship. So those who think the Ontario Legislature would never be guilty of the folly of passing such a bill had better be on the alert to circumvent the log-rollers.

TORONTO FIRE UNDERWRITERS.

The annual meeting of the Toronto Board of Fire Underwriters was held on Wednesday and Thursday, February 13th and 14th. Mr. J. G. Thompson, of the Lancashire, president, was in the chair. Thirty companies were represented. What had been done in the interim since last annual meeting was confirmed. A modification of the increased rates on city properties, which were printed in our issue of January 18th, was adopted in so far as regards large retail stores, with more than 10,000 square feet floor space. The secretary is in such cases given power to specifically rate such risks. The board's inspector submitted his report on the fire appliances of Toronto. Mr. P. H. Sims, of the British America, was elected president for the ensuing year, and Mr. Alfred Wright, of the London and Lancashire, vice-president. Mr. McLean, the secretary, has been given a month's holiday, and is now in the lovely groves of Virginia.

WESTERN ASSURANCE COMPANY.

The experience of the Western during the year 1894 has proved to be somewhat more favorable than might have been expected in view of the disastrous character of the year to fire insurance companies generally, for the report says, "After paying out of the profits of the year our usual dividend of ten per cent. upon the capital, we have been able to add $10,000 to our reserve fund, and after providing an ample reserve for running off outstanding risks we have made a substantial addition to our net surplus." On comparing the previous year's figures we find the increase in surplus to be $28,083, viz., from $349,164 to $377,247, and the reserve fund is brought up to a round $1,100,000. The income of the year was $2,193,873, and the outgo $2,082,420.

Referring to the recent great fires in Toronto and the steps to be taken to guard the city from a repetition of them, the directors add a cautious sentence to the effect that as a result of these disasters the improved protection so long needed in Toronto "seems likely to be afforded." The Western, as our readers know, has taken over the Canadian business of the United Fire Insurance Company. The remarks of the new president, Mr. George A. Cox, upon the death of his predecessor and his own appointment to the position, were couched in terms of sincere appreciation of the late president's high character and long service, and of becoming modesty with regard to himself as Mr. Smith's successor.

WELLINGTON MUTUAL FIRE INSURANCE COMPANY.

The report of this company, in commenting on the increase of fire losses during 1894, expresses the opinion that a very large number of them are "due to gross carelessness, and we fear to something worse," and advocates the appointment by the Government of officers to examine into all suspicious fires. This suggestion is in harmony with that made by the authorities of another of the old mutual companies, the London, which recommends for the public good the appointment of "a fire marshal, with experienced detectives under him, to check the increasing crime of incendiarism."

It is very probable that the ferreting out of a few incendiary fires and the sending to penitentiary of those who cause them, would lessen the number of such cases. But what is to be done to those whose inexcusable carelessness about fire causes an enormous aggregate of losses to themselves and others? They cannot be sent to gaol for their negligence, and yet they ought somehow to be punished.

The company's statement shows nearly a hundred fires in the property of its policy-holders, with losses of $35,300, which amount is about the same as in the previous year. The total at risk shows an increase of $360,000 over 1893, under 4,905 policies; the issue of policies during the year was 448 larger. This company evidently has a staunch lot of agents, and an equally staunch lot of customers. Mr. Charles Davidson was re-elected to the board, and Messrs. W. H. Storey and Thomas Gowdy chosen to replace F. W. Stone, deceased, and F. McElderry, resigned. Mr. James Goldie is the president.

TRUSTS CORPORATION, ONTARIO.

The Trusts Corporation of Ontario has held its sixth annual meeting. The remaining shares authorized have been subscribed and the capital is now a million dollars. Evidently the business of the year has been a large and satisfactory one. The corporation handled in 1894 trusteeships, executorships and administrations of estates from all over Ontario to the amount of more than two million dollars, and still has in its hands, being dealt with, estates to twice that sum. The safe-deposit branch of the company's business has also shown growth during the year. The result of the twelve months' work as regards earnings was that after payment of directors' fees, the balance of preliminary expenses etc., six per cent. dividend was paid, and the sum of $14,738 carried forward to credit of profit and loss, a gratifying result to shareholders.

AFFAIRS OF JOHN McGILLIVRAY & CO.

The suspension of this firm, who were manufacturers' agents and importers of specialties in Montreal, was a surprise to the trade, and confirms anew the truth of the saying that it is easier to make money than it is to keep it. A short time ago these people were in the enjoyment of evident prosperity, and so good was their credit to the last, that up to within a few weeks of their stoppage, we are told, certain continental houses were pressing them to accept delivery of unexpired contracts. The liability to European houses is a little over $12,000, and the indirect liability is about the same. It appears that there are no debts in Canada. The firm's total liabilities of corresponding period last year were close upon $140,000 All its engagements for the 4th of October, November and December were met at maturity. This, with the interim losses, rent and expenses, presses hard on the much-reduced balance, which will now yield but a small dividend to the four and six months' houses. Had a suspension occurred in October, a much better general showing would have been made, but at that date, it seems, the firm had no idea of not being able to pull through. The liability existing, so the firm states, is solely on account of goods for the current half year, and includes no renewals for previous seasons. The present misfortune is due to heavy losses suffered during the past year.

There is no doubt that a business was done by this concern out of proportion to its capital, and although a big turnover under a boom may score a success, it is never prudent, and most often disastrous, to trade beyond one's means. An annual turnover of $260,000 on a capital never over $20,000 is decidedly perilous trading. It is claimed that the situation could have been retrieved had one of the European houses conceded but a fraction of the liberality of which a perhaps indiscreet excess was accorded in more prosperous times. After May's stock-taking, when the business showed a surplus, and retrenchment was going on, steps were taken to induce three European firms to grant for two years a certain open credit until the position of the firm got easier. Two of them agreed to what was practically an equivalent, but the third and most important refused, and are blamed now for a fatal half-confidence which lost the last chance of saving the business. Mr. McGillivray, at any rate, complains bitterly of this desertion, which he pronounces to have been the cause of the ruin of his business, as well as the precipitation of a needless and demoralizing misfortune.

DRY GOODS JOTTINGS.

The March number of the *Dry Goods Review* is issued in the form of a special issue. In point of typography the publishers deserve many compliments for their taste, while the editorial staff merit praise for the number of well written articles which the number contains.

Mr. John Slingsby, of the Slingsby Manufacturing Company, Brantford, has resigned his position as the superintendent of the mill. The mill hands waited upon him and presented him with an address and gold watch and chain. Mr. Slingsby, it is stated, intends starting a concern of his own.

Messrs. S. F. McKinnon & Co., in this city, hold their millinery opening on Monday next, and it is scarcely necessary to say that owing to the heavy fire which took place in their warehouse a month ago, they will not have any old stock to show customers. Messrs. D. McCall & Co. have their opening on the same day.

If we mistake not, large hats will be "all the go" this spring. The models of the warehousemen show it, while the present style of dresses, an important criterion, support this tendency. Wide puffed sleeves are all popular, and a small hat crowning such broad shoulders as most women display would look exceedingly out of place.

The allotment of the taxes of the textile mills at Cornwall, Ont., between the Protestant and Catholic schools, has given rise to difficulties. The companies want two-fifths of the taxes to go to the Separate Schools, but the courts, considering the Catholic ownership of the stock, have fixed the sum at six per cent. Now the opposing parties are circulating petitions for and against the shareholders' resolutions, subject to ratification by the Legislature.

Monday, February 25th, is the first day of the spring millinery openings. Already a numerous contingent of visiting milliners have arrived, and may be seen in both our retail stores and wholesale dry

goods warehouses. It is impossible to give a forecast of the season's styles at present, for only after several days' experience in such leading houses as S. F. McKinnon & Co. and D. McCall & Co., can a correct estimate of the trend of taste be formed. We promise next week a description of what these houses consider the season's "leaders."

The annual meeting of the Montreal Cotton Company was held last week in the offices of the corporation at Montreal, No. 87 St. Peter street. Mr. A. F. Gault, president, was in the chair, and Mr. D. F. Smith acted as secretary. The report of the year's business was read, considered, and adopted as satisfactory. These gentlemen were re-elected directors for the ensuing year: Messrs. A. F. Gault, Chas. Garth, Jacques Grenier, E. K. Greene, Hon. J. K. Ward, R. L. Gault, and S. H. Ewing. At a later meeting of the new board, A. F. Gault was re-elected president, Chas. Garth vice-president, and D. F. Smith secretary-treasurer.

It is significant of the character of dry goods business in the United States during the last two years to observe the alteration in the results of the transactions of the H. B. Claflin Company of New York. In their report of that great concern for 1894, its managers say that the great fall in values of merchandise (15 per cent. in the latter half of the year) necessarily reduced profits and increased losses by bad debts. "Our sales in actual volume of merchandise have been larger than in any other season of our business experience, but in dollars and cents they fall 19 per cent. below those of the autumn of 1892. The result for the season shows net profits of $245,434.64. For the corresponding period in 1893 our net profits were $6,522.98. For the corresponding period in 1892 they were $511,725.66."

The annual meeting of the shareholders of the Merchants' Manufacturing Co. (Cotton Mill, St. Henri) was held on the 13th inst., at the office of the selling agents, Messrs. Alex. Ewan & Co. The statement submitted was considered very satisfactory. Since last year the company have completed a large extension to their main mill building, and are putting in machinery for making bleached sheetings and window shade goods up to 108 inches in width. This is said to be the first machinery introduced into Canada specially adapted for this purpose. The company are running their works full time, and are employing nearly 700 hands. The following are the officers: A. A. Ayer, president; Gilman Cheney, vice-president; R. B. Angus, J. P. Cleghorn, James Crathern, Jonathan Hodgson, and Robert Mackay, directors; and Wm. G. Cheney, secretary-treasurer. Mr. Harold Lawton, who has for the past five years been superintendent of the works, and has given the utmost satisfaction, is severing his connection with the company in March, and is to be succeeded by Mr. Alfred Hawksworth, of Pontiac, R.I.

FOR GROCERS AND PROVISION DEALERS.

Montreal butchers had a drive on the 12th, ending with a banquet at the Balmoral in the evening.

Bread as a daily article of food is used by only about one third of the 1,500,000,000 that constitute the present population of the earth.

St. Stephen, N.B., grocers have concluded that they and their employees shall have a rest three nights in each week, and their shops will accordingly be closed.

In Ottawa there has been some little opposition to early closing of stores, especially in the Lower Town. But the grocers have now moved into line and the law is being well observed.

Canned lobsters have advanced 30c. per doz. in England, and orders are said to have been taken there for Canadian at the advance. Orders have also been booked for Canadian canned apples.

Some 3,000 bags of foreign granulated sugar have been rejected in Chicago. The same thing occurred in Canada so soon as the price of the domestic product dropped below the cost of the foreign article.

In conversation with several wholesale grocery firms the St. John, N.B., *Sun* was told that the year's business had turned out at least as well as they had anticipated, and that the outlook for the current year was regarded more hopefully.

The Olive Cheese and Butter Manufacturing Co. has been organized in West Nissouri, Ontario. The directors are Wm. Caspel, president; Peter Elgie, vice-president; John McKay, A. G. McKay, Robert Davis and Mr. Phalen.

Frequent complaints are received from English receivers as to the poor quality of many shipments of Canadian apples. This is a matter which cannot be overlooked. The Ottawa Board of Trade proposes to take up the question, discuss it in all its bearings, and if possible suggest a remedy.

Quite a marked change has taken place in position of pepper within the past two days, stimulating advices from abroad stirring up an active demand for spot and to arrive goods developing, and prices advancing from a starting point at 4½c. until at the close holders ask ½ to ¾c. higher. About 500 tons has thus far changed hands. It is surmised that advices of probable short crop have been received.—*N.Y. Journal and Bulletin of Commerce.*

Dr. H. M. Smith, of Port Huron, has collected statistics showing that 10,056,381 pounds of fish of all kinds were caught in Lake Huron during the past year. Of these 2,514,455 were herring, 1,717,628 perch, 1,505,619 trout, 1,483,072 pike and sturgeon. The catch in Lake St. Clair was 2,994,371 pounds. Whitefish and trout have diminished in abundance, while herring, sturgeon, pike and perch have increased. The total value of the catch in both lakes was about $300,000.

Montreal cheese men believe in "big times," and last Thursday converted their theory into practice by a sleigh drive to Lachine. They had a noisy time, and everyone present thoroughly enjoyed himself. At the head of one sleigh was a cheese box erected upon a stick, and labelled "September Make." The box contained June cheese. Then there was a butter tub which proclaimed the words "Government Pap. Per 20c. bounty." These hits, one at the English trade and the other at the bounty agitators, were well received.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Feb. 20th, compared with those of the previous week:

Clearings.	Feb. 20.	Feb. 14.
Montreal	$ 9,489,391	$ 8,818,495
Toronto	4,947,002	4,521,813
Halifax	967,686	954,132
Winnipeg	688,505	642,440
Hamilton	683,749	626,079
Total	$16,776,333	$15,562,959

Aggregate balances this week, $2,448,382; last week, $2,474,903.

HARDWARE AND METAL TRADES

The Wallaceburg glass works buildings are completed and the furnaces are about built.

The paint trade is quiet. A number of orders are being taken for spring shipment, but immediate business is not good.

Twenty-four years ago electricity as a mechanical power was unknown. Now $900,000,000 is invested in various kinds of electrical machinery.

James Watson & Co., Glasgow, write on Feb. 8th:—"The iron market has been a shade firmer, not from any improvement in the situation, but rather due to arrangement in the speculative account of the trade. Purchases of iron for shipment and consumption are restricted to immediate requirements."

A peculiar substitute for window glass, known as "tectorium," has for some time been employed in Austria, Italy, Germany, Switzerland and Russia as a covering for hothouses, marquees, verandas, windows of factories, roofs of stores, etc. It is a special, insoluble, bichromated gelatine, translucent as opal glass, and incorporated in wire gauze.

Ex alderman Clendinneng, of Wm. Clendinneng, Son & Co., Montreal, has been nominated by the French-Canadian Society of Artizans as the Conservative candidate for the Commons in the St. Lawrence Division of Montreal. Mr. Clendinneng is well known to the hardware trade as the manufacturer of "Ætna" hot water boiler and numerous kinds of stoves, of which the names "Leader" and "Universal" stand out prominently.

—It is very significant of the business depression in the United States when so old established and important an industry as the Rhode Island Locomotive Works, at Providence, has to ask its creditors for an extension of five years' time. It used to employ 1,200 hands, but last year had only some 500. In June, 1894, the plant was mortgaged for $300,000, this loan being raised to take up old and falling due bonds, calling for about one half that sum, and the remainder was put into the business.

—Our readers may remember that during last summer or autumn the cattle shippers of this province made a dreadful to do about the exorbitant rates charged by steamships from the St. Lawrence to Europe. We received a copy of the circular they issued, in which terms of strong abuse were used towards shipowners, some of whom replied not unsuccessfully to the charges. A commissioner was appointed by Government to look into the alleged grievances, and yet strange to say, not a man of the complaining shippers has appeared before him! Have they so soon forgotten their troubles, or were the troubles unreal?

—The report of the Western Assurance Company will be found on page 1,114 of to-day's issue.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st January, 1895.

J. M. COURTNEY, *Deputy Minister of Finance.*

Meetings.

TRUSTS CORPORATION OF ONTARIO

The sixth annual meeting of the shareholders of the Trusts Corporation of Ontario was held at their offices, corner of King and Jordan streets, Toronto, on Tuesday, the 12th February, at 12 o'clock noon.

The president, the Hon. J. C. Aikins, occupied the chair, and among those present were:—Hon. S. C. Wood, Edward Martin, Q.C., W. H. Cawthra, A. Nairn, J. H. Plummer, John Catto, Donald Mackay, J. L. Blaikie, William Gordon, Wm Cooke, Thos. Long, Alexander Manning, John Stuart, W. D. Matthews, Hugh Ryan, J. J. Kenny, Matthew Leggat, and others.

The manager, Mr. A. E. Plummer, having been appointed secretary of the meeting, read the report of the directors, which showed that after providing for dividends of 6 per cent. up to and including that payable on the 1st January, 1895, the remuneration of the directors from the commencement of the company's business, on January, 1894, writing off the balance of preliminary expenses, and settling the claims of the company's late solicitors, the sum of $14,738 was carried forward to the credit of the profit and loss account. The directors add:

It will be seen from a comparison of these statements with those of former years, that a most satisfactory increase has been made in the accumulation of our trusts. The additional business acquired by the corporation during the year, embracing administrations, executorships, trusteeships, and similar offices, amounted to $2,141,000 in actual assets, and after winding up a large number of assets, and distributing the funds to beneficiaries and others, the total value of trust assets remaining in the hands of the corporation amounts to over four million dollars.

In addition to this, a large number of wills, appointing the corporation executor and trustee, have been lodged in our vaults for safe custody, or reported to us for record upon our books.

These various trusts have been committed to us from all parts of Ontario, and afford the best possible evidence not only of the steady and spreading growth of our business, but also that the duties devolving upon the company in the past have been discharged in such a manner as to ensure continued confidence and support.

Your directors regret to announce the death of one of their number during the past year, viz., Mr. George W. Kiely, who had been a friend and director of the corporation since its inception. His selection of the corporation as his executor and trustee was a mark of confidence which, coming from one so well qualified to judge of its capabilities, cannot but be gratifying to the shareholders.

In accordance with the resolution passed last year, the remainder of our authorized capital has been issued and subscribed, thus increasing our capital stock to $1,000,000.

In moving the adoption of the report the president made the following remarks:—

It affords me great pleasure in presenting such a satisfactory statement of our business, which during the year almost doubled the accumulation of trusts placed with us since the company was organized. This is all the more gratifying, as our chief aim and object has always been the building up of the business of administering estates, our duties as an investing company being solely confined to moneys remaining in our hands as trustees or guardians after winding up estates, or placed with us on special trusts.

During the year the following business was acquired by the corporation. I speak, of course, in round figures:—

38 administrations, 3 administrations, will annexed, amounting to	$860,000
30 trusteeships	250,000
3 executorships	760,000
8 guardianships	260,000
2 committeeships	5,000
2 receiverships	6,000

That the management has given every attention to prompt and speedy winding up of estates placed with us is evident, as during the past year we disposed of 23 administrations, 2 executorships, 2 guardianships, 1 committeeship, and 1 trusteeship, and I have much pleasure in saying that I have read more than one letter from solicitors in charge of estates complimenting the manager on the prompt and courteous manner in which the administration had been conducted.

Our safe deposit department shows an increase in box rents for the year, but our storage branch was not so largely patronized during the summer. No doubt this department feels the general economy of the times, as well as other branches of business. After allowing for wages, light, etc., the safe deposit vaults yield at present about 9 per cent. upon our investment, which is a fairly good return.

The report was then adopted, and the usual resolutions passed. The election of the directors was then proceeded with, Messrs. Emilius Jarvis and Frederick J. Stewart being appointed scrutineers, who reported the unanimous election of the following directors:—

Hon. J. C. Aikins, J. L. Blaikie, Sir R. J. Cartwright, Wm. Cooke, Hon. J. P. Gowan, Wm. Hendrie, J. J. Kenny, Matthew Leggat, Thos. Long, Chas. Magee, Alexander Manning, Hon. Peter McLaren, W. D. Matthews, B. B. Osler, E. B. Osler, Hugh Ryan, John Stuart, Hon. S. C. Wood.

At a subsequent meeting of the board the Hon. J. C. Aikins was re-elected president, and Sir R. J. Cartwright and Hon. S. C. Wood re-elected vice-presidents.

WESTERN CANADA LOAN AND SAVINGS COMPANY.

The thirty-second annual meeting of the shareholders of the Western Canada Loan and Savings Company was held at the company's offices, 76 Church street, Toronto, yesterday. The following report and financial statements were read:

REPORT.

The directors have much pleasure in laying before the shareholders the thirty-second annual report of the business of the company.

The profits of the year, after deducting all charges, and writing off, as was considered prudent, a sufficient sum to cover any depreciation in the value of real estate, amount to $172,197.80.

Out of this sum have been paid the usual half-yearly dividends, at the rate of ten per cent. per annum, together with the income tax thereon, amounting to $152,386.41, and the balance has been carried to the credit of the contingent fund.

The amount now standing at the credit of that fund is $70,445.90.

The Reserve Fund remains at $770,000.

The repayments on account of mortgage loans have been, on the whole, satisfactory; and when in any case it has been considered desirable to grant some indulgence, and extend the time for payment, the security has invariably first been again specially reported upon.

The debentures of the company falling due during the year have been more generally renewed than in any former year; and the directors have had no difficulty in obtaining new money at a lower rate to replace any debentures which were not renewed.

The total amount of moneys entrusted to the company by British and Canadian investors is now $4,480,193.24.

The balance sheet and profit and loss account, together with the auditors' report, are submitted herewith.

G. W. ALLAN,
President.

FINANCIAL STATEMENT OF THE WESTERN CANADA LOAN AND SAVINGS COMPANY FOR THE YEAR ENDING ON 31ST DECEMBER, 1894:—

Liabilities.

To shareholders—		
Capital stock	$1,500,000 00	
Reserve fund	770,000 00	
Contingent account	70,445 90	
Dividend, payable 8th Jan., 1895	75,000 00	
		$2,415,445 90
To the public—		
Debentures and interest	$3,450,300 81	
Deposits	1,029,892 43	
		4,480,193 24
Sundry accounts, including coupons outstanding		578 90
		$6,896,218 04

Assets.

Investments	$6,688,760 88
Office premises and furniture, Toronto and Winnipeg	106,606 50

Dividends and tax thereon	$152,386 41	
Carried to contingent account	19,811 39	
		172,197 80
		$409,802 47
Interest on mortgages and debentures, rents, etc.		$409,802 47
		$409,802 47

WALTER S. LEE,
Managing Director.

TORONTO, 8th February, 1895.

To the Shareholders of the Western Canada Loan and Savings Company:

GENTLEMEN,—We beg to report that we have completed the audit of the books of the Western Canada Loan and Savings Company for the year ending 31st December, 1894, and certify that the annexed statements of assets and liabilities, and profit and loss, are correct, and show the true position of the company's affairs.

Every mortgage and debenture or other security has been compared with the books of the company. They are correct, and correspond in all respects with the schedules and ledgers. The bank balances and cash are certified as correct.

W. R. HARRIS,
FRED. J. MENET,
WM. E. WATSON, F.C.A.,
Auditors.

The president then said:

The report which has just been read, and which it is now my duty to propose for your approval and adoption, and the financial statement which accompanies it will, I trust, enable all our shareholders to understand clearly the present position of the company.

I venture to hope that the more thoroughly these statements and figures are examined by you, the better you will be satisfied as to the soundness and stability of the company, and the care and judgment with which its affairs have been administered.

The satisfactory earnings of the year have enabled us, after providing for all charges and expenses, and writing off a sufficient sum to provide for any actual or probable losses from the depreciation of real estate, to pay our usual dividend of ten per cent. to our shareholders.

There is no doubt that the present time calls for the exercise of special care and judgment on the part of all institutions loaning money on real estate. As you all know but too well (for what investor in these times has not had some such experience), in spite of the utmost care and caution unlooked for changes occur, which affect what, at the time they were taken, were looked upon as properties offering the most undoubted security.

In dealing with all such cases, I think that we can claim that the directors have exercised a wise and conservative policy, in neither carrying forward nor taking credit for any amounts which could fairly be considered doubtful and not likely to be realized, but have applied the pruning-knife without hesitation to the extent of closing out some twenty-eight accounts, making a charge of $27,827 on the contingent account, and if, as one of the results, that account shows somewhat reduced figures, the shareholders may feel satisfied that by the policy which has been adopted, the company stands on such safe and solid ground as entitles it to the thorough confidence of its shareholders.

In regard to our current mortgages, as stated in the report, the payments have been upon the whole satisfactory, and considering the prevailing depression of 1894, I think we might almost have used a stronger term, and said very satisfactory.

In the case of parties who had fallen behind in their payments, or who asked for an extension of time, we have not hesitated where a careful inspection showed that the property was not deteriorating in value, and the mortgagors themselves were making honest efforts to meet their engagements, to show them every reasonable indulgence, and in this we are sure we shall have the approbation of the shareholders.

To turn now to the company's borrowings, the report alludes to the very general renewal of the company's bonds in Great Britain, and I think it is a matter of great satisfaction for us in Canada that, notwithstanding the shock which it was feared would be given to all colonial securities by the financial difficulties in Australia and New Zealand, Canadian securities still hold their own in the British market. This company was again and again offered very considerable sums for investment in our bonds during the last summer, much beyond what the limits imposed upon our borrowing powers would allow us to accept. The renewals of bonds which matured last year were, as already stated, more general than in any previous year, and I may mention that among them were bonds, originally issued for five years, which dated back a quarter of a century, and I think it may be claimed as a strong proof of the estimation in which our debentures are held that investors should prefer to renew again and again, each fifth year generally at a lower rate of interest, rather than give up the investment.

In connection with this branch of the company's business, I desire to express, on behalf of the directors, our strong sense of our obligations to our agents in Great Britain, Messrs. Bell, Cowan & Company, of Edinburgh, for the untiring zeal and energy with which they have sought on every occasion to promote the company's interests, and also for the very valuable counsel and advice which they have always freely afforded us in connection with our debenture business. Before passing from the subject of our debentures I may mention a circumstance which may be of interest to the shareholders. The total amount entrusted to the company for investment, both British and Canadian, is now $4,480,193; but it is to the increase in the number of Canadian investors in the company's bonds that I wish to call your attention. In 1893 the total amount of bonds held in Canada was $382,315; in 1894 it had come up to $470,328, showing an increase of $88,000 within the last year, and I think there is every prospect of the demand increasing, both with advantage to the company and to the country. We have, moreover, very satisfactory evidence of the estimation in which the standing of this company is held, in the fact that large blocks of our debentures have been purchased by insurance companies, some for deposit with the Canadian Government.

As most of our shareholders are doubtless aware, the company's office premises in Winnipeg were destroyed by fire in the month of November last. I am glad to be able to state that all our books, titles, and securities were found in perfect order when the vaults of the building were opened. The building was amply covered by insurance, and the insurance companies met us in a very liberal spirit, and have paid the ascertained loss in full. As rebuilt in accordance with the present plans, the new building will be in many respects better and more conveniently arranged, and the part not required by the company will doubtless again be rented on such terms as will bring in a handsome revenue. I may take this opportunity of stating that our business in Manitoba continues to be very ably and carefully conducted by our manager, Mr. Fisher, who is also very fortunate in having the assistance of a very able and efficient staff of inspectors.

And now, gentlemen, in looking forward to the future of the Company, there are two important questions which at once suggest themselves. First, may we reasonably hope that the wide-spread commercial and financial depression which has so long prevailed, not merely in Canada, but over the whole Continent, is beginning to pass away, and that as a consequence land values, both as regards farm lands and town property, will again rise to something like their old figures? And, in the second place, are the low rates of interest now prevailing likely to become permanent, or even to have a more downward tendency, and so render it more difficult for investors, either companies or individuals, to employ their money as profitably as hitherto? Now, on both these points we have within the last few weeks seen in the public papers the published reports of the views of many of our leading business men. While all

admit how wide-spread the depression has been, both in its injurious effects upon the trade and business, and upon the value of real estate, yet there seems to be a general consensus of opinion that already there are indications of improvement, "that trade is reviving," and that "farm lands in some sections of the country are in good demand" and that we may reasonably anticipate that '95 has better days in store, both for the merchant and the farmer. Now, I can look back to a period in the financial history of this province, and especially of the city of Toronto, in 1857 and 1858, and for several years afterwards, when the aspect of things was far darker than it has ever been during the present "hard times," when real estate everywhere, but especially in this city, went down, as it seemed, hopelessly in value, and there were not wanting then pessimists who prophesied that it would never rise again to anything like its former value. Yet, after all, though there were years, and long years, of depression, the tide turned at last, trade and business revived, and with returning prosperity real estate once more rose, and continued to rise, in value.

Now, I maintain that we possess in this country, and especially in this Province of Ontario, and this city of Toronto, elements of strength and powers of recuperation which did not exist in '57 and '58. The resources of the country now are infinitely greater, there is much more wealth, far more capital ready to be invested and seek profitable employment whenever the opportunity offers. And, looking to the magnificent position which all the financial institutions of the country have maintained through all these days of trial, in striking contrast to what we have seen across our own borders, I cannot but believe that the return of more prosperous times—of which the shrewd and careful observers I have alluded to already see glimpses—will not be very long delayed. I have alluded to what has been said in this connection as to the increasing demand for farm lands in some sections of the country, and which we may hope is an indication that more prosperous times, notwithstanding the low prices which have prevailed, are in store for the farmer also. There is no class of the community whose well-being is of greater importance to the country, and in which we, as loan companies, are more interested.

I need not dwell upon what I am sure you have all heard a great deal of lately, the new industries in dairying, cheesemaking, etc., to which our farmers have been induced to apply themselves. I only allude to it because it shows that the farmers of Ontario have within their reach resources which only require to be properly developed and judiciously made use of to become increasingly profitable, and largely helpful in bringing back better times. And if we turn to Manitoba and the Northwest, we shall find that the same lesson is being learned there, and that the farmers there are beginning to understand that they possess in their broad acres not only the finest wheat-growing land, but other hitherto undeveloped resources, which only require to be properly worked to become a source of increasing wealth.

Turning now to the other question, are the low rates of interest now prevailing likely to become permanent, and even to have a more downward tendency, and to render it more difficult for investors, either companies or individuals, to employ their money as profitably as hitherto? I do not find that there is quite such an unanimity of opinion on this point among those best qualified to "read the signs of the times." That lower rates of interest than were formerly obtained will continue to prevail, seems to be generally admitted; though in the opinion of many it is not so certain that, should times improve, and trade and business revive, and profitable openings present themselves for the investment of capital, the rate of interest will go down any lower, if, indeed, it does not have a tendency to rise. In regard to the effects upon the business of loan companies and other money-lending corporations, so far as loan companies are concerned, more than one authority whose views should carry great weight has expressed the opinion that the low rate now obtained on mortgages is counterbalanced by the lower rate which the companies pay for their money. On the other hand, others, whose opinions are equally entitled to consideration, have given as their view that the low rate of interest at which money is now obtained does not by any means make up fully for the reduced rates at which companies have to lend their moneys, and that these lower rates of interest must lead to such a reduction of profits that reduced dividends must naturally follow. These are rather conflicting opinions, but whatever may be the ultimate outcome of the present state of things your directors are persuaded that the wisest course to adopt in the interests of the shareholders is, while exercising redoubled care and caution, and endeavouring to strengthen at all points the position of the company, to watch carefully the progress of events, and be prepared to adopt whatever course shall appear best calculated to inspire the shareholders and the public generally with the fullest confidence in the financial soundness and stability of the institution to whose care they have entrusted their money, whether as holders of our stock, depositors in our savings bank, or investors in our debentures.

In conclusion, let me say that my colleagues and I feel that in our managing director we have one who is constantly on the watch to note each "sign of the times," and by his ability and vigilance the interests of the company are most safely guarded; and I may further add that in respect to our whole staff the company possesses most faithful and efficient officers.

The retiring directors, viz.: Messrs. George Gooderham, Alfred Gooderham, George W. Lewis, and Walter S. Lee, were re-elected. These gentlemen, with the Hon. George W. Allan, Mr. Thomas H. Lee, and Hon. Sir David Macpherson, K.C.M.G., form the board. At a subsequent meeting held by the directors, the Hon. George W. Allan and Mr. George Gooderham, were re-elected president and vice-president, respectively.

HURON AND ERIE SAVINGS AND LOAN COMPANY.

The annual meeting of this company was held at its office in London, Ont., on Wednesday, Feb. 13, 1895.

Present: Messrs. J. W. Little, Philip Mackenzie, F. E. Leonard, V. Cronyn, A. W. Porte, F. P. Betts, Geo. A. Somerville, J. M. McWhinney, J. H. A. Beattie, Hume Cronyn, Joseph Wheaton, Geo. F. Jewell, A. G. McWhinney, C. F. Hanson, D. Regan, Thomas A. Browne and others.

The president, Mr. J. W. Little, took the chair, and the manager, Mr. G. A. Somerville, acted as secretary. The minutes of the last annual meeting were read and approved, after which the report and financial statement were submitted, as follows:

REPORT.

The directors of the Huron and Erie Loan and Savings Company beg to submit herewith their thirty-first annual report, showing the results of the business of the company for the past year, accompanied by the balance sheet to Dec. 31, 1894, duly audited.

As explained at the last annual meeting, the need of additional accommodation in the offices and vaults of the company had been urgently felt, and during the past year somewhat extensive additions and alterations were made, at a cost of $15,219.70. This expenditure was met by the application of $14,219.70 out of the surplus profits of the year, and the addition of $1,000 to the figure ($19,000) at which the office premises had previously been taken into account.

After defraying all expenses of management and all other charges, the net profits, including $7,341.12 brought forward, have been sufficient to pay two half yearly dividends at the rate of 9 per cent. per annum, together with the shareholders' income tax of $2,132.04 thereon, to apply $14,219.70 upon the company's building, and to carry forward, as an unappropriated balance, $15,798.65.

The call due in July last on the new shares issued in 1893 has been paid in full, and the premium added to the reserve fund, which now amounts to $700,000, or 50 per cent. of the paid-up capital stock of the company.

During the year there has been an increase in the savings bank deposits of $100,131.22, in Canadian debentures of $50,460, and in sterling debentures of $198,603.83. The total assets of the company are $6,364,339.70, being an increase for the year of $455,306.86.

The value of the real estate held by the company, other than office premises, is $13,457. This sum includes all properties remaining unsold, which have come into possession of the company by foreclosure, failure to obtain purchasers under power of sale, or otherwise

As in the past the company's loaning operations have been confined strictly to Western Ontario, and the system of inspection by the company's own officers of property offered as security has been continued

Your directors desire to bear testimony to the very efficient manner in which the manager and other officers of the company have discharged their respective duties.

All of which is respectfully submitted.

J. W. LITTLE,
President

London, Ont., Jan. 30, 1895

G. A. SOMERVILLE,
Manager.

We hereby certify that we have carefully audited the books and accounts of the Huron and Erie Loan and Savings Company for the year ending December 31, 1894. The cash and bank accounts have been audited monthly; the postings and balances of all the company's ledgers examined quarterly, and we find the whole correct, and in accordance with the above statements. We have also examined the company's securities and find them in order.

GEO. F. JEWELL, F.C.A.,
THOMAS A. BROWNE, } Auditors

London, January 30, 1895.

In moving the adoption of the report the president said:

The duty of moving the adoption of the annual report of this company has been for many years a simple one. We have not suffered to any great extent from the agricultural depression or

the difficulty in disposing of real estate, and for that reason have not considered it necessary to discuss either of these questions or the future prospects of the company. This year's report is especially gratifying; our funds have been fully and profitably employed, and every department of the business shows a substantial increase, whilst the percentage of expenses to total assets is less than in any previous year.

The net profits, after paying the usual dividends, have yielded sufficient to pay $14,219.70 on the building and to add $8,457.53 to the balance carried forward, which now amounts to $15,798.65. The balance is in no sense to be regarded as a contingent fund,- all the assets having been most carefully valued, but it is simply carried forward because no decision has yet been reached as to whether the reserve fund is to be increased beyond 50 per cent. of the paid-up capital.

The policy of realizing promptly on real estate falling into the company's hands has been continued with most satisfactory results. Out of investments aggregating over $6,000,000, the property held for sale at the end of the year amounted to only $13,457, representing 497 acres of land, of which 175 acres have already sold at an advance upon the prices at which they were taken into account. The remaining farms have been on hand but a short time, the one longest in the company's possession not dating back to the last annual report, and we expect they will all be closed out shortly.

The sum charged to "Losses on real estate," representing anticipated as well as ascertained losses, amounts to less than one-tenth of one per cent. on the cash value of the mortgages. The arrears of principal and interest are nearly the same as last year, or about one and one-half per cent. of the cash value of the securities.

During the year applications for loans to the amount of $2,099,507 were received, of which $824,853 were accepted. The total number of mortgages held by the company is 3,466, of which nine are for $10,000 or upwards, the average being $1,689.72.

In the savings bank there are only 26 accounts over $4,000, the average being $346.08.

The alterations and additions to the company's building, which were so long contemplated, have now been completed in a manner which will meet all requirements for many years to come. The offices, board room, vaults, treasury, etc., are arranged in the most modern and convenient manner, greatly facilitating the transaction of business.

The manager and other officers of the company still continue to render efficient service; they have been most zealous and attentive to their duties, and I can say without hesitation that no company could have a more reliable staff.

Mr. Philip Mackenzie, vice-president, seconded the motion, which was carried unanimously.

Resolutions fixing the remuneration of the president and directors, reappointing the auditors, as well as the usual votes of thanks, were unanimously adopted.

Messrs. George F. Jewell and Thomas A. Browne having been appointed scrutineers, reported the following gentlemen elected as directors for the ensuing year: Messrs. J. W. Little, P. Mackenzie, Prof. Wm. Saunders, A. W. Porte, F. E. Leonard, and V. Cronyn.

At a subsequent meeting of the board, Mr. J. W. Little was re-elected president, and Mr. Philip Mackenzie vice-president.

ONTARIO LOAN AND DEBENTURE COMPANY.

The twenty-fourth annual meeting of the shareholders of the Ontario Loan and Debenture Company was held at their offices in London on Wednesday, the 13th inst., at 3.15 p.m.

The following shareholders were present, viz.: Messrs. John McClary, A. S. Emery, Wm. Bowman, Wm. McDonough, Rev. Wm. Birks, Albion Parfitt, A. M. Smart, John G. Richter, Charles F. Hanson, P. W. D. Broderick, A. O. Jeffery, J. Edgar Jeffery, J. M. McWhinney, secretary-treasurer Synod of Huron, etc.

The following report was then submitted:—

REPORT.

The directors beg to submit for the information and approval of the shareholders the twenty-fourth annual report of the company, with the relative accounts, for the year ending 31st December last.

The demand for money on first-class mortgage securities has been light, with exceedingly low rates of interest. The sum of $464,301 has been loaned, and $778,345, principal and interest, has been repaid.

The net earnings of the year, after paying and providing for all due and accrued interest on debentures and deposits, and after paying expenses of all kinds, amount to $102,284.21, as against $101,493.27 for the previous year; out of which the usual half-yearly dividend, at the rate of 7 per cent. per annum, has been paid, and the sum of $18,000 carried to the Reserve Fund, which now amounts to $450,000, being 37½ per cent. on the paid-up capital.

The company have properties foreclosed and owned amounting to $34,992, and properties brought to sale, and unsold at the end of the year, $62,160, together amounting to $97,152. These properties have each been revalued at the end of the year by one of the company's inspectors, and taken into account at his valuations, which valuations your board have every reason to believe are reliable.

Sterling debentures outstanding at the end of the year amount to £367,992, as compared with £374,857 at the end of the previous year.

Currency debentures show an increase of $8,140 over the previous year.

The thanks of the shareholders are due to the financial agents of the company in Scotland, Messrs. Myle & Cook, C.A., of Edinburgh, for the satisfactory manner in which they have renewed maturing, and placed new debentures of the company.

All of which is respectfully submitted.

JOHN M'CLARY,
President.

WILLIAM F. BULLEN,
Manager.

To the Shareholders of the Ontario Loan and Debenture Company:

We hereby certify that we have audited the books and accounts of the Ontario Loan and Debenture Company for the year 1894, comprising a monthly cash audit and the verification of the postings and balances in all the company's books, and we find the whole correct, and in accordance with the above statements. We have also examined the securities, and find them in order.

GEO. F. JEWELL, F.C.A.,
A. M. SMART,
} Auditors.

London, Ont., Jan. 19, 1895.

The president, in moving the adoption of the report, said: Gentlemen,—It devolves on me, as president, to move the adoption of the report, but before doing so I would say that you are all aware since the last annual meeting we have lost by death our late esteemed president, Mr. Jeffery. I know you will agree with me that we have suffered a great loss; his superior business ability and knowledge of values of property rendered him invaluable to the company. He, together with myself, were the only two left of the original directors of the company. I am now endeavoring to the best of my ability to fill his place. The position of vice-president, vacated by me, has been filled by the appointment of Mr. Emery, an old and well-known resident of this city. He has been one of the auditors of the company for the past twenty years, which makes him thoroughly acquainted with all our business details. This, together with being an excellent judge of values of real estate, renders his services of great value to the company.

Our annual report is very full, and has been in the hands of the shareholders for some time; I think you will agree with me it is a good showing considering surrounding conditions.

The past year has not been favorable for our farming community; nearly all the products of the farm have ruled low, with the exception of cheese and pork. I am pleased to state that our farmers are continuing to devote increased attention to dairy products, viz., cheese and butter, and to raising stock. This, I feel sure, will be found to be much more profitable than growing grain, while it is enriching the soil. Farm lands have now reached a price which makes them a desirable investment for capitalists. Good improved farms can be purchased and rented to give a return of from five to six per cent. on the capital. We may fairly conclude that the bottom has been reached. It is only a matter of time that we may look for a considerable advance in price in our desirable farm lands. Comparing soil and climate, they have no superior.

Through the depression and depreciation which has extended to general merchandise, as well as farm and other lands, with little inclination to embark in new enterprises or extend existing ones, requiring a reduced volume of money to supply current requirements, it has led to a considerable accumulation of surplus money in our monetary institutions, resulting in a largely reduced demand for money on high-class mortgage securities, with a considerable reduction in rates of interest, it appears to your board, to some extent, a waiting condition, anticipating a limited legitimate outlet of money for the present year. Looking forward, we trust, in the not distant future, when business on this continent regains its normal condition, when we have a right to expect to be in a position to participate in increased prosperity, commanding the confidence of the community, and a liberal patronage of the public.

The adoption of the report was then moved by the president, and seconded by the vice-president, Mr. A. S. Emery, in a few well chosen remarks, and was carried unanimously.

The following shareholders were elected directors of the company for the ensuing year, viz.: Messrs. John McClary, A. S. Emery, Wm. Bowman, Wm. McDonough, and W. A. Gunn.

Messrs. Geo. F. Jewell, F.C.A., and A. M. Smart, were re-elected auditors.

At a subsequent meeting of the board, Mr. John McClary was re-elected president, and Mr. A. S. Emery vice-president.

BUILDING & LOAN ASSOCIATION.

The annual general meeting of the Building and Loan Association was held at its offices, No. 13 Toronto Street, Toronto, at 2.30 p.m., on Tuesday, the 12th day of February, 1895, the President, Larratt W. Smith, Q.C., D.C.L., in the chair.

There were present: George Murray, D. A. Milne, Robert Jenkins, Edward J. Hobson, Donald Gibson, Joseph Jackes, Price Jackes, J. E. Underwood, W. A. Parlane, Alan Cassels, Geo. R. R. Cockburn, M.P., A. V. Delaporte, R. H. Temple, Alexander Smith, John Harvie, and others.

The directors' report for the year 1894 was submitted, as follows:

REPORT.

The directors beg to submit to the shareholders the twenty-fifth annual report, for the year ending 31st December, 1894, together with the accompanying financial statement for the same period, certified to by the auditors.

They regret having to report that the business of the past year has not been as satisfactory as heretofore, and that the depressed state of the country, and especially of the city of Toronto, has had the effect of decreasing the revenue of the association, for the time being, and of preventing the realization of property which, under normal conditions, could readily have been effected. The directors have consequently had no alternative, in the exercise of a sound policy, but to withhold charging the interest on many loans which have become unproductive, until the return of such prosperous times as would warrant a change. It is satisfactory, however, to be able to report that the revenues from Manitoba during the past year have greatly exceeded those of previous years.

The offices in the association's building, also, have been nearly all occupied, and, notwithstanding low rentals, have yielded a larger income than for the previous year.

All ascertained losses have been paid out of the earnings of the year.

The borrowers have repaid $198,633 during the year.

A considerable reduction has been effected in the rate paid for deposit money.

The amount of sterling debentures has been somewhat increased, owing to the activity of the agents of the association in Scotland, and the total interest paid thereon has slightly decreased, a result arising from the reduced rates at which money has been obtained.

The monthly audit has been regularly maintained, and the management and staff have performed their duties to the satisfaction of the board.

All of which is respectfully submitted.

LARRATT W. SMITH,
President.

WALTER GILLEPSIE, Manager.

We hereby certify that we have audited the books of the association, and have examined the vouchers and securities relating thereto for the year ending 31st December, 1894, and have found the same carefully kept, correct, and properly set forth in the above statements.

HENRY WM. EDDIS, F.C.A. } Auditors
JOHN M. MARTIN, F.C.A. }

Toronto, 10th January, 1895.

The report and financial statement having been read, the president, before moving their adoption, made the following remarks: "It must be evident to everyone that we are passing through no ordinary times, and that the extraordinary depression which we are now experiencing is not limited to this Dominion, or even to this continent. Loan companies have been especially affected by it, because not only has real property become largely depreciated in value, but the earning power has been greatly lessened, so that in the present state of things it is safer to husband our resources, and make secure the investments we have, than to look for fresh ones at unremunerative rates, and this is the present policy of this association, endeavoring at the same time to reduce our expenditure wherever possible, and to exercise the strictest economy. How long this state of things will last it is impossible to predict, but the difficulty in employing the funds of this association, to the same advantage as heretofore, unless some improvement in this respect should soon take place, can lead only to one result, the paying of only such dividends as we are enabled to earn during the year

"It is satisfactory, however, to be able to state that our returns from Winnipeg have been larger than usual during the past year, and that our investments in that quarter are getting into much better shape. I say Winnipeg advisedly, as we have comparatively few loans on farm property in Manitoba, and, of them, but one is not in a satisfactory condition.

"There has been no difficulty in procuring all the money we require on debentures, either here or in Scotland; the difficulty has rather been in placing it out advantageously. We are far within our borrowing powers, and our debenture liabilities are so distributed that we never have the slightest difficulty in meeting them as they mature. During the past year debentures amounting to $183,410 have been met, and new debentures, at reduced rates of interest, were issued to the extent of $181,525.

"The offices of the association have yielded a better return last year than the previous one. Notwithstanding the lower rentals obtainable, a gross return of 7½ per cent. has been derived from them, out of which the usual deductions for taxes, caretaking, fuel, and insurance, had to be provided.

"The actual ascertained losses of the year, trifling in amount, have been met and written off as they were incurred.

"I regret not being able to present a more favorable report. It has always been our policy to exhibit a fair and candid statement of things as they are, and not to gloss over, or suppress, any weakness in the position of the association, in the expectation that better times would show more favorable results."

Mr. Cockburn, the vice-president, on seconding the adoption of the report, stated that his co-directors had decided to continue their conservative policy of distributing among the shareholders only what interest the association could immediately collect; if the present times continued, this might mean a temporary reduction in the dividend, but the directors feel that it is the only safe and prudent course to pursue under the circumstances.

The report was then unanimously adopted

After the usual resolutions were put and carried, scrutineers were appointed, and on a ballot being taken, the former directors were unanimously re-elected.

At a subsequent meeting held by the board, Larratt W. Smith, Q.C., D.C.L., was re-elected president, and George R. R. Cockburn, M.P., vice-president.

DOMINION SAVINGS AND INVESTMENT SOCIETY.

The twenty-second annual meeting of the shareholders of the Dominion Savings and Investment Society was held at their offices, London, Feb. 12, 1895, pursuant to notice, at 11 o'clock a.m.

Present: Robert Reid, Esq., president; Messrs. Dr. Bettridge, Strathroy; T. H. Purdom, inspecting director; John Ferguson, James A Blair, W. J. McMurtry, Toronto; Alex. Purdom, C. R. Somerville, Duncan Campbell, C. H. Elliott, John Purdom, Col. R. Lewis, Samuel Wright, Miss Rebecca Cadham, Charles Cadham, A. G. Deadman (Lambeth), John Wright, Col. F. B. Leys, M. J. Kent, Edward Burke, E. J. Parke, Q.C., Francis Love, W. H. Smith, Rev. J. G. Laird, Dr. Arnott, J. Dearness, I. Waterman, Joshua Jackson and others.

The president, Mr. Robert Reid, having taken the chair, the manager, Mr. Nathaniel Mills, acted as secretary.

The minutes of the last meeting were read and confirmed, and the secretary read the annual report as under:

REPORT.

The directors beg leave to submit the twenty-second annual report of the affairs of the society.

The net earnings during the year amounted to $56,618.61, from which two half-yearly dividends at the rate of 6 per cent. per annum, amounting to $55,962.45, have been paid, and the balance, $656.16, carried to the contingent fund.

The amount loaned by the society during the year was $317,512.71, selected from loans applied for amounting to the sum of $491,949.96.

The directors find that the general depression, everywhere prevailing, still exists in Ontario, and that in connection with the downward tendency in rates obtainable for money, has reduced the earning power of the society, and consequently the amount of the earnings during the past year. Considering these facts, the result is as satisfactory as could be expected.

The closest economy has been exercised in the management, the office expenses amounting to the sum of $8,746.49.

Mr. H. E. Nelles, who has been manager of the society during the past four years, has, under the advice of his physician, gone to San Diego, Cal. The directors regret to lose as manager one whose integrity and ability were recognized by all, and whose experience each year was rendering his services more valuable to the society.

Mr. Nathaniel Mills, who has for five years past been the society's accountant, and therefore thoroughly acquainted with its business, has been promoted to the position of manager.

The books of the society have been each month regularly audited by Messrs. C. R. Somerville and J. K. McDermid, with the result which appears by their certificate attached to the statement.

All the directors retire annually, but are eligible for re-election.

Respectfully submitted,

ROBERT REID,
President.

NATHANIEL MILLS,
Manager.

London, Jan. 29, 1895.

We hereby certify that we have made a regular audit of the books of the Dominion Savings and Investment Society for the year ending Dec. 31, 1894, that we have examined the vouchers and securities and find them in order, and that the accompanying statements of "Profit and Loss" and "Assets and Liabilities" hereto annexed are a correct showing of the affairs of the society.

C. R. SOMERVILLE,
J. K. MCDERMID, } Auditors.

The president moved, and Mr. C. H. Elliott seconded the adoption of the report. Carried.

Mr. Reid said the interest of the shareholders had been carefully watched during the year. The board of directors had in all matters rendered all the assistance in their power. They had, in common with all other loan companies, to contend with the depressed times, the lower rates obtainable for money, and the difficulty in effecting sales of real estate at reasonable prices. He referred to the loss of Mr. Nelles as manager, and expressed the belief that Mr. Mills, his successor, would prove in every way a competent man.

Mr. D. Campbell said the earnings of the society had decreased, and Mr. T. H. Purdom then remarked that when the low rates were considered and the small margin of earnings over the dividend paid, and the necessity for accumulating a reserve taken into account, it was not likely that the present dividend could be maintained in the future.

Mr. M. J. Kent advised a reduction in the rates paid in the savings bank, which would enable the society to maintain its dividend. The discussion was further continued by Mr. W. H. Smith, I. Waterman and Col. Lewis.

The following gentlemen were then unanimously elected directors for the ensuing year, namely:—

Robert Reid, Charles H. Elliott, T. H. Purdom, W. J. McMurtry, J. H. Starr, Wm. Bettridge, John Ferguson, Col. R. Lewis and John Morrison.

Messrs. C. R. Somerville and J. K. McDermid were re-elected auditors.

At a subsequent meeting of the board Mr Robert Reid was re-elected president; C. H. Elliott, vice-president, and T. H. Purdom, inspecting director.

WELLINGTON MUTUAL FIRE INS. CO.

The general annual meeting of the Wellington Mutual Fire Insurance Company was held in the company's office, Guelph, on the 12th of February, 1895.

James Goldie was appointed chairman and Charles Davidson acted as secretary.

The secretary read the directors' report with financial statement and auditors' report.

REPORT.

The directors of the Wellington Mutual Fire Insurance Co., in submitting their 55th general annual report for the year ending 31st December, 1894, feel a pleasure in being able to state that notwithstanding the excessive number of fires that has taken place through the country during the past year, of which this company had its share—97 in all—being 19 more than in 1893 and nearly 50 per cent. more than in 1892—(showing the effect of hard times) with losses amounting to $35,023.50, they are very glad to be able to state that these have all been satisfactorily settled with the exception of three small losses not then adjusted (two of which, amounting to $115 and $200, have since been paid), besides paying the sum of $1,490 of 1893 year's losses.

The number of policies issued during the year was 2,152, being an increase of 448, making now a total of 4,905 in force, covering property to the amount of $5,283,626 25
which, in comparison with last year 4,923,687 81
shows an increase of 359,938 44

which your directors consider shows the steady progress the company is still making, while it is giving its members the very lowest rate of insurance, as it has always done in the past.

The manager reports the harmony and efficiency existing among the office staff—which the board is highly gratified with, and the general efficiency of the agents, on whom the board relies to still further advance the interests of the company as they did last year, by adding over a third of a million to the amount insured, which the board highly appreciates

The financial statement, with the auditors' report, will now be submitted, which gives a clear account of the position of the company, showing as it does the amount of debentures, cash, agents' balances, etc., which are all good, and which, with the balance of premium notes, shows a sum of $151,539 as security, which they trust will meet with the approval of the members.

Owing to the death of Fred. W. Stone, and the resignation of J. E. McElderry, Charles Davidson is the only director who this year retires and is eligible for re-election.

AUDITORS' REPORT.

Guelph, Jan. 8th, 1895.

The auditors have completed their audit of the books, accounts and vouchers of the Wellington Mutual Insurance Company, for the year ending 31st December, 1894, and they have found everything connected therewith to be correct and in order, exhibiting the usual neatness and carefulness in the keeping of the books. The balance in the Bank of Commerce at the credit of the company on 3rd December, 1894, was $5,426.51, and the cash on hand at that date was $226.56.

All of which is respectfully submitted.

(Signed)
THOS. W. SAUNDERS,
ALEX. MACKENZIE, } Auditors.

It will be seen, as before stated, that the losses have very much increased during the past year, and the directors cannot but remark (as they did last year) that a very large number are due to gross carelessness, and they fear even something worse, which ought to be thoroughly enquired into, but which is not the province of the companies to do. But in our opinion it is the province of the Government to appoint properly authorized persons to examine into all suspicious fires, which your directors believe would be a great saving to the country at large.

The chairman having made a few remarks regarding the losses, etc., moved the adoption of the report, which was seconded by Mr. J. I. Hobson, and that the same be printed and circulated as heretofore.

Messrs. Harry Murton and Geo. Preston having been appointed scrutineers for the election of three directors, a ballot was taken, and they reported that Charles Davidson, W. H. Storey and Thomas Gowdy were duly elected.

It was moved by Mr. Randall, seconded by Mr. Wissler, that Thos. W. Saunders and Alex. McKenzie be auditors for the year.—Carried.

It was moved by Mr. Gowdy, seconded by Mr. Murton, that a vote of thanks be given to the directors of the old Board, manager and staff of officers as well as the agents, for their efficient services during the year.—Passed.

James Goldie, Esq., president, acknowledged the compliment,

Mr. Sleeman moved, seconded by Mr. Hobson, that a vote of thanks be tendered to the scrutineers for their services, which was duly acknowledged by Mr. Preston.

—Chronic grumbler—"Look here! There's no meat in this sandwich."

Affable waiter—"Then why do you call it a sandwich? I am surprised that a gentleman of your erudition should commit such a solecism in rhetoric."—*Boston Transcript.*

—Musical note: The agent who keeps on the even tenor of his way, without resorting to base methods, may not treble his income, but he will have the satisfaction of not going counter to good morals.

OCEAN STEAMER CHANGES.

The season of 1895 will witness some changes among the steamship companies sending their ocean boats to Montreal. The Dominion line, which has been well known for many years, no longer exists, excepting in name, the steamers of the company having been purchased by Richard, Mills & Company The new concern took over all the liabilities of the Dominion line, and paid £85,000 in cash for the company's six steamers. A weekly service will be run as heretofore between Liverpool and Montreal, the steamers to be put on the route being the "Vancouver," "Labrador," "Oregon," "Mariposa," and "British Prince." The latter is a new addition to the fleet. It is said the "Sarnia," "Dominion," "Toronto," and "Ontario" have been sent to Belfast to be broken up, having seen their best days.

The service between Montreal and Bristol has been taken over by Elder, Dempster & Co,, who at present own some sixty steamers, including the "Memphis," "Memnon," "Merimac" and "Mariposa." This company intend to establish a service between London and Montreal. Mr. Harling, of Harling & Ronald, has been appointed a salaried manager of the Bristol Line at Montreal The "Vancouver,", which has been commanded by Capt. Williams for some years, the Commodore of the line, is coming out this next trip in charge of a new commander, while the steward's staff is also in charge of new blood. Such changes are to be expected in every steamer in the service.

The Johnston Line Company has decided, the *Star* says, to run a weekly service to Liverpool and a ten days one to London. A few of the bondholders of the Beaver Line residing in Montreal have, it is understood, offered the creditors of the company seven shillings and sixpence in the pound, which has been accepted. These bondholders therefore secure possession of the company's assets. The shareholders of the company get nothing. The offices in the Board of Trade building have been given up, and all the clerks notified that their services will no longer be required after a certain date. Still it seems from a late cable that it is intended still to run these steamers.

—The quantity of tobacco, cigarettes, and snuff taken for consumption was 10,002,347 lbs., slightly more than an average. The duty collected was $2,448,957, an increase of $376,092 over the average. Canadian tobacco taken for use shows a big increase, the total being 904,885, or 321,498 pounds more than in 1893. Cigars also show a considerable increase, the quantity manufactured being 120,345,137, an increase of 14,679,889 over the average of four previous years.

—Western statesmen, who are both financiers and politicians, talk for free silver and hoard gold. They talk as a matter of buncombe, and hoard as a matter of business.

CHURCH'S ALABASTINE

The Permanent Wall-Coating.
Does not RUB or SCALE from any hard surface.
Coat over coat can be applied.
No more washing or scraping of walls necessary.
Alabastine is The Sanitary Wall-Coating.
Displaces Kalsomines, which decay on the wall.
Equally adapted for Ornamental work and plain Tinting.
Pleases Painters as well as the general public.
Easily applied by anyone who can handle a brush.
Sixteen beautiful tints and White.
Put up in Five-pound packages, and never sold in bulk.
The only Wall-Coating that can be mixed in cold Water.
No hot water being needed. SAVES TIME AND WASTE.
Full directions for use on every package.
Sold by leading Hardware and Paint dealers everywhere.
Our book "The Decorator's Aid," furnished Painters.
Ask your dealer for Tint-Circular showing colors.
BEWARE OF IMITATIONS bearing similar names.

KEEP THESE IN MIND.

Who pays all the heavy and increasing expenses of the city's government?
The taxpayer.
Who pays for good government and gets bad?
The taxpayer
Who pays for good water and gets bad?
The taxpayer.
Who pays for good gas and gets bad?
The taxpayer.
Who pays for good reservoirs and gets bad?
The taxpayer
Who pays for good streets and gets bad?
The taxpayer
Who is legally responsible for the city's increasing debt?
The taxpayer. This debt is a perpetual lien on his property, and by so much depreciates its value.
Who pays the policemen, the firemen, the school teacher, and all the office holders?
The taxpayer.
Who should be most interested in honest, capable and frugal municipal government?
The taxpayer.
Who should be most alert at election times to secure the defeat of men who have wasted his taxes and increased his debt?
The taxpayer.
Who should be foremost to assert his dignity as a freeman, and to protect the sanctity of his ballot, whether in conventions or at the polls?
The taxpayer.
Who should hold in contempt party politicians, who toil not, neither do they spin, but make handsome livings and large fortunes by diverting the revenues of this city derived from taxation to their own personal gain, and control municipal legislation for their own personal profit, debauching every channel of public life?
The taxpayer.—*Philadelphia Call.*

—The *Chicago Herald* and *Chicago Evening Post* have passed into the hands of the syndicate represented by Mr. James W. Scott. Mr. Scott says that the *Times* and *Herald* will in a few days be consolidated. The paper will be called the *Herald-Times*. The *Evening Post* will continue under its old name.

—According to the annual report of the Canadian Department of Inland Revenue for the year ended 30th June, the total revenue accrued during the year was $82,141,495, which was $78,735 less than 1893, but $362,969 more than 1892. The quantity of spirits produced during the year was 1,604,344 proof gallons, as compared with only 3,856,955 gallons in the previous year, but at the end of the year there was 11,906,826 proof gallons of spirits in bond, a decrease of 1,595,988 from 1893 and 556,638 less than the average of the four previous years. The export of spirits was gallons 377,479 more than the average of the four previous years, an indication that Canadian whiskey was gaining favor abroad. The total revenue accrued from spirits was $4,133,637.

VALUABLE
Leasehold Coal Dock
IN THE CITY OF TORONTO,
— CANADA. —
For Sale by Tender.

Tenders will be received by the undersigned up to 3 p.m. of the 15th DAY OF MARCH, 1895, addressed to "E. R. C. Clarkson, 26 Wellington street east, Toronto," sealed and marked on the outside, "Tenders for Dock Property."

The property to be tendered for consists of the coal dock property, with plant and equipment, situate on the south side of the Esplanade, Toronto, at the foot of Church street, held under lease, from the Boulton Estate, expiring 1st August, 1896, with a right of renewal at a rental to be fixed by arbitration. The present rental is $2,035 per annum. The property has a frontage of about 213 feet on the Esplanade by a depth on the east side of 513 feet, and on the west side of 496 feet. On it are erected large, substantial and modern coal sheds, one of which is 200 feet by 100 feet; two Hunt elevators, elevated track, shed pocket, weigh scales, and boiler, and 40 horse-power engine. Fine offices and modern equipment throughout.

The property is centrally situated, and is considered the most perfect coal dock in Canada.

The property cost in 1888, $75,000, and there has been spent upon it since in permanent improvements $20,101.

The plant is in excellent order.

Terms of Sale:—Twenty-five per cent. down, and sufficient with that amount to make one-half within thirty days thereafter, and the balance at the expiration of one or two years at the option of the purchaser. All unpaid purchase money to bear interest at six per cent. per annum from the date of mailing of notification of acceptance of tender.

Full information, including conditions of sale, as approved by the Official Referee, can be obtained at the office of Messrs. Mulock, Miller, Crowther & Montgomery, 99 King street east, Toronto, Solicitors for Estate, or to

E. R. C. CLARKSON,
Liquidator of above estate.

—A tree of enormous proportions was recently cut by Mr. A. McGonigal, jobber for the Rathbun Co. on their Levant limits. It measured 4,391 ft. board measure, or 21 standards and 23 feet.

—The Scotch deposit rates have been one per cent., and a depositor makes the following lament, according to the *Pall Mall Gazette*:

Ye banks that prey on ony loon
How can ye act sae gey unfair?
How can ye gie me ane per cent.
And I sae weary, fu' o' care?
Ye'll break my heart ye grasping banks
That wontonly my interest's shorn
Ye'll mind me o' departed rates:
Departed—never to return

—The annual meeting of the Royal Loan and Savings Company took place on the 13th inst. in Brantford. The report of the year's operations showed a dividend of 7 per cent. The officers were re-elected as follows: President, T. S. Shenston; vice-president, W. Watt, sr. Directors—Judge Jones, C. B. Heyd, J. Mann, W. Buck, H. Cox, W. S. Campbell, W. Roy, G. H. Wilkes. Manager, R. S. Schell.

—Nickel steel armor plates, made by Krupp, on a new system, were successfully tested at Meppen. The plates were about 5½ inches thick, and showed a resistance equal to plates of 9½ inches, made by the old process. The plates were struck without injury by five shots, each from six-inch and eight-inch guns.

—The Canadian Association of jobbers in American watches held its annual meeting in the Windsor hotel, Montreal. Directors were elected as under:—J. A. Pitt and Alfred Eaves, Montreal; W. E. Boyd, Hamilton; H. Ellis and S. H. Lee, Toronto. Mr. J. A. Pitt was elected president, Mr. W. E. Boyd, vice-president, and Mr. S. H. Lee, treasurer. Mr. Edgar A. Wills is permanent secretary.

—Here is the magniloquent beginning of an applicant for the position of Chief of Police in Hamilton, Mr. Michael Joyce being the writer thereof:—"My lords: May it please your excellencies from the altitude of your sublime perch to shed the light of your benign countenances upon your petitioner, who, kneeling in profound humility at the foot of the throne, humbly tenders his application for the chiefship of the force." The applicant admits that he drinks, chews and smokes. He says—"The fossils of the old regime had courage, coolness and intelligence, and ability to govern, but they knew nothing of the hypnotic art. This Baldwinian gift do I possess."

MONTREAL MARKETS.

MONTREAL, Feb 20th, 1895

ASHES.—The demand is very slack, and receipts also are very light, being only 53 brls of pots this year to the end of last week. A few brls. of pearls came in a few days ago, and a quotation is now made of $6.10. No 1 pots, $4.00 to $4.05, seconds, $3.70

CEMENTS AND FIREBRICKS.—There is some little revival of interest in cements, a few western enquirers being reported. Present quotations for English are $2.05 to $2.20; Belgian, $2.00 to $2.05. There is always a little doing in firebricks at $17 to $22 for ordinary; Glenboig, $25.

DRY GOODS.—The change from the late stormy and severely cold weather to bright skies and a warm sun has caused many retailers to ask that their orders for spring goods be promptly despatched, and the warehouses at present all show much bustle in the laying out and shipping of goods, some of them working nights. Travellers are doing rather better in the country, but the effects of the heavy recent storms are still apparent in very poor remittances. We do not hear of any changes in values.

FISH.—The demand is more active, especially for green cod, which is firmer in price. We quote: No. 1 green cod, $4.50 to $4.75; No. 1 large, $6.50; large draft, $7.50; dry cod, $4.25 to 4.50; herrings, $3.75 to 4.50, according to brand; N. S. salmon, $13 to 14 for No. 1; B. C. ditto, $10.50 to 11; sea trout, $9 to 10; fresh herring, 70c. to $1 per hundred; cod and haddock, 3 to 4c.; finnan haddies, 6 to 7c. per pound.

FURS.—Receipts are very light at the moment, due to poor communication with back country points. We quote for strictly prime skins: Beaver, $3.25 to $4; black bear, $15 to $25; cub do., $5 to $10; red fox, $1.25 to 1.50; muskrat, 7 to 10c.; lynx, $1.50 to 2.50; marten, $1.25 to 1.75; mink, $1 to 1.50; skunk, 50c. to $1.25; otter, $8 to $12; fisher, $5 to $7.

GROCERIES.—As the country roads become more settled orders are improving, but business can hardly be called active. A large transaction in cheap grade black teas, involving 2,200 pkgs., was reported several days ago, but particulars are not available. Apart from this teas have been quiet of late, only small lots of Japans selling, at very steady prices, however. Some shading of prices has been talked of in sugars by Lower Province sugar makers, but the Redpath refinery holds to its former quotation of 3¾c. for standard granulated; the St. Lawrence company are still making an unbranded line at 3⅞c.; yellows range from 2⅞ to 3⅛c. The jobbing price for Barbadoes molasses is 32c. in puncheons, and 36c. in brls. Canned goods are looking up a little, an improved enquiry being reported; we quote standard brands of tomatoes 90 to 92½c corn, 92½ to 95c; peas, 87½ to 90c lobsters, $7 to 8 a case salmon, $1.35 for prime red, inferior $1.10 to 1.15; very little mackerel here. Dried fruits are dull; off-stalk Valencias are easy at 3¾c., currants 5¼c for Provincials in brls., cases Patras 4½ to 5c.; prunes in abundant supply and easy at former quotations; California loose muscatels 6 to 6½c. for 4-crown; 3-crown 5½ to 6c. There is quite an enquiry for dried apples from the West, and prices are stiff at 5½ to 6c., while evaporated are sold at 6½ to 7c. per pound

LEATHER.—Some houses report rather more doing in a moderate way. A large manufacturing shoe house made a contract for 8,000 sides of No 2 B A sole at 17½c for future

delivery. This is an advance on current quotations, and shows a belief that leather is bound to go up. Sole generally may be quoted firmer. Further enquiries have been received from England for splits, and prices realized quoted at sixpence to eightpence, which shows some advance, but there is no stock here to spare.

METALS AND HARDWARE.—We do not hear that there is a great deal more doing in these lines. Sales are reported of some lots of domestic pig iron at $16.75 to 17.00 per ton, but in Scotch there is little being done. The British markets are dull, with warrants cabled at 41s. 5d. The Siemens furnace at Londonderry, which has been out of operation for several months, will be again blown in about the 1st of March. There are quite a few enquiries for tinplates, but would-be buyers are very exacting as to price, wanting very low quotations, and not much business has resulted. That big lot of Canada plates is still in the market, and is an obstacle to better prices; it is said that they have been offered in fair lots at $1.95. Ingot tin is weaker and is being sold at 15½ to 16c.: lead is cabled a little lower. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $14 to $15; common do., $12; bar iron, Canadian, $1.60; British, $2 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates — Blaina, or Garth, $2.05; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.25 to $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.65 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6¼ to 6¾c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25, shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3⅞ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards

OILS, PAINTS AND GLASS.—The extreme frost in the South has further affected the turpentine market, and prices there are again firmer. Local prices are advanced to 47c. per gallon for single brls., lots 45 to 46c. A sale of several car loads of seal oil was reported a few days ago at 35c., but the color is said to have been a little off. In other lines there is nothing new. We quote:—Turpentine, 45 to 46c. per gallon for single barrels; two to four barrels, 44c. Linseed oil, raw, 57c. per gallon; boiled, 60c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6¼; tins, 6½c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. These prices are shaded 5c. for 50-box lots.

TORONTO MARKETS.

TORONTO, Feb. 21st, 1895.

DRUGS.—There is something satisfactory about being able to report an improvement in trade, and this can be said of the drug trade during the past week. From the country orders are being received of a satisfactory nature, and prospects look a little brighter. The main interest in regard to values centres in cod-liver oil. Norwegian cod liver oil has continued to advance until its price has almost doubled, and Newfoundland cod-liver oil is of course very strong. Gum tragacanth and gum acacia are firm at an advance. Cocaine is higher, while cubeb berries are reported lower. The *Reporter* lists quinine, caffeine, balsam Peru, camphor, gum chicle, damiana, mandrake, senega, as advanced, while orris root, canary seed, celery seed, coriander seed, diamond I shellac are reported lower.

GRAIN.—During the week the markets have

Keep Posted EVERY DAY

Our "Daily Bulletin" is the only thing of the kind in Canada. A most complete and reliable record of Failures, Compromises, Business Changes, Bills of Sale, Chattel Mortgages, Writs and Judgments for the entire Dominion.

We issue carefully revised reference books four times a year.

R. G. DUN & CO.

Toronto, Montreal, Hamilton, London, and all cities in Dominion, U.S., and Europe.

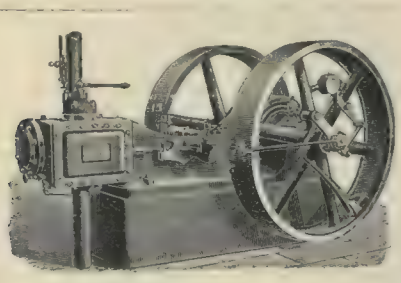
THE OAKVILLE BASKET CO.

MANUFACTURERS OF

1, 2, 3 bushel grain and root baskets.
1, 2, 3 satchel lunch baskets.
1, 2 3 clothes baskets.
1, 2, 3, 4 market baskets.
Butcher and crockery baskets.
Fruit packages of all descriptions.

For sale by all woodenware dealers.

Mention this paper. **Oakville, Ont.**



The "Robb-Armstrong" Engine

Is up to date in design and workmanship. Simplest and best governor made. Interchangeable parts. Economical in use of steam and oil.

ROBB ENGINEERING CO., Ltd.
Amherst, N. S.

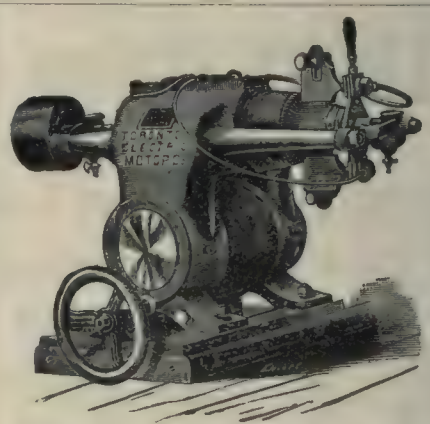
STEAM'S NOT IN IT

Either as to cost or efficiency, with one of our celebrated **ELECTRIC MOTORS.**

See the one that runs the MONETARY TIMES big presses and freight elevator. Not the slightest jar and almost noiseless.

Write and we will call and see you.

KAY ELECTRIC WORKS
HAMILTON, ONT.



TORONTO ELECTRIC MOTOR CO.

MANUFACTURERS OF

Arc Lamps for Incandescent Current.
Repairing a Specialty.
107 Adelaide St. West, Toronto.

DYNAMOS AND MOTORS

MONTREAL ELECTRIC CO., Agts. for Province Quebec, 302 St. James St., **Montreal**

ELECTRIC WATER WHEEL GOVERNOR

(PATENTED)

Variations in speed detected by fast running, sensitive Governor Balls. Gate movement instantly set in operation by electric current. Quick and powerful action.
Thirty days trial.

These prices are wholesale by the car-load

been without important change. No large transactions are reported in wheat, and this market has ruled very quiet. There is no movement for export nor has there been any for some time back. The roads of Ontario have improved, and so far from being impassible now afford excellent sleighing. In consequence of this deliveries at country points from first hands have increased and are quite liberal. Manitoba wheat continues steady but quiet at the quotations of a week ago. Firmness rules in barley, although there has been no quotable advance. A number of small transactions have been made on American account, and, indeed, we hear of some round lots moving to the United States. Oats are not only firmer in feeling, but also in price, for quotations are 1c. per bushel higher than a week ago. There is a good demand from the Maritime Provinces, Quebec and the lumbering districts of Northern Ontario. An active enquiry exists for peas, and sales are being made at 54 to 55c. the bushel. A considerable quantity is being sent forward *via* Portland. Last season's crop was rather lighter than usual, and is now apparently pretty well picked up.

The stocks of grain in store at Port Arthur on Feb. 9th were 680,907 bushels. During the week there were received 13,277 bushels, and shipped 9,159 bushels, leaving in store on Feb. 16th, 685,055.

THE VISIBLE SUPPLY.

	Feb. 16, '95. Bush.	Feb. 18, '94. Bush.
Wheat	80,734,000	80,216,000
Corn	12,651,000	14,708,000
Oats	6,932,000	5,687,000
Barley	1,665,000	1,908,000
Rye	353,000	917,000

HIDES AND SKINS.—Of the local hide market there is really nothing new to report. Trading continues to be conducted upon a rather limited basis, while no change has been made in quotations. The position of the Chicago packer hide market is thus summed up by *Hides and Leather*, Feb. 16th: It was apparent at the opening of the week that the packers had concluded to move their native and Texas steers, and this was soon accomplished by conceding ¼c. on their previous asking prices Some buyers who had been figuring on getting the latter at about 7c. were evidently disappointed. The market is now very closely sold up, heavy cows and spready steers being the only lines on which there are any considerable offerings. It is said that the total holdings in the four markets early in the week did not exceed 176,000 hides, nearly a quarter of a million less than the corresponding time last year The receipts of cattle continue surprisingly small. It was not the general opinion last week that sheepskins would advance on the middle of the month. But on Monday buyers agreed to pay 85c. for the best fresh skins; other descriptions, however, remain unchanged at 80c. Tallow is dull and depressed. Large quantities of Australian tallow have been brought into the United States and values there are consequently low. We learn that a duty of 20 per cent. is not likely to prove sufficient to keep American tallow out of this market. Dealers are selling choice rendered at 5⅛c Some few weeks ago they received 6¼c. for the same descriptions. When 5c. and 5¼c. must be paid for stock there is but little margin left for the merchant, and small incentive to push trade.

LUMBER.—The last six weeks have been very slow. One of the largest operators describes January and February, 1895, as the slowest months in the experience of his firm. The severe wintry weather has had much to do with the existing depression. Freight receipts have been diminished to almost a nonentity. However, beginning with the present week, some little enquiry has been developed, and with favorable weather and probabilities of an early spring trade, may return once more to normal conditions. One of the most peculiar features of the situation is, that in the absence of demand prices have remained firm, which speaks well for the strength of lumber merchants.

PAINTS AND OILS.—For the season, trade is fairly active. Turpentine is firm, and prices have taken an upward turn. It is impossible to foretell the course of primary markets, the situation being very complicated in result of the influence of speculative forces. Linseed oil is firm, and the number of orders placed is considered satisfactory. The paint trade, in so far as the movement for present requirements is concerned, is slow, but orders for spring delivery are fair. Import orders for glass are up to the usual standard for this season of the year; little stock, however, is being called for present consumption. The situation in lead has not altered since our last report. Although there is no association in existence, there is not that disastrous cutting of prices which one might expect under the circumstances.

PROVISIONS.—Trade is only fairly good. Receipts of roll butter are larger and the market generally is depressed; rolls are quoted at 13 to 14c., and tubs at 14 to 15c. per lb. Cheese is quiet and steady, with a quiet undertone to the market. There is no change in hog products; dressed hogs are selling at $5.20 to 5.25 per cwt. Strictly fresh eggs are worth 20 to 21c., pickled 12 to 14c., and held stock 8 to 10c. Dried apples are firm at 5¾c.; evaporated quiet and steady at 7 to 7½c.

WOOL.—The situation has not materially changed during the present month. There is some demand from the United States for Canadian fleece wools, however, in the face of very limited stocks, but little trade is doing in this direction. There is little enquiry for pulled wools from local sources, but coarse long wools are readily picked up by American buyers. The domestic woolen mills are undoubtedly inactive and report trade slow, with the outlook not encouraging.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

WESTERN ASSURANCE COMPANY.

The forty-fourth annual meeting of the shareholders of the above company was held at its offices in Toronto on Saturday, Feb. 16th. Mr. Geo. A. Cox, president, occupied the chair, and Mr. C. C. Foster having been appointed to act as scretary to the meeting, read the following

REPORT.

The directors beg to present herewith their annual report showing income and expenditure of the company for the year 1894, together with profit and loss account and statement of assets and liabilities at the close of the year.

The premium income, owing mainly to general business depression and depreciation in values, shows a falling off compared with that of the preceding year, but this was more than counterbalanced by reduced losses, and the revenue account shows an excess $111,453.47 of income over expenditure. Two half-yearly dividends at the rate of ten per cent. per annum have been declared; $10,000 carried to reserve fund, which now amounts to $1,100,000; and after providing an ample reinsurance reserve to meet liabilities on outstanding policies, the net surplus of the company has been increased to $377,247.59.

Your directors feel assured that the shareholders will have learned with deep regret of the recent loss which the company has sustained in the death of its late president, Mr. A. M. Smith, who, as a director for the past twenty-nine years, and as president since 1883, had, by his wise counsel and the active personal interest he had always taken in its affairs, contributed largely to the success of the company.

The vacancies caused by Mr. Smith's death have been filled by the election of the vice-president, Mr. Geo. A. Cox, to the presidency; and of the managing director, Mr. J. J. Kenny, to the position of vice-president; the vacancy on the board being filled by the appointment of Mr. J. K. Osborne as a director.

J. J. KENNY,
Vice-President and Managing Director.

Western Assurance Offices,
Toronto, February 9th, 1895.

AUDITORS' REPORT.

To the President and Directors of the Western Assurance Company:

GENTLEMEN,—We hereby certify that we have audited the books of the company for the year ending 31st December, 1894, and have examined the vouchers and securities in connection therewith, and find the same carefully kept, correct and properly set forth in the above statement.

R. R. CATHRON,
JOHN M. MARTIN, F.C.A., } Auditors.

Toronto, February 9th, 1895.

The president, in moving the adoption of the report, said:—

I am sure that I express the sentiments of every shareholder of the company when I say that the absence from the chair of one who for so many years has presided over our annual gatherings, and maintained such a constant oversight of the affairs of the company, is a source of sincere regret. This feeling is painfully impressed upon us at this, the first shareholders' meeting for thirty years from which our late president has been absent. You will, I am sure, agree with me that we are fortunate in having secured for our board-room so excellent a portrait as that before you of one who has so well earned a place of honor upon its walls, and whose kindly disposition, business integrity, and blameless life have left upon the annals of our business community, and more particularly upon the minds of those intimately associated with him, a record which must afford us pleasure, as well as profit, to contemplate. Although in failing health for some time past, Mr. Smith continued to take a deep interest in the business of the company, and to fulfil the duties of his office until after the close of the year with which the report just read deals, and I feel, therefore, in presenting it that I am rendering, on his behalf, an account of the final year of his presidency, rather than submitting a report by virtue of the position to which the directors have recently done me the honor to elect me.

In performing this duty my task is a comparatively light one, for the statement of the accounts of the year, which has been in the hands of shareholders for some days, is one which appears to call for no lengthened explanations, and certainly requires no words of appology at my hands. From a shareholder's point of view, and taking into account the depressed condition of general business over the entire continent during the year, it must be regarded, I think, as an eminently satisfactory statement, showing, as it does, that after paying out of the profits of the year our usual dividend of ten per cent. upon the capital, we have been able to add $10,000 to our reserve fund; and that after providing an ample reserve for running off outstanding risks, we have made a substantial addition to our net surplus. On the whole, therefore, I say that I think we may congratulate ourselves, as well as the officers and agents of the company, upon the result of the year's transactions, bearing evidence, as it does, of that careful selection of risks and judicious supervision which is so essential in times when depreciation in the value of all classes of property is liable to increase the hazard of fire underwriting.

Although the report deals only with the business of 1894, I may be permitted to refer briefly to matters relating to the present year, and in this connection I may first allude to the unfortunate experience of our own city during the early part of January, when by two fires, occurring within a week of each other, property to the value of close upon one million and a half dollars, and embracing several of what were regarded as our best mercantile risks, was destroyed, involving a loss of nearly one million dollars to insurance companies. With the large interests which the "Western" has in Toronto, it is needless to say that we could not hope to escape heavy losses in such disasters; but I am pleased to be able to inform you that our lines were so well distributed, and on the larger risks reduced by re-insurance, that our net loss by these two fires was $37,200, an amount not sufficient to seriously affect, with our present large income, the average of the year's losses. As a result of these fires, the improved fire protection which has long been urgently needed in Toronto seems likely to be afforded.

It will be of interest also to shareholders to know that a contract has been entered into under which we have reinsured the Canadian business of the United Fire Insurance Company, of Manchester, England, which company has ceased doing business in the Dominion, being, in fact, now in course of liquidation. This will naturally bring some increase in the volume of our Canadian fire business, from which we have in the past derived a fair profit, and from which we feel that we may reasonably look for satisfactory results in the future.

The vice-president seconded the adoption of the report, which was carried unanimously.

The election of the directors for the ensuing year was then proceeded with, and resulted in the unanimous re-election of the old board, viz.:—Messrs. Geo. A. Cox, Hon. S C. Wood, Robt. Beaty, G. R. R. Cockburn, M.P., Geo. McMurrich, H. N. Baird, W. R. Brock, J. K. Osborne, and J. J. Kenny.

At a meeting of the board of directors, held subsequently, Mr. Geo. A. Cox was re-elected president, and Mr. J. J. Kenny, vice-president for the ensuing year.

EASTERN TRUST COMPANY.

The annual meeting of the Eastern Trust Co. was held in Halifax on the 13th inst., when a report of operations for the year 1894 was submitted up to the close of that year. Stock to the amout of $119,200 had been subscribed, and $29,800 paid in. A dividend of 5½ per cent. was declared out of the net profits. The value of estates administered is given in the report. John F. Stairs, M.P., is president; Adam Burns and Robie Uniacke, Halifax, vice-presidents. The directors are as under:

J. Walter Allison, Halifax; R. L. Borden, A. Drysdale, Michael Dwyer, Thos. Fyshe, R. E. Harris, Q.C., Thos. E. Kenny, M.P., James R. Lithgow, James C. Mackintosh, Halifax; David MacKeen, M.P., Cow Bay, C.B.; Patrick O'Mullin, Thomas Ritchie, W. B. Ross, Q.C., Wiley Smith, W. N. Wickwire, M.D., Halifax. Mr. B. A. Weston is manager.

—The annual meeting of the shareholders of the Elgin Loan Company was held last week in St. Thomas. Messrs. John Baird, A. Murray, George Wegg and L. Millington, the retiring directors, were re-elected. Dr. D. McLarty was re-elected president and Mr. John Baird vice-president, and George Rowley manager.

—Only five out of seven hundred students at the University of Toronto attended lectures yesterday, the remainder having practically gone on strike against the professors. When students become too old to birch and are too young to behave themselves, they can at times cause considerable of a situation.—*Montreal Gazette.*

—Women in Glasgow shops, according to a recent report, receive from $1 or $1.25 to $3 a week; hairdressers, milliners and tobacconists may get $3.75. Overseers begin with $3 a week and may rise to $600 a year. One young woman, in sole charge of a shop, received $2 a week; her hours were 12½ on four days of the week, 7½ on one and 14½ on one; her meals were brought to her; there were no sanitary conveniences, these being rare in Glasgow shops. Another worked from 9.30 a.m. till 10 p.m., and on Saturdays till 11, for $1.75 a week, and was not allowed to go out for her meals.

Office -Temple Building, Montreal.

AGENT FOR TORONTO AND VICINITY—FRED. J. STEWART. Office—No. 30 Victoria St., Toronto.

Sun Life Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.
T. B. MACAULAY, Sec. & Actuary. IRA B. THAYER, Supt. of Agencies.

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

AN UNAVAILING EFFORT

An illustration of the difficulties attendant on retail business in Canada to-day is to be found in the position of the Berlin firm of Groff & Hymmen, who are asking their creditors for a compromise at 66⅔ cents in the dollar. In the year 1888, Groff & Hymmen, then as now dealing in dry goods and millinery, bought out J. B. Fellman & Co., thinking it a desirable thing to lessen the number of shops competing. They paid too much for the business, as it now turns out. Then, in breach of an understanding, we are told, Mr. Fellman allowed Mr. Sheffield to start in an adjoining store, and cut up the business. Groff was thereupon advised by his friends to consent to an amalgamation, which he did, and the firm of Groff, Sheffield & Hymmen was saddled with too heavy a stock. In 1890 Hymmen retired, and Groff & Sheffield continued. Not long afterward Sheffield retired and Groff continued until 1892, when Hymmen, who was well liked and a good salesman, was re-admitted partner, Groff undertaking another amalgamation and taking over the Ridgetown stock of Hymmen, and assuming his liabilities of $7,384. This resulted in a loss of $2,500 to the business. The result of these various changes and amalgamations has been that Mr. Groff, who has a good record, feels himself compelled to ask for a compromise. His wife, it appears, had $7,000 or $8,000 derived from her late father, a good deal of which she lent to the business.

In a letter to this journal dated February 26th, Mr. Groff, who has been in business some twenty-two years, says: "Had credit not been so cheap and so freely given, it would have avoided all this trouble." He probably means that if wholesale dealers had not been so ready to give credit to opposition stores, he would not have needed to make so many amalgamations in the hope of saving his business. Possibly he himself is to blame for accepting so much credit, for we observe that he has twenty-two merchandise creditors, for an aggregate of nearly $13,000. The amount of assets is not stated, but it would appear that the capital of all three parties, Groff and Sheffield and Hymmen, has been wasted or utterly wiped out in the efforts of the past six years. Hymmen showed in February, 1892, stock and accounts of $13,800 against goods liabilities of $7,384, and a loan of $2,500 from Mrs. H. Hymmen. But there was a loss in the taking over of this Hymmen business which, Mr. Groff declares, is the more immediate cause of his present unfortunate position. He thinks that if the desired compromise be granted, he can yet go on and prosper. This whole involved history is a commentary upon the readiness with which people open new stores and are helped by the cheap credit of wholesale houses to enter into competition with established concerns. The business of the country should be got more close to a cash basis.

AMERICAN FINANCIAL AFFAIRS.

Henry Clews says in last week's New York letter: The immense subscription in London to the current bond loan is an evidence that foreigners have a higher estimation of the intrinsic worth of United States Government bonds than we have in this country. The signal success in floating this loan cannot fail to lead the way to a revival of confidence in American railroad securities, which are now down to prices that should make them look inviting, for speculative ventures at least. The speculative spirit in all the European money centres is rampant, as we have indicated from the African gold craze.

The silver movement in the Senate has come to an end, not only without serious consequences, but with significant symptoms of its growing weakness, which will afford an opportunity for other important measures to be called up, including the Pooling bill, which, together with the appropriation bills, will about fill up the short time remaining of this wretched Congress, the ending of which will terminate, to a very large extent, the suffering of almost every household throughout the land. It would certainly appear from all present indications that better times are at hand.

To recapitulate, the things in sight to be considered in diagnosing the situation, are the following:

The Pooling bill may yet pass this Congress.

The adjournment of Congress, now near at hand.

The new crops will bring the benefits accruing from a sheltering winter.

The opening of the spring trade has a very fair promise.

The $100,000,000 gold reserve is made good

The London connection, under the lead of the Rothschilds, with the new Government loan, again opens the door in London to American securities.

The big profits that will be realized from the bond negotiation may be expected to encourage the buying of other American securities on an important scale.

The prospects, therefore, are quite good for a turn in the tide of Wall street.

DURING 1894 the home and foreign insurance companies doing fire underwriting in New York State received a total in cash premiums of $133,770,946, and paid in fire losses $81,015,403, or a fraction over 60 per cent. The business done in New York State amounted to $22,085,736 received in cash premiums, while there was paid in fire losses $12,628,881. This leaves a better margin for those who risk their capital in a business that is often unprofitable

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE city of Ottawa is asking for tenders for the purchase of over $300,000 worth of that city's debentures.

THE shareholders of the Canadian Pacific Railway will hold their annual meeting on Wednesday, 3rd April next.

A MERCHANT named A. J. Crosby, keeping a general store at Waverly, N.S., and also running a fruit business in Halifax City, has made an assignment. He formerly did a fair business at Yarmouth, and more recently at Saulnierville, but has evidently been on the down grade of late, and found very slow in payments.

MR. HUGH MOONEY, of Mattawa, notifies his customers to pay up their accounts either in cash or by security by 1st March, 1895, else he will have a lawyer collect them. This, he says, is because of a change in his business. We trust Mr. Mooney purposes to sell for cash hereafter. If he sticks to this resolve we hope to congratulate him on success.

JOHN WILSON, the only partner in the firm of Bessonet & Wilson, wholesale carriage hardware dealers in Halifax, N.S., has made an assignment. The liabilities are quite small, and no preferences are given.——The Oxford Furniture Company, of Oxford, N.S., organized in 1890, with a capital of $25,000, is financially cramped, and unable to meet maturing engagements; an extension of three months time is asked.

Watch this Space Every Week

We intend to use it for cuts descriptive of our new Folding Box, patented in Canada, the United States and Europe. A new cut will appear each week.

If you are interested in paper boxes it will pay you well to make further inquiries regarding this new style of box, as it is adaptable to nearly all requirements. We shall be issuing a full descriptive circular shortly.

Mercantile Summary.

THE office of Morrison & Co., private bankers, has been removed, we understand, from Virden Manitoba, to Whitewood, Assiniboia.

JOHN O'DONNELL, Jr., grocer, Quebec, who succeeded to the old established business of his former employer, A. Fraser, is reported to be in embarrassed circumstances, and proposing a settlement at the rate of 50 cents on the dollar.

Two young men of Brockville, Ont., Orr & Shaver, who went into a grain and feed business only last fall, on a very limited capital, have already made over their estate to the sheriff, but gave a chattel mortgage for $500 before doing so.

ON this day week the Pillow & Hersey Manufacturing Company held its annual meeting in Montreal. Directors were appointed as under: John A. Pillow, president; John R. Hersey, vice-president; John McDonald, C. R. Hosmer, and A. H. Hersey.

THE internal revenue of the United States is shown below. Commissioner Miller says the receipts for the several months of this fiscal year from internal revenue were as follows: From all sources, $91,031,311, an increase of $6,882,068 over the corresponding period of 1894. The principal items are spirits, $53,578,031, an increase of $5,716,661; tobacco, $17,648,947, increase of $1,216,798; fermented liquors, $18,385,184, a decrease of $180,383.

CANADA PAPER CO.

15 Front St. West, TORONTO | 578 Craig Street, MONTREAL.

Mercantile Summary.

ETIENNE SYLVAIN, for the last 15 years doing quite a good sized business in groceries and grain, in the St. Roch's suburbs of the city of Quebec, is reported in embarrassed shape, and is proposing that his creditors should accept 75 cents on the dollar.

THAT Sherbrooke takes a sensible interest in recreation is evident from a sentence in the correspondence of the St. John's *News*, which says: "With the whist club, the snowshoe club, the book club, and the art club, our people have no lack of interesting occupation and amusement this season."

MONTREAL failures for the week are none of them important. Arthur Gauthier, a contractor in a small way, has made assignment of his estate, and owes $2,384.——Michael Arahill, for many years in a moderate retail grocery way, has defaulted on liabilities of some $3,000, and the assignee is in possession.——L. D. Vadeboncœur, tailor, previously reported as failed, has compromised liabilities of about $3,000 at 20 cents on the dollar.——The Tiger Tea Co., a private retail enterprise, is reported financially embarrassed, and seeking an extension. The liabilities are put at from $4,000 to $5,000.——Moise Richard, grocer, reported failed in a late issue, has arranged his liabilities at 25 cents on the dollar, cash.

DRESS GOODS & CRAVENETTES

Mercantile Summary.

THE general stock of A. J. O'Boyle at Brechin is advertised for sale on Wednesday next ——On the same day Sweet & Co 's Victoria Harbor general stock will be sold.—— Foster & Pender's stock of carpets is to be sold on the following day

A PARAGRAPH in our issue of February 8th stated that Joseph A. Rogers, hatter and furrier, Winnipeg, who was burned out, had made an assignment. We should have said that an assignment of his insurance policies was made for the benefit of creditors. We are further told that there are assets enough to fully cover his liabilities.

FORTY per cent. was realized from the sale of Bowman & Moore's hardware stock, Hamilton. ——The stock of Smith & Stutt, dry goods, etc., at Seaforth, was purchased by J. F. Clark, of Port Hope, for 61½ per cent.——The clothing stock of Hoover Bros., Port Arthur, was sold to Hoover & Co. at 75 per cent., a good sale.——The general stock of John Fraser, Lefroy, was bought by G. P. Mackay for 66 per cent.; the book debts realized 43 per cent.

COUNTRY failures in the Province of Quebec, despite the reported poverty of collections, are much fewer than have generally been anticipated. ——D H & O Langlois, dealers in furniture at St. Johns, are reported failed. The concern was in trouble in 1891, and tried to compromise debts of some $10,000, but had to go into insolvency.——The creditors of V. Mailloux, dry goods, of the same town, had a meeting in Montreal, on the 22nd ult., when he made an offer of 35 cents, cash, which was rejected. He owes, in round figures, $10,000, and nominal assets $9,000 ——J B Lavallee, general store, St. Germain de Grantham, has made an offer of 50 cents, at 2, 4 and 6 months, but creditors are not disposed to accept, and the estate will be wound up.——L. Bernstein, general dealer and peddler, of East Angus, on whom a demand of assignment was made last week, has made an abandonment of his estate, and the liabilities are placed at about $4,000. —T Malo, a tinsmith at Vercheres, is seeking a compromise arrangement. ——Antoine Courchene, grocer, Isle Dupas, reported insolvent last week, has made an offer to creditors of 20 cents, cash —C A Poirier, grocer, Windsor Mills, has assigned; liabilities are about $1,300, and assets comparatively nothing. ——Telesphore Demers, general store, Ste. Sophie de Levrard, is offering a compromise of 40 cents on the dollar, secured.

We hear from Montreal of the death from pneumonia of Mr. W. H. Meredith, of the firm of Middleton & Meredith, who was a director of the Bank of Montreal.

The Everett Paper Mills, of Washington State, are shipping paper to Australia, so the people of Vancouver proposed to start a paper mill in that city.

The annual meeting of the Yarmouth Steamship Company was held a week ago. The Yarmouth *Times* learns that they will pay $20,000 on their indebtedness and pay a dividend of five per cent. The old directors were re-elected.

The water will be let out of the Cornwall canal about the 16th March. The contractors, Messrs. Davis & Sons, have enormous piles of stone at various points where retaining wall is to be built. The Toronto paper mill, roller mills and Hodge's mill will be closed down while the water is out.

An Ottawa letter tells of the death of Col. Allan Gilmour, one of the best known men in Canada. Born in Glasgow, he lived many years in this country, where he had been engaged in shipping, lumbering, etc., and made a large fortune. He was considered to be the largest individual holder of bank stocks in the Dominion. The deceased gentleman was liberal with his purse in the direction of philanthropy, as well as for purposes of art or sport.

At Newmarket, W. W. Pegg, money lender, has got into trouble with his banker, who has obtained a judgment of $6,000 against him, and is endeavoring to compromise with the bank. ——John Benner & Sons, woolen manufacturers at Owen Sound, are financially embarrassed. They write their creditors that they will be compelled to assign and will not be able to pay unsecured creditors anything unless relief is granted the firm by means of a long extension of time with easy payments.

A special sale of Crown timber limits was held in Quebec on Tuesday last. The lots are situated in Bonaventure, Gaspe, Montmagny, Lake St. John, St. Maurice and Saguenay agencies and among the purchasers were Messrs. Price Bros., Dickie, J. B. Renaud, J. Albert, Ryan, Blaquiere, W. C. Stevenson, Robertson and McCallum, also J. C. Langelier, in trust for the Canadian Pulp Company, which intends erecting large mills in township Anger, County Bonaventure, to make ground pulp. This company is composed of Montreal people and three American capitalists. The sale only realized the sum of $9,199, besides the ground rent.

Geo. A. Cox has been elected a director of the Toronto Street Railway Co., in place of J. W. Leonard, of the C.P.R., who retires

The rate of taxation in London for 1895 will be about 20 mills in the dollar, if the *Free Press* is correctly informed. This is higher than in the past year.

Mr. Commissioner Larke writes from Australia that he regards the prospect of building up a trade with Canada as excellent. He had met out there a number of travellers for Canadian houses who had preceded him, and they expressed themselves as well satisfied with the business they had done. Mr. Larke thinks that the surest way to establish business is to send good commercial travellers to introduce an article, and then appoint local agents to continue the business

The firm of Scott Bros., doing a business for the past six years at Bairdsville, N.B., have assigned for the general benefit. They have over-bought and over-credited, and have been pressed from various quarters during the fall and winter.——E. A. Everett, in business in St. John, N.B., since 1882, as a dealer in hardware, wall paper, etc., is reported assigned. It is said accommodation paper has had a good deal to do with his troubles, but details are not yet available.——Frank S. Scammell, coal merchant, of the same city, has also failed and assigned.

The bailiff is in charge of C. W. Laker's livery stock in Toronto, and it will be sold today.——A number of years ago Wm. Mara retired from the grocery business in this city, having made considerable money. This he invested in various stocks, and lost it all, or nearly all. After this he opened another store near his old stand, and was again prosperous. This business he disposed of in 1892, and started a wine and liquor store down town. The result has proved disappointing, and now he asks creditors to accept 55 per cent. in full.

After doing business as a grocer at Leamington, Wheatley, Romney, and again at Leamington, last fall, Wellington Dunbar demonstrated the truth of the old adage of the rolling stone, etc. At last one of his creditors, becoming tired, issued a writ, and he assigned ——In October, 1892, J. H. Hetherington, carpet manufacturer, moved from Paris to St. Catharines, where he got a grant of $1,500 from the city. At that time he claimed, apart from the bonus, a surplus of $2,000. For a considerable time he has been very slow in making payments. The business, too, has been unsatisfactory. Now an assignment is made.

The succession duties yielded to the treasury of Ontario in 1894 over $150,000.

Customs duties collected at Toronto during February were $399,452, as compared with $366,160 in February, 1894.

The Grand Trunk earnings for the third week in February show an increase of $3,873 over same week of 1894, which is a matter of pleasing significance.

An assignment has been made by Jos. C. Devlin, formerly a grocer at Victoria, B.C., who has been sued on a lawyer's bill. He did this to avoid making any preference creditors ——It is reported that R. P. Freeman & Co., extensive dry goods dealers in New Westminster, who had a nice trade, are in financial difficulty. They claimed, four months ago, to have assets of $21,000, and liabilities of $12,000. We are unable to give further information before going to press.

In 1886 John Hiebert opened a general store at Pilot Mound, Manitoba, but has leaned on a relative most of the time for financial assistance. For some time past he has found trade very dull, and had great difficulty in making collections. Finding himself unable to meet maturing obligations, he gave a trust deed, in November last, to D. K. Elliott for $29,000, covering all his stock, etc. At this time he claimed a surplus of $8,000, but evidently his affairs have proved disappointing. He now assigns.——The insolvent stock of James Watts, wholesale and retail tobaccos, Winnipeg, is advertised for sale.——The general stock of the insolvent firm of Reid & Gerhardt, at Neepawa, has been sold.

About six months ago James F. McGarvey removed from Strathroy to St. Mary's, where he started a grocery, mortgaging the stock. In December last a fire occurred in his premises and a settlement was made with the insurance companies, from whom he obtained $1,980. We get word this week that he has assigned. ——J. P. Thompson & Co. succeeded Brignall, Thompson & Co., dry goods dealers, Belleville, n August, 1893. Previous to this, a meeting of the firm's creditors had been held, when it was decided to liquidate the business. After the greater portion of the stock was disposed of, Thompson & Co. purchased the remainder and continued the business. But an assignment was inevitable, as they could not make any progress, and an assignment has been made. Forty cents in the dollar is offered.

After he had travelled for a wholesale house for a number of years, Peter McDonald Fraser opened a dry goods store in St. Thomas in September, 1888, claiming to be worth $10,000. Two years later one Smith was admitted a partner, and the style was changed to Fraser & Smith. After the lapse of about a year the latter retired and Fraser continued. It is now claimed that whatever surplus there may be in the business belongs to Fraser's wife, who invested her capital. We hear that the estate has been put into the hands of R. C. Struthers for the benefit of creditors.

In the spring of last year, Maguire Bros., dealers in dry goods at Tilsonburg, dissolved partnership, G. A. Maguire continuing the business. At that time their statement showed assets of $11,500 and liabilities of only $3,000. After settling with his brother he claimed a surplus of $5,000. The competition in that place being very severe an assignment became necessary.——A short business career is that of L. G. D'Aubin, grocer at Windsor, who after ten months business as a principal was obliged to assign. The little money he had saved in eighteen years clerking is all gone.——After paying his way in the shoe business in Hamilton for nine years, John Devine now assigns. He always had a good record.——A second failure has been made by R. J. Davison, general storekeeper at Newmarket, the first being in 1883. Since then he has been controlled by a city firm, and failing to sell out he makes an assignment.

TORONTO, FRIDAY, MARCH 1, 1895.

THE SITUATION.

A bill has been brought into the House of Lords to empower Canada and Australia to enter into a preferential commercial treaty. This can be done without violating existing treaties between Great Britain and other European powers; but the preference cannot, in the face of these treaties, be extended to the mother country. The bill is the outcome of the colonial conference. Countries between which there is scarcely any trade may create some by the facilities of a treaty. That there may not be any resulting drawbacks it would be rash to affirm. An exclusive treaty acts repulsively on all the rest of the world not included in it. This is its restrictive side. The preference, in the present case, will tell equally against Great Britain and foreign countries. It is impossible to believe that Imperial statesmen can feel much pleasure in making a grant of powers which is intended to produce such an effect. They sacrifice something of Imperial interests in deferring to the wishes of the colonies concerned. They may not even believe that the course taken will be best for the colonies themselves, though they will not oppose an experiment on which the latter are presumed to have set their hearts. As the colonial conference was the work of the colonies, so must the responsibility for the experiment of intercolonial treaties rest on the contracting parties. That Great Britain will consent to become a party to these treaty arrangements we see no sign. She is not convinced that her interests or duty can be found in that direction. The bill will extend colonial liberties, in a collective rather than in an individual form, as it will be the starting point of a collateral line of development thrown out from the trunk of colonial self-government.

Any significant change of note in the tariff discussion is at any time worthy of attention. On one side we notice a disposition now, for the first time, to affirm that the tariff characterized as the National Policy is to be permanently maintained. But the assertion is not generally made, even on one side. Mr. Comptroller Wood, for instance, finds it necessary to repudiate the notion of an unchangeable fiscal policy. A time may come, in the history of a country, when it is almost equally difficult to maintain and to abandon a protective tariff. Public opinion may demand a change, and when the tariff is made a party question, everybody understands that the defeat of one party and the success of another means a change of tariff policy. From the birth of the National Policy to the present day there never has been a time when this contingency has not been present to the public mind. Everybody has understood that if he ventured an investment under the tariff of to-day the rate was liable to be lowered on the morrow of the success of the opposing party. There were plenty of people ready to take the risk, and to ask for increases of duty which they knew could not be maintained after the occurrence of a party revolution. The descent from a high to a low tariff, however necessary, can seldom be made without economic dislocation. This is the penalty that has to be paid for legislative interference with the normal course of industrial development. When it is known that a tariff can last just so long as one party retains the reins of power, and no longer, no one is taken at a disadvantage, or can say that he counted on the permanency of a state of things which one of the great parties had all along persistently opposed.

Unwelcome is the news that there is no dividend for the holders of the ordinary stock of the Canadian Pacific Railway Company. The dividends on the guaranteed stock were secured by a financial stratagem, of which the public scarcely took the trouble to take the exact measure. A large capital sum, sufficient to pay dividends for a given number of years, was set apart for that purpose. What was this but paying dividends out of capital? Between dividends earned and dividends paid the proper distinction was not made. What the holders of guaranteed stock got was a certain annuity for a stated number of years, with a chance of continuance thereafter. When the golden goose was eaten, another was substituted. But for the ordinary stockholders, who depend on earnings, there is now, for the first time, no dividend; hitherto they too have got dividends. The road gets credit for good management, and seems to deserve it. But now that there has been a break in the dividend on the ordinary stock, the question arises, what is the future to bring forth? Diminished business on all American railways is the rule, and it is not matter of surprise that the C.P.R. has suffered in common with the others. But this does not make the change the more welcome. The difference between the claims of the company in respect of the British Columbia section and what the arbitrators decided the Government had to pay, was very great, and may have upset many calculations of the company. The change from temporary to permanent bridges has been expensive, but this was a capital item. The amount of the reported earnings of the road, its location being considered, has been matter of surprise, and on it was founded the hope of the ordinary stockholders that they would get a dividend.

Many questions must arise out of the application to the Ontario and Federal Governments for aid to bring back and settle, in the Nipissing district of this Province, 3,727 French Canadians, who, for divers reasons, left Canada some years ago. Father Paradis is the moving spirit in the proposed repatriation. He asks from the C.P.R. free transport for all these people and their effects; from the Ontario Government free land and $50 for each family, and from the Federal Government freedom from import duties and $50 for each family. Free grants of land, on certain conditions, would not be a departure from the usual policy; grants of money would. On what ground could the deviation be justified? Is it to be an isolated case, or would the incident be drawn into a precedent? It is tolerably clear that if these demands were granted, new applications,

based on what had been done before, would speedily be made. Father Paradis has in his mind another remarkable move for future execution. He has his eye on 400 young persons of both sexes, of marriageable age, whom he proposes shall all unite in marriage on the 20th August of this year. We fear that a wholesale proceeding of this kind would not turn out well. But well or ill, the project shows the cast of the good Father's mind, and gives some glimpse of fruitful projects he is likely to develop. The question of bonusing emigrants is the first that requires to be settled; and it is necessary to make it plain whether the incident is to be justified by exceptional circumstances, or is to be made the starting point of a new policy. The intending colonists may well deserve our pity; they have been scourged by fire and plundered by grasshoppers; they are all in want of employment. But if these facts were to be permitted to settle the question, the decision might lead us an inconvenient distance. The triple bonus asked could scarcely fail to give entrance to the canker of demoralization, by creating a hankering after donations made and received in the name of charity.

BI-METALLISM IN EUROPE.

The British House of Commons has gone so far as to join France and Germany in regretting the increasing divergence between the price of gold and silver: and the Chancellor of the Exchequer has promised that if France and Germany should move for a new International Monetary Congress, England will send representatives. At the same time, Mr. Harcourt holds out no hope that the policy of the Government, on the question of bi-metalism, has undergone, or, so far as he is concerned, is likely to undergo any change. Mr. Everett, who made the motion, said the price of silver had been depreciated by the artificial means of legislation. This is only part of the truth: the discovery of richer mines and the use of improved machinery, is a factor in the reduction of the price of silver. The German Reichstag has shown signs of a desire that the question of bi-metalism should be re-considered; but in Germany, as elsewhere, opinion is divided on the subject. The silver men everywhere, by asking too much, defeat their own object. They desire to fix the ratio between the two metals so as to put silver far above its market value. It is true that the market value now and what it would be, if silver were re-monetized, are far from being identical. The cost of production is the fairest criterion of what the ratio ought to be; but the cost of production in poor and in rich mines varies greatly, and the rule sought for cannot easily be found there. If the price of silver varies, what about the price of gold? The world has soon forgotten Cavalier's fear that the price of gold would decline. If we believe a tithe of what the bi-metalists say, the price of gold has appreciated, while that of silver has depreciated.

TENANT'S RIGHT TO REMOVE TRADE FIXTURES.

The old rule that whatever is annexed to the soil must be considered as part of the soil, and as soon as fixtures are so annexed they lose their character as chattels, has of late years been continually modified. The weight of authority grew to be that a tenant may remove trade fixtures, provided he removes them during the term, or if he remains in lawful possession after the term. If a tenant with a right to remove fixtures surrender his term either directly or by operation of law, and takes a new lease, the result is that the fixtures are included as part of the property owned by the landlord, and the tenant loses his right to remove. This modification of the rigor of the old law was till recently supposed to temper all leases, whether under the Short Forms Act or not, till the decision on the 29th of October last of Chancellor Boyd in the case of Argles vs. McMath, in which that distinguished jurist startled the mercantile community by adjudging that every tenant who executes a lease in the usual form, or, as it is called by the lawyers, a lease under the Short Forms Act, precludes himself when he has executed such a lease from removing any fixtures put there by him during his term.

Trade fixtures are described as shelving, mirrors, gas fixtures, window fixtures, outside awnings, and other articles brought on the demised premises as independent personal chattels and physically attached by nails or screws, but not carpets spread with tacks for the purpose of keeping them in place; and if an article is to be considered a fixture, it must be attached to the freehold so as to become a part of it, so that it cannot be severed without doing some injury.

When a tenant signs a lease under the Short Forms Act, it contains the covenants on his part in the words, "and to repair," and "that he will leave the premises in good repair." These apparently innocent words have by the force of the statute an extended meaning, which is best told by quoting the words of the statute itself. The covenant to repair by the tenant is that "he will, during the said term, well and sufficiently repair, maintain, amend and keep the said demised premises, with the appurtenances, in good and substantial repair, and all fixtures and things thereto belonging, or which at any time during the said term shall be erected and made, when, where, and as often as need shall be." The covenant to keep in repair by the tenant is, that "he will, at the expiration, or other sooner determination of the said term, peaceably surrender and yield up unto the said lessor the said premises hereby demised, with the appurtenances, together with all buildings, erections, and fixtures thereon, in good and substantial repair and condition, reasonable wear and tear and damage by fire only excepted."

Chancellor Boyd's view of the law is that, having regard to the extended meaning of these covenants, fixtures erected by the tenant for the purpose of trade cannot be removed at the end of the term, but belong to the landlord; that the rigor of the old rule, modified by late decisions, is revived against the tenant who executes a lease containing such covenants as referred to. From this decision an appeal was taken to the Court of Queen's Bench, when that court, of three judges, unanimously came to the conclusion that a tenant, while he is yet lawfully in possession of the premises, under the original lease, has the right, while he remains in possession of the premises leased, to remove trade fixtures, and has a reasonable time in which to do so. To prevent the possibility of the Court of Appeal varying this decision against the tenant, the Legislature should meantime set the matter at rest.

THE MILLINERY OPENINGS.

One of the strangest mysteries of our mysterious old world is its changing seasons. Winter, spring, summer, autumn, succeed one another with a precision which puts the handiwork of man to shame, and illustrates the excellence of Divine creations. Men and women are creatures of imitation and follow nature in her changing moods; in spring the lighter colors are chosen by the milliner or designer for dress material, while winter calls forth the more sombre shades. In a few more weeks the hot rays of the sun will have driven away the last remnants of the snow bank and spring will be with us; already its harbingers, the

milliners, have visited our city, and in accordance with a promise made last week, we will attempt a description of what they pronounce the season's "leaders."

In shapes of head gear we have an entire change from the plateau and low crown of last season to extreme high crowns. These are either upright or tapering, and of the latter description the majority are seen in children's shapes. But size forms the season's distinctive feature. Large hats with very wide brims are prominent everywhere. This, as we have previously pointed out, was to be expected from the prevailing style of puffed sleeves. The average woman displays a breadth in shoulders which a brawny lumberman might well envy, and to crown this enormous edifice by a small sized headgear would certainly give an appearance very disproportionate. But all women do not wear puffed sleeves, nor will they all wear large hats. As is often the case, we have the two extremes side by side, very large shapes and very small shapes. But making allowance for the exaggeration in style which is apt to characterize the first models, we may safely predict that when the season settles down large sized hats will be one of its more prominent characteristics. The material used for the better class of goods is fancy Swiss and Bernina braid of all descriptions. Some of the shapes are made of a mixture, the crown of Swiss straw and a plain chip body. One feature of the new millinery that appears most prominent is the preference given to colored straws. While many of the newest t nts are portrayed on the shape, the darker tones have apparently won most favor, an unusual thing for the spring season. Bonnet shapes have attracted but little attention, and indeed there is nothing about the models displayed to excite particular remark. A large number of small turban shapes of different patterns are seen, some with heavy braid roll, and others with plain chip roll and fancy crown. The usual quantity of leghorns for children's wear are being shown, and these goods vary little, if any, from the styles of a year ago.

One can describe shapes with a feeling that he is treading on moderately safe ground; but when the realm of trimmings is entered, everyone but the artist is at sea, and even the artist oftentimes fails through lack of words. Milliners see visions of wealth in the fact that lavish decorations are declared in good taste for the spring of 1895. "Side trimmings" will likely predominate in order to harmonize the hat with the shoulder width of dresses. A number of the shapes have the brim bent or cut away; in others the bending is left to the will of the milliner, while in still others the shape is intended to remain unbent.

Floral decorations are in such abundance that the summer of 1895 may be termed a flower season. It is difficult, in fact impossible, to name the flowers most in favor. Roses, chrysanthemums, violets, asters, buttercups, cowslips, heliotrope, carnations, and a host of others all have their admirers. Every year the maker of artificial flowers has brought his creations nearer his model, Nature, until there is now seemingly nothing lacking except the sweet perfumes, for which one looks in vain. This year has witnessed a decided improvement in the manufacture of foliage. In consequence the milliners have expressed a decided preference for these decorations, and in fact such has been the demand that several of the houses report having completely sold out their stock. Special favor has been given to ivy foliage and rose leaves in plain and shaded effects. Both the flowers and leaves most in evidence are large, the smaller flowers, such as lilacs, lily of the valley and heath, having apparently disappeared. Many of the trimmed models show the flowers in large tufts bunched tightly together. During the winter, violets and roses have found a very conspicuous place in headgear, and the present tendency may be regarded as but a continuation of winter styles.

More than the usual variety of jet sprays running into steel, gold and black effects, are shown. There are divers kinds of wing effects to be seen in the warehouses, not only the wings of birds, but of every conceivable winged object. They create a good appearance on bonnets and tocques. A new effect called the satin bead takes off that bright, glassy appearance which has hitherto marked so many of these decorations. Many combinations of wings and buckles, which give a decidedly good appearance, will be used this coming season. Slides and buckles running into rhinestone and jet, and combinations of rhinestone and jet, are considered in very good taste. The slides are for a large part of Grecian block pattern.

Ostrich goods vary but little from those of last year; as then ¾ flats and tips are most used. The very long feathers may not, however, be left long on the shelf if the rage for large hats continues unabated. In trimming the more expensive hats French ornaments are in request. To describe these objects, extending as they do over crowns, wings, bows, bandeaux and a hundred other objects, is simply an impossibility. They are to be had at all prices from 50c. to $10, and some of them are simply exquisite in their execution.

While certain quantities of lace have been purchased, it is not at all probable that lace will find any very prominent place in the season's millinery. All the widths are used from 2½ in. to 12 in. wide, while black, cream and beurre are the most prominent shades. Light applique laces which make up easily into *choux* and rosettes for side effects, are in the best taste.

Everything points to a grand ribbon season, and sales have been made of all widths, extending from No. 5 to No. 80; wide ribbons, however, are most in favor. Several new and very pretty patterns are features of the season. The Dresden, after the old Chene patterns in floral effects, like a painting on china, is worthy of special notice. Another very pretty thing is a shot-effect ribbon, with lace edges. Double-faced and two-toned satin ribbons are considered "leaders."

The season has not developed any marked new shades, but is rather notable for the combination of many colors. Some of the best shades on the spring card are Fuchsia, Roi, greens, Ebenia and Sans-Gêne. The bleuet shades, notwithstanding the fact that they still number many admirers, are very apparently losing ground.

FIRE INSURANCE MATTERS.

The president of the British America, in addressing the shareholders at the annual meeting, confessed that had the board of the company foreseen that they were entering upon a year of unusual financial stringency and commercial depression, they might have hesitated to assume the responsibilities they did. However, by hard work and close watching, he tells us they have, with the assistance of their agents, worked up a larger business, increased the reserve and made a gain in surplus. In a year like 1894, when fire insurance losses were severe, this is an achievement on which the company is entitled to take credit.

The great fires in Toronto in January are referred to as an illustration of the necessity for distributing risks if an underwriting organization does not want to be swamped. Suppose all those Melinda street, and Jordan street, and Wellington street risks that burned in January had been insured only by the "Toronto Municipal Fire Insurance Bureau," and the whole sum of nearly a million dollars indemnity had been demanded at once from Mr.

Coady, the city treasurer, by the sufferers, would not the citizens have been at the point of riot on being taxed an additional 8 mills in the dollar to pay for them? There would have been no Aberdeen, or London, or Manchester strong box to go to for the insurance money.

Cities and towns have often made complaint against fire insurance companies for advancing rates of premium. Judging by the outcries of some Canadian cities and towns, one would think they were the only places that had ever had their rates raised. But we learn by an old country paper that the citizens of Nottingham, the celebrated lace and hosiery town of England, are also threatened by the fire underwriters to have their fire premiums doubled. The reason for this step is the same there as elsewhere; the fire department is insufficient for the requirements of the place, and therefore the underwriters charge higher rates to cover the increased risk. Nottingham is an important place, its warehouses and factories contain quantities of delicate fabrics especially exposed to loss or damage by fire, and covered doubtless by millions of pounds insurance. The inefficiency of the fire brigade was shown at a recent fire in that place, and as the town authorities showed no disposition to make necessary improvements in appliances, there was nothing for the underwriters to do but raise rates.

THE ROYAL TEMPLARS.

SECOND ARTICLE.

At the close of our last article on this subject we reaffirmed, what we should like to see Rev. Mr. Kettlewell successfully deny, that death claims in assessment societies, as in other companies, increase with increasing age, and that healthy young lives will not endure the heavier assessments caused by the numerous deaths of the older members. When "levies" rise from $7 and $9—as they were upon the Royal Templars in the United States in 1884 and 1885—to $17.82, and $19.86, as they were in 1892-3, the old and sickly members must be increasing, and the young and healthy must be giving the society the cold shoulder. Mr. Kettlewell admits that his society is making no reserve provision for avoiding the freezing out of the young men which is now going on at Buffalo, when his own members are, with himself, each twenty or thirty years older than now. He says the net cost has averaged $8.20 per $1,000, apart from expenses, in 1894, while it was only $5.80 the previous year. That was surely a heavy advance in death claims for one short year. The Buffalo branch, with three times as many members to help steady the rate, only advanced from $7 to $10.33 from 1884 to 1889, but that increased death grip came then to stay, and to increase stealthily ever since. It rose the next year to $12.20, then to $15.88, next to $17.82, and in 1893 to $19.86. Result: the young men rapidly dropped out, diminishing the numbers from 15,791 in 1889, to 12,957 in 1893. And there is little doubt the 1894 figures, when they come to hand, will reveal a still more desperate state of things. This being the case in the parent branch of his own fraternity, and this being the inevitable, never-varying result of depending upon *post mortem* calls to meet current demands, as provided by the unerring laws of nature, what sense is there in the Grand Councillor quoting the experience of the Canada Life, or that of any regular company, as a guide to what will happen to a society working on an ascending rate of assessments? The two things do not run on the same track. The cost in the regular society, for all purposes, gets less and less, from the interest on the reserve, as the policy-holder gets older. In the assessment society the cost gets greater and greater as the certificate grows older. There are some apparent exceptions, but they are easily explained, being usually produced by a large influx of new members during the first ten or fifteen years. That influx over, the cost goes up apace. From 1874 to 1893 the cost per $1,000 in the United Brethren of Lebanon, Pa., grew from $9.10 to $43.50, reducing the members from 14,237 to 4,609. In the Southern Tier Masonic, of Elmira, N.Y., the cost in 1881 was $17.00, and now is $58.40, the membership falling, meanwhile, from 5,085 to 927. In both cases, to thousands of hopeful people, there was heavy, cruel, aggravating loss and disappointment. Again, we ask, what are the Royal Templars doing to guard against a similar result in their case? As an illustration of the difference in the influences at work in a regular company, and in an assessor, toward retaining the healthy, long-living members—the one attracting them by its strong reserve funds, and its decreasing premiums, and the other repelling by its poverty, and increasing leech-calls—let us put side by side the two following cases. One is that of Hon. O. Mowat, policy No. 2,993 in the Canada Life, and the other Mr. H., of Oconomoc, Wis., certificate No. 455 in the United Brethren Mutual Aid, above mentioned. The following figures give the cost per $1,000 for 17 years from the commencement of each insurance:—

HON. O. MOWAT.		MR. H., IN UNITED BRETHREN.	
Year.	Cost per $1,000.	Year.	Cost per $1,000.
1st	$30 50	1877	$10 00
2nd	30 15	1878	34 50
3rd	29 80	1879	24 00
4th	29 45	1880	22 00
5th	29 09	1881	34 50
6th	28 73	1882	37 00
7th	28 73	1883	52 00
8th	28 73	1884	59 50
9th	28 73	1885	82 00
10th	28 73	1886	99 50
11th	24 48	1887	112 00
12th	24 48	1888	99 50
13th	24 48	1889	114 50
14th	24 48	1890	129 50
15th	24 48	1891	129 50
16th	18 93	1892	147 50
17th	18 93	1893	164 50

During the first seven years, the Canada Life received $216.45 and the assessment society only called for $214. But on the 8th year the "insurance at cost" came to $59.50, and grew to $164.50 in 1893, while the other grew smaller, being only $18.93 for the 17th year. Mr. Mowat's 17th year of insurance was reached in 1876. Ten years later his cost per $1,000 had come down to less than $1 per annum, and at present he not only has nothing to pay, but is deriving an actual annual income. And yet the assessment societies go on representing that the cost in a regular company for that age at entry (40) is $30.50, while theirs, they state, will remain about one-third, or one-half as much. Only in March last Dr. B. C. Mackenzie, medical examiner for the Royal Templars, published a two-column article in the *Templar*, in which he represented the companies as charging $22.63 at age 30, while only $8.28 was the entire annual cost in his society, and not a hint was dropped about the profits reducing the $22.63, or about the $8.28 increasing to the point of driving out the most desirable members, as has occurred in the U.S. branch of his own pet society. It would be hardly right to close this article without repeating the valuable table given in our issue of Dec. 14th last, showing the actual experience of the American branch of the Royal Templars. And alongside of it, we give, for the same years, the experience of a still larger society—the Chosen Friends—who are not supposed to be total abstainers:—

ROYAL TEMPLARS			CHOSEN FRIENDS	
Members.	Per $1,000.	Years.	Members.	Per $1,000.
15,113	$ 7 00	1884	22,737	$ 7 95
14,530	9 00	1885	26,175	8 64

It will be observed that a sort of blight struck both of these large societies in 1889, since which time new members have been hard to get, and the best of the old ones have been quietly getting out, leaving the burden upon the few. They remain, apparently, under the Mackenzie-Kettlewell delusion that the old man with the scythe will deal as favorably with an assessment society as with a regular life insurance company. There are people still, as there were in Scripture times, who act as blind leaders of the blind. We trust that both the doctor and the preacher will learn something useful from what we have written.

THE HALIFAX FIRE.

Halifax was visited last Wednesday morning by a severe fire, which resulted in damage amounting to more than half a million, possibly nearer one million dollars. Of this amount the Dominion Government will lose fully half. The grain elevator and shoot, which were completely destroyed, cost, with appurtenances, more than $240,000. The immigration and freight sheds were destroyed. The immense wharves were burned to the water's edge, and the railway tracks, offices and a dozen cars consumed. In the shed were two steamers' cargoes of goods, those of the "Indrani" and "Corean." About 200 tons of these goods were for Halifax merchants, whose losses will be very heavy. Then there were 200 tons more destined for New Brunswick, Quebec and Ontario, probably $200,000 worth. The latter goods, it is believed, will be insured, the policies covering the transit of goods till they arrive at their destination, but there is no insurance on the stocks of the Halifax merchants. Neither was there any insurance on fourteen cars of coal, eight cars of potatoes, and one car load of beef consumed. The Canada Atlantic Railway lost $10,000 in cars burned In addition to this there were large quantities of goods there waiting shipment to Newfoundland, and these were all lost. The Armour Beef Company of Chicago lost four cars. The Government disinfecting apparatus, which cost $15,000, was also burned. On Water street the wooden buildings, from 150 to 185, were more or less damaged, most of them insured. It was a very severe fire, and the great damage done will add not a little to the already heavy fire loss list for 1895.

ELMIRA BOARD OF TRADE.

We hear with interest that the business men of Elmira have formed a board of trade. This place is one of the most progressive in the rich county of Waterloo, whose people are known throughout Ontario for their intelligence and thrift. From the names of members we have so far seen this new body should take an active part in discussing questions of commercial interest. The gentlemen whose names follow form its first council:

President—H. Ullyot, M.D.
Vice-President—Geo. Klinck.
Secretary—R. V. Clement.
Treasurer—S. A. Brubacher.

M. L. Weber, J. S. Weichel, W. R. Wilkinson, S. Laschinger, Daniel Reatz, A. Werner, J. P. Luckhardt.

LANDED BANKING AND LOAN COMPANY.

This Hamilton company continues to exhibit a larger proportion of debenture money concurrently with reduced deposits, and it appears to be getting its money cheaper than before. It is stated in the report that the interest due by borrowers has been satisfactorily met. At the same time the earnings are on a lower scale, as shown by the proportion of gross earnings to total assets, which was 5.968 per cent. in 1893, to 5.58 per cent. in 1894. The object sought by the creation of a contingent fund last year having been attained, that fund is now wiped out and $10,000 has been added to Reserve after payment of dividend, a sufficiently satisfactory achievement in a year of low values and depressed business.

HOME SAVINGS AND LOAN COMPANY.

The year of grace 1893 was an unusually good one for this company, demand for funds being active and rates good. In both these respects the year 1894 differed from its predecessor, so one is prepared to find that its interest earnings were on a lower scale and amounted to some $20,000 less. Still, after paying substantially the same aggregate of interest to its depositors as in the previous year, the profits were sufficient to yield 7 per cent. dividend, to place $10,000 to reserve, and $5,000 to contingent account, a result which speaks for itself. The company had less mortgage loans last year, and more loans on stock and debentures. Its real estate loans are all in Toronto, we are told, where they can be inspected by the directors. It is in accordance with careful policy and with the nature of its deposit funds that the management should prefer to lend most upon readily available securities. And this, we understand, they aim to do. The resolution congratulating Sir Frank Smith on the honor of knighthood is one whose terms will find an echo in many hearts.

QUEEN CITY FIRE INSURANCE COMPANY.

The regular shareholders' dividend of 25 per cent. on the original paid-up capital, has been paid by this company for 1894, and in addition thereto a bonus dividend of equal amount. After making these payments there is a balance at the credit of Profit and Loss of more than $48,000. This result is exceptional among the fire insurance organizations of to-day in Canada. The amount of loss for the year on risks of $2,771,000 was only $4,779, and this scattered over some fifty losses. A significant statement of the president is that ten of these losses are attributable to incendiarism solely, a sort of hazard which, as he truly remarks, no underwriting skill can foresee or estimate. Mr. Austin is able to assure his shareholders that the loss of the Queen City by the recent great fires in Toronto will not reach one-half of the $36,240 standing at the credit of Profit and Loss, after providing for all liabilities, including re-insurance reserve, at the close of 1894. The showing deserves to be considered eminently satisfactory.

MILLERS AND MANUFACTURERS INSURANCE COMPANY.

The business in force of this company at close of 1894 is nearly the same as at the end of the previous year, though the number of risks is lessened, and gross earnings were somewhat reduced, which was to be expected in view of the depression in manufacturing and other lines of business. But the results to policyholders and members are such as require no apology. The balance to profit and loss account shows an increase of some $13,000, losses having been only $6,782, where in 1893 they were $26,185—adjusted and unpaid claims being included in both cases. It is stated in the president's address that a much larger business could have been done had the applications come up to the company's standard. But below this standard, adds Mr. Goldie, "we will not write on any hazard, and we will not remain on any risk where there is apparent indifference to care, order and cleanliness." This is a high stand to take, and it ought to be significant to manufacturers or the weight good underwriters attach to the conditions of safety in the construction and every-day working of a mill or factory. The remarkable feature of this company's showing is the very low ratio of loss and expense to net cash premium income, namely, 55 per cent., while the loss ratio alone of insurance companies operating in Canada last yeaf was 66.33 per cent.

ANSWERS TO ENQUIRERS

J. M. McC., New York.—Have sent you the desired paper. The view taken seems to us the rational one. More the pity that your legislators do not seem disposed to drop their political feuds in presence of a national danger. You remember what the *Daily Indicator* said: "There is really no more reason for receiving and storing gold and silver for the purpose of issuing certificates for coin than there is to receive deposits of hogs and issue against them certificates for pork chops," which recalls to *Rhodes' Journal* the proposal of Edward Atkinson made to some members of Congress, that as hens' eggs constituted a more valuable industry than silver, Congress ought to purchase $4,000,000 worth of eggs a month and store them under the House of Representatives.

Secretary, Hamilton.—(1) That particular item is not separately mentioned in the list. (2) The total value of goods imported free of duty into Canada for the last six months of 1894 was $22,960,784; coin and bullion included, $26,525,690.

S. B., City.—We have not seen the company's report for 1894, but are glad to be told there was an improvement. The officers are the same, so far as we know; write to the secretary.

BOOK NOTICES.

Annual Report for the Year 1894 of the Toronto Board of Trade, with statistics of the port. Hunter, Rose & Co., printers, Toronto.

The Currency and Banking Law of the Dominion of Canada, considered with reference to currency reform in the United States. By William C. Cornwell. G. P. Putnam's Sons, New York and London, 1895

THE INNUITS OF OUR PACIFIC COAST. By His Honor J. C. Schultz, LL.D., F.R.S.C., M.D., Lieutenant-Governor of Manitoba. From the Transactions of the Royal Society of Canada, Vol. xii., Sec. 2, 1894 Montreal, W. Foster Brown & Co.

THE INVESTIGATOR ALMANAC and Fire Insurance Chart, 1895.—This annual publication gives a list of fire, casualty, plate glass and guaranty companies doing business in the United States, their condensed figures for 1894, and Illinois business for ten years. Price 25 cents: The *Investigator* office, La Salle st., Chicago.

DRY GOODS JOTTINGS.

Small check dress goods are "leaders" for the spring of 1895.

Cheviot serges stand up well in the list of popular fancy dress goods for the spring trade.

Messrs. Cole & Son, woolen stock manufacturers, are asking Guelph for inducements to locate in that city.

Reports from the cotton growing districts of the Southern States indicate a greatly decreased acreage this coming year.

The January imports of hats and bonnets into Toronto for 1895 amounted to $22,582, as compared with $25,800 a year ago.

M. Worth, the Parisian dress-creator, says he studies nature and blends the colors in his costumes as a result of field and forest observation.

Completed statistics for 1894 place the total exports of raw silk from Yokohama during the last year at 55,622 piculs, of which the shipments to America have been 31,372 piculs.

The Trilby craze has invaded fabrics. "Silk warp Trilby" is the name of a material brought out for street and travelling wear in the spring. It is of a Jacquard weave and effect, is pretty enough to sustain the reputation of its sponsor, and it is not expensive.

Soon the warm beams of a summer's sun will drive away the last vestige of a demand for cold weather goods, and yet your shelves give evidence of a bountiful supply. To sell them at a reduction may mean a loss, to carry them means a loss. Choose the less of two evils.

A circular letter issued by a Toronto jobbing house urges a course upon retailers which this journal has always advocated, viz., personal attendance upon the market. Whether it be with Montreal, Toronto, Halifax, St. John, Winnipeg, Vancouver or Victoria firms you trade make a point of visiting your centre of supply as often as possible. Commercial travellers do wonders in their way, but there is many a bargain to be made in which they cannot participate.

Early in the year we predicted a big season for crêpons, and every day adds to our convictions in this direction. In fact, such has been the confidence of jobbers in the future of this weave of dress goods that manufacturers report difficulty in filling the orders they have taken within the promised time. The scarcity of all-wool, wool and mohair, and silk and wool crêpons has caused American merchants to give increased attention to cotton crêpons of domestic make.

The following are the latest Canadian arrivals: Messrs. S. Simard, Quebec; W. J. B. Brunet, Quebec; W. A. Ross (New York); Aubrey Kirk (Messrs. A. Kirk & Co., Antigonish); Thos. Glover, Pictou, Nova Scotia; A. Kirkpatrick (Messrs. Vassie & Co., St. John); F. P. Bowser (Messrs. G. M. Smith & Co., Halifax); Mr. Cummings (Messrs. W. Cummings, Son & Co., Truro, Nova Scotia), and Mr. McCurdy (Messrs. McCurdy & Co., Antigonish).—*Drapers' Record, London, Feb. 9.*

Printed silks, turned out on the cylinder machine, writes the Manchester correspondent of the *Drapers' Record*, are being sold by local printers. The move is an enterprising one, but it is open to doubt whether the "runs" for goods of this class are large enough to justify the building up of hopes on the subject. Silk block-printing, slow and old fashioned though it may appear, is not likely to die out while orders are given out for a few yards of a single pattern, as is often the case with printed silks.

The surprising quickness and energy with which a modern commercial house revives from a heavy blow has been illustrated to all this week by S. F. McKinnon & Co. Many were the plans which Mr. Guthrie and his assistants in this firm had laid for a brilliant opening in a handsome new warehouse, only to be frustrated by the ravages of fire. However, any one who visited the premises of this house on Bay street during opening days this week, would scarcely believe that these quarters were but temporary, so perfect were the firm's arrangements for meeting the wants of their patrons.

The cotton manufacturing company of St. John, William Parks & Son, limited, held its annual meeting last week. It appeared from the report that the volume of sales for the past year was larger than usual and the stock now on hand is less than usual. The balance sheet showed a reduction in the value of assets of the company of $8,332, which was caused by the shrinkage in the value of cotton goods during the year, the writing off of all repairs to buildings and machinery, and the reduction of stock in process and goods on hand to meet present market prices. In the opinion of the directors the prospects for the ensuing year are good and might be confidently looked forward to if the other Canadian mills would restrict their production of goods to such a volume as they could dispose of at profitable prices. The directors elected were John H. Parks, Thos. H. McAvity, Alfred C. Blair, S. S. Harding (of New York), and Wm. Pugsley. At a subsequent meeting of the board Mr. Parks was re-elected president.

FOR GROCERS AND PROVISION DEALERS.

The new cannery now being built by Costello & Company at Steveston, B.C., is progressing rapidly.

The movement of raisins has been free for some weeks past, and there is not so heavy a stock left here. It is nearly all sack goods and not high grade. A little call would quickly absorb all the prunes in the States.—*California Grocer.*

The London *Grocer* of Feb. 16th says: "Inquiries for Canadian and American cheese have been languid, and to encourage buying, even to the smallest extent, holders have had to submit to an occasional concession in value, so that the top quotation for choice quality can hardly be fixed above 51s. landed.

The California Wine Manufacturers' Association announce officially the sale of 4,000,000 gallons of wine to the California Wine Association at 12½ cents per gallon, an advance of 5c. per gal. over 1894. The deliveries are to be at the rate of 500,000 gallons monthly and cash will be paid. The association also has contracts for the sale of 5,000,000 gallons yearly for the next three years. This, with the removal of competition by the lease of six big wineries of the California Wine Association, will tend to advance the price of California wine and insure a profitable price for grapes next fall.

The economic part of the Patrons' platform is apparently being swallowed up by the society's desire for political glory. And there is wisdom here. It is easier far to carry a constituency than run a store. However, all the Patron stores have not yet disappeared, as the following from a country correspondent of the Sherbrooke *Gazette* bears out: "Our Patron Association is prospering finely; about half a dozen new members every meeting. They have not got a store here yet, but are supplying themselves with flour, coal oil, sugar, tea, feed; coal oil at 16 cents a gallon, flour at $3.50 per barrel, tea at 20 cents a pound, sugar at 4 cents a pound, the very best granulated; feed at $1.10 a hundred, oatmeal at 2½ cents a pound. If a member wants anything, he tells the secretary the first meeting and there is a committee appointed that have made contracts with a number of wholesale merchants, so the members get a barrel of flour at wholesale prices."

Mail advices from Barbadoes to February 9th report per Clairmonte, Man & Co. as follows: The reaping of our crop will not commence before March next. It is estimated that the yield will be much below the average. Shipments as follows:

	Sugar. —Hhds.—		Molasses. —Punch's.—	
	1893.	1894.	1893.	1894.
United Kingdom.....	8,855	10,177	385	1,618
United States	56.211	50,099	13,681	8,060
British Provinces	1,822	4,788	29,166	34,107
Totals.....	66,888	65,064	43,232	43,785

—*N. Y. Journal and Bulletin of Commerce.*

One of the interesting events of the week in Toronto grocery circles was the arrival of a car of California canned fruits consigned to Eby, Blain & Co. This, we believe, is the first car lot of these goods to be sent here and it speaks volumes for the Californians that they are able to pay the higher freight charges and a custom tariff of 24c. a dozen, and still sell in this market at a profit, The following varieties—apricots, white cherries, pears, peaches, plums and nectarines, made up the consignment.

HARDWARE AND METAL TRADES.

During the past week forty-two cars of nickel matte passed through here in transit from Sudbury, Ont., to Constable Hook, N.J. They averaged 40,000 lbs. to the car.—*Ogdensburg Advance.*

The Westinghouse Air Brake Company, of New York, and the Marion Steam Shovel Company, of Marion, Ohio, contemplate establishing branches in Canada, and talk of locating in Hamilton.

A list of the type-writing machines in use by the Government at Washington shows the following: Remingtons, 1,620; Caligraphs, 130; Smith Premiers, 126; Densmores, 45; Yosts, 6; Hammonds, 59; other makes, 4.

James Watson & Co., Glasgow, February 15th, write: "The Scotch pig iron market has been rather firmer this week, but the severe

weather is affecting trade adversely in nearly all departments. Special brands are easier in price.

The turpentine market is in an unsettled condition in consequence of the uncertainty existing as to the course of affairs in primary quarters. At present the "bulls" appear to have the ascendant influence, and prices are firm at an advance.

At the last meeting of the Montreal Brassworkers' Association, President W. D. Burns presiding, the following officers were elected for the ensuing term: President, W. D. Burns; vice-president, Jas. Daly: treasurer, Jas. Dansken; recording-secretary, Nelson; financial-secretary, Geo. Henry.

More than half the world's supply of tin is mined in the Straits settlement at the tip of the Malay Peninsula. The output in 1891 was 36,061 tons, out of a total of 56,551 tons; 12,106 came from the Dutch East Indies, chiefly from the Island of Banka, leaving only 8,384 tons for the rest of the world.

A large quantity of steel from England, Sweden and the United States is now on its way to Ottawa to be manufactured into saws by a new concern, the Ottawa Saw Manufacturing Company. All descriptions of saws will be made, but more especially those used in lumber mills, and the works will begin with a staff of 35 employes.

Out of 530 tin plate mills in existence, 200 are known to be idle, and an accurate return would probably show that nearly one-half of the plant is standing. Prices at Swansea range from 9s. 6d. a box upwards, and even after making full allowance for cheap steel and tin, and the concession of 12½ per cent. in wages, it is certain that few, if any, of the works can be operated profitably.—*Griffiths' Report, London, Feb. 8th.*

The Hamilton Bridge Works were sold by auction in the Chancery office on Monday last. Mr. J. H. Tilton secured the property and plant at $49,900. It is understood Mr. Tilton represents a syndicate headed by Wm. Hendrie and himself, and that the works will be opened up again. The creditors, a telegram states, will probably receive a fair dividend, but there will be nothing for the shareholders. The works cost $135,000, and were valued at $80,000 some years ago.

The annual meeting of the shareholders of the Londonderry, N. S., Iron Company (Limited) was held on the 14th inst. After the annual report had been read and adopted the election of directors for the ensuing year was proceeded with, and resulted as follows: Lord Mount-Stephen, Sir Charles Tennant, Bart.; Messrs. A. S. McClelland, James J. Greenshields, A.T. Paterson, John Turnbull, L. McD. Paterson. At a subsequent meeting of the directors, Mr. A. T. Paterson was re-elected president and managing director, and Mr. John Turnbull, vice-president.

Messrs. John Shaw & Sons, Great Maze Pond, Borough, London, report a quiet, steady inquiry for clover and grass seeds. Quotations generally are unchanged. Fine yearling home-grown cowgrass is much wanted, and realizes remarkable prices. Spring tares, being exceedingly good and cheap, attract increasing attention. Large black rapeseed is held for more money. Very low rates still prevail for mustard seed. Canaryseed sells more freely at the late reduction. Cables from Buenos Ayres estimate the La Plata crop at the extremely moderate quantity of 2,500 tons. Hemp and linseed are dull, and French buckwheat, notwithstanding its cheapness, is neglected. Fine blue peas are firmer. Best haricots are 2s. higher.

Trade conventions are good enough in their way as affording an opportunity for the interchange of thought and a better understanding among business men; but for the creation of true fellowship and accomplishment of practical good give us a banquet every time. Mr. W. H. Thorne, president of the St. John, N.B., Iron and Hardware Association, understands that even metal merchants are fond of a good dinner, and recently entertained the members of the St. John trade to a banquet. Needless to say every one had a good time. The following gentlemen were present: W. H. Thorne, A. T. Thorne, Thomas McAvity, George McAvity, Wm. Kerr, John M. Robertson, W. A. Maclauchlan, John McIntyre, Geo. W. Ketchum, Geo. A. Horton, Z. R. Everett and J. S. Neill (Fredericton), George Boyd (Montreal), Samuel Hayward, W. S. Fisher, A. M. Rowan, W. L. Ham, W. J. Forbes, F. A. Young, Leonard Nase, E. A. Everett, James Pender, J. M. H. Robertson, John J. Barry, Miles E. Agar, T. C. Lee, George McDonald, E. B. Ketchum.

INSURANCE ITEMS.

Judge McDougall delivered judgment some days ago in the appeal of the Confederation Life Association against the assessment of $168,000 made by Toronto last year on the interest arising from the investments of its reserve fund. The judge dismissed the appeal, finding in favor of the city's contention upon all points.

John Wanamaker, of Philadelphia, according to his own story to a reporter, presented a few years ago a $1,000 policy, paid up for one year, to every insurable head of family in his employ. Many of the men who received them not only kept these policies, but added to them, and Mr. W. says, "in not a few cases these policies have been the means of saving worthy families from want."

What about the propriety of life insurance for men with small means or young men on salary? Can they afford it? They ought to afford it, and deny themselves something in order to do it. Most young men spend more for cigars during the year than the annual cost of a $2,500 policy in a good company. "If they must have the cigars," says a very shrewd American, "they might divide between cigars and life insurance, and carry at least a $1,000 policy. Every young man, before he is married, ought to try to get at least a $1,000 policy."

How fast and how far a fire will spread in a wooden town is illustrated in the Winnipeg *Free Press* account of the recent fire in Morden, Manitoba: "The fire started about 8 o'clock in the evening in the Wilson block and spread with fearful rapidity. The chemical engine was quickly got out, but the buildings being all frame structures the fire spread quickly * * all the buildings from Hansen's block to the Commercial hotel were doomed. The brick fire wall erected by Schultz & Hansen saved their block." The list of losses foots up $52,000, while the insurances are only $13,400, mostly in English companies.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Feb. 28th, compared with those of the previous week:

Clearings.	Feb. 28.	Feb. 21.
Montreal	$8,818,378	$ 9,489,391
Toronto	4,664,130	4,947,002
Halifax	963,539	967,686
Winnipeg	659,396	688,505
Hamilton	474,136	683,749
Total	$15,579,579	$16,776,333

Aggregate balances this week, $2,394,300; last week, $2,448,382.

The brief statement of its business for 1894 issued by the Manufacturers Life Insurance Company, contains some interesting figures, especially those contrasting the position of the company in 1889 and at the close of last year. The income, which, five years ago, was $157,354, has gone up to $306,715. The assets from $293,592 to $821,320. Insurance in force, which in 1889 amounted to $6,110,000, is now $9,283,000. And, whereas there was in 1889 no net surplus, that fund stands now at $50,469. These very creditable results have been achieved by strict economy, by the energy of agents and by the careful selection of risks. Mr. Ellis, the managing director, may in all fairness be congratulated on the exhibit.

—The Dominion Life Assurance Company has held its sixth annual meeting. Its report shows a gain in assurance in force of $264,000; in cash income of $8,000; in assets of $30,000; in surplus of $4,400 in 1894 as compared with 1893. It has been able to lay by $29,500 out of a total cash income of $51,894 towards reserve and surplus, which is an exceedingly successful showing. The report tells us that the amounts of insurance exclusive of bonus additions held in the three sections are $810,616 in the Abstainers' Section, $642,488 in the General Section, and $288,301 in the Women's. The losses since 1889 are $4,500 in Abstainers' Section, $4,000 in the General and $2,500 in the Women's. Most of the policies are on the Endowmentplan.

—While the investments of the company are maintained at about the figure of former years, and earnings of all kinds were as much in 1894 as in 1893, the management of the Ontario Loan and Savings Company recognize "the continuous reduction in the price of real estate of every description," and admit that "rates of interest procurable on desirable investments exhibit a continuous decline." They therefore distribute only six per cent. dividend, where for several years they paid seven, and add $4,000 to contingent fund, making it $14,000, while the Rest remains at $75,000, so that their reserved funds are nearly 30 per cent. of the capital. This company now has a larger proportion of its borrowed money in the shape of debentures.

—In writing the other day of the Halifax Banking Company, we stated that the bank had paid the usual dividend for 1894. It has done more. The dividend declared for the latter six months of the year was 3½ per cent

--The Molsons Bank declares a dividend of four per cent for the current half year

Meetings.

BRITISH AMERICA ASSURANCE CO.

The annual meeting of the shareholders of the British America Assurance Company was held in the company's office, Toronto, on Friday, 22nd February, 1895

The president, Mr. George A. Cox, occupied the chair. Among the shareholders present were Messrs. S. F. McKinnon, Robert Thompson, Robert Beaty ,J. K. Niven, John Hoskin, Q.C., Augustus Myers, E. G. Fitzgerald, H. M. Pellatt, J. J. Kenny, J. Stewart, John Scott, James M. Hamilton, P. Jackes, A. E. Ames, Dr. Daniel Clark, Dr. J. C. Warbrick, James O'Hara, J. K. Osborne, Robert Bond (Guelph), H. D. Gamble, W. H. Banks and H. O'Hara.

Mr. P. H. Sims, who was appointed to act as secretary, read the following

REPORT.

The directors have pleasure in submitting to the shareholders their report on the business of the company for the year ending 31st December, 1894.

From the accompanying statements of account it will be seen that the company has made satisfactory progress during the year. The total income amounted to $1,464,654, and the balance of income over expenditure was $97,690.84. Two half-yearly dividends at the rate of 7 per cent. per annum have been declared, the surplus or reserve fund has been increased to $517,424, and after making ample provision for a re-insurance reserve to run off all existing risks, the net surplus of the company has been increased by $12,264.

The directors have to regret to have to record the death of Mr. A. M. Smith, who had been a valued member of the board for the past two years. The vacancy thus caused has been filled by the election of the Hon. S. C. Wood as a director.

GEO. A. COX,
President.

FINANCIAL STATEMENT, BRITISH AMERICA ASSURANCE COMPANY, FOR THE YEAR ENDING DEC. 31ST, 1894.

J. J. KENNY,
Vice-President and Managing Director.
P. H. SIMS,
Secretary.

To the President and Directors of the British America Assurance Company:

GENTLEMEN,—We, the undersigned, having examined the securities and vouchers, and audited the books of the British America Assurance Company, Toronto, certify that we have found them correct, and the annexed balance sheet is a statement of the company's affairs to 31st December, 1894.

R. R. CATHRON,
R. F. WALTON, } Auditors.

Toronto, Ont., 18th February, 1895.

The president, in moving the adoption of the report, said:

I desire in the first place to say, on behalf of my fellow directors as well as for myself, that it affords us more than ordinary satisfaction to be able to meet the shareholders with a statement of the business of the company for the past year, and of its condition at the close of 1894, which I think we can say, without laying ourselves open to the charge of egotism, bears evidence of the realization of the expectations which we entertained when we assumed the responsibility of the direction of the affairs of the company at the close of the year 1892. At the annual meeting in the February following, when the shareholders ratified the changes which had been made in the directorate, we expressed our confidence in the future of the company—our belief that, notwithstanding the somewhat discouraging experience of some preceding years, the British America Assurance Company might be placed upon a footing such as its old-time standing among the financial institutions of this country, and as one of the oldest insurance companies on the continent, entitled it to occupy. I am free to confess that had we realized that at that time we were just entering upon a period of almost unprecedented financial stringency and business depression, bringing with it, as such conditions invariably do to fire insurance companies, an abnormal ratio of losses, we might have hesitated in assuming this responsibility.

Our task, however, has been rendered less difficult than we might have anticipated under these adverse circumstances; first, by the promptness with which shareholders accepted the $250,000 new stock, which at the outset we decided it would be well to strengthen the financial position of the company by issuing, and secondly, by the hearty manner in which our representatives, both in Canada and the United States, have seconded our efforts to place the business upon a satisfactory basis. To the support and co-operation we have thus received, and to the great advantage of having in our vice-president, who has fulfilled the duties of managing director, an able and experienced underwriter, I attribute mainly the progress we have made during 1894, and the profit we are able to show as the result of the transactions of a year which, generally speaking, has not been a favorable one in the business and financial world. We have, as the figures of our statement demonstrate, entered upon the present year stronger in every respect than we were a year ago, with a larger business on our books, an increased reserve fund, and after making provision for all losses which occurred up to the 31st of December and for the increased liability under unexpired policies, a gain in net surplus. I think we may also claim that by prompt settlement of losses and by affording our agents every possible facility for conducting business, we have placed the company upon a footing which will command for it a full share of the benefits which must accrue to fire insurance interests, in common with others, from a revival in trade and a return to more prosperous conditions throughout the country.

In relation to the business of the present year, it will be of interest to shareholders to know how we were affected by the two serious fires which occurred in this city last month, and I am pleased to be in a position to say that for disasters of such magnitude, involving together a loss of nearly one and a half million dollars, the net losses sustained by this company were moderate, being some $33,400 by both fires. These fires afforded a forcible illustration of the necessity of care on the part of companies in distributing their risks, even in the most substantially constructed sections of our cities, to avoid the chance of excessive loss in any one conflagration. They can scarcely have failed also to have had the effect of shaking the faith of the advocates of municipal insurance in the scheme having this object in view, which has been discussed in our city council during the past year. There have been many practical demonstrations on this continent of the necessity of such protection as is afforded by the capital and resources of fire insurance companies, deriving their income, in millions annually, from the extended, and in some cases world-wide, fields in which they have agencies established, and who are thus in a position to distribute the burden of fire losses, and particularly that of serious conflagrations, so widely as not to materially affect any community or any individual by the contributions in the shape of the premiums which they require to enable them to afford protection against loss by such disasters. That we in Canada are not unduly taxed in this respect may be seen by reference to the Dominion Government insurance reports. These show that while during the past twenty-five years some companies have made a fair profit, others have paid out more than they have received, and that on the entire business the companies reporting to the Insurance Department at Ottawa are realizing so small a margin of profit upon the premiums they are receiving in this country that they have to rely for their dividends to shareholders, as far as Canadian business is concerned, largely upon the interest on their investments.

I would not take up your time discussing this question were it not that I observe a bill is about to be introduced in our Local Legislature to authorize municipalities to undertake the insurance of property within their corporate limits. I may say that, in common with many of you, I am much more largely interested as a property owner than an insurance shareholder, and although I have little doubt as to the fate of the bill referred to, I feel it my duty to avail myself of this opportunity to point out some of the dangers which such an experiment would involve. It would, I feel confident, seriously affect the credit of any municipality which embarked in it, and depreciate the value of its bonds. The holders of debentures of such a city or town would be placed in the position of shareholders in an insurance company which had assumed a liability for loss by fire in one locality many times in excess of its available assets. In case of a serious conflagration, a city relying upon its own resources for insurance would present a spectacle which might well be compared to that of a man endeavoring to lift himself out of the mire by his boot-straps. Does anyone for a moment suppose that Chicago, Boston, St. John, New Brunswick, or St. Johns, Newfoundland, or in fact many of our Ontario towns which have suffered from severe fires, would have been rebuilt under any system of municipal insurance? It would, moreover, fail to afford such security as financial institutions which loan money upon mortgages require, and consequently it would involve the necessity of other insurance being procured by borrowers beyond that charged for by the municipality.

But I need not enlarge upon the many objections to which this proposed system of so-called insurance would be open. The single fact, that it would place any city undertaking it in daily danger of being rendered hopelessly bankrupt, must condemn it in the judgment of all who give the matter serious consideration. I feel, as I have said, interested in this question chiefly as a citizen and as a taxpayer, and my reason for touching upon it here is that, having constantly before us in our business the dangers of conflagration hazard, it seems fitting that a word of warning (even though the possibility of the consummation of this project may be remote) should be given to those who would impose upon us a liability which might involve such disastrous consequences to us, both as individuals and as a community.

The vice-president seconded the adoption of the report, which was carried, and a vote of

thanks passed to the president, vice-president and directors for their services during the past year.

The following gentlemen were elected to serve as directors for the ensuing year: Geo. A. Cox, S. F. McKinnon, H. M. Pellatt, J. J. Kenny, Thos. Long, R. Jaffray, Hon. S. C. Wood, John Hoskin, Q.C., LL.D., A. Myers.

At a meeting held subsequently Mr. Geo. A. Cox was elected president and Mr. J. J. Kenny vice-president.

QUEEN CITY FIRE INSURANCE COMPANY.

Report of the directors to the twenty-fourth ordinary general meeting, held at the offices of the company, Church street, Toronto, on Saturday, the 23rd of February, 1895.

REPORT.

The directors have much pleasure in submitting to the shareholders the Revenue account and Profit and Loss account for the past year, and the balance sheet, showing liabilities and assets on 31st Dec., 1894.

The number of policies in force at the close of the year was 2,584, covering at risk, after deducting reinsurance, the sum of $2,771,191.

By referring to the Profit and Loss account it will be seen that the total sum at the debit of this account on 31st December was $53,488.44, out of which has been appropriated the regular shareholders' dividend, equal to twenty-five per cent. of the original paid-up capital, leaving a balance at the credit of this account to cover reinsurance, reserve, etc., of $50,988.44.

In accordance with the Act of Incorporation, all the directors retire, and are eligible for re-election.

JAMES AUSTIN, President.
HUGH SCOTT, Vice-President.
THOS. WALMSLEY, Secretary.

REVENUE ACCOUNT FOR YEAR ENDING 31ST DECEMBER, 1894.

Ratio of surplus assets alone, over all liabilities, including re-insurance reserve, to amount of risks in force, 3.66 per cent.

A larger surplus ratio than any other purely stock fire insurance company transacting business in the Dominion.

AUDITOR'S REPORT.

I hereby certify that I have audited the books and examined the vouchers and securities of the company for the year ending 31st December, 1894, and find the same correct, carefully kept and properly set forth in the above statements.

HENRY WM. EDDIS, F.C.A., Auditor.

Toronto, Jan. 31st, 1895.

The President, in moving the adoption of the report, said:—

You will observe there is a slight falling off in the Revenue account, as compared with the previous year, owing mainly to the general depression of business and reduction of interest that has so universally prevailed during the past year. We have also had a larger number of fires than in any previous year, as we have paid fifty-seven fire claims, an average of over one a week; and we regret that of that number ten are attributable to incendiarism solely, a character of hazard no underwriting skill can foresee or estimate. In the face of such an experience, the balance, $11,152.29, carried forward to the debit of Profit and Loss should, I think, be considered very satisfactory.

In referring to the recent fires, and the greatest that ever afflicted this city, on the 6th and 10th of January last, I beg to draw your special attention to our Profit and Loss account. You will, by referring to it, see that, after providing for all liabilities, including reinsurance reserve, there still remains a credit balance of $36,240.86; and as this account has been wisely husbanded for the very purpose of meeting with impunity just such a conflagration contingency, I have much pleasure in informing you that this company's loss thereby will not reach 50 per cent. of this sum.

The vice-president seconded the adoption of the report, coupled with a resolution ordering the payment of a bonus dividend equal in amount to the regular ordinary dividend, which was adopted and carried.

The old board, viz., James Austin, James Scott, Hon. Justice Maclennan, Hugh Scott and Thomas Walmsley were unanimously re-elected, and at a subsequent meeting of the directors James Austin was elected president, and Hugh Scott vice-president.

MILLERS' AND MANUFACTURERS' INSURANCE COMPANY.

The general annual meeting of the Millers' and Manufacturers' Insurance Company (Stock and Mutual) was held at the company's offices, 32 Church street, Toronto, on Friday, 22nd February, 1895. The president, Mr. James Goldie, occupied the chair, the manager, Hugh Scott, acting as secretary.

REPORT.

Your directors beg to submit the tenth general statement of the business of the company, comprising revenue account and Profit and Loss account for the past year, and the balance sheet, showing the liabilities and assets on 31st December, 1894.

The total number of policies in force at the end of the year was 578, covering at risk, after deducting reinsurance, the sum of $1,389,579.

By referring to the Profit and Loss account, it will be seen that the sum at the debit of this account on 31st December was $74,487 72, and after deducting for reinsurance reserve, $11,373.76, and for claims adjusted (since paid), $4,553.46, the balance remaining to carry forward to the credit of this account was $58,560.50.

The retiring directors this year are Jas Goldie, W. H. Storey, Hugh Scott and A. Watts.

All of which is respectfully submitted.

JAS. GOLDIE, President.
HUGH SCOTT, Managing Director.

I hereby certify that I have audited the books and examined the vouchers and securities of the company for the year ending 31st December, 1894, and find the same correct, carefully kept, and properly set forth in the above statements

WM. A. WILSON, Auditor

Toronto, February, 1895

The chairman, in moving the adoption of the report, said :

The statement of the accounts of the past year, now before you, is one which I think may be considered highly satisfactory, and does not call for any lengthened explanations. There are, however, some features of our experience to which it is very gratifying to draw your special attention, namely, our loss and expense ratio, compared with the average loss and expense ratio of the whole fire business reported to the Dominion Government from 1886 to 1893, inclusive, covering the period of this company's operations.

We find from the report of the Superintendent of Insurance that the average loss ratio to cash premium income for the above period was 62.90 per cent., and, taking as a basis the expense ratio of 1893 only, as the previous years have not been tabulated with it, we find the average expense ratio to have been 31.20 per cent., together making 94.10 per cent. as the average loss and expense ratio combined, on a volume of premium income amounting to $46,512,825. Whereas our average loss ratio was 45.83 per cent., and expense ratio 25 22 per cent., together making 71.05 per cent as our average loss and expense ratio combined for the same period on a cash premium income of $210,918, making a difference in favor of this company of 23.05 per cent., which I think must be considered as eminently satisfactory, more particularly when you take into consideration the exclusive character of our business, mills and factories, which are designated as " Special Risks."

We could not include in the foregoing comparative averages the past year's business, as the Government returns for 1894 have not yet been published. We have, however, this company's results, which were a loss and expense ratio combined of only 55.00 per cent. of the net cash premium income of 1894.

I may add that a very much larger volume of business could have been placed on the books of the company had the business offered come up to the standard we have adopted—below which we will not write on any hazard - and will not remain on any risk where there is apparent indifference to care, order and cleanliness.

The report was adopted, and at a subsequent meeting of the directors James Goldie was re-elected president, and J. L. Spink, vice-president.

LANDED BANKING AND LOAN COMPANY.

The eighteenth general annual meeting of the shareholders of the Landed Banking and Loan Company was held in the company's office, Hamilton, on Feb. 19th, at noon.

The following shareholders were present : George H. Bull, W. A. Robinson, Matthew Leggat, E. B. O'Reilly, M.D., Wm. Marshall, Alex. Main, Samuel Barker, J. J. Mason, John Proctor, Rev. George Forneret, Thos. Bain, M.P., James C. McKeand, Walter R. Macdonald, Alex. Turner, W. F. Findlay, J. D. Wilson, R. A. E. Kennedy, James Angus, A. H. Moore, Henry McLaren, Edward Martin, Q.C.

On motion, the president, Mr. Matthew Leggat, acted as chairman, and the treasurer, Mr. C. W. Cartwright, acted as secretary.

The secretary read the notice convening the meeting, also minutes of meeting held the previous year, which were confirmed.

The annual report of the board of directors, of which the following is a copy, was then presented :

REPORT.

The directors take pleasure in submitting to the shareholders the eighteenth annual report of the company's affairs, together with the profit and loss account and balance sheet for the year ending December 31, 1894, duly audited.

The net profits for the year, after deducting all charges, amount to..	$50,672 86
Added to which is the balance carried forward from last year.....	979 40
	$51,652 26

Which amount has been appropriated as follows, viz.:—

Two half-yearly dividends at the rate of six per cent. per annum, amounting, with the income tax, to	$41,341 98
Added to Reserve fund....	10,000 00
Carried forward to next year	310 28
	$51,652 26

The Reserve fund, including what is added this year, amounts to one hundred and fifty-five thousand dollars ($155,000), equivalent to about twenty-two and three-quarters per cent. on the capital paid up.

The gross assets of the company show an increase over preceding year of $16,820.26, and now amount to $1,930,353.10.

The debentures issued by the company, both currency and sterling, indicate a gain over former year, aggregating $26,818.84, which is gratifying, and is evidence that the investing public in Canada and the United Kingdom have increasing confidence in the security furnished by the company. In this connection your directors are pleased to be able to say that sterling and currency debentures to a large amount fell due last year, the main part of which were renewed and at lower rates of interest.

The interest due by borrowers has been satisfactorily met

Last year $8,000 was carried to a contingent fund. This was intended to provide for a probable loss arising out of litigation then pending and as explained at last annual meeting. The claim and all expenses have been settled for within the amount set aside, and the balance has been included in the earnings of the present year.

Your directors have pleasure in bearing testimony to the valuable services rendered the company by their agents in Scotland, Messrs. McAndrew, Wright & Murray, W.S., 9 Albyn place, Edinburgh.

The officers of the company continue to perform their several duties to the satisfaction of the directors.

All of which is respectfully submitted.

MATTHEW LEGGAT,
President.

Hamilton, February 9, 1895.

C. W. CARTWRIGHT,
Treasurer.

We, the undersigned, have audited the books of the Landed Banking and Loan Company for the year ending December 31, 1894, and certify that the foregoing statements are in conformity therewith.

We have also examined the securities held by the company, and found them correctly set forth in the securities book. The expenditures have been duly vouched for.

W. F. FINDLAY, F.C.A.,
W. MARSHALL, } Auditors.

Hamilton, February 9, 1895.

The adoption of the report was moved by Mr. Matthew Leggat, seconded by Mr. Thomas Bain, M.P., and was carried unanimously

ELECTION OF DIRECTORS.

On motion the following were re-elected directors for the ensuing year: Mr. Samuel Barker, Mr. Thomas Bain, M P., Mr. R. AE. Kennedy, Mr. M. Leggat, Mr. Henry McLaren, Mr. J. J. Mason and Mr. John Waldie.

Messrs. W. F. Findlay, F.C.A., and William Marshall were re-appointed auditors for the ensuing year.

The usual vote of thanks to the auditors, directors, treasurer and staff having been passed, the meeting adjourned.

At a subsequent meeting of the directors, Mr. Matthew Leggat was re-elected president, and Mr. John Waldie vice-preeident.

ONTARIO LOAN AND SAVINGS COMPANY.

The twenty-second annual meeting of this company was held at the office of the company, Oshawa. Ont., on Wednesday, February 20th, 1895. The following shareholders were present Messrs. W. F. Cowan, W. F. Allen, R. S. Hamlin, John Cowan, J. A. Gibson, T. H. McMillan, W. Readwin, John Carter and Rev. S. H. Eastman.

The president occupied the chair, and Mr. T. H. McMillan acted as secretary to the meeting. The minutes of the previous annual meeting were read and confirmed.

The chairman then read the annual report of the affairs of the company for the past year, as follows:—

REPORT.

Your directors have much pleasure in submitting their twenty-second annual report, which they hope will meet with approval of the shareholders.

Owing to the continuous reduction in the value of real estate of every description, it has been found imperative to use unusual caution in the acceptance of loans, yet despite this circumstance a satisfactory outlet has been found for investments to nearly the average amount of former years.

Interest accruing on mortgages and repayments of principal moneys on same account have been met with unexpected promptness, when it is considered that the great majority of our borrowers belong to the agricultural class, whose incomes have been seriously curtailed by the unprecedented reduction in the market value of their products.

This feature of the business is naturally very gratifying to your directors, indicating as it does that the investments of the company are of high average character as regards security.

Although rates of interest procurable on desirable investments exhibit a continuous decline, the revenue earned by the company has slightly exceeded that of the previous year.

The usual dividend of six per cent. per annum has been paid, and the available surplus, amounting to $4,000, has been transferred to the contingent account.

This account, formed for the protection of the Rest, has now reached the sum of $14,000, being nearly equivalent to twenty per cent. of the Rest account, which stands as before at $75,000.

All of which is respectfully submitted.

W. F. COWAN,
President.

T. H. MCMILLAN,
Secretary-Treas.

AUDITORS' REPORT.

We hereby certify that the above statement contains a correct representation of the affairs of the company as shown by the books, December 31st, 1894. We have examined vouchers and securities and find the same correct.

G. H. GRIERSON,
J. P. OWENS, } Auditors.

Oshawa, Feb. 18th, 1895.

Mr. Allen seconded the adoption of the report, which was carried.

Mr. Hamlin, seconded by Mr. Gibson, moved that the sum of $150 be paid to the auditors, Messrs. Grierson and Owens, for their services for the past year, and that they be appointed auditors for the coming year. Carried.

Mr Carter, seconded by Rev S H Eastman, moved that a vote of thanks be and is hereby tendered to the president, vice-president, directors and secretary-treasurer for the very satisfactory manner in which they have conducted the affairs of the company during the past year, and that the sum of $300 be presented to the president, and $200 to the vice-president for their services to the company. Carried.

Mr. Hamlin, seconded by Mr. Allen, moved that this meeting do now proceed to elect, by ballot, seven directors to fill the place of those retiring, and that Messrs. John Carter and Wm Readwin be appointed scrutineers for said election, and that the poll remain open for one hour for the purpose of receiving the vote of the shareholders; but that should five minutes elapse at any time without a vote having been taken, the poll shall be closed; and that the said scrutineers be paid the sum of $2 each for their services. Carried.

Chair resumed, the scrutineers reported the following seven gentlemen who were duly declared elected directors for the ensuing year: W. F. Cowan, R. S. Hamlin, W. F. Allen, Wm. Brien, J. A. Gibson, Jno. Cowan, Thomas Paterson.

A vote of thanks was tendered to the chairman, and the meeting adjourned.

At a subsequent meeting of the directors, Mr. W. F. Cowan was unanimously elected president and Mr. W. F. Allen, vice-president.

Debentures for Sale

CORPORATION OF OTTAWA

Tenders addressed to the undersigned marked "Tender for Debentures," will be received at the office of the City Clerk until 4 p.m. of Thursday, the 14th day of March, 1895, for the purchase of $301,733.33 of the debentures of this Corporation.

These debentures are payable at the end of 20 years, and bear interest at the rate of 4 per cent. payable half yearly, and will be made payable in sterling money in London, England, or in currency payable at Quebec Bank, Ottawa, tender to state which preferred.

The highest or any tender not necessarily accepted, and delivery to be made from the Quebec Bank here.

Further particulars can be had from the City Treasurer, Ottawa.

JOHN HENDERSON, City Clerk.

Ottawa, 23rd Feb'y, 1895.

VALUABLE
Leasehold Coal Dock

IN THE CITY OF TORONTO,

— CANADA. —

For Sale by Tender.

Tenders will be received by the undersigned up to 3 p.m. of the 15th DAY OF MARCH, 1895, addressed to "E. R. C. Clarkson, 26 Wellington street east, Toronto," sealed and marked on the outside, "Tenders for Dock Property."

The property to be tendered for consists of the coal dock property, with plant and equipment, situate on the south side of the Esplanade, Toronto, at the foot of Church street, held under lease, from the Boulton Estate, expiring 1st August, 1896, with a right of renewal at a rental to be fixed by arbitration. The present rental is $2,035 per annum. The property has a frontage of about 213 feet on the Esplanade by a depth on the east side of 513 feet, and on the west side of 496 feet. On it are erected large, substantial and modern coal sheds, one of which is 20 feet by 100 feet; two Hunt elevators, elevated track, shed pocket, weigh scales, and boiler, and 40 horse-power engine. Fine offices and modern equipment throughout.

The property is centrally situated, and is considered the most perfect coal dock in Canada.

The property cost in 1888, $75,000, and there has been spent upon it since in permanent improvements $20,101.

The plant is in excellent order.

Terms of Sale:—Twenty-five per cent. down, and sufficient with that amount to make one-half within thirty days thereafter, and the balance at the expiration of one or two years at the option of the purchaser. All unpaid purchase money to bear interest at six per cent. per annum from the date of mailing of notification of acceptance of tender.

Full information, including conditions of sale, as approved by the Official Referee, can be obtained at the office of Messrs. Mulock, Miller, Crowther & Montgomery, 99 King street east, Toronto, Solicitors for Estate, or to

E. R. C. CLARKSON,

Liquidator of above estate.

MONTREAL MARKETS.

MONTREAL, Feb. 27th, 1895.

ASHES.—A little American enquiry is reported since last writing, but the present movement is a very light one. Very little stock is coming forward, however, and prices are pretty steady. We quote $4 to 4.05 for first quality pots, and hear of $4.07½ being paid in one case; seconds, $3.70; pearls may be quoted at $6 to 6.10, with next to nothing doing in them.

DAIRY PRODUCTS.—Cheese is particularly dull, and there is no export movement at all at the moment. Prices range about 8¾ to 9c. per lb. for summer makes, and 9½ to 9½c. for fall make. In butter there is a fair consumptive demand for good creamery and dairy, but apart from this there is no movement; we quote creamery 20 to 21c.; Townships dairy, 16 to 18c. per lb. Western is offering freely at 11 and 12c. without finding many buyers. Eggs are in good request, with good stock scarce; limed sold to-day up to 20c., strictly fresh 28 to 30c. per dozen.

DRY GOODS.—Most of the travellers are through with the first spring trip, and some have already started out for sorting business,

Granby Rubbers and Overshoes

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, of every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

though it is hard to see how spring stocks can be much broken into as yet in the country, considering the weather. City retail trade is described as rather picking up. A couple of the wholesale millinery houses had their spring openings this week, which were fairly attended, but next week will probably see more of a rush in this line. Several dry goods buyers from the North-West and British Columbia are in town, but have made only moderate selections, and do not speak very hopefully of the trade outlook in their respective sections. We do not hear of any changes in prices, but the possibility of some advance in domestic woolens is being canvassed, and mill men are showing some caution in the making of contracts for future delivery at old prices.

Fish.—There is a very fair demand for both pickled and fresh fish at the moment, but the quantity of the former now handled is quite moderate as compared with previous years. Perhaps this arises from a modification of the Lenten meat restrictions as compared with former times. Green cod is scarce, and is held at very firm prices; herrings are also rather firmer. We quote: No 1 green cod, $4 50 to $5 00; No 1 large, $6 00; large draft, $7 50; dry cod, $4 25 to 4 50; herrings, $4 00 to 5 50, according to brand; N S salmon, $13 for No 1; B C ditto, $10 50 to 11 50; sea trout, $9 to 10; fresh herring, 70c. to $1 per hundred; cod and haddock, 3 to 4c.; finnan haddies, 6 to 7c. per pound.

Furs.—The offerings of raw furs are quite small, and there is nothing fresh to note in the way of prices. We quote for strictly prime skins: Beaver, $3 25 to $4; black bear, $15 to $25; cub do., $5 to $10; red fox, $1 25 to 1.50; muskrat, 7 to 10c.; lynx, $1.50 to 2.50; marten, $1.25 to 1.75; mink, $1 to 1.50; skunk, 50c. to $1.25; otter, $8 to $12; fisher, $5 to $7

Groceries.—Some heavy drifting winds experienced since last writing have kept filling up the country roads in a good many sections, and travellers' letters still speak of impeded traffic with interior points, and the consequent bad effect upon business. In prices there is nothing specially new. Several representatives of Japan tea houses have been in this city within the last few days, but as to the amount of encouragement they have received in the way of orders for new crop teas, it is hard to speak. Enquiries from New York are reported for low grade Japans, also from Western points, but no important transactions have developed lately. London reports a strong market for blacks. Sugars are without noticeable variation. The regular refinery price for standard granulated is 3½c.; round lots would be shaded an eighth, but there are not many of these moving; yellows range from 2⅞c. up. Sales of some 400 to 500 pkgs. of molasses are reported from first hands during the past week at 32½c. for choice Barbadoes; inferior ditto, 28½c., and Porto Rico in barrels at 28c.; the usual jobbing advance must be added for country orders. Coffees are quiet, but steady; we quote Rio 19 to 21c., Maracaibo 20 to 22c., Java 24 to 28c., Mocha 26 to 30c.

Hides and Tallow.—The market is quieter this week, and receipts quite light, butchers having not done much slaughtering, owing to Wednesday opening the Lenten season. Dealers are still buying No. 1 light hides at 5c. per lb. and heavies at 5½c.; calfskins are rather more plentiful and bring 5c. the pound; lambskins 65c. each, with very few now offering. Tallow remains quiet at 5 to 5½c. per pound.

Leather.—We can report hardly as much doing in this line as a week ago. Orders have been placed by two manufacturing shoe houses for some 5,000 to 6,000 sides of grain and upper leather, for future delivery, at some advance on last year's figures, but the trade is not buying very liberally for present use. Prices hold the firmness lately noted, and Quebec splits are now held at 13c. We quote:—Spanish sole B.A. No. 1, 18 to 20c; do No 2 to B A, 17 to 18c; No 1 ordinary Spanish, 17 to 18c; No 2, 16 to 17c; No 1 slaughter, 19 to 21c. No. 2 do., 17 to 18c.; common, 15 to 16c.; American oaksole, 39 to 43c; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; western splits, 15 to 16c.; Quebec do. 13c.; juniors, 11 to 13c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c; russet sheepskin linings, 30 to 40c; harness, 18 to 23c; buffed cow, 10 to 12c; extra heavy buff, 12½c; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

Metals and Hardware.—No improved movement can be noted, and quite a little shading would be done in most lines of goods, in order to effect business. Foundries, and other consumers of pig iron and heavy metals, are running in a very moderate way, and in general hardware orders are reported quite light. Wholesale men are placing very few import orders for spring, and are evidently waiting developments. We quote:—Coltness pig iron, none here; Calder, No 1, none

STEAM BOILER & PLATE GLASS INSURANCE CO.
OF CANADA
Haed Office, - - - LONDON, Ontario.

THE unexpected generally happens. Have your boiler inspected and insured; it pays to know that you are right. Don't trust to luck. Will your boiler stand the pressure at its weakest point? Can you judge it?

INSPECTION makes you safe; insurance indemnifies you against loss. Have a competent inspector determine what pressure is safe, and the benefit of his advice and inspection.

I.X., $4.75 to 5.00; Coke I.C., $2.65 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c. tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25, shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards

Oils, Paints and Glass.—Business in these lines at the moment is only moderate. Linseed oil is reported easier in Britain, owing to an improved demand for oil cake, which has induced crushers to operate more freely, and though local stocks are not large, local quotations are easier at 56 and 59c. per gal. for raw and boiled respectively in small lots. Turpentine rules very firm at recent advance. There is not much cod oil available, and from 36 to 37½c. per gal. is asked for wholesale lots, with jobbing lots at 39 to 40c. Seal oil is in little request. Quite a number of steamers will go to the ice from Newfoundland in a week or two, despite the commercial crisis there. Paris green is in demand, and the prices quoted are 12½ to 13c. per lb. in bulk, and 14 to 14½c. in small packages. We quote:— Turpentine, 47c. per gallon for single barrels; two to four barrels, 45 to 46c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6¼; tins, 6½c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2, $4 to 4.25; No. 3, $3.75 to 4; dry white lead, 4½ to 4¾c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80. These prices are shaded 5c. for 50-box lots.

Wool.—A wool salesman who has been a good deal among the mills during the past fortnight reports that manufacturers are not at all heavily stocked, and that there is more of a disposition to buy. Sales of some fair blacks have been made at steady prices, and local stocks are now low down. Cape wools are also reported scarce in New York. Two cargoes are now on the way for local importers, and will be unloaded at Boston and New York. We quote Cape 13½ to 16c.; a little Australian, not of very good quality, is available at 15c.; B. A. scoured, 25 to 32c.; British Columbia, 10c.; domestic fleece is higher at 20 to 22c.; pulled domestic wools are scarce, and firmer. The next series of London sales begins on the 5th of March. Australian wools are reported to have firmed up a good deal since the close of the last sales.

ÆTNA

Life Insurance Company

Of HARTFORD, Conn.

Cash Capital, all paid-up, $1,250,000 00
Accumulated Assets, $40,267,952 90
Deposit at Ottawa, $3,541,617 00

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

. . . . W. H. ORR & SONS, Managers,
Cor. Toronto & Court Sts.

STEAM'S NOT IN IT

Either as to cost or efficiency, with one of our celebrated **ELECTRIC MOTORS.**

See the one that runs the Monetary Times big presses and freight elevator. Not the slightest jar and almost noiseless.

Write and we will call and see you.

TORONTO MARKETS.

TORONTO, Feb. 28th, 1895.

GRAIN.—Wheat is firm. Ontario red and white wheat is quoted 1c. per bush. higher; deliveries are rather light, and reports come in from many districts of bad roads and poor prospects of immediate improvement. Manitoba wheat continues unchanged. Oats are firm, with a good demand from the eastern provinces, while large shipments are going north to the lumber camps. Quotations are 1c. per bush. higher than they were a week ago. Stocks of oats throughout the country are thought to be rather large, but all will be needed before the season is over. Barley is firm and higher at an advance of 1 to 2c. per bush. The movement is principally to the United States in 5 and 10 car lots, but a fairly good local trade is also doing. Peas are up 2c. per bush., and firm at the advance. They are moving almost exclusively by way of export. Rye and corn remain nominal and unchanged.

THE VISIBLE SUPPLY.

	Feb. 23, '95. Bush.	Feb. 24, '94. Bush.
Wheat	79,476,000	77,258,000
Corn	12,969,000	1,817,000
Oats	6,772,000	282,000
Barley	1,522,000	1,216,000
Rye	340,000	541,000

The stocks of grain in store at Port Arthur on Feb. 16th were 685,055 bushels. During the week there were received 39,905 bushels, and shipped nil, leaving in store on Feb. 23rd, 724,960 bushels.

GROCERIES.—The week has been rather uneventful. The position of currants continues very strong and an advance of ¼c. per lb. on the different grades of Filiatras and Patras has taken place this week. Local stocks are very scarce, while the foreign market is reported strong Sugars are easy. There is not that demand from the retail trade that characterized the market at the opening of the new year; and as we have previously said, there is nothing in the condition of things which should warrant heavy purchases or speculation. The tea market holds strong and the general feeling is a good one. Low and medium grades are in demand, and there is every prospect of an advance of 2 or 2½c. a lb. in the near future.

HARDWARE AND METALS.—Trade is undoubtedly better this week than it has been during the last fortnight. The wholesale houses have felt very severely the effect of bad roads, and as the country highways improve it is but natural to look for increased business. Some good assorting orders for general shelf hardware and tinware are being received. The demand for spring supplies, such as milk cans, creamery cans, sap buckets, sap spiles, spades and shovels is active. Rope also continues in good request. Cut nails and chain are not moving freely, and the same may be said of other lines of heavy hardware. Orders for wire screens, screen doors and green wire cloth, to be shipped in March and April, are good, and denote an active spring trade in these lines Plain fence wire for spring shipment continues in good demand. Trade in barb wire is not so active as dealers had expected or as might be reasonably expected. For galvanized iron and tin plate import orders are coming in well, although shipments from stock are at present very light. There have been few important changes in value since our last report. Sisal rope has been reduced to a 6⅞c. basis, manilla remaining unchanged. Binder twine values remain as yet a matter of surmise.

HIDES AND SKINS.—No change in the Toronto hide market has taken place this week. Tanners continue to complain that they are getting the worst of the market, and the situation is well expressed by Mr. J. L. Breithaupt in his report as chairman to the board of the tanners' section of the Toronto Board of Trade: "Of the hide market, it may be said that, although prices ruled somewhat low up to about July, they began to advance in August; the prices since then have been stoutly maintained, and, in fact, largely increased, closing in December with meagre offerings, a strong and excited market, and with values away beyond the proportionate price of leather. The advance on hides from the midsummer prices was from 30 to 50 per cent., whereas leather has barely advanced more than an average of 5 per cent. This, from the tanners' standpoint, desperate state of affairs, was one of the causes of the formation of the tanners' branch, giving them more frequent opportunity to meet together to discuss, and, as far as possible, remedy this unfortunate condition, by intelligent and concerted action in the buying of raw material and disposing of the finished product. How soon the desired ends may be accomplished remains to be seen." Sheepskins are offering rather freely on the local market; quotations continue unchanged, and, in the Montreal opinion, are very high. Large sales of choice cake tallow took place this week at 5½c., which quotation cannot admit of much profit to the merchant.

PROVISIONS.—We have found but little, if any, improvement in the provision trade. Butter continues depressed and inactive, and dullness characterises most Canadian markets. Rolls are selling at 13 to 14c. Holders have been under pressure to sell tubs this week, and are offering medium at 8 to 10c., and fine at 12 to 13c. per lb. Prices of hog products remain as previously quoted; dressed hogs are rather firmer at $5.35 to 5.40 per cwt., while receipts are limited. Strictly new laid eggs are worth 22c., other descriptions remaining unchanged. Dried apples are in fair request, while in evaporated the export market having weakened, but little trading is being done.

WOOL.—Present business in fleece is almost nil; the market is pretty well cleaned up and before the arrival of the new clip in May, will probably be entirely bare. Nothing new has taken place in the pulled wool market; stock is well sold up and quotations remain unchanged.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

HOME SAVINGS AND LOAN COMPANY, LIMITED.

The sixteenth annual general meeting of the shareholders of this company was held in the company's office, No. 78 Church street, Toronto, on Thursday, February 21st, 1895, at 3 o'clock p.m.

The president, Hon. Sir Frank Smith, occupied the chair; the manager, Mr. James Mason, acted as secretary.

The secretary read the notice calling the meeting. The minutes of the last annual general meeting, held 15th February, 1894, were, upon motion to that effect, taken as read, and were confirmed.

The secretary then read the annual report and financial statement, as under:

REPORT.

The directors beg to submit the sixteenth annual report, with accompanying financial statements, showing the result of the company's business for the year, ended 31st December, 1894, and its position on that day.

The year just closed has been remarkable for the abundance of money, both private as well as public funds, seeking safe employment, being largely in excess of the good investments offering. The consequence of this was a very considerable reduction in the rates of interest obtainable, and greater difficulty in placing money.

After paying and providing for two half-yearly dividends, at the rate of seven per cent. per annum, and paying all expenses, including salaries, printing, advertising, auditors' fees, and all commissions on loans, and providing for directors' compensation, there remained a net profit of $8,676.27. To this is to be added $1,002.43, balance Profit and Loss account, and $6,250, premiums received on new issue of stock, making in all $15,928.70. Of this sum $10,000 is added to the reserve fund, $5,000 added to the contingent account, and the balance, $928.70, placed at the credit of profit and loss account.

The reserve fund has now reached the sum of $185,000, and there stands at credit of the contingent account $8,000.

During the year the mortgage loans fell off $36,535; loans on collaterals increased $126,-799.97, and deposits increased $100,160.26.

The further issue and allotment of two thousand five hundred shares of the capital stock of the company, for which authority was given at the last annual meeting, was made during the year, and all taken up, and the first call of 10 per cent. paid in. The subscribed capital is now $2,000,000.

In common with the banks and loan companies generally, a reduction in the rate of interest paid for deposits has been made, taking effect from January 1st, 1895—the rate paid by the company from that date being 3½ per cent., instead of 4 per cent., as formerly.

All of which is respectfully submitted.

FRANK SMITH,
President.

Toronto, February 11th, 1895.

JAMES MASON,
Manager.

To the President and Directors of The Home Savings and Loan Company, Limited:

We hereby certify that we have carefully examined the books, receipts and vouchers of The Home Savings and Loan Company, Limited, for the year ending 31st December, 1894, also the securities and cash on hand, and found the same correct and in accordance with the above statements.

J. M. SULLIVAN, } Auditors.
J. G. HALL, }

Toronto, 11th February, 1895.

The adoption of the report and financial statement was moved by the president and seconded by the vice-president, Mr. Eugene O'Keefe, and carried.

It was then moved by Mr. Hugh Ryan, seconded by Mr. Jas. Gunn, and caried, "That the thanks of the shareholders be and are hereby tendered to the president, vice-president and directors, for their careful attention to the affairs of the company during the past year."

Moved by Mr. M. O'Connor, seconded by Mr. Edward Stock, "That the thanks of the shareholders are due and are hereby given to the manager and other officers of the company for the efficient manner in which they performed their respective duties during the past year," which was also carried.

On motion of Mr. J. J. Foy, Q.C., seconded by Mr. W. T. Kiely, Messrs. John Sullivan and John G. Hall were appointed the auditors of the company for the ensuing year; to be paid the sum of $750 for their servics.

Moved by Mr. John Foy, seconded by Mr. E. O'Keefe, "That the poll be now open for the election of directors, and that the same be closed whenever five minutes shall have elapsed without a vote having been tendered; and that Messrs. R. B. Street and A. Foy be the scrutineers to take the vote, and that they report the result to this meeting." Carried.

The election was then proceeded with, the result of the ballot being the unanimous re-election of all the retiring directors as follows: Hon. Frank Smith, and Messrs. Eugene O'Keefe, Wm. T. Kiely, John Foy and Edward Stock.

A motion made by Mr. W. T. Kiely and seconded by Mr. James Gunn, having been carried, that the president leave the chair, and that Mr. Hugh Ryan take it,

The following resolution, moved by Mr. Hugh Ryan and seconded by Mr. Matthew O'Connor, was unanimously adopted:

"The shareholders take this opportunity to tender to their president, Sir Frank Smith, their sincere and hearty congratulations on the honor bestowed upon him since their last meeting by Her Most Gracious Majesty the Queen, when he was raised to the dignity of knighthood; and it is the earnest wish and hope of the shareholders that he may be long spared to enjoy the distinguished and well deserved honor thus conferred upon him—a wish they feel sure is shared by his fellow-citizens of Toronto, and his many friends throughout the Dominion."

The meeting then adjourned.

At a meeting of the new board, held immediately after the close of the above, the Hon. Sir Frank Smith was re-elected president, and Mr. Eugene O'Keefe re-elected vice-president of the company.

DOMINION LIFE ASSURANCE COMPANY.

The sixth annual meeting of the shareholders of the Dominion Life Assurance Company was held in the company's head office, Waterloo, Ont., on Friday, Feb. 15th, 1895. The president, James Innes, M.P., was in the chair, and shareholders representing over 1,500 shares of the stock were present.

The report submitted exhibited the following items:

	1893.	1894.	Increase per ct.
Cash income	$ 43,864 07	$ 51,894 29	18
Insurance in force	1,477,937 00	1,742 845 00	18
Assets	139,483 32	169,041 52	21
Liabilities	134,817 81	159,859 55	18
Surplus over all Liabilities	4,665 51	9,181 97	94

To lay by toward reserve and surplus the large proportion of $29,558.20, out of a total cash income of $51,894.29, or 57 per cent., speaks exceedingly well for the management, and is equalled by no other Canadian company, and probably excelled by none elsewhere. The character of our investments may be indicated by the fact that at the close of the year only $192 of interest was overdue.

The company's losses by death in 1894 were only two policies for $3,000, being a mortality ratio of less than two per thousand, a loss ratio unequalled hitherto by a company in its sixth year.

The amounts of insurance exclusive of bonus additions held in the three sections are $810,-616 in the Abstainers' Section, $642,488 in the General, and $288,301 in the Women's, and the losses from the beginning in 1889, are $4,500 in Abstainers' Section, $4,000 in the General and $2,500 in the Women's.

The insurances are $1,355,105 as Endowment policies, $218,300 as Limited Pay Life, and $188,000 as Straight Life policies. The average amount on each life issued is $1,343, and the average premium per $1,000 at risk is $28.20.

In moving the adoption of the reports, the president adverted to the financial depression which had made it difficult to secure a large increase of business and had slightly increased the lapse ratio, but congratulated the shareholders and policy-holders as well upon the healthy state of our finances, which was seen in the doubling of the surplus, thus enabling the directors to declare a moderate dividend to the shareholders and to continue the handsome dividends to policy-holders begun last year. After brief remarks expressing their satisfaction with the reports had been made by Messrs. McMullen, M.P., and Cargill, M.P., and others, the reports were unanimously adopted, and the election of directors was proceeded with, resulting in the unanimous re-election of the former board.

Hearty votes of thanks were tendered to the agents, officers of the company and the president, and responded to in suitable terms, all expressing the honest conviction that the Dominion Life is unsurpassed and unsurpassable judged by the standard of doing the most for the policy-holder in proportion to the money he pays in. The meeting then adjourned, and the board met and re-elected James Innes, M.P., president, and Chr. Kumpf, Esq., vice-president.

The following constitute the board of directors: James Innes, M.P., Guelph, president; Chr. Kumpf, ex-mayor, Waterloo, vice-president; Thomas Hilliard, Waterloo, managing director; P. H. Sims, secretary British America Fire Insurance Co, Toronto; Hon. S. Merner, senator, New Hamburg; Walter Wells, L.D.S., Waterloo; W. T. Parke, M.D., Listowel; Wm. Snider, miller, Waterloo; W. Vandusen, banker, Tara; John Shuh, president Wool Manufacturing Co., Waterloo; Simon Snyder, druggist, Waterloo; Henry Cargill, M.P., Cargill; Jacob Conrad, hardware merchant, Waterloo; Thos. Gowdy, ex-mayor, Guelph; J P. Hughes, inspector Ætna Fire Insurance Co., Waterloo; James McMullen, M.P., Mount Forest; Geo. D. Forbes, manufacturer, Hespeler.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co.
of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.

DECISIONS IN COMMERCIAL LAW.

IN RE THE ONTARIO EXPRESS AND TRANSPORTATION CO.—An Act of Parliament reciting that a company had been "duly organized," had ceased its operations, and had been "reorganized," and declaring that the charter is in force, and the company "as now organized," capable of doing business, does not give legislative sanction to an illegal increase of the capital stock so as to make holders of the shares of illegally issued stock liable as contributories in the winding-up proceedings, according to the Court of Appeal.

THE BRIDGEWATER CHEESE FACTORY CO. v. MURPHY.—One S., president of the plaintiff's company, kept an account with the defendants, headed in their books, "S., president of Bridge water Cheese Factory," and upon which he drew cheques from time to time signed "S., President." This account being overdrawn S. made a note for $1,600 in favor of the defendants signed "S., President," and to which he attached the seal of the company. The defendants discounted this, placing the proceeds to the credit of the account. This covered the overdraft, and the balance was chequed out by S. to pay various creditors of the plaintiff's company. At this time S. was a defaulter of the company in an amount exceeding $1,600, and before this action he absconded. The note was made without the authority or knowledge of the directors of the company, by whom under their by-laws the affairs of the company were to be managed, but they knew that the bank account was kept by S. in his own name as president, and that he issued cheques upon it as aforesaid. The note not being paid at maturity, was charged by the defendants to said account, with the consent of S., though without any authority from the directors. The present action was brought to recover from the defendants the amount of the note, on the ground that S. had no power to bind the company by such a note. The defendants did not allege any fraud, but said they had accounted to the plaintiffs for all moneys that had come into their hands. It appeared that the defendants had discounted the note in good faith, believing it was for the company's purposes, and authorized by the company, and so believed until long after they had charged it up to the plaintiff's account. Held by Street, J., that the plaintiffs were entitled to judgment. The defendants knew that the account to which the note was charged was a trust account, the moneys to the credit of which belonged to the plaintiffs and not to S., and the note; as a matter of law, was not the note of the plaintiffs, but the individual note of S. The defendants could not, without assenting to a breach of trust on the part of S., permit him to pay his private debt to them out of trust funds, which they knew to be such.

AN INSOLVENT ESTATE.

Mr. S. A. D. Bertram, official assignee, Winnipeg, sends us a statement of the affairs of the firm of McInnis & Irwin, storekeepers at Strathclair, Manitoba. For a while the store was kept open by creditors, and $682 realized from goods sold. The remainder of stock, put down at $4,307, was sold for cash at 55 cents in the dollar, and realized $2,342; the building brought $360 and the $3,880 of book debts (at 12½ cents in the dollar, alas!) $485. Ten thousand dollars was the total realized.

Now to turn to the other side of the account. It is plain that the experiment made by creditors of keeping the store open and replenishing the stock was unfortunate and the result unsatisfactory. We find an entry of expenditure thus: "Cash paid wages running store and other expenses during time creditors ran business from 1892," $1,548.72; and others of cash paid for new goods, $3,802; cash paid insurance, taxes, etc., from 1892 till date, $307. There was $3,348 paid creditors, equal to 46½ cents in the dollar on liabilities of $7,260.

There are twenty-seven creditors of the estate on the list, three in Toronto, one each in Montreal, Berlin, Woodstock, Windsor and Birtle, the remainder in Winnipeg. A separate payment of 5 per cent. dividend only was made to two other firms whose claims amounted to $2,694. We are not told why this difference was made; possibly they were found not to be legally entitled or something of the kind.

—Pittsburg does not take rank with Philadelphia as a money-spending city, but she is making rapid advances. Her outgo for municipal purposes for the current year will reach a total of $5,125,510. She is a borrower in the money market, and like Philadelphia, has managed in the last ten years to double the rate of annual expenditure.—*Phil. Record.*

—Six torpedo-destroying boats of the British Navy in succession have broken the record for speed. The record of the "Havock," 26½ knots an hour, was unequaled until beaten by the "Hornet," with 27¾ knots. Then came the "Daring," which developed a speed of 28 23 knots; and the "Decoy" and "Ardent" have each in turn beaten that record. All previous scores, however, were eclipsed when the torpedo-boat destroyer "Boxer," in her recent trial trip, made the astonishing and unheard-of run of 100.6 miles in three hours—a mean speed of 29.17 knots an hour. The little flyer, indeed, made a spurt at the rate of 30.35 knots, or very nearly 35 miles an hour.

WESLEY SNELL sold his farm near Exeter some years ago, when he was considered worth nearly $3,000. He became an implement agent, afterward a butcher, but he did not prosper at business, and now he assigns. Boys, stick to the farm.

E. R. C. CLARKSON, of Toronto, has been appointed liquidator for the Steel Sink Range Boiler and Stamping Company, whose factory is in New Toronto. This step was probably brought about by the failure of several of the prominent stockholders of the company.

IT would hardly have been believed, a few years ago, that bicycles would have gained so quickly in public favor. At first, too, it was thought their use would be confined to the cities, but they are fast becoming familiar to almost every family. Not only this, they are helping on the movement in favor of good roads.

THE Montreal grocery jobbing firm of Pigeon, Gendron & Co. for several years past have had hard work contending with the keen competition from concerns of larger means. They called their creditors together last week, but were unable to effect a settlement, and have been asked to assign. They owe, direct, about $14,000, and a like amount indirect.

Mercantile Summary.

THE Wilson Printing House, Montreal, a job printing business, carried on by Robt. A. Wilson under cover of his wife's name, he having been unsuccessful some years ago, has not proved a success, and a meeting of the principal creditors has been called to consider the situation. ——Geo. Weldon, a picture framer, of the same city, has assigned on demand. The liabilities are light, about $1,500.

A GENERAL dealer at Tay Creek," N.B., named J. R. Tomlinson, has failed. Mr. T. was formerly a farmer and lumberman, and began store-keeping just about a year ago, with small capital and less experience. Probably he admits, by this time, that not every man can "keep store" successfully.——T Dickinson, operating in lumber in a small way at Canterbury, in the same destrict, has also failed.

THE proprietor of the Windsor Hotel, St Johns, Que., C. M. Hoadley, has made assignment of his estate. The estate is expected to be a poor one. Mr. Hoadley formerly kept the "Camperdown House," on Lake Memphremagog, favorably known to Montrealers, and was also for a time hotel-keeping in Granby. ——V. Mailloux, dry goods, of the same town, recently reported to be offering his creditors 35 cents on the dollar, on $9,000 or $10,000, has also assigned,

Mercantile Summary.

THE Belleville Gas Company paid four per cent. dividend last year. The city owns a third of the stock. Mr. John Bell is president, Mr. J. W. Johnson vice-president, and Mr. J. L. Biggar secretary-treasurer.

AN Illinois newspaper recently sued forty-three men who did not pay their subscription. It got judgments against each of them. Of the forty-three some twenty-eight then swore that they owned no more than the law exempts from judgments. They were thereupon arrested for petit larceny and bound over in the sum of $300 each. All but six gave bonds. The postal laws make the taking of a paper out of a post office, with refusal to pay for it, petit larceny.—*Brooklyn Eagle.*

THE customs receipts of the Argentine Republic from January 1 show a decrease of £250,000, as compared with the same period of last year. Great Britain retains her position at the head of the countries trading with the Republic, her exports to the latter for the year amounting to 33 million pesos, and her imports to 20 million. During the same period, the exports of France and Germany amounted to 10 million and 11 million pesos, and their imports to 19 million and 12 million pesos respectively.

IT was stated last week by the St. John *Sun* that the lumber cut on Salmon River would amount to eighteen million feet. That journal says, in a later issue, that a well known lumberman pronounces this incorrect, because it will not exceed nine millions, about as follows: Hugh McLean, say four million; G. G. King, about three million; R. D. Richardson, about three-quarters of a million. The output of lumber on the Bay Shore this winter will be larger than that of former years, according to one of the operators.

FOR many years John Milne has been running a saw mill in Agincourt. He has assigned, and the principal cause of his trouble is in that he tried to assist his son in Stayner who has been losing money for three years.——In the spring of 1888 J. Braiser purchased the hat and cap stock of Lazier & Meyers in Belleville. In doing so he had the assistance of a Montreal firm who failed in 1890, and then Mr. B. was obliged to ask for a compromise at 50 per cent. This he obtained. Afterward he was assisted by a house in Toronto, to whose book-keeper he now assigns ——An offer of 25 per cent is made to the creditors of Mich. Quinlivan, grocer and liquor dealer of Brantford. He has enjoyed a fair record for nearly twenty years.

THE Montreal firm of Jasmin & Vallieres, dating from 1891, when they commenced dry goods retailing on a capital of about $2,000, have been obliged to call a meeting of their creditors.

THE Hearle Manufacturing Company, who succeeded to the old established soap making business of the late J. G. Hearle in 1892, have assigned. W. E. Price, at the head of the business, has had five partners, with none of whom he has worked in harmony, and his management is much criticized. The liabilities are put at $35,000, Mrs. Price figuring as a very large creditor.

THE firm of Curtis & Newsome, dealers in hardware and stoves at Vancouver, succeeded the Cunningham Hardware Company two years ago. Their statement of 1894 shows a surplus of over $6.000. Some time last summer Curtis left the concern on account of ill health. This evidently weakened the financial standing of the firm, for their assignment is now reported.

RICHARD ROSS, of New Glasgow, N.S., who succeeded his father in the grocery and baking business a little more than a year ago, has already found it needful to assign.——At Truro, in the same province, an assignment has been made by McCurdy, Wilson & Hill, builders and manufacturers of furniture. The liabilities are placed at $6,000, of which $2,400 are secured by preferences.

FROM St. John, N.B., we hear of the following two failures; David McAlpine, doing business in stationery and toys under the style of D. McAlpine & Co., has made assignment, owing about $6,000, with preferences of $2,000, and the estate will hardly more than pay preferred debts and expenses.——W. H. McInnes, a young man in business a short time as a tailor in that city, has also assigned.

MR. ALEXANDER DIXON has received a flattering letter from the Norwich Union Fire Insurance Co., which he served as Canadian manager for fifteen years. The letter says the board is "desirous of offering you some trifling proof of our esteem, and we shall be glad if you will accept 100 guineas, or, should you prefer it, a piece of plate of that value." The letter further says that Mr. Dixon's recommendation of Mr. J. B. Laidlaw as his successor had been confirmed, and Mr. Laidlaw appointed manager for Canada.

FOR many years Messrs. H. McElroy & Sons have been largely engaged in business as general merchants and millers at Richmond, Ont. (Carleton Co.), and Carp. They have got into deep water financially, and being sued by some of their creditors, are engaged in taking stock, with the view of consultation with their creditors. Last spring they showed a good surplus, some $40,000 to $50,000, but largely tied up in mill, store and residential property.

IN 1883 R. H. Pomeroy started a general store in Fullerton. Nine years later he assigned. His brother bought the stock at 60 per cent. and the business was managed by R. H., under the style of Pomeroy & Co. Another assignment is made this month. ——We hear of the assignment of J. C. Brain, doing a tailoring business at Huntsville.——Also of that of E. H. Sheffield, dry goods dealer in Walkerton. Strong competition, with business depression, seems to be the cause of his trouble.

IT is a little more than one year since Ernest Steele opened a general store at Ormsby. His habits were not those of a man who gave close and constant attention to business, and his business did not prosper. He has assigned, and on the whole no one need be surprised to hear it.——James Walker, confectioner, etc., at Mount Forest, also assigns.——For many years Thos. Hall has been a dealer in shoes, etc., Goderich, but he was of an easy-going disposition, and any money that he may have made appears to have been lost through granting credit freely. Now he is obliged to meet his creditors.

IN the spring of last year, J. R. Gilbert, baker in this city, gave a chattel mortgage to a milling firm that is now in liquidation; hence his assignment.——J. Segsworth & Co., wholesale jewellers in this city, suspended payment in May 1889 and afterward arranged a compromise at 50 per cent. on liabilities of $26,000. This did not include their banker's claim. This compromise caused some unfavorable remarks at the time. Since then the affairs of the firm have been in poor shape; they have been sued several times, and last Saturday they gave a chattel mortgage to a money lender, who has now foreclosed. Unsecured creditors need not expect a dividend.

PIERRE DESHAIS, of St. Angele de Laval, Que., formerly a general merchant, in which line he was not very successful, and latterly a hay dealer, is offering a compromise of 20 cents on the dollar.——V. R. Aubin, secretary-treasurer to the municipality of Chicoutimi, and who has also been doing a small business in stationery and sewing machines, has assigned to the court. A lack of sobriety has had a good deal to do with his troubles.—— A. A. Farley, of Victoriaville, Que., who opened a general store last fall, has assigned on demand, with liabilities of $2,540 He was formerly for a short time of the firm of Farley, De Billy & Co., tailors.——L. Taschereau, in a very small way of business at Lourdes, Que., is gazetted insolvent.

A RECENTLY established jeweller, of Stouffville, W.L. Reeve, has assigned. He had very little means. ——Assignments are made, too, by W & J. Milne, sawmill, Stayner, and by H. S. Leverton, butcher, at Sparta. — J. T. Showler commenced tailoring in Arkona five years ago, and shortly afterward opened a general store in connection with the tailoring. Owing to dull business and poor collections he has assigned.——The sheriff is in possession of the fruit store of Thos. Evans, at Fergus. He only commenced business 1st January last.——John Madee, dealer in cigars at Simcoe, has assigned. — Thos Babe, general dealer, moved to Parkdale in 1884, from Cataract, where he had been in business a number of years. He did very well for some years, but his real estate speculations have caused his downfall.

J. URGELE PAQUIN, keeping a general store at St. Eustache, Que., for the last four years, having started with the assistance of his father, who is a well-to-do farmer, has become embarrassed, and a demand of assignment has been served upon him. He must not be confounded with J. A. Paquin, of the same place, a merchant in good standing ——F. X. Cayer, a storekeeper, of St. Nicholas, opposite Quebec, has assigned. He was formerly at St. Agapit. Merchandise liabilities are about $1,500, and he owes a like amount upon a mortgage.——Joseph Laurier, who has been a general trader in a moderate way for fifteen or twenty years at St. Roch L'Achigan, Que., is numbered among this week's batch of insolvents. Mr. L. has been rather a prominent man in his parish; he has been choir-master in the parish church, and has given a good deal of attention to politics and other matters outside his business. It is no doubt owing to this latter fact that his troubles are largely due.——G. Menard, hotel-keeper at Iberville, Que., is insolvent. He was previously in business at St. Hilaire.——A meeting of the creditors of J. H. Merrill, form-

erly in the lumber business at Fitch Bay, and who bought out the general store business of W. T. Knight, at Smith's Mills, Que., has been called. He "branched out" last spring, buying the business of C. H. Gordon & Co., at Beebe Plain.

THE TORONTO FIRE.

The third of Toronto's great fires, that of Sunday morning 3rd instant, is the worst, we believe, in respect of aggregate value of property destroyed and damaged. From Simpson's huge six-story departmental store, corner of Yonge and Queen streets, which is burned to the ground, the flames spread north, east and west, gutting several stores and scorching Eaton's extensive premises. The following is a list of the various companies interested, and the probable amounts for which they will be held responsible. In at least a half dozen instances, among them being the Western, Hartford, British America, Phenix of Brooklyn and Eastern companies, the reinsurances have been deducted:

Ætna	$12,000
Agricultural	10,000
Alliance	7,000
Atlas	10,000
British America	7,000
Caledonian	25,000
Commercial Union	23,500
Connecticut	15,000
Eastern	8,500
Economical Mutual	5,000
Guardian	10,000
Gore	5,000
Hartford	11,500
Imperial	5,000
Lancashire	13,500
Liverpool & London & Globe	32,000
London & Lancashire	23,000
London Assurance	30,000
Manchester	12,000
National	13,000
North American	10,500
North British and Mercantile	23,000
Northern	22,000
Norwich Union	23,000
Phenix of Brooklyn	15,500
Phœnix of Hartford	10,000
Phœnix of London	7,000
Queen	16,0 0
" City and Hand-in-hand	11,500
Royal	25,000
Scottish Union and National	14,000
Sun	15,000
Union	10,000
United Fire	8, 00
Wellington Mutual	5,000
Western	9,000

The following is about the amount of insurance carried by the respective parties: The T. Eaton Co (limited), where the damage was very small, had $400,000, over one-third of which was in American mutual companies; Sutcliffe & Co., dry goods, $76,000; The Agriculture and Arts Association, $13,750; P. Jamieson, clothing, $32,700; John Milne & Co., $21,000; McPherson & Co., shoes, $16,000, damage slight; Gourlay, Winter & Leeming, pianos, $21,500, but little damaged; C. F Adams & Co., furniture, $15,000, damage $4,500; Wanless & Co., jewellery, $27,000, damaged by smoke and water; Imperial Bank, $14,000, loss probably under $1,000. Besides these there are more than a dozen smaller losses, where the damages are very small, the principal one being Knox Church spire, which took fire and fell.

THE SITUATION.

Two causes have been discovered which will delay the Franco-Canada commercial treaty taking effect. From England comes the news that the Canadian legislation for carrying the treaty into effect is defective. To Ottawa this is news, and thence comes a story that the interpretation of the instrument on the question of what constitutes direct trade between Canada and France, is in doubt, and that doubt must be cleared up before the treaty goes into operation. At this rate, the delay must continue till next Session of Parliament; besides, it remains to be seen whether the doubt about interpretation can be satisfactorily removed. This set-back, so unexpected, will take all interested by surprise.

On a question of privilege the Canada-Australian bill has, for the time, been dropped in the House of Lords. But it will now make its appearance in the House of Commons, and the only result of the hitch will be delay. So remote is the bill's relation to revenue that it seems hypercriticism to object that the introduction of it in the Lords before it had passed the Commons constituted a breach of the privilege of the representative chamber. The fact that the bill was challenged may be found to conceal an ulterior motive, but this is not certain at present. The possible effect of the objection taken may be to throw over the measure till next session.

A few days ago the announcement was made, on authority that would ordinarily pass unchallenged, that "a contract has, under order-in-council, been entered into which will ensure the immediate construction of the [Hudson Bay] railway, at the rate of at least 200 miles a year." But the statement was no sooner made than doubts as to its correctness arose. So many promises of progress have been made in the name of this road which failed to stand the test of experience, that it does not seem safe to accept too readily anything of the kind as certain. The tenor of the order-in-council which was to have this magic effect is not stated. It is known that the company had been trying to get the Federal Government to advance money for or upon the lands, and when an order-in-council was mentioned, the natural enquiry was, could it be for this purpose? No answer to the mental suggestion has come.

Suggestions of an extension of the projected Atlantic and Lake Superior Railway over the prairies and across the Rockies are already being made. It is of course as easy to talk of the larger as of the smaller scheme, and the chances of both are at present about equal. Even a gigantic scheme, when time and space are unpropitious, fails to prove inspiring.

A new feature in the bi-metal question has appeared. The statement comes from England that £50,000 has been raised in aid of bi-metalism and that there is a proposal to raise the amount to £100,000. This of course implies that a systematic agitation in favor of the cause is to be entered upon. This is taking a leaf out of the Anti-Corn Law League book. The League won its cause by means of organized agitation, carried on by lectures, pamphlets, and special organs in the press. It carried on the agitation four years before it was able to raise, in one sum, so large an amount as £100,000. But it does not follow that because these methods brought success to the League, they will have the same result when employed in the cause of bi-metalism. The League had Cobden for its prophet and Wilson and a host of other able men for its disciples. It appealed powerfully to the manufacturing capitalists and to the hungry workmen. Belief in the avowed aim of the agitators, untaxed bread, fired the enthusiasm of millions. Bi-metalism starts the agitation with the odds greatly against it, and the world will not be easily convinced that it is right; and not merely England, but all the great commercial nations, must consent. No doubt England holds the balance of power on the question, and with her more than any other country, perhaps more than all others, the decision rests.

If the decision of the United States Congress not to pay the British Behring Sea claims in a lump sum be definite, the next step will be a commission that will go over all the claims in detail and settle each according to the evidence The lump sum must have been arrived at by a less tedious process. Congress is within its rights in insisting that the evidence by which claims for compensation are capable of being supported shall be produced. The vote of Congress is not in reality the rejection of the claim, but the rejection of the method resorted to for establishing it roughly in lump. There are members of Congress who say that $450,000 is too large a sum to pay, that a less amount would compensate the owners of the vessels captured for the resulting losses. That the amount can be reduced by the method that must be used to establish it cannot be taken for granted. If the evidence should show that the aggregate loss was greater, it will have to be paid. The American Government, we may be sure, did not agree to $450,000 without being convinced that that amount was due. But the delay is unfortunate. It is inconvenient to the sufferers, and it keeps open the sore which policy and prudence would combine to heal at the earliest moment possible. It rests entirely with the United States to choose which of the two methods open to it of settling the claimit will follow, and certainly present indications almost make it certain that resort will be had to a commission.

The difference between the New York trunk lines and the Grand Trunk of Canada over the immigrant traffic a few days ago was forced on public attention by a request from the Transcontinental Association addressed to the commissioner of the Trunk Line Association that he would not, till further notice, send any immigrant passengers by the Grand Trunk to Chicago. Both the Grand Trunk and the Trunk Line Association purchase immigrant

passenger freight from the steamship companies, under the name of commissions. The Grand Trunk, it is complained, outbids its rivals, and gets more than its "legitimate" share of the business, the former paying $6 a passenger and the latter $1.50. When the passengers are carried beyond Chicago, the lines that carry them repay part of this commission. The steamship companies want to get the largest commission they can, and are said to be threatening to offer the whole business, which they can control, to that line which shall make the highest bid. Threats are made of boycotting the Grand Trunk, but the question is one of the highest bid, not of the loudest threat. The commissions paid by railways to steamships for passengers are a result of the railway competition, and so long as Montreal and New York can compete in this way the immigrant traffic ought to fare better than it would if no competition existed. Apparently the immigrants do not benefit by the commissions paid to the steamship companies, but the vessels getting these commissions can afford to carry at lower rates than they could without them. There is, however, no reason to conclude that, taking the whole journey by water and land, the commissions reduce the total amount payable in passenger fare. If the trunk lines have been less liberal than the Grand Trunk in commissions, they have only themselves to blame if they do not get a larger share of the business.

DEPARTMENTAL STORES.

For some time past, objections to departmental stores have been heard in different cities where they have got a footing, notably in New York and Toronto. Of the latter city, the municipal council is to-morrow to take these complaints into consideration; but what it can do, should it desire to discourage such establishments, is not very clear. It has no power over the regulation of commerce, and cannot visit these stores with discriminating taxes. Departmental stores have brought in a new plan of doing business, and their success has crowded to the wall a number of rivals which did business by the old methods. What are the peculiar features of the departmental stores? At first sight they may appear to run counter to the rule of the division of labor; but this superficial view would not be the true one. There is in them division of labor, each department having a special organization, just as complete, if not more so, as that which prevails in stores where only one kind of business is carried on. With this division of labor, there is concentration of capital and effort. A third feature is that business being done only for cash, no bad debts are made, and the percentage which has to be allowed for them in credit stores is an addition to the resources for competition. The quickness of the returns causes a saving of interest.

So far as they go, these stores represent a transition in the mode of doing business, and the question is whether the change is to become complete, involving the whole range of business. The change of method seems to bear some resemblance to a new invention in the arts, which gives a decided advantage to its possessors. If appearances are not deceptive, may not the revolution go on to completion, so that the time may come when business cannot be carried on in any other way? Whether we like it or not, the tendency is this way at present. The trouble is that only a few of those now in trade can take advantage of the new method: one great departmental store causes hundreds of small stores to disappear. The only chance is that some means of successfully contending against departmental stores may be found in a change of method which, while imitating, may even be an improvement on the methods of these formidable rivals of the old-fashioned stores.

ANOTHER GREAT FIRE.

A great fire occurred in Toronto on January 6th this year; another on January 10th; another on March 8rd. The destruction of property by these three burnings is not less than two millions of dollars. The insurance companies lost by the first fire $445,000, by the second $540,000, by the third $570,000. All three took place in the business quarter, and they were all mercantile risks that burned.

The circumstances of these serious fires merit some attention. They all began in modern buildings of unusual height; the causes which produced them are not yet discovered, but indications point to incendiarism; they took place at a time when the city was—as unhappily it still is—poorly provided with modern fire-fighting apparatus. The feeling gains strength that there are incendiaries among us. Only on Wednesday evening last a fire was discovered in the basement of a Front street shop, in the heart of the wholesale quarter, which could not well have been other than incendiary. Luckily a chemical engine quenched it.

Let the city council then offer a reward of a thousand or two thousand dollars for the apprehension of these incendiaries, and so stimulate detectives and others to seek out the scoundrels who revel in destruction. It will be money well spent if it shall place even one of them in gaol for life. But will the council move? That ponderous body resolved in the middle of January last to buy steam fire engines, yet never a steam fire engine is in our midst to-day except the little one which, by the grace of a merchant who *lent it* to the city, saved, we are told, the whole Eaton departmental store, when Simpson's and other buildings were destroyed on Sunday last. An incendiary spirit in a town is bad enough, but to be further cursed with a set of municipal guardians who delay bringing the appliances to combat the incendiary's evil work, is even worse.

Torontonians will take what comfort they can out of the fact that a Merryweather steam fire engine has been ordered from London by cable, and that a Ronald steam fire engine is on its way from western Ontario. Also that a water tower and appurtenances, and 6,000 feet more hose, have been advertised for. All this is poor comfort to the people on Yonge and Queen streets whose stocks and premises are a ghastly heap of ruins for the lack of such engines on Sunday last. It should further be urged that if six and seven story buildings are to be the rule, Toronto should have more water pumping power and larger water mains. Two steam fire engines is not protection enough—a water tower will also require one of them. The conflagration hazard must not be ignored.

ONTARIO LOAN COMPANIES.

The general feeling among mortgage loan companies in Ontario, as reflected in their reports or in addresses at their recent annual meetings, is one of caution and economy. In view of untoward conditions in agriculture during the year consideration has often been extended by the companies, as a rule, to farmers who were borrowers. At the same time the Ontario farmer has shown himself quite as able as the average man in other walks of life to pay his way. The facts that confront the loan companies are a reduction in value of farm real estate and a lowered rate of interest. Their earnings are likely therefore to be upon a lower scale. The conservative policy outlined in the report of the Hamilton Provident & Loan Society for 1893 has evidently been pursued during the year just past. They have restricted their loans during the year, and at the same time have been repaid by their borrowers a sum which swells their balance of unused money in bank. It is the policy of the board,

the repor says, to lend only on the choicest securities, and to borrow money at the lowest rates. They have done business enough in 1894 to earn $84,540 net, which, while it is $5,000 less than in the previous year, is enough to pay seven per cent. dividend, and carry $6,500 to contingent fund, which stands at $36,567.

The address of Mr. Stirton, at the meeting last month of the Guelph and Ontario Investment Society, is what the gentlemen of Wall street would term "bearish" in tone. But Mr. Stirton, as we well know, has nothing to do with bears or bulls in that sense, his interest being in the main agricultural. And speaking of agriculture he shows how it has suffered from prevailing conditions. "The value of farm property has declined," he says, "very materially. . . In fact it has become almost impossible to fix a true value on farm lands, and to sell such properties, even at greatly reduced prices, is most difficult." Then as to lending rates, maturing mortgages, he finds, have to be renewed at a lower rate, thus tending to reduce profits, and he warns shareholders not to expect the returns they have been getting. As to the position and earnings of the company, its business has been restricted during 1894 and its profits slightly lessened; the company has $41,960 in real estate on hand and has put $7,700 to a contingent fund against further loss. Still, it shows profits almost as large as in the previous year, pays the same dividend and makes an addition to Reserve. The result does not require apology.

The earnings of the Midland Loan Company last year were nearly the same as in the year previous. The usual dividend was paid, and $7,000 placed to contingent fund, which is now $13,000, sufficient, in the opinion of the management, to cover all possible losses on property. While agreeing with most of the other heads of companies, that the earning power of such societies is likely to be less in the future, and that the tendency is therefore towards a reduction of dividend, Mr. Mulligan stated in his speech that 97 of the company's mortgages had been reduced last year by payments on account of principal. The circumstance is a tribute to the general prosperity of the farmers of the Midland district.

THE EASTERN FIRE ASSURANCE COMPANY.

The annual meeting of the Eastern Assurance Company was held in Halifax on Thursday, 28th ult. An effort was made, by a section of the shareholders, to have the company wound up forthwith, but it was voted down. A like effort was made a year ago, it will be remembered, but this was likewise unsuccessful. Such timidity in the face of two or three bad years' fire loss is not what one would expect from the fire underwriters of our Maritime Provinces. As merchants, bankers, marine insurers, manufacturers, shippers, they have shown their enterprise and pluck, and have stood reverses with equanimity. Surely their pluck is not deserting them in the field of fire underwriting.

The majority of shareholders clothed the directorate with power to reduce the subscribed capital from $1,000,000 to $500,000, and the paid-up capital from $250,000 to $200,000, if legislative authority be obtainable for the purpose, or otherwise to dispose of the company's affairs as they may deem best. Before they take any steps in the direction last indicated, we should like to point out to the directors some considerations which they may have overlooked. Of course, being business men, they were not ignorant of the risk run when founding a fire insurance company. The fire loss is not a fixed quantity per annum. Fires do not follow closely rules or precedents in their occurrence, and it is not safe to strike an average over a few years only. The insurance companies lost only a million dollars in Canada in 1869—they lost eight millions in 1877. While the annual insurance loss of 1882 and 1883 averaged only $2,600,000, that of 1887 and 1888 averaged $3,250,000. Indeed, to look further into the matter statistically, the fire premiums for the years 1869 to 1880 inclusive, averaged $3,023,000 per annum, while from 1881 to 1888 inclusive, they were $4,766,017 per annum. In the same group of years first mentioned the losses were $2,439,600 per annum, or at the rate of 80.65 per cent. of the premiums, while in the later group of years they were $3,062,275 per annum, or only 64.24 per cent. of the premiums. These figures, which are in the Insurance Blue Book, were all at the disposal of the founders of this company, and they could not have been ignorant of the vicissitudes of fire underwriting. Let us hope, then, they did not go into the business to be frightened out of it by three years' lack of dividends. We can point them to companies in Quebec and Ontario that have come through far worse sieges in the past thirty or forty years, and are still in the field paying regular dividends and doing a bigger business than ever.

The Eastern has, after some hard work, got well established in the Dominion and has a respectable name. It has paid off its preliminary expenses and survived some of the hindrances of early years. It has secured risks of twenty millions of dollars. Is it not a questionable policy to disregard these things, and let the labors of agents and inspectors for years go for naught? Even in 1894, the business of which appears to have so much discouraged a portion of the stockholders, the company, it is stated, earned a trade profit of about four per cent., exclusive of interest on investments. Bearing in mind the untoward character of 1894 as a year of poor profit in any department of business, this showing is not to be despised. An organization with the balance sheet of the Eastern is by no means hopeless, and we trust the directors will see that it goes courageously on.

TO PREVENT FRAUDULENT ASSIGNMENTS

We are pleased to learn that the legislature of New Brunswick has passed the bill regarding assignments and preferences, which only needs the sanction of the Governor to become law. The object of this legislation is to prevent fraudulent assignments and to secure to all creditors equitable treatment in the distribution of estates. Something of the kind has long been needed, for preferential assignments were a crying evil. The bill was introduced by the leader of the Government, and went through in substantially the same form as presented. It provides that if an insolvent person, knowing his condition, gives a judgment to defraud any of his creditors, it can be voided. Even preferences to one creditor over the others are voidable, as are the transfers of goods, chattels, property or securities. Gifts and conveyances are in the same position. Assignments for the benefit of creditors take precedence over all executions The bill provides ample machinery for the quick, cheap and easy carrying out of all its provisions.

LA BANQUE DU PEUPLE.

We have received a copy of the report of La Banque du Peuple, and the newspaper report of the cashier's remarks. Mr. Bousquet reminds us that falling prices have discouraged merchants from making ventures, and as a consequence the volume of business has been restricted. The year has not been, in the United States, one of commercial recovery, but on the contrary of even greater industrial prostration. Canadian business has felt these drawbacks, and banking in Canada, it is undeniable, has been rendered more arduous by these and other circumstances. The cashier, in conclusion, referring to the uncertainty which exists in some industrial quarters in view of an approaching election, makes the significant forecast that no party elected to power will venture to seriously disturb matters further by industrial legislation.

The authorities of La Banque du Peuple appear to believe, however, that there is a better time coming in business. And they have shown their faith by their works, in extending the business of the bank. A considerable increase is to be seen in deposits, those at notice especially, while the demand deposits are lessened. At the same time the bank has a larger proportion interest-bearing than before. Circu-

lation, while actually somewhat less than at a like date in 1893, is probably the same relatively to the decline in prices of commodities. The aggregate transactions of the bank are on an enlarged scale, and what is of even more interest to shareholders, the dividend is advanced to seven per cent., after paying which a round sum is carried forward.

BANK OF BRITISH NORTH AMERICA.

The directors of the Bank of British North America have issued their report and statement of accounts to the 31st December. The dividend has already been announced. The balance sheet shows deposit and current accounts of £2,032,426, a decrease of nearly £50,000 compared with the end of 1893; notes in circulation of £196,971, a decrease of about £25,000; and bills payable, etc., of £1,071,322, a reduction of £150,000. Items on the other side reflect the difficulty experienced in employing funds in general business. Cash and specie at bankers and in hand at the close of 1894 stood at £512,474, an increase of £50,000 on the year; cash at call and short notice at £349,515, an increase of £150,000; and bills receivable, loans, etc., at £3,317,437, a decrease of £500,000. The report of the court of directors says:

The profits for the half year, including £1,543 0s. 5d., brought forward from last account, amount to £22,942 19s. 5d., out of which the directors have now to report the declaration of a dividend of 20s. per share, payable, free of income tax, on the 5th April next, leaving a balance of £2,942 19s. 5d. to be carried forward.

FEDERAL LIFE ASSURANCE COMPANY.

This company, which has now passed its thirteenth year, is showing the results of persistent hard work. While the volume of business was not increased in 1894, as compared with the previous year, which could hardly have been expected considering the depressed state of trade, the report shows an addition of some three hundred to the company's list of policy-holders. This seems to indicate that smaller policies are being taken out, which, other things being equal, is a favorable condition of things for the company in respect of probable mortality. The assets shown, apart from guarantee capital, are $431,807, as compared with $379,098 a year before, which is a gain of more than $52,000, and the aggregate of assurances is between ten and eleven millions. Deducting $41,914 increased reserve liabilities, the report shows an addition of some $11,000 to the company's surplus. The mortality of the year was less than in the previous twelve months, being $95,759 net under 36 policies, as compared with $103,031 under 47 policies. The management, having done so well in an untoward year, are encouraged to look for still more favorable results during the next twelve months.

EXCELSIOR LIFE INS. CO.

The report of the Excelsior Life Insurance Company, whose operations are confined to the Province of Ontario, gives evidence of energetic work on the part of the company's staff during the twelve months past. Policies to the extent of more than a million dollars were issued or revived during 1894, and the insurance in force reaches $2,329,000, a gain of $613,000 over 1893. There is also a considerable gain in gross assets, and, the report claims, a reduction in the ratio of expense. When the condition of general business last year is recalled it must be admitted that the gain in business is very creditable. The death losses paid were only $9,000, and of this $2,000 belonged to 1893. The company has thus far been fortunate in death losses. In another year it is the intention of the management to work under a Dominion license. The company has an infinential directorate with a sensible man at the head of it, and the policy of the company may be expected to be one of prudent progress.

FURNITURE DEALERS' ASSOCIATION.

As the result of a meeting of about thirty furniture dealers representing concerns all over the province, held at the Royal Hotel, Hamilton, Feb. 27th, an organization was formed to be known as the Canadian Retail Furniture Dealers' Association. Mr. John Hoodless, of Hamilton, was elected president, and the other officers are as follows: First vice-president, W. Wisher, Toronto; second vice-president, W. Clegg, Peterborough; third vice-president, J. Kilgour, London; sec.-treasurer, W. B. Rodgers, Toronto; executive committee, A. Duncan, Brantford; H. F. Tratt, Collingwood; J. Elliott, Ottawa; H. G. Frost, Belleville, and W. Renaud, Montreal. The object of the new association is the transaction of business interesting to the trade, and to promote a better understanding amongst those engaged in the Canadian furniture trade. No attempt will be made to fix a scale of prices.

—Correspondence will be found on pages 1172 and 1173.

BELL TELEPHONE CO.

On Thursday, 28th February, the annual meeting of the Bell Telephone Company was held in Montreal, on which occasion the report and annual statements for 1894 were submitted. The statement of receipts exhibited a gross income of $1,021,839, which is $51,665 more than that of 1893. And the working expenses for the twelve months amounted to $729,611, which was $4,820 more than in the previous year. A very decided gain is shown in net revenue, which from $236,383 in 1893 increased to $283,227, which is an improvement of more than sixteen per cent. A dividend of 8 per cent. was paid by the company, and $50,000 added to the contingent account, while $10,698 was placed to the credit of revenue account. The surplus of the company's assets over liabilities is given at $921,429. The old board of directors were re-elected as follows: Messrs. C F. Sise, president; G. W. Moss, vice-president; W. H. Forbes, Hon. J. R. Thibaudeau, John E. Hudson, Robert Archer, Robert Mackay, Wm. E. Driver, Hugh Paton.

RED CEDAR SHINGLES.

The fact that the States of Washington and Oregon shipped 12,000 cars of "red cedar" shingles last year would naturally lead one to infer that a prosperous business was being done in this line. We learn, however, from a British Columbia mill man, who recently visited Toronto, that a strange state of affairs prevails in this business there. Although the extraordinary lasting qualities of this wood have been locally known for nearly a century, it has only been within the last six or seven years that shipping facilities have been such that exportation of cedar shingles by rail has been possible. When once started the business grew very rapidly, and although wages and cost of living was high, there was good money in the business. However, it appears that in the West, as well as in the East, no good business can be carried on any length of time without being over done, and when the "land boom" of the western town spent itself, it became the general rage to engage in shingle manufacturing. No matter what a man's previous experience may have been, so long as he could raise a few hundred dollars, or could buy machinery on credit, mills for making shingles sprang up like mushrooms everywhere, with the result that in a very short time the combined capacity of the mills exceeded the demand five or six times over.

Therefore, when the general depression made its influence felt, the result was deplorable in the extreme. Mill owners toppled over like nine-pins. Buyers for the plant appeared, and many of them in turn have succumbed, and during the past year or so it has become quite the custom for mill owners to let their operatives have the use of their plants for a consideration based on the quantity turned out, the operatives making an arrangement with the wholesale grocer or other merchant to take the out-put and sell it for what it would bring, furnishing them meanwhile with the bare necessities of life. This plan of operation is surely demoralizing enough, but our informant says the worst feature is the rascally way the goods are made is seriously injuring their reputation, and that the Province of British Columbia is, for the time being, feeling the bad effects of this unhealthy competition.

THE CURRANT MARKET.

It is not all plain sailing in the currant market at present. The last two seasons have afforded but little profit to the Grecian growers, their resources are now pretty well exhausted, and it is doubtful whether as a class they will be able to expend the money necessary to secure an average crop of fruit. Two years ago the Grecian currant grower, after expenses of freight, Government duties, commissions and other charges incidental to the business had been paid, realized about ½c. per lb. with which to cover his outlay in production. The present season has yielded but little better results, and the expectations of an improved condition of affairs have been universally disappointed. Mr. D. Pasqu, of Patras, a merchant of wide experience, writing to a Toronto broker, says of the 1895 season: "The prospects for the new crop are not at all favorable; famine cries aloud in the land among the cultivating classes of the fruit-growing population, and many vineyards will be left without cultivation. The next [crop of currants] will therefore be much smaller and of far inferior quality to that of 1894."

In consequence of the prospects of a shortage in the coming crop of currants, some brokers are advising merchants to purchase now and carry stock over until the next season. However, this is a policy which only a few are in a position to carry out. To store currants for so long a time one must be possessed of dry, cool rooms and absolutely dark; otherwise worms, the pest of the fruit-grower and merchant alike, may cause great waste or a total destruction of the stock. Anyone possessed of suitable premises, might, however, make a profit by carrying 1894 currants over into the coming season. Some of the wholesale trade made a success of storing currants last

year, in so far as quality was concerned, and will doubtless repeat the operation this year.

The statistical position in Greece is, from all reports, gaining strength every day. Up to Jan. 31st, 1895, 128,000 tons had been shipped from Patras. A letter from that port, dated Feb. 5th, gave information of the departure of three ships for Russia and one for Holland, carrying 5,000 tons between them, while bottoms were also under charter to carry an additional 4,000 tons to these two countries. The advent of Russia as a consumer of currants is a factor which must be counted on for the future, for this country shows every indication of advancing at once to an important place in the currant consuming countries of the world.

A GOOD VEILINGS SEASON.

The millinery openings last week established the fact that the spring and summer of 1895 will be good seasons for veilings. One prominent importer thinks the coming spring will be "the best season in years," while all the houses have made preparations for a big trade. There is money to be made in the veiling department, and retailers would do well to carry a complete assortment. Veilings are in demand at all seasons of the year, while the changes in fashion are not marked enough to occasion any serious loss by handling other than staple lines.

One of the best veilings shown by Toronto importers is in double width, with chenille spots in both black and colors. Chenille spots are very popular in Berlin, the German capital, and are meeting with good favor here. An odd yet pretty effect is seen in the combination of small black spots and large colored spots on a black background. Many different colored spots are shown, and all will have their admirers. While large and small dots are drawing almost equally, the tendency for the future is towards the large dots, in accord with the prevailing idea abroad. Borders are in good taste, but many of the nicest veils are without borders

DRY GOODS JOTTINGS.

A flax mill is to be built at Zurich, Ont.

Spring samples of gloves are very similar to those of last year.

Fire recently did some little damage to the Pattison woolen mills, Preston.

As a millinery ornament, buckles hold a better place this season than ever before.

It will pay you to push a good substantial black glove at $1. Shoppers are asking for it.

Tocques and turban effects are bound to obtain considerable prominence during the weeks of early spring.

Lace collars are selling well, and are exceedingly neat and pretty. Prices range all the way from $3 to $15 per dozen.

Veiling manufacturers in Europe are very busy, and prices at which goods are now offering may be subject to a sharp advance.

A level business head, guided by sound business principles, insured Robert Simpson's stock to its full limit. In what shape would a fire catch you?

Tartans, the Scotchman's pride and joy, according to the prediction of New York experts, will loom into favor as dress materials for the autumn of 1895.

Last week jobbers made large sales of Valenciennes laces for both dress goods and millinery purposes. The shades considered in best taste are white and beurre.

Dotted white taffeta printed with rows of tiny flowers—violets, roses, bluebells, etc.—form some of the prettiest new parasols. They are made up so that the rows go around the parasol, which is then edged with two plain or plaited ruffles of chiffon.—*Economist.*

Messrs. Slingsby & Talbot are seeking from Dunnville exemption from taxes for ten years and a loan of $10,000 for five years free of interest, and in return they promise to build a carpet factory there and manufacture Brussels carpets, blankets, flannels and yarns.

Prepare for a "Millinery Opening" and then a "Spring Dress Goods Opening." There is nothing like starting the season with a rush, but if you will pardon the expression, don't "rush the season." Keep your spring goods back until warm weather has closed the season for heavier fabrics.

There is no line which must be kept so strictly "up to date" as neckwear. Inability to secure the latest styles has always driven necktie seekers from the dry goods store to the exclusively men's furnishings shops. The Niagara Neckwear Company have sought to obviate this difficulty, and judging from the spring samples made at their Niagara Falls factory, we are inclined to believe they have succeeded. Don't purchase old styles, insist upon having the latest, and you can make the necktie counter hum.

Referring to that just now intensely interesting subject, the departmental store, the New York *Dry Goods Economist* says: "Whether the future evolution of trade will strengthen and solidify the department store or bring into greater prominence the specialty store, some very useful lessons may be learned from the former, as it is to-day, that would materially help in the management of our medium-sized and large stores that still adhere to a strictly dry goods business; in other words, the stores that are really department stores, although devoted to one branch of trade—dry goods only."

The following Canadian buyers are reported by the *Drapers' Record*, Feb. 23, as having arrived in England: Messrs. C. M. Blanchard (Messrs. Blanchard & Bentley, Truro, N.S.), G. B. Fraser (Messrs. Greenshields, Son & Co., Montreal), Alexander Macaulay (Messrs. Macaulay Bros., St. John), Thomas Vooght (Messrs. Vooght Bros., North Sydney, Cape Breton), Messrs. G. R. and A. E. Renfrew, Quebec; W. D. Ross, Yarmouth; D. S. Robertson, Toronto; W. Vassie, St. John, N.B. The following have left for home: Messrs. L. J. Simmons (Quebec), G. Kippax (Messrs. Cockshutt & Co., Brantford, Ont.), R. Prigsley (Messrs. Etter & Prigsley, Amherst N.S.), E. K. Spinney (Messrs. Spinney & Co., Yarmouth, N.S.), J. A. Ogilvy (Messrs. Ogilvy, Sons & Co., Montreal), S. C. Lacroix (Messrs. Z. Paquet, Quebec), R. Begg (Messrs. John Macdonald & Co., Toronto), A. J. Johnston (Messrs. Wyld, Grasett & Darling, Toronto), R. F. Scott (Messrs. James Scott, Toronto), Tom Ritchie (Belleville, Ont.), J. W. Hector (Montreal), J. Marshall (Messrs. J. Marshall & Co., London, Ont.), J. Lowry (Messrs T. Eaton & Co., Toronto).

THE BOOT AND SHOE COUNTER.

Are you a general storekeeper? Do you carry a stock of boots and shoes? And if so, is this department a paying one? Sit down and answer this question. Bring pencil and paper into the study, and find exactly where you stand in the matter. Did you make, last year, not only a net profit, but a gross profit out of your boot and shoe sales commensurate with your business pretensions? You didn't? Well, then, wherein lay the cause?

In the first place, are you well posted on footwear? You may have measured dress goods, and weighed out groceries for a full quarter of a century; you may be a successful merchant of long experience, and yet be unable to buy and sell boots and shoes to good advantage. There is a knack in knowing just what styles will suit a particular trade which comes only to the specialist. To-day the trade is offered a bewildering number of different shapes and sorts of footwear, nearly all which can be turned to good account by every merchant if he is able to exercise proper judgment in selecting his stock. Money is to be made in handling pronounced novelties if you take them at the right time, and drop them at the right time; but in this connection "a little knowledge is a dangerous thing," as you may recall by glancing at the accumulation of back numbers on your shelves You are too old to pick up these things now? Well, perhaps so. But money will buy the skill you lack, and cannot acquire. Would it be advisable to place an expert, a young man with bright ideas, who has had good training in clothing the pedal extremities of the public, in charge of your boot and shoe counter? Possibly your trade wouldn't warrant this move; and maybe you think yourself quite competent to run your own boot and shoe counter. If so, pardon the suggestion.

But, by the way, where do you keep your footwear? Not in the back of the store. No! It was in your neighbor's shop that we found boots and shoes stuck away off in a corner. There was crockery in the window and on the front shelves; during the last six months he had sold just fifty dollars worth of plates and dishes. People had passed in and out and away to the city to select their boots, when at the same time he had—concealed in that dark corner—the very goods they wanted. We have no quarrel with the city merchants, but we do pity some country storekeepers who bewail their cruel fate in having such keen competition and attempt so little to better their condition. Move the footwear forward. If you cannot afford to give it a continuously prominent position, see that it has a good place once in a while.

There is money to be made in handling footwear. It is true that boot and shoe men complain of hard times; but then that is quite the proper thing in trade now-a-days. The departmental stores of the city are booming boots and shoes. It was only recently that the exclusive boot and shoe dealers of a Western Ontario city wrote to the manufacturers asking them not to sell to a certain firm who proposed adding a boot and shoe department to their store, but it availed little. At first, it is true, the travellers held themselves aloof, but the first season sufficed to show that the "boot and shoe department" had come to stay, and this house now has access to some of the best makers. For the most part the departmental stores either confine their stocks to ladies', misses' and children's shoes, or specialize along this direction. It would appear that there are at least two things which men decline to purchase in departmental stores, gentlemen's furnishings and footwear

One of the most important features that will contribute to the general merchant's success in handling boots and shoes is the possession of convenient facilities for trying on the footwear. A certain degree of seclusion is essential, if it be only a seat in which people can turn their backs upon the public. This, of course, applies more particularly to the women, many of whom object to an exposure of shoeless feet to the vulgar gaze. Extravagance in furnishing is uncalled for, but taste and convenience should never be overlooked.

FOR GROCERS AND PROVISION DEALERS.

Americans are boring for salt across the Detroit river from Sandwich.

An evaporating factory for Leamington is a possibility of the near future.

An attempt is being made to establish a canning factory at Sherbrooke, Que.

A new brewery erected in Quebec by Messrs. Coté and Amyot is nearing completion.

Exports of tea from Yokohama and Hiogo to Canada from May 1st, 1894, to January 31st, 1895, were 9,449,495 lbs. During the same period the total shipments amounted to 45,194,258 lbs. against 44,986,522 lbs. same period last season, and 47,190,821 lbs. year before.

The *Planet* says the Chatham Retail Grocers' Association have settled the sugar question. The decision of their meeting was that not more than 25 pounds of granulated shall be sold for a dollar; not more than 28 pounds of coffee sugar, nor more than 30 pounds of bright yellow sugar for a dollar. Incorporated in the motion was the permission to sell as much less as they have a mind to, but no more than stated above.

Why is it that the consumers of seeds will never give their orders until the frost has disappeared? As a consequence of such delay all the trade comes in a rush, the employees of the wholesale seed house must toil far into the night in order to answer the urgent requests from the country, and even then many persons must be disappointed. The dry goods jobber can have his seasons distributed over several months, but the seedsman, as it seems, must crowd his into so many weeks

Mr. G. A. Gigault, assistant commissioner of agriculture for the province of Quebec, recently made an official visit to England, and on the 27th inst. spoke of the result of his trip at the annual meeting of the Central Canada Agricultural Association, Montreal. Three-quarters of the importers approached by Mr. Gigault in England advised that Canada develop its cheese trade rather than its butter trade for export. But Mr. Sam. Hughes, of Liverpool, said the outlook was better for butter. England imported cheese to the value of $25,000,000 and butter to the value of $62,000,000. Moreover, the demand for cheese might decrease, as frozen meat from Australia could be sold at a very low rate, and would, according to Mr. Hughes, eventually take the place of cheese with the workingman. The argument made by Mr. Hughes is worthy of serious consideration.

HARDWARE AND METAL TRADES.

The coal output of the Nova Scotia mines last year was 2,168,340 tons.

Messrs. Kalte & Poole, Berlin, have secured the Port Elgin foundry and will commence operations at once.

Statistics of the Canadian pig iron industry show that during 1894 the production was 53,014 tons. Of this 40,000 tons were produced in Nova Scotia.

An American syndicate is reported as asking the St. Thomas council to guarantee bonds to the extent of $300,000 for the erection of a $600,000 iron and steel plant..

James Watson & Co. write Feb. 27th: "We have again to report a dull but steady market for Scotch pig iron, with a moderate quantity of iron changing hands at unaltered quotations. The prospects of trade do not improve."

The Government of Nova Scotia collected in 1894 royalties on mines and minerals amounting to $242,657. In 1893 (nine months) the royalties yielded $175,205, and in 1892, $165,697. The royalty on coal alone, 12½ cents a ton, netted the province last year $209,330.

The Master Plumbers' Association, of Toronto, held its ninth annual meeting last Thursday, and elected the following officers for the ensuing year:—Thos. Cook, president; W. I. Burroughs, 1st vice-president; Geo. Guest, 2nd vice-president; J. K. Allison, secretary; A. Fiddes, treasurer; W. J. Garratt, sergeant-at-arms. Twenty-one new members were admitted to the association, after which the association discussed the sanitary condition of the city, and how best to improve and maintain it.

Again it is our pleasant duty to record a further advance in the price of crude. The demand has been very steady and firm for several months, with a constantly rising price. Last week petrolea crude was worth $1.21, but the price soon rose, and during this week a good deal of oil has been sold at $1.25, and Oil Springs at $1.27. Preparations for commencing drilling are being made and everybody is looking forward to a very busy summer, which is badly needed to offset the long depression we have suffered from. A good deal of drilling is going on now.—*Petrolia Topic*, March 1st.

The Wallaceburg, Ont., glass works, it is expected, will be in full operation about the middle of April. Building operations will be completed some time in the present month, and the remaining time occupied in putting in the plant. The officers of the company are: President, Capt. J. W. Steinhoff; vice-president, Dr. Geo. Mitchell; secretary-treasurer, Mr. A. G. Laird; directors, Capt. Jno. Scott and Messrs. D. A. Gordon, Harry Martin, J. H. Fraser and Harvey Morris. The superintendent, Mr. R. Davis, is a gentleman of experience in the glass manufacturing industry, having been manager and part owner of the Upland glass works, Upland, Ind.

PATENT RECORD.

The following list of United States patents granted to Canadian inventors, February 19th and 26th, 1895, is reported by James Sangster, patent attorney, Buffalo, N.Y.:—

Edward E. Horton, Toronto, tire.

Charles J. Stuart, Montreal, projectile.

Solomon Hyman, Montreal, cut and plug tobacco, and cigars and cigarettes. (Trade-mark.)

Henry H. Childs, Montreal, egg-case.

Charles L. Higgins, Montreal, footwear,

Samuel Hughes, Lindsay, heating and ventilating railway carriages.

James T. McCabe, Toronto, assignor to McCabe Manufacturing Company, support for travelling hangers for step-ladders

James T. McCabe, Toronto, assignor to McCabe Manufacturing Company, door hanger.

Walter Rowlands, Montreal, railway-switch stand

Joseph A. G. Trudeau, Ottawa, electric current transformer.

Jared H. Beamer, assignor of one-half to W. P. Ryan, Brampton, machine for cleaning and polishing fruit.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, March 7th, compared with those of the previous week:

Clearings.	March 7.	Feb. 28.
Montreal	$10,035,562	$8,818,378
Toronto	5,550,139	4,664,130
Halifax	1,142,521	963,539
Winnipeg	762,026	659,396
Hamilton	724,915	474,136
Total	$18,215,163	$15,579,579

Aggregate balances this week, $2,616,228; last week, $2,394,300.

—At a dinner of the Article Club in London, which discusses commercial affairs, the discussion at the last monthly dinner was upon the Decimal System. Scarcely any one denies that the decimal system of currency is preferable to the clumsy English £ s. d., but the authorities in the Old Country fear to make a change because of the difficulty of getting the people used to it, etc., etc. But once show the English people that their system of currency stands in the way of their doing business with certain countries, they will take pains to have it altered. Meanwhile a Decimal Association has been formed in England.

—The management of the People's Bank of Halifax decided last month upon the opening of a branch at Cookshire, the chief town of Compton county in the Eastern Townships of Quebec. Accordingly a branch of that bank was opened on Main street in that place on Monday last, 4th instant, and Mr. F. E. Halls is acting manager.

—A circular from the Eastern Townships Bank, dated 4th instant states that a branch office of that bank has been opened at Magog, Que., under the management of Mr. E. P. Olivier, from head office.

—The statement of the Commercial Bank of Windsor for 1894 has been issued. An addition has been made to reserve fund, which is now $95,000. The amount of the paid capital is $287,060

A jury of sixteen men, French and English, investigated the fire of January 31st in Webster's store, Coaticooke, and exonerated Mr. Webster from blame in connection therewith.

Meetings.

LA BANQUE DU PEUPLE.

The annual general meeting of the shareholders of La Banque du Peuple took place in the board room of the bank in Montreal on Monday, March 3rd. The president, Mr. Jacques Grenier, occupied the chair; Mr. J. S. Bousquet, the cashier, acted as secretary, and among the other gentlemen present were Messrs. George S. Brush, vice-president; A. Leclaire, T. Prefontaine, William Francis, A. Prevost, Charles Lacaille, John Y. Gilmour, George R. Muir, Hon. F. E. Gilman, J. S Coutlee, Godfrey Weir, Dr. Edward Desjardins, M. Burke, M. Nolan deLisle, John Mann, Rudolph Forget, W. S. Evans, A. Turcotte, A. W. Stevenson, W. St. Onge, Louis Armstrong, Charles Whittiman, John Morrison and John Crawford.

In opening the meeting Mr. Grenier remarked that in accordance with precedent, though, perhaps it was hardly a law, he would take the chair, if that were the will of the stockholders, and Mr. Bousquet would act as secretary.

Mr. John Crawford said if there was to be a choice out of all the stockholders, Mr. Grenier would be the man whom they would place in the chair.

Mr. Grenier said that for the past two years it had been the custom to conduct the proceedings in English only, most of the stockholders being English. If there was no objection, they would follow that practice to-day.

No objection being offered, Mr. Grenier read as follows the annual report of the directors:

REPORT.

The directors beg to submit to the shareholders the statement of the affairs of the bank for the year ending 28th February, 1895.

The net profits of the year, after providing for all bad and doubtful debts and deducting cost of management, amount to $114,280.18.

Out of this sum we have paid dividends at the rate of seven per cent. per annum, amounting to $84,000, and placed to the credit of Profit and Loss, $30,280.18.

The business of the bank, both at the head office and branches, is steadily progressing, and the number of current accounts annually increasing.

We find that the convenience afforded to the public by the local branches is appreciated and forms a valuable aid in the maintenance of the bank's relations with clients in the outlying parts of the city.

It is the desire of the directors to employ the bank's resources as fully as possible in the locality whence they are derived, so as to assist in every legitimate way the commercial and agricultural interests of the country.

All our agencies have been thoroughly inspected during the year, and we notice a large increase in the volume of transactions; they are working very satisfactorily.

We are happy to bear sincere testimony to the industry and attention displayed by the officers of the general staff and branches in the conduct of the affairs of this institution, and fully appreciate their efforts in assisting your board to promote the best interests of the bank.

The whole respectfully submitted.

J. GRENIER,
President.

Montreal, 1st March, 1895.

Mr. Bousquet, the cashier, then presented the following:—

STATEMENT OF PROFITS FOR THE YEAR ENDING 1ST MARCH, 1895.

Dr.

Dividend, 3½ per cent., paid September 1st, 1894	$ 42,000 00
Dividend, 3½ per cent, payable March 4th, 1895	42,000 00
Balance of profit and loss carried forward	42,857 60
	$126,857 60

Cr.

Balance of profit and loss account 28th February, 1894	$ 12,577 42
Net profits of the year after paying expenses and providing for all bad and doubtful debts	114,280 18
	$126,857 60

J. S BOUSQUET,
Cashier

AUDITORS' REPORT.

We, the undersigned auditors, named at the last general annual meeting of the shareholders, after having examined the books, verified the specie and legal tenders on hand, in a word, after having taken cognizance of the assets and liabilities of the corporation of "La Banque du Peuple," have the honor to report that we have found the whole to be correct and deserving our approval.

P P MARTIN,
NOLAN DELISLE, } Auditors
LOUIS ARMSTRONG,

Montreal, 1st March, 1895.

THE PRESIDENT'S ADDRESS.

Mr. Grenier, in moving the adoption of the reports of the directors and auditors, said: It would be useless for me to enter into details or go into long discussion, because as business men you know the position of the country just as well as any of the directors. Although we have been privileged by Providence in that business has not been made so bad in our country as in the neighboring Republic, and, indeed, almost all over the world, yet we also are passing through a little crisis. I hope that in the spring things will improve, but until the Government have decided what is to be done, I think a certain amount of depression will be felt in the city of Montreal and throughout the Dominion. The report of the directors speaks for itself. Though we have not made much progress, yet we have made some. The profits are $7,000 more than last year. The percentage is 9½, as against 9 last year. That is not a very great improvement, but it is an improvement, and the stockholders are certainly justified in expecting that our progress will be much greater next year, if business improves. When we met in March of last year, this building was very far from being completed. It is now completed, as you see; it looks exceedingly nice, and I think it is a credit to the stockholders as well as the directors. (Hear, hear.) Every one of the stockholders who has visited the building, and even strangers from America and elsewhere, are delighted with it. Last year I told you that I expected that the revenue from the rents of the building would pay 4 per cent. on the capital invested and give us the bank premises free. At the beginning of May we had only about one storey rented, but we made progress in June, July and August, so that by the end of the year we had three storeys let out of five. We have now only about one storey unrented, and we have applications for it. I hope by the first of May next every part of the building will be rented. My prophecy of last year that the rental would give us four per cent. on the capital invested and the bank free, will, I think, be fulfilled, and if we realize that, it will, I think, be a very good investment for the stockholders. This year the net revenue from the building, after paying all expenses, is $5,202, a little over 2 per cent on the capital invested, but when you take into consideration the fact that we have only had one-half of it rented for the whole year, you will see that I am justified in what I said a year ago, that the stockholders will get 4 per cent. on the capital invested and have the bank free. When we realize that I think we shall have done well. I hope that any of the stockholders who have not paid a visit to the bank will look through after the meeting is over, and I am sure we shall be very happy to show them round. I move the adoption of the report (seconded by Mr. Brush), and shall be pleased to answer any questions Meanwhile Mr Bousquet will, perhaps, say a few words

MR BOUSQUET'S REVIEW

Mr. Bousquet. I will simply add a few remarks by way of supplement to what the president has said, as I do not intend to make any retrospect of the commercial situation of 1894, as I used to formerly.

To say that 1894 has been a period of depression in trade and industry is to say what everyone knows from personal experience.

The trade of the Dominion, in common with all other countries, has sustained of late a check. The movement of merchandise has not enlarged this year, while the bane of falling prices in many important commodities has discouraged ventures that otherwise would have been undertaken, and rendered returns to producers less profitable.

After the commercial disturbances of 1893 in the United States, which reflected to some extent on Canada, it would have been unreasonable to expect that 1894 would display buoyancy, but, at least, one would have been justified in supposing that the year would be a period of decided recuperation and recovery. This it has not been; on the contrary, the prostration of industrial interests became deeper and more pronounced as the year progressed.

I do not mean to recall in detail and give a summary of the facts and conditions which have tended to disturb and suppress industrial movements during the year, but after considering the terrible strain endured in every line of business, the thought will find general expression amongst our shareholders that the results obtained are not nearly as bad as the year's advent prepared the public to anticipate

Conducting banking business amid such aggravated circumstances and restraining influences can lead but in one direction, smaller profits and heavy losses; of course such results are not encouraging

To interpret our report correctly, the constitution of the field of our operations must, I repeat, be recalled and the strain those events have caused be borne in mind.

When so considered, no one can hesitate to accept the statement as satisfactory.

The energy of the president, directors and managers is, of course, as a natural consequence of the responsibilities of their duties, devoted to the legitimate advancement, progress and development of the affairs of this institution. No opportunity has been lost by them of making any step forward, in the way of business accommodation, extension of commercial relations, and other facilities to the trade auxiliary to improvement in view of putting this bank on a standing equal to the requirements of its customers.

I am glad to state that, as a result of their endeavors, our business has increased materially during the year, and a number of depositors and new accounts have been added to our list, so that our deposits stand $6,623,936.51

The public deposits rose $710,327,92; those on demand decreasing $287,599.72; and those after notice increasing $997,927.64: the latter doubtless being from the savings department inaugurated in our new premises, which has proved to be a success and so far reached beyond our expectations.

The increase in our advances is due chiefly to the acquisition of commercial accounts at agencies and here, and these accounts have undoubtedly been acquired through the business facilities and commercial opportunities we can now afford to give to the public. Of course in banking to-day, like every other business, competition has set in, and we cannot expect any improvement or increase of transactions, if we are not in a position to grant equal advantage with our competitors

The circulation, it will be observed, was at the close of last month, just 8 p. c. less than at the corresponding period a year ago a decline not greatly, if at all, out of proportion to the fall in prices of staple articles, leaving the

inference to be drawn that in point of volume, at any rate, the trade of this bank has not been diminished.

Special attention has also been given during the year to the extension of commercial relations; it is a pleasure for me to state that we have lately completed agreements with foreign bankers which enable us to float Government bonds and city debentures on the English market, with as much chance of success as any other institution, and in fact during last year we have effected several large loans and sales with benefit.

Hence it is gratifying to be in a position, after such a year of general depression, to state to the shareholders that as a result of our endeavors, we have in almost every respect gained ground, that the general statement shows an increase of deposits and advances to the public, while the earnings have netted 9½ per cent., which may be considered a fair result.

So far as the commercial situation of the Dominion is concerned, although trade is admittedly quiet, and for a period may continue to be restricted mainly to present wants, we have every reason to believe in a rapid expansion when circumstances and conditions warrant. With the output of forest, farming produce and fisheries remaining large, the export trade well maintained and the domestic business conducted upon prudent and conservative lines, we have every reason to believe that a light degree of activity will set in at spring especially.

There certainly also exists actually in Canada a feeling of uncertainty as to the future, due to pending elections. The fear of radical changes is always detrimental to business, and is a great influence in arresting the wheels of commerce, and while the uncertainty exists it causes suspense, and this in itself causes stagnation in all the departments of trade and industry.

But the causes of the present state of things being removable by wise government, there is good ground for believing that any party elected into power will enact industrial legislation to not seriously disturb the machinery of our general trade.

MIDLAND LOAN AND SAVINGS COMPANY.

The twenty-second annual meeting of the shareholders was held at the company's offices, Port Hope, Ont., on Tuesday, February 5th, 1895, at 2 p.m. Present: H. H. Burnham, Judge Benson, James G. Williams, Adam Purslow, LL.D., R. Dingwall, W. Williamson, T. T. Baines, Henry Mulligan, Thomas Hewson, A. W. Pringle, A. McMann, James Craick, Dr. Clemesha, John Helm, J. H. Helm, Wm. Henwood, John Mulligan, Rev. T. R. Hull and George M. Furby.

The chair was taken by the president, Mr. John Mulligan, and on motion, the manager, Mr. Geo. M. Furby, was appointed secretary of the meeting. The minutes of the last meeting were read and approved of. At the request of the president, the secretary then read the twenty-second annual report of the directors of the company.

REPORT.

The directors beg to submit herewith their twenty-second annual report, showing the results of the business of the company for the past year, accompanied by the balance sheet of 31st December, 1894, duly audited.

From the net profits of the year, your directors, after defraying all expenses of management, providing for interest to depositors and debenture holders, and payment of municipal taxes, have been enabled to pay two half-yearly dividends of three and one-half per cent. each, leaving a balance of $7,047.66, which has been carried to the credit of the Contingent fund.

Following upon the extreme stringency of the money market during the latter part of 1893, the demand for the company's available funds during the first half of the year was active, the securities offered of the highest character, and the rates of interest better than have prevailed for some time past. This active demand did not continue throughout the year. The high rate of interest received during the early part of the year, must, however, be considered exceptional.

The total earnings of the company for the year were $79,186.52, being slightly in excess of those of 1893; the total payment of interest amounted to the sum of $76,305.52—very good evidence of the general high character of the company's securities.

The amount invested on mortgages on real estate during the year was $110,533, and the amount of repayments on principal moneys of mortgages on real estate was $111,806. The total amount placed for investment with the company in debentures and deposits is now represented by the sum of $910,240.05, being an increase as compared with 1893 of more than twenty thousand dollars.

The security the debenture holders and depositors hold for this liability of the company is as follows;

Mortgages on real estate and other small assets of the company		$1,339,614 96
Company's offices		7,000 00
Cash in banks and on hand		46,609 32
Capital subscribed but not called in		200,000 00
		$1,593,224 28
Liability		910,240 05
Balance in excess of the company's liabilities to its debenture holders and depositors		$ 682,984 23

The large amount of $40,097 18 has been paid to depositors during the year as interest on their deposits. The results of the year's business, considering the times, must, on the whole, be considered gratifying, and the directors have great pleasure in submitting them to the shareholders.

In conclusion, your directors have great pleasure in testifying to the zeal and efficiency of the officers of the company in the discharge of their various duties.

JOHN MULLIGAN,
President.

Port Hope, Jan. 15th, 1895.

		$1,393,224 28

GEORGE M. FURBY,
Manager.

We, the undersigned auditors, hereby certify that we have compared the company's vouchers with the cash book, checked the postings from the cash book and journal to the different ledgers, tested the various ledger balances and compared the same with the balance sheets, compared the various securities of the company with the registers, and found all correct and in good order. The above balance sheet gives a true statement of the position of the company as shown by the books on the 31st December, 1894.

HENRY WHITE, }
J. D. SMITH, } Auditors.

Port Hope, January 18th, 1895.

The president then moved the adoption of the report as follows:—

In moving the adoption of the report which—together with the financial statement—has just been read, I do not propose to make any lengthened remarks.

The business of the year has on the whole been satisfactory and affords ample grounds for encouragement, notwithstanding the partial failure of crops in the district covered by the company's operations, the great depreciation in the value of landed property and the continued low prices prevailing for most of the products of the farm.

It will be observed that no portion of the surplus earnings of the year has been added to the Reserve fund. The whole amount, some $7,044. has been placed to the credit of the Contingent account. The amount of this account is now more than $13,000, and is ample, if not more than sufficient, to cover all possible losses on properties foreclosed or held for sale. I am pleased to be able to certify that all the lands that have been taken over by the company, with perhaps a single exception, are of a productive character, well situated and yielding fair rents for the times, and as to the exception referred to, I have reason to believe that this year we shall realize a fair revenue from it and continue to do so in time to come. Reference is made in the report to the active demand for the company's funds in the early part of the year, and to the satisfactory rates obtained. It is pointed out, however, that this condition of things, so far as rates are concerned, must be considered exceptional. There can be no question that the tendency of rates for the best class of securities is a downward one. It therefore follows that the earning power of this company, and of similar ones, will on this account in the future be diminished. Some companies have already reduced their dividend and probably more will find it to their advantage to follow in the same direction. As an evidence of the high character of the securities of the company the report refers to the very satisfactory payments made during the year, on account of interest—$76,305—the total earnings for the year being $79,186; as emphasizing this statement I may add that the sum of over $22,000 was also paid on account of principal on ninety-seven of the company's mortgages during the year in sums of from $100 to $500. I may also state that the payments of interest for the month of January this year are largely in excess of those made in the corresponding month of last year. The high position of credit accorded to the company continues to be maintained, and notwithstanding the fact that the rate of interest paid on debentures has been lowered, there has been an increase in the amount invested with the company. There is evidence of restricted operations and diminished earnings everywhere to be seen, and it may be found necessary in the near future to reduce the rate now paid on deposits, and still further the rate upon debentures. I have no doubt if this course be decided upon by the directors the change will be cheerfully accepted by our depositors. As an evidence of the zeal of the directors in guarding the interests of the company, I think it proper to state that it is their practice from time to time to go through the list of mortgagors in arrears and carefully scrutinize every account—giving the management their valuable advice in dealing with each case, and speaking generally, I feel that I cannot speak too highly of the careful attention given by the directors to the business of the company.

In conclusion, I feel that I am warranted in repeating that the report must be considered as a favorable one. It must be admitted that there is extreme depression in the country—that there has been a serious shrinkage in the value of all landed property—but, notwithstanding this, I have unbounded faith in our good Province of Ontario. Perhaps in our time, or in the time of most of us here, we shall not see the high prices of the past, but that we shall again have good crops and comparatively prosperous times I have no fear or doubt.

In justice to the manager and office staff, as

well as to the inspector, I may here state my high appreciation of their diligence to the company's business and their faithful services during the year.

Mr. Mulligan then referred to the recent address of Mr. Blaikie, president of the Canada Landed and National Company, quoted portions of it, and concluded by moving the adoption of the report, which was seconded by Mr. Burnham, the vice-president, and carried.

The auditors, Messrs. Smith and White, were re-elected, and Messrs. Craick and Dingwall appointed scrutineers. Upon a ballot being taken the former board of directors were re-elected, viz.; Messrs. John Mulligan, H. H. Burnham, J. W. Clemesha, M.D., Wm. Quay, J. H. Helm, Wm. Henwood, and A. W. Pringle.

Mr. Mulligan was afterwards re-elected president, and Mr. H. H. Burnham vice-president of the company.

HAMILTON PROVIDENT AND LOAN SOCIETY.

The twenty-third annual meeting of the shareholders of the Hamilton Provident & Loan Society was held on Monday, 4th March, at the society's office, Hamilton. There were present: Geo. H. Gillespie, A. T. Wood, T. H. Macpherson, Geo. Rutherford, W. R. MacDonald, Alex. Turner, W. H. Glassco, H. D. Cameron, E. A. Rhys Roberts, Jas. W. Simpson, John Crerar, Q.C., Geo. H. Bull, C. Ferrie, D. M. Cameron, W. A. Robinson, Geo. LaRiche, R. J. Hearne, P. M. Bankier, P. D. Crerar.

The president, George H. Gillespie, occupied the chair, and the treasurer, H. D. Cameron, acted as secretary.

The secretary read the following report and financial statement:

REPORT.

The directors herewith submit their twenty-third annual report for the information and approval of the shareholders.

The amount loaned during the year amounted to $433,113.48, while the amount received from borrowers amounted to $713,748.65.

The net profits of the year, after paying and providing for all due and accrued interest on borrowed capital, paying cost of management, and providing for losses and all other charges, amount to $84,540.30, out of which two half-yearly dividends, at the rate of 7 per cent per annum, were paid, together with the personal property tax, and the balance, $6,540.30, carried to the Contingent fund. The Reserve fund now amounts to $300,000, and the Contingent fund to $36,567.30.

The repayments on account of principal and interest, both in Ontario and Manitoba, were satisfactory.

The directors have during the year steadily pursued the policy of lending on the choicest securities, and accepting money on deposit and debentures at the lowest rates of interest.

All of which is respectfully submitted,

GEORGE H. GILLESPIE,
President.

7th February, 1895.

FINANCIAL STATEMENT FOR THE YEAR ENDING 31ST DECEMBER, 1894.

H. D. CAMERON,
Treasurer.

We hereby certify that we have examined the books, accounts, and vouchers of the Hamilton Provident and Loan Society, and have found the same correct. We have also examined the securities (excepting those relating to Manitoba loans), and find them in perfect order and correct, as set forth in the above statement.

W. F. FINDLAY, F.C.A.,
MAITLAND YOUNG,
Auditors.

Hamilton, 9th February, 1895.

On motion of the president, seconded by the vice-president, the report was adopted.

William F. Findlay and Maitland Young were re-appointed auditors.

The following gentlemen were re-elected directors, viz.: G. H. Gillespie, Alex. Turner, Wm. Gibson, M.P., W. R. MacDonald, W. H. Glassco, A. T. Wood, Thos. H. Macpherson, and Geo. Rutherford.

At a meeting of the directors held subsequently, G. H. Gillespie was elected president, and A. T. Wood was elected vice-president.

GUELPH AND ONTARIO INVESTMENT AND SAVINGS SOCIETY.

The nineteenth annual meeting of the shareholders of this society was held at the society's office, corner Market square and Wyndham street, Guelph, February 20th, 1895, the president, D. Stirton, Esq., in the chair.

Among the shareholders present were Messrs. A. J. Brewster, John M. Bond, Hugh Black, James Cormack, T. J. Day, J. A. Davidson, Robert Forbes, James Forrest, H. Howitt, M.D., Wm. Hunter, Jas. L. Halley, C. E. Howitt, James Innes, M.P., J. W. Kilgour, Hugh Kean, J. J. Kelso, John Kitching, jr., Alfred Lace, Robert Melvin, Harry Murton, J. E. McElderry, Alex. McPhedran, B. R. McConkey, John McKinnon, A. McKinnon, M.D., John Phin, Jas. P. Phin, Daniel Porritt, George Parkinson, A. B. Petrie, jr., Jos. Smith, Geo. Shortreed, and Robt. Torrance, D.D.

The secretary, Mr. J. E. McElderry, read the annual report and financial statement as follows:

REPORT.

The directors of the Guelph and Ontario Investment and Savings Society present to the shareholders their report for the year ended December 31st, 1894.

After paying all costs of management, municipal tax on dividends, interest on deposits and debentures, etc., etc., the net profits, including $4,361.46, brought forward from last year, amount to $48,048.71. This sum has been appropriated as follows:

Dividend No. 36, paid 2nd July, 1894, 8 per cent.	$16,909 67
Dividend No. 37, paid 2nd January, 1895, 8 per cent.	16,909 67
Carried to reserve fund	6,500 00
Balance carried forward	7,729 37
	$48,048 71

The reserve fund now amounts to $155,000, and the total assets of the society are $1,709,022.21.

During the year applications for loans amounting to $336,685 were received, and from these investments on mortgage security to the amount of $150,483.32 were selected and granted.

The value of real estate held by the company is $41,960. This sum includes all properties remaining unsold which have come into possession of the company by foreclosure, failure to obtain purchasers under power of sale or otherwise. The directors have thought it wise to make a substantial addition to the Contingent Fund out of this year's earnings to provide for any possible loss that may arise out of the disposal of these properties.

The officers of the society continue to discharge their duties to the satisfaction of the board.

As usual, the books and accounts have been carefully examined every month, and the auditors' report is presented herewith.

All of which is respectfully submitted.

DAVID STIRTON,
President.

WILLIAM ROSS, Secretary.

We have audited the books and vouchers of The Guelph and Ontario Investment and Savings Society monthly during 1894 and found them correct. We have also examined the mortgages and calculated the value and earnings of each one separately, proved the bank balances, and certify that the foregoing balance sheet is a correct statement of the company's affairs to 31st December, 1894.

A. J. BREWSTER,
J. W. KILGOUR,
Auditors

Guelph, January 25th, 1895.

In moving the adoption of the report, the president said:

I speak for the managers of the society when I say that we are pleased to see such a large number of shareholders so much interested in the affairs of the society, as shown by the attendance at this meeting. In connection with the report presented, I may say that I do not feel it necessary for me to go into anything like a statement of the financial condition of the country—we find this question thoroughly discussed in all the newspapers. But it may be well for us, in considering the report of the year's business, to give some attention to the

actual state of those matters. The financial depression which has prevailed throughout the greater part of the civilized world has made its effects felt very seriously in our own country, and our agricultural interests particularly have suffered to a very great extent. The shortage in our crops, caused by the excessive drouth which prevailed during last summer, together with the very great reduction in the prices of both grain and stock, have made serious inroads on the income of our farmers, and as a natural consequence the value of farm property has declined very materially. This unfortunate state of affairs has had a most telling effect on the business of such enterprises as ours, whose dealings are in the most part with farmers; in fact, it has become almost impossible to fix a true value on farm lands, and to sell such properties, even at greatly reduced prices, is most difficult. I am hopeful, however, for a revival ere long. Through the indefatigable energy of our agriculturists, I am hopeful we will overcome those difficulties and resume again our proper, normal condition. Such being the state of matters, and having to contend with the difficulties I have mentioned, I think you will agree with me that we are exceedingly fortunate in being able to present so favorable a statement of our operations during the past year.

Under those trying circumstances, your board have felt that they would best serve your interests by pursuing a conservative course in carrying on our business. We felt that to extend our business to a degree anything like as great as that followed in previous years would be injudicious, and would have shown a lack of judgment and care in our dealings with your interests, and we have, therefore, kept it within the strictest limits compatible with profitable investments.

It is to be observed that in 1893 we derived an income of $3,143 from premiums on stock. No new stock was issued in 1894. Then a large number of our old mortgages matured, and had to be renewed at a lower rate of interest than they were then bearing, as the old rates are not now obtainable. These and other reasons have tended to reduce our profits somewhat. We, however, have been able to pay you the usual dividend, and have added to reserve fund and carried forward a very substantial amount, which I consider is a most satisfactory showing. For the future I think we may make up our minds that money is to be cheaper, and you, gentlemen, must not be disappointed if your earnings are not as large as they have been.

I do not think it is necessary for me to say anything more in regard to the report. I shall be pleased to make any explanations that may be desired.

I am glad to say that the officers of the society continue to give entire satisfaction. I consider that we are fortunate in having so efficient a staff.

Our late secretary, Mr. Ross, who has been with us for a length of time, found that his general health was unequal to the strain placed upon it by the volume of our business, and at the end of the year, believing it to be his safest and wisest course, tendered his resignation, which, in justice to him, we felt it our duty to accept. With regard to his successor, Mr. McElderry, I need say but little. He has long been an active director of the society, and as such has been in a position to acquire an amount of information in regard to the affairs of the society which no outsider could obtain. This, together with Mr. McElderry's well known and successful business career, I think fully justified the directors in appointing him manager of the society, and in expecting good results from the appointment.

Mr. Robert Melvin seconded the motion for the adoption of the report, and said: In the absence of the vice-president, the duty of seconding this motion falls upon me; but after the thorough explanation given by the president, I do not think it is necessary for me to say much. There is only one feature of the report, that of "amount of property on hand," which we regard as not entirely satisfactory, and that, I am sorry to say, we cannot help. I think we have done quite as well this year as last. The net earnings this year, after taking off the balance carried forward, were $43,687.25, or 10½ per cent. on the entire capital stock. On the whole I think we stand fully as well as could be expected, considering the hard times. Our Reserve last year was about 35 per cent. of the paid up capital; and I find on examining the reports of some of the largest and best companies in Canada, that many having a greater percentage of reserve, have not earned proportionately as much as we have, and by comparison with these companies' reports, I find that we have done quite as well as any, and better than some. There has been guarded and constant watching given by the directors; the books were carefully gone over, and the securities watched most closely. Some of the managers of other companies state that they see no reason why they should not be able to give in the future the same proportion of profits as in the past, because they are getting money at lower rates. I differ from those gentlemen, because nearly one-third of the capital invested is our own money. We get the balance at a lower rate of interest, but not this. I have no hesitation in saying, however, that by proper care and attention, the Guelph and Ontario will continue to hold the same relative position to the other companies that it does to-day.

The motion for the adoption of the report was carried unanimously.

On motion of Mr. J. M. Bond, seconded by Mr. McConkey, Messrs. Brewster and Kilgour were appointed auditors for the ensuing year.

The scrutineers, Messrs. James Cormack and T. J. Day, reported the following gentlemen elected as directors, viz., Messrs. D. Stirton, A. B Petrie, Robt. Forbes, Robt. Melvin, H. Howitt, M.D., John Phin, James P Phin, James Innes, M.P., John M. Bond

Mr. Brewster moved, seconded by Mr. Innes, that the thanks of this meeting be tendered the scrutineers for their services, and that their report be received. Carried.

Moved by Rev. Dr. Torrance, seconded by Mr. John McKinnon, that a vote of thanks be tendered to the officers of the society for their services during the past year. Carried

At a subsequent meeting of the board, Mr. D. Stirton was re-elected president, and Mr. A. B. Petrie, vice-president.

FEDERAL LIFE ASSURANCE COMPANY.

The thirteenth annual meeting of this company was held at the head office in the city of Hamilton, on Tuesday last, Mr. Wm. Kerns, M.L.A., vice-president, in the chair, when the following report was submitted:

REPORT.

Your directors have much pleasure in submitting herewith for your approval the thirteenth annual statement of the company, showing the amount of insurance written, the receipts and disbursements for the year 1894, also the assets and liabilities of the company at the close of the year.

Fourteen hundred and one applications for insurance, amounting to $1,974,700, were received during the year; of these applications twelve hundred and sixty-one were accepted for $1,761,700. The remainder were either declined or in abeyance, waiting further information, at the end of the year.

The insurance written was of a most desirable class, both in the rate of premium and in the distribution of the risks over a large number of lives for the amount assured.

The aggregate amount assured by the company was not increased, though more than three hundred lives were added to those previously insured.

The assets of the company were increased during the year by $52,709.48, and the reserve liabilities by $41,914 99, the difference of nearly $11,000 being an addition to the company's surplus of the previous year. A very satisfactory result in view of the considerable amount paid to policy-holders for claims and profits.

The security to policy-holders, including guarantee capital, was, at the close of the year, $1,051,610.78, and the liabilities for reserves and all outstanding claims $336,675.03, showing a surplus of $714,945.75. Exclusive of uncalled guarantee capital the surplus to policy-holders was $95,132.75.

The death claims of the year amounted to $95,759.34 (re-insurance deducted), under 36 policies; a reduction of eleven in the number of deaths and about $7,000 in the amount insured.

The depression in nearly all branches of business has been much felt throughout the country, inducing great care as to new engagements and some difficulty in the continuance of existing contracts. On the whole, however, the results of the company's business during the year have given your directors much satisfaction. The outlook for the current year is of the most promising nature, our new business being greatly in excess of, and the mortality much less than, that for the corresponding months of last year.

We have an excellent staff of agents, who are doing a good work, and will, with such support as the company is now able to give them, make very favorable returns during the year in all branches of their agency work

In surrendering our trust into your hands, we have to congratulate you upon the excellent record of the company for its upright business methods, for its good returns to policyholders, and upon its continued progress in all departments pertaining to the welfare of its policyholders, and which constitute a sure foundation for future prosperity.

The accompanying certificate from the company's auditors vouches for the correctness of the statements submitted herewith, all accounts, securities and vouchers having been examined by them.

JAS. H. BEATTY,
President.
DAVID DEXTER,
Managing Director.

AUDITORS' REPORT.

To the President and Directors of the Federal Life Assurance Company:

GENTLEMEN,—We have made a careful audit of the books of your company for the year ending 31st December, 1894, and have certified to their correctness.

The securities have been inspected and compared with the ledger accounts and found to agree therewith.

The financial position of your company as on 31st December is indicated by the accompanying statement.

Respectfully submitted,
H. STEPHENS,
SHERMAN E. TOWNSEND, } Auditors.
Hamilton, 2nd March, 1895.

Paid-up and guarantee capital ..		$700,000 00
Amount assured		$10,521,137 34

The adoption of the report was moved by Mr. Kerns, seconded by Dr. Burns, and carried unanimously, after favorable comments from the mover, seconder, and other shareholders.

The medical director, Dr. A. Woolverton, submitted an interesting report and analysis of the death rate experience of the company for the year, for which he was tendered a vote of thanks.

The retiring directors were re-elected and the auditors re-appointed.

At a subsequent meeting of the directors the officers of the board were all re-elected.

Debentures for Sale

CORPORATION OF OTTAWA

Tenders addressed to the undersigned marked "Tender for Debentures," will be received at the office of the City Clerk until 4 p.m. of Thursday, the 14th day of March, 1895, for the purchase of $301,733.33 of the debentures of this Corporation.

These debentures are payable at the end of 20 years, and bear interest at the rate of 4%, payable half-yearly, and will be made payable in sterling money in London, England, or in currency payable at Quebec Bank, Ottawa; tender to state which preferred.

The highest or any tender not necessarily accepted, and delivery to be made from the Quebec Bank here.

Further particulars can be had from the City Treasurer, Ottawa.

JOHN HENDERSON, City Clerk.

Ottawa, 23rd Feb'y, 1895.

CHARLES DRINKWATER,
Montreal, Feb'y 23rd, 1895. Secretary.

TENDERS

INDIAN SUPPLIES

Sealed Tenders addressed to the undersigned and endorsed "Tender for Indian Supplies," will be received at this office up to noon of Tuesday, 9th April, 1895, for the delivery of Indian Supplies, during the fiscal year ending 30th June, 1896, at various points in Manitoba and the North-West Territories.

Forms of tender, containing full particulars, may be had by applying to the undersigned, or to the Assistant Indian Commissioner at Regina, or to the Indian Office, Winnipeg. The lowest or any tender not necessarily accepted.

This advertisement is not to be inserted by any newspaper without the authority of the Queen's Printer, and no claim for payment by any newspaper not having had such authority will be admitted.

HAYTER REED,
Deputy Superintendent-General of Indian Affairs.

Department of Indian Affairs,
Ottawa, February, 1895.

EXCELSIOR LIFE INSURANCE COMPANY

A large number of shareholders were present and took part in the proceedings of the annual meeting of the shareholders of the Excelsior Life Insurance Company, held on Tuesday, the 12th February, at the company's head offices, corner of Adelaide and Victoria streets, Toronto.

Among them were the following: E. F. Clarke (president), J. W. Lang, Thomas Long, Rev. S. Tucker, Rev. John Alexander, Ald. John Hallam, Ald. J. J. Graham, E. H. Tallmadge, Captain Charles Hood, David Fasken, B.A., Wilbur Grant, James W. Lee, T. R. Whiteside, H. M. Boddy, E. Marshall, Toronto; Hon. Peter White, M.P., R. W. Gordon, of Pembroke; E. W. McKean, R. B. Burt, Hamilton; James Gillies, Carleton Place; David Barr, Renfrew; S. J. Parker, Owen Sound; W. J. Macfarland, A. Macpherson, Markdale; Geo. E. Weir, Dresden; John Urquhart, M.D., Oakville.

A large number of the company's chief agents were also present.

The directors' annual report (with the auditors' and actuary's certificates) were read.

REPORT.

The report of the company's operations for the year ending Dec. 31st, 1894, which your directors have the honor of presenting, is replete with evidences of general prosperity. Gains all along the line, in new business, in business in force, in assets, in receipts for premiums and interest, are shown. When it is considered that these results were achieved in a time of very general business depression, and that the company's operations have been confined to the Province of Ontario, the success attained must be considered very satisfactory. When all the reports of the year are published it will be found that few (if any) companies have secured a larger volume of business in the province.

The applications for the year were 953 for insurance amounting to $1,216,750; 864 policies were issued or revived for $1,084,750; 43 applications for $69,500 were declined, and 44 applications for $62,500 were incomplete or under consideration. The insurance in force on December 31st was $2,329,733.15, showing the most satisfactory gain of $613,813.15.

The receipts from premiums and interest amounted to $61,467.16, an increase of $16,593.92 over the previous year, and the reserve increased $28,412.60, now amounting to $87,003.12, and total net assets $27,002.11, the amount now being $149,087.70.

The gross assets now amount to $447,352.10, and the surplus security on policy-holders' account $353,158.16, a sum large enough to convince the most sceptical that the security afforded the company's policy-holders is unsurpassed.

The amount paid in death claims during the year was $9,000, of which 2,000 was outstanding from the previous year, awaiting completion of claim papers. It is a source of congratulation to your directors that the company should continue to experience such an astonishingly low death rate. This point alone will prove a strong factor in ultimately providing satisfactory returns from your investment.

After making a moderate allowance for the management and collection of old business, it will be seen that there has been a substantial reduction in the ratio of expenses to new business.

The net interest of the year was the comparatively large sum of $5,246.22, proving that the company's assets, which continue to be selected with the greatest care, are most productively as well as safely invested

Your directors believe, from an analysis of the business, that the company has now reached that period of its career when the accretion from old business will be sufficient to offset the temporary deficits incurred in writing new business, and that subsequently the company should be in a position to make a distribution of profits at an unusually early period of its career.

The procurement of a Dominion license has received a great deal of attention at our hands during the year. It was, however, found impracticable to obtain the license in time to have the company's business appear in the Dominion blue book for 1894. The directors for the ensuing year will doubtless be enabled to comply with the requisite formalities, and thus have the report for 1895 appear therein.

The progression, present position, and future prospects of the company should prove a source of much satisfaction.

In moving the adoption of the report the president stated that they had reason to congratulate themselves on the results attained

CHURCH'S ALABASTINE

The Permanent Wall-Coating.
Does not RUB or SCALE from any hard surface.
Coat over coat can be applied.
No more washing or scraping of walls necessary.
Alabastine is The Sanitary Wall-Coating.
Displaces Kalsomines, which decay on the wall.
Equally adapted for Ornamental work and plain Tinting.
Pleases Painters as well as the general public.
Easily applied by anyone who can handle a brush.
Sixteen beautiful tints and White.
Put up in Five-pound packages, and never sold in bulk.
The only Wall-Coating that can be mixed in cold Water.
No hot water being needed. SAVES TIME AND WASTE.
Full directions for use on every package.
Sold by leading Hardware and Paint dealers everywhere.
Our book "The Decorator's Aid," furnished Painters.
Ask your dealer for Tint-Circular showing colors.
BEWARE OF IMITATIONS bearing similar names.

during the past year. It should not be forgotten that the entire period covered by the company's operations was one of general depression. Many financial institutions had lost ground, or had barely held their own. Notwithstanding the adverse conditions that have prevailed, the result of the year's work can but prove a cause for satisfaction. He was able to report substantial progress in spite of what would appear to some people insurmountable obstacles and difficulties. In the face of the keenest competition, the handsome gain in new business written and in force, the large increase of income, and the substantial addition to the assets had been made solely on the merits of the company by the honest and persistent work of its representatives. The present year will end the company's first quinquennial, and the indications are that our policy and share holders will reap a satisfactory return from their investments. With their hearty co-operation the year 1895 will surpass the records of this or any other company.

The Hon. Peter White, Rev. S. Tucker, Mr. Gillies, Mr. Tallmadge and other shareholders addressed the meeting, and asked numerous questions respecting different items appearing in the report, and about the company's business generally, and expressed themselves as perfectly satisfied with the explanations given and with the report just presented.

Rev. Mr. Alexander considered that all interested had very good reason to be gratified with the condition of the company as shown by the report. The prospects of the company could not be better than they are.

Dr. Ferguson, medical director, in responding to a vote tendered himself and the medical examiners, said: The company was to-day in a position which will compare favorably with that of any other company of the same age and condition whose operations had been confined to such a limited sphere. The great causes of mortality had been carefully guarded against in considering the desirability of risks for insurance. The mean average of death rate of the year was 3.40. In this respect the company's record was unparalleled in the annals of life insurance. This fact, taken in connection with the company's low expense ratio, which was 5 per cent. lower than the previous year, and this without making any allowance for the collection of old business, was conclusive evidence that an unusually large percentage of profits would accrue on the company's policies.

The president, in tendering thanks unanimously voted the company's agents, stated that a glance at the agents present was sufficient to show that the company's interests were in good hands. They were a body of gentlemen that any company might be proud of. Right royally had they served the Excelsior, and had honorably conducted their business with the insuring public. It was a source of much pleasure to witness the excellent *esprit de corps* and good feeling that permeated the entire agency force.

Mr. Kerr, auditor, in thanking the shareholders for his reappointment, said: The duties of himself and his co-auditor, Mr. Grant, had been made pleasurable by the cheerful readiness with which everything was opened to their view. The business and records of the company were conducted in a most concise and comprehensive manner. Their examination had been most thorough, and it was with much pleasure he was able to report that the result was exceedingly satisfactory. His fifteen years' practical experience of the business of life insurance, and the thorough knowledge he had of the company's affairs, warranted the statement that, metaphorically speaking, the summit of the mountain had been reached, and the broad valley of prosperity and success was now displayed to view.

The following gentlemen were elected directors of the company for the ensuing year:—

E. F. Clarke, J. W. Lang, Thomas Long, Toronto; Hon. Senator Gowan, K.C.M.G., Barrie; Hon. Peter White, M.P., Pembroke; John Ferguson, M.D., M.A,, L.R.C.P., Ald. John Hallam, Toronto; S. J. Parker, Owen Sound; George E. Weir, Dresden; J. R. Armstrong, Ottawa; David Fasken, Toronto; John Urquhart, M.D., Oakville; David Barr, Renfrew; S. A. Macvicar, Sarnia; W. J. Macfarland, Markdale.

The most successful meeting in the history of the company closed after a vote of thanks had been tendered the head office staff and suitably responded to by the secretary.

At a subsequent meeting of the board of directors Mr. E. F. Clarke was re-elected president, and Messrs. J. W. Lang and S. J. Parker, vice-presidents. Mr. Parker was also added to the executive committee.

Correspondence.

COMMERCIAL TRAVELLERS AND RETAILERS.

Editor MONETARY TIMES:

SIR,—The other day I received a nice letter from a wholesale dealer in Montreal, telling about the hard circumstances of doing business now for us retail folks, and saying how it was hard on the wholesale man too, these days.

Just about the same time I saw a circular from a Toronto dry goods firm of wholesale importers, talking about the unfair competition of city departmental stores, and telling us retai dealers we ought to visit the city, because there are plenty of job lots going that they can't sell through their travellers. This was very kind of these folks, and plenty of the wholesale men can talk and write very well.

Sometimes I feel like telling them they ought to use the wisdom on themselves that they practice on us in writing to us. One way they might protect their customers would be, so it seems to me, to quit selling to any man who asked for credit, and wanted to go into competition with their customers.

There was somebody wrote in the Christmas MONETARY TIMES a skit on a Montreal house and a Toronto house, and a Mr. Bright Eyes, and I guess it was the circular brought it to my mind. Anyway there are people like Macswattle all around us. You might say the woods are full of them. And yet commercial travellers, like that Jim Shipsole in the story, will go on selling them and hurting us. I don't blame the travellers; I blame the people that hire the travellers.

Feb. 23rd, 1895. PERTH COUNTY.

BANKRUPT STOCKS

Editor MONETARY TIMES

SIR,—We hand you a circular received from one of the large wholesale houses in Toronto It has reference to the large departmental stores and the difficulty to compete with them.

We think if you look into the matter you will find the number of bankrupt stocks thrown on the market has more to do with the strong competition than the large departmental stores. You may go into any town in the Dominion and what will you find? One or two Cheap Johns, cutting and slashing right and left, selling goods bought at auction *in Toronto*, and they keep on replenishing their stock from the same source. And what do you see as the result? The honest merchant, in order to hold his trade, has to mark his goods, bought in the regular way, at cost or below. And as no merchant can do business without a living profit, the end is not long coming, and another bankrupt stock is advertised to swell the list.

How long this thing is to go on is for the wholesale trade to say. Instead of doing all they can to put a stop to this business, you will often see them sending lines to the auction rooms to help the thing along. The sooner they wake up to the fact that THEY ARE PAYING for all this in the end, the better it will be for themselves.

I remain, yours, etc.,

ONE WHO IS MAKING AN EFFORT TO PAY 100 CENTS.

—Forty lumbering plants on the Saginaw River in Michigan during the past year produced 481,244,000 feet of lumber, the smallest output since 1868. High water mark was reached in 1892, 1,011,274,905 feet.

—The year 1894 seems to have been a bad one for the steel rail manufacturers of America, for their output was the smallest since 1885, according to the annual statement issued by the American Iron and Steel Association.

SEVERAL of the London banks, when recently explaining the reduction of their dividends, referred to losses in British possessions in North America as a reason for diminished profits, quite apart from the unsatisfactory state of trade in this country. The banks having more direct relations with our possessions in North America show equally bad results To-day the report of the Bank of British Columbia has been issued, and the dividend and bonus announced made a total distribution of only 8 per cent. for the year as compared with 10 per cent. per annum for the six years ended December 31, 1893.—*Glasgow Herald, 13th Feb.*

MONTREAL MARKETS.

MONTREAL, March 6th, 1895.

ASHES.—Some 52 brls. of pots were shipped on Saturday last, 30 going to Liverpool, and the balance to other parts of Britain. There are now in store 138 brls. The receipts for February were small, only 79 brls. as compared with 157 brls. last year. Prices are inclined to be rather stiffer; we quote $4.00 to $4.05 for first pots; seconds, $3.70; pearls, $6.00 to $6.10.

BOOTS AND SHOES.—It is pretty generally conceded that orders this year for spring footwear have fallen rather short of anticipations, and a good many houses are cutting less leather than they usually do at this season. Quebec city manufacturers are said to be rather busier, but we hear of goods being offered there at figures which cannot permit of any profit, and it is said some Montreal houses have preferred to buy in that market, rather than make up the goods themselves

CEMENTS AND FIREBRICKS.—There has been very little enquiry so far regarding cements for spring importation, whereas in former seasons a good many orders have been placed by this date. A quotation has been received from England, namely, six shillings, which is just about the opening price of last spring, and is equal to $1.90 laid down. For English brands in a jobbing way from stock, the figure is $2.10 to 2.15. Belgian, $1.90 to 2.05 Firebricks, $17 to $22 for regular brands.

DAIRY PRODUCTS.—Lent generally favors a larger consumption of butter, and some jobbers report a little improvement in demand, but the improvement is not at all active. Choice creamery in small lots sells at 20 to 21c.; Townships dairy, 16 to 18c.; Western is plentiful and cheap at 10 to 14c. There is a change for the better in cheese, and some moderate sales are reported at rather firmer figures. The cable quotation for white is sixpence better. The advance in eggs noted last week is fully maintained; limed stock is very scarce, and sales have transpired at 20 to 21c. New-laid are coming in very slowly and realize 26 to 30c. per dozen.

DRY GOODS.—The millinery openings have hardly attracted the attendance expected, especially from far-away points, and buyers are said to be operating carefully. Purchases of dry goods are also reported to be moderate, though the warehouses report a fair number of visitors. Travellers are home from the country in a good many cases, to revise samples for the sorting trip. Millinery payments on the 4th were hardly up to the mark, and general dry goods payments were a bare average.

GROCERIES.—An increased demand is noted for sugars, which are reported firmer in New York, but local quotation for standard granulated is still 3⅞ to 3¾c per lb. at the factory; yellows, 2⅞ to 3c. In other lines there is no special activity, and country grocery orders do not show much gain in number or volume. For teas a fair number of enquiries are being made, but we hear of no blocks moving since last report; the market, however, holds all the elements of firmness before noted. In coffees, some moderate transactions have transpired in Maracaibos and Rios. We quote Rio 18½ to 20c.; Maracaibo, 20½ to 22c.; Java, 25 to 28c.; Mocha, 26 to 29c. For molasses there is a good Lenten demand, this being an article largely consumed among our French Canadian farmers and working classes at this season. Stocks are light and values firm at 32½c. for choice Barbadoes in puncheons; barrels, 35c. There is a little more demand for canned goods, and corn and peas are getting scarce. Parties handling California raisins claim there is a prospect of more firmness in prices. Dried apples are in limited supply, and are firm at 5 to 5½c., while evaporated can be had at 6⅛ to 7c. Dates are very low in price, being quoted at 3¼ to 4c.

HIDES AND TALLOW.—Receipts of green hides continue light, and the quality is in many cases affected by the grub. Calfskins are beginning to be more plentiful. Dealers are paying on the basis of 5c. per lb. for No. 1 light, and find pretty ready sale to tanners at 6c.; heavies, 5½ to 6¼c.. calfskins 5c. per lb.; lambskins, 65c. each. Tallow quiet and easy at last quotations

LEATHER.—Prices continue firm in all lines, in sympathy with hides, and stocks are light all round, the product of most tanners having been curtailed of late. Splits are notably in small supply, and it is claimed a fair lot of choice Western splits was sold at 16½c. Shoe manufacturers are light buyers at the moment. We quote:—Spanish sole B.A. No. 1, 18 to 20c. do No 2 to B A., 17 to 18c. No 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 21c No 2 do., 17 to 18c common, 15 to 16c. American oaksole, 39 to 43c. waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c. western splits, 15 to 16c. Quebec do. 13c.; juniors, 11 to 13c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 28c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled

Electro Plating Silver, Nickel, Copper, Bronze, Blue Nickel and Brass Plating.

cow, 9 to 12c ; polished buff, 9 to 11c. ; glove grain, 9 to 10c. ; rough, 16 to 17c. ; russet and bridle. 40 to 50c.

OILS, PAINTS AND GLASS.—Further advance is reported in turpentine, the quotation for single barrels being now 50c. per gallon. Linseed and other oils remain as before, also leads and colors generally. Glass stocks are becoming reduced, and the discount on 50-box lots has been done away with. We quote :— Turpentine, 50c. per gallon for single barrels ; two to four barrels, 48 to 49c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c. ; castor, in lots, 6c. ; single cases, 6¼ ; tins, 6½c. ; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75 ; No. 1, $4.25 to 4.50 ; No. 2, $4 to 4.25 ; No. 3, $3.75 to 4 ; dry white lead, 4¼ to 4½c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75 ; yellow ochre, $1.50 to 1.75 ; spruce ochre, $2.25 to 2.50 ; Paris green, 12½ to 13c. in bulk, 14 to 14½c. in small packages ; window glass, $1.20 per 50 feet for first break ; $1.30 for second break ; third break, $2.80.

METALS AND HARDWARE.—No increased movement can be noted in these lines, and we cannot learn of any noteworthy transaction in Scotch pig iron for some time past ; a little is being done in domestic iron at $16.50 to 17. Bars have been sold at $1.55, it is said, in moderate lots, though most houses decline this figure except for car lots. Canada plates are in slow demand, and fewer sold this last season than formerly. Tinplates are also dull, and no import orders for spring have apparently yet been placed. In other lines there is nothing new. We quote :—Coltness pig iron, none here ; Calder, No. 1, none here ; Calder No. 3, none here ; Summerlee, $21.00 to 21.50 ; Eglinton, $19.50 ; Gartsherrie, none here ; Langloan, none here ; Carnbroe, $19.00 to 19.50 ; Shotts, none here ; Middlesboro, No. 3, $17 ; Niagara No. 2, $18.00 to 18.50 ; Siemens, pig, No. 1, $16.75 to $17.00 ; Ferrona, No. 1, $16.50 to 17.00 ; machinery scrap, $14.00 to $15.00 ; common do., $12.00 ; bar iron, Canadian, $1.60 ; British, $2 to 2.15 ; best refined, $2.40 ; Low Moor, $5.00 ; Canada plates — Blaina, or Garth, $2.05 ; all polished Canadas, $2.75 ; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30 ; No. 26, $2.15 to 2. 20 ; No. 24, $2.10 ; tin plates—Bradley charcoal, $5.25 to $5.50 ; charcoal I.C., $3.25 to $3.50 ; P.D. Crown, $3.75 to 4.00 ; do. I.X., $4.75 to 5.00 ; Coke I.C., $2.65 to 2.90 ; coke wasters, $2.65 ; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c. ; No. 26, 4c. ; No. 24, 3¾c., in case lots ; Morewood, 5¾ to 6c. ; tinned sheets, coke, No. 24, 6 to 6½c. ; No. 26, 6½ to 6¾c. ; the usual extra for large sizes, Canadian bands, per 100 lbs., $1.85 ; English ditto, $2 ; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal ; American steel plates, $1.90 to $2 ; ditto, three-sixteenths inch, $2.60 ; common tank iron, $1.65 to 1.75 ; tank steel, $1.80 ; heads, $2.85 ; Russian sheet iron, 10 to 10½c. ; lead, per 100 lbs., pig, $2.85 to 3.00 ; sheet, $4 to 4.25 , shot, $6 to 6.50 ; best cast steel, 10½ to 12c. ; toe calk, $2.50 ; spring, $2.50 to $2 75 ; tire, $2 to 2.25 ; sleigh shoe, $2 ; round machinery steel, $2.50 ; ingot tin, 15½ to 16c. ; bar tin, 25c. ; ingot copper, 9¾ to 11c. ; sheet zinc, $4.50 ; Silesian spelter, $4 to 4.25 ; American do, $4 to 4.25. Antimony 10½ to 12c. ; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs. ; annealed do, $2.70 ; galvanized, $3.35 ; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c. ; ⅜ inch, 4½c. ; 7-16 in., 4¼c. ; ½ in., 3¾ to 4c. ; ⅝ in., 3½c. ; ¾ in., 3¼c., ⅞ in., and upwards

WOOL.—Millmen are reported fairly busy as a rule, and there is expectation of rather better business. A new series of sales opened yesterday in London, and firm prices are looked for. We quote :—Cape, 13½ to 16c. ; Australian, 15c. ; B.A. scoured, 25 to 32c. ; domestic fleece, 19 to 22c. ; pulled supers, 20 to 21½c. ; extra, 23 to 26c. ; B.C. and Nor-West, 10 to 12c. per pound.

TORONTO MARKETS.

TORONTO, Mar. 7th, 1895.

GRAIN.—During the week under review little has taken place to excite special interest in this market. Wheat continues to hold firm, but shows no advance over last week's quotations. There is now but little trading in Manitoba wheat, and the only movement of any kind is to local millers. Deliveries from first hands are light. Barley is strong, with good demand and movement principally to the United States, but we do not hear of any large transactions. Active enquiries for oats are being received from Quebec and the Maritime Provinces, while the local trade is good. In view of this quotations have advanced, and holders are firm at 37 to 38c. Peas are not in large supply, and holders can dispose of stock to good advantage. The market has shown almost weekly advances for some time past, and quotations since our last report are from 1 to 2c. per bush. higher. There

THE OAKVILLE BASKET CO.

MANUFACTURERS OF

1, 2, 3 bushel grain and root baskets.
1, 2, 3 satchel lunch baskets.
1, 2 3 clothes baskets.
1, 2, 3, 4 market baskets.
Butcher and crockery baskets.
Fruit packages of all descriptions.

For sale by all woodenware dealers.

Mention this paper. Oakville, Ont.

STEAM'S NOT IN IT

Either as to cost or efficiency, with one of our celebrated ELECTRIC MOTORS.

See the one that runs the MONETARY TIMES big presses and freight elevator. Not the slightest jar and almost noiseless.

Write and we will call and see you.

is a good enquiry both for export and from the local trade for feeding purposes. Rye and corn remain purely nominal.

THE VISIBLE SUPPLY.

	Mar. 4, '95. Bush.	Mar. 3, '94. Bush.
Wheat	78,761,000	75,569,000
Corn	13,667,000	19,106,000
Oats	6,586,000	2,661,000
Barley	1,417,000	1,058,000
Rye	318,000	520,000

GROCERIES.—For the season a fairly steady trade is being done. In dried fruits California descriptions are at present receiving most attention; apricots are quoted at 11 to 13c.; pears, 10½ to 11c.; peaches, 11½ to 12½c. There is nothing special to note of raisins; off stalk are quoted at 3 to 4c.; and f.o.s at 4½ to 4⅝c.; layers are worth 5¼ to 6c., according to quality. The feature of the week is probably the firmness at which molasses is held. Brokers have not at the time of writing advanced prices, but their advices indicate the probability of an immediate advance of 2c. per gal., which may not unlikely be turned into 5c. before many days. At present New Orleans descriptions are alone affected, although it is more than probable that low grades of all kinds will in sympathy be quoted higher. The local jobbing trade have had a quiet week in sugars, and there is a general tendency to ease prices. Retail stocks throughout the country are heavy, and sales can be made only at a sacrifice in quotations. Teas continue active, and the strength of the price list has brought out a good demand. The Canadian Packers' Association are in session at time of writing.

HARDWARE AND METALS.—Some little improvement is to be noticed in the week's trading. Orders for spades, shovels, churns, milk can trimmings, etc., booked some time ago, are now being delivered. Barbed wire and ordinary fence wires are in much better demand, though quantities are not as yet large. While a few orders are still being booked for window glass, the bulk of the business is over and handed to the manufacturers. Enquiries for prices on builders' supplies are also coming in more freely, and from present appearances prospects for spring are good. Tinware is going out well. Plumbers' supplies are a little better. Orders for screen doors and wire are now freely booked for shipment in the latter part of this month. The metal trade is showing more life, especially in galvanized iron, tinplate, ingot copper, ingot tin, black sheet iron and tinned iron. With the exception of a further advance in rope no change in prices has taken place. Manilla, in quantities, is quoted at a basis of 8¾c., and sisal at 6¼c.

PAINTS AND OILS.—For paints there is fairly good demand for delivery in April, otherwise trade is quiet and prices without change. Dry colors are moving rather freely. Turpentine varnishes are higher, in sympathy with the advance in turpentine. Turpentine has materially strengthened within the last few days, and stands now at 48c. per gal. As we have previously noted, it is very difficult to arrive at the causes of the strength of the primary market. It is probably a matter of speculation, with the "bulls" uppermost for the time being. Merchants here say that a farther advance of 5 or 6 cents per gal. would surprise no one. White leads remain as last reported. For years English vermillion has been away down in price, but present appearances point towards this market attaining something like an old time basis. Carmine lake is stiffening in price, and stands quoted at $4.50 per pound.

PROVISIONS.—Trade is but fairly active. Butter continues unchanged and depressed. Choice large rolls are quoted at 13 to 14c.; tubs find slow sale, with medium quoted at 8 to 10c. per lb. Cheese is easy with a jobbing trade doing at 10 to 10½c. per lb. There is a rather firmer tone to the hog product market in consequence of an advance in the price of dressed hogs. Last week dressed hogs were quoted at $5.35 to 5.40, while they now stand at $5.75 per cwt. Deliveries are not liberal. There is, in the views of some merchants, every prospect of a smart advance in the price of hog products. New-laid eggs are quoted at 25c., while limed are worth 18c. per doz.; consumption at these prices is small, and a sharp decline in the market would surprise no one. Dried apples continue unchanged at previous quotations. Several car loads of evaporated were received this week, and are quoted at 7 to 9c. per lb.

SEEDS.—The export trade for the season is now pretty well over, and as the local consumption has hardly yet awakened, trade is at present in almost a standstill condition. However, a week's warm weather would do much towards the development of a good distributive movement. Merchants are paying the following prices: Timothy, $1.75 to 3.00; alsike clover, $4 to 4.25; red clover, $5.75 to 6.25. Selling prices are from 15 to 30c. per 100 pounds in advance of these quotations.

WOOL.—At this season of the year there is seldom anything interesting to say of the wool market. We read a statement recently that there was still in Canada a considerable quantity of last year's clip, but after careful inquiries we have failed to ascertain any evidences of it. In the vicinity of Hamilton it is true some merchants are holding a quantity of fleece, but the greater part of this, we are informed, is sold and held merely awaiting orders for shipment. The same may be said to a certain extent of Toronto, but one of the best authorities assures us that there is not more than 5,000 lbs. of domestic fleece wool in this city. Quotations of pulled stand as follows: combing, 20c.; super, 20c.; extra, 22c. per lb. There is a good demand from the United States for our combing wool, and merchants find a ready market for all receipts. Several cars are going forward this week. For the present importations from the American markets appear to have ceased.

" " " 1894, $4,239,050 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

WEALTH AGAINST COMMONWEALTH.

This is a history, by Henry Demarest Lloyd, of the origin and growth of the richest monopoly in the world, the combination known as the Standard Oil Trust.

More than sixty years ago it was known that illuminating oil of an excellent quality could be extracted from bituminous coal; and in 1860 there were more than threescore manufactories of it in this country. In that year it was first discovered that vast deposits of rock-oil lie under the soil of Pennsylvania and adjoining States. Throughout wide districts, wherein wells were driven, the oil flowed like water. The cost was almost nothing, and in ten years the native product could be bought in any quantity for ten cents a barrel. Thousands of men at once learned the simple business of distilling it for use, and refineries sprang up everywhere.

It seemed that no department of human activity offered less encouragement to the spirit of monopoly than the production, refinement, and distribution of this natural oil. Yet hardly five years passed, after the value of the great discovery became known, before a mysterious power was felt to interfere with the business in every branch, from the sinking of new wells to the final distribution of oil among consumers. The refiners were the first to suffer. Those who paid the standard prices announced by the railroads for transportation found themselves undersold. Their business became unprofitable. Many were compelled either to close their works or to sell them at nominal prices to a combination, the only purchaser. This little group of refiners, whose home was Cleveland, were masters of every important line of railway by which oil could be carried from the wells to the refineries, and thence to the several great markets. They had secret contracts with these roads, entitling them to enormous preference in rates, and even to a large bonus out of the higher rates charged to other shippers. Courts and legislatures, the men and committees of congress, were appealed to, investigations were held, every engine which public opinion or the business interests of the independent refiner could command, was tried in attacking these discriminations. But the result was everywhere the same. The business of refining oil became and remains practically a complete monopoly in the hands of the Standard Oil Company.

Some of the men who conceived the combination in question are now, by virtue of this monopoly which they have organized, princes among the millionaires of the world, with estates already equal to the proudest dukedom of England, and with incomes larger than those of many kings. It is the magnificence of this success which impresses the imagination of him who reads their exploits. The robber knights of Europe took their lives in their hands when they sallied forth in pursuit of plunder, and deeds of strength and daring, inspiring the novelist and the poet, divert the thoughts of readers from the outrageous wrongs they perpetuated and the frightful misery they inflicted. In a somewhat similar manner readers of the story of the great monopoly may for a time forget the injustice and oppression, the defiance of law and the contempt for the rights which the law is designed to protect, which have marked its whole career. They may even, for a time, be stirred to admiration of the ingenious devices, the persistent and vigorous pursuit of a fixed policy, the unremitting devotion of a number of conspirators to the interests of all, which have overcome the obstacles of law, morality, and public opinion, as well as those of ordinary competition, and secured to a handful of men the enjoyment and profit of one of nature's greatest gifts to mankind, almost as conclusively as if it were their creation. With this in view, it may be said that no more wonderful romance of real life has ever been written than Mr. Lloyd's book.—*Literary News.*

—We hear from Montreal that the bonds of the Quebec loan sold by the Government in September last at 77 have since been disposed of in the English market by the French bankers at 85½, which means a profit for them of $8.50 on each bond, or a total profit of $467,500. Not a bad transaction this for the French bankers, so far as profit is concerned. If the Province of Quebec likes, for the sake of dealing with *La Belle France*, to submit to such shaves as this, doubtless the polite and sharp-witted brokers of the French capital will encourage her.

GREAT JOURNALISTS.

At the banquet of the Ontario Press Association in Toronto recently, the toast "In Memoriam" was proposed by the new president of that body, Mr. L. W. Shannon, of Kingston. "It is a natural and laudable feeling," said Mr. Shannon, "that prompts us to remember to do honor to the eminent men who have gone before us. Sometimes they serve for examples, sometimes for warnings. The times change, new problems arise; the ideas and methods suitable for one generation are out of place in the next; but character and ability retain their value, and we are not true to ourselves nor to our best instincts if we fail to do homage to those wherever found and to preserve the recollection of them when their possessors have departed. The men whose names are associated in this toast were men of very different types. In general cast of mind, in disposition, in manner, as well as in political affiliations and the course they pursued in the actual world of affairs, they were the very antipodes of each other, but in one respect they were alike, they made their pens powerful instruments in determining the government of this country. They were statesmen-journalists, and realized the utmost capability of this honorable occupation, which they advanced and we humbly follow."

Mr. W. Buckingham was called on to speak of Hon. George Brown. In part he spoke as follows:

"Mr. Brown was undoubtedly a great man, both on the platform and in Parliament—the Rupert, indeed, of debate; possessed of what has been described as the fire of the true orator, which is never subdued, but always allowed to burn—bearing down all opposition by his mighty presence, his sonorous sentences, his torrents of vigorous thought poured forth in words of fire. As an orator, without doubt, Mr. Brown possessed extraordinary faculties, but, after all, there can be no question that he smote his mightiest blows when he smote with the glowing thunderbolts of the *Globe*. I believe that as a writer, even more than as a speaker, Mr Brown was the embodiment of his own doctrine of force, and when, with pen and voice combined, he assailed the walls of privilege, though buttressed round by authority, they came crashing to the ground."

Of that valuable public servant and true Canadian, Hon. Thomas White, Mr. A. F. Wallis said: "It was my good fortune to know the Hon. Thomas White, or Tom White, as he was affectionately called, in those days when he was passing from journalism into politics. Everybody recognized his great abilities as a thinker and a writer, but to me the qualities that were most prominent were his geniality and his unbounded sympathy for those who were young in the profession. Mr. White acquired great distinction, and I think his eminence can be attributed to the assiduity with which he waited. The impression he left behind him was emphasized by his leader, who found himself unable, because of the strength of his feelings, to announce his death to Parliament. A statesman weeping in public was certainly a marvellous tribute of affection. His character is best summarized in those words of one of Canada's most eloquent men—Mr. Laurier. Said Mr. Laurier: 'His untiring energy, his great industry, his vast and wide knowledge of all political questions, his aptitude for business, his skill in debate, his eloquence, all were a happy combination of varied qualities which render his demise a loss not less to the country than to his party.'" (Applause.)

RICHELIEU AND ONTARIO NAVIGATION COMPANY.

The annual meeting of the Richelieu & Ontario Co. was held in Montreal a week ago, the president of the company, Mr. N. K. Connolly, in the chair.

The report gave the gross receipts realized from steamers and from other sources at $696,015.91, and the expenditure and fixed charges to $571,735.50, leaving a balance of net profit $124,280.41. The suit entered against the insurance companies in connection with the loss of the "Corinthian" by fire has been settled, and the amount in full paid. The new issue of bonds, amounting to $600,000, at 5 per cent., authorized by the shareholders at the meeting called for the purpose, held on the 15th August last, for retiring $500,000 at 6 per cent., already issued, and for the consolidation of the debt of the company, have been satisfactorily placed in London. On motion of the president, seconded by Mr. W. Wainwright, the report and financial statement were adopted. Scrutineers for the election of directors having been appointed, there was no opposition, and the old board was returned, viz.: Messrs. N. K. Connolly, W. Wainwright, L. J. Forget, Jas. Swift, J. Louis, Hector Mackenzie, F. C. Henshaw, Michael Connolly, Rodolphe Forget and C. O. Paradis.

In replying for the directors to a vote of thanks, the president congratulated the shareholders on the success of the year's workings, and pointed out that for the first time in a long period the company had been enabled to pay a small dividend.

Mr. Gildersleeve, the general manager, said he thought he saw where the earnings could be increased another year and the expenses diminished, and, consequently, he had no fear for next year's results. The peculiarly strong position of the R. & O. N. Co. was that it had a number of separate and independent routes, each of which earned money by itself. No outside company or organization could successfully attack it in such a position, unless the opposing company organized independent and separate routes to each of the R. & O. N. Co.'s lines. He spoke hopefully of the future, and had no doubt of dividends.

Mr. N. K. Connolly resigned the presidency, in consequence of inability to attend to the duties. So Mr. L. J. Forget was chosen to succeed him, and Mr. W. Wainwright was re-elected vice-president.

A ROLL OF HONOR.

Eli Neaves, who was thirteen years old on his arrival in Canada from England in 1892, has already paid back to the Fegan Home the cost of his outfit and ocean fare, $50. What is more, this lad of sixteen sent to Mr. Fegan last Christmas the sum of forty-three dollars, to be used in helping other London boys as he had been helped. This we gather from a list of Fegan's old boys compiled by Mr. A. H. Brace of the Distributing Home on George street, Toronto, and called "A Roll of Honor." Sixty-one others of Mr. Fegan's lads have repaid their expenses in the same way during the last six years, and they are scattered all over Ontario on farms, or at trades, or in service. Mr. H. P. Dwight (who with Messrs. John Hoskin, Q.C., and James Hedley, are Mr. Fegan's Canadian committee) tells us that the amount contributed by 154 of these lads to an 1895 New Year's gift to Mr. Fegan was no less than $1,432. This handsome donation from grateful boys was made up of such sums as 50 cents and a dollar from little chaps who have just begun to earn, and such sums as $30 from Charlie Boyce, and $56 from Alfred Ritherdon, and $17.75 from Percy Avery. These lads do not forget the ladder that helped them up.

—The Urban Mutual Fire Insurance Company held their annual meeting at Portage la Prairie, Manitoba, last week, and re-elected the old officers and directors. Judge Ryan is president and W. P. Rundle manager. The amount at risk is now $500,000. The losses for 1894 were $1,000, the receipts $2,000. The surplus of assets on hand is $11,000, of which $2,000 is stated to be cash in bank.

—The farming interest is strong in the Ontario Legislature, there being in that body, it seems, 45 members who are either farmers or closely connected with farming interests. There are 16 lawyers in the House, 9 merchants, 7 lumbermen, 6 physicians, 4 newspaper men, 2 contractors, 1 real estate man, 1 auctioneer, 1 land surveyor, and 1 miller.

—The St. John *Globe* tells us something about items of the provincial revenue of New Brunswick in 1894. The succession dues yielded $4,804. Thirty-five fire insurance companies paid $4,083 of taxes, apparently in proportion to extent of business. The Government got $230 out of the Commercial Union and $189 out of the Western and so on. Sixteen life assurance companies paid $2,416, and there was some $200 more squeezed out of accident and guarantee companies. Nine banks paid $4,025: the Bank of Nova Scotia, $700; Bank of Montreal, $650; Bank of B. N. A., $600; Bank of New Brunswick, $550; Halifax Banking Co., $475; People's Bank, Halifax, $400; Merchants Bank, Halifax, $450; the People's Bank of N. B. and the St. Stephen Bank, $100 each; the Western Union and the C. P. R. Telegraphs, $250 each; the Canadian and Dominion Express Companies, $125 each.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office—Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses** and **contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

DECISIONS IN COMMERCIAL LAW.

BOND V. TORONTO RAILWAY COMPANY.—The Court of Appeal decides that having car buffers of different heights, so that in coupling the buffers over lap and afford no protection to the person effecting the coupling, is a "defect in the arrangement of the plant" within the meaning of the Workmen's Compensation Act.

BARNS V. DOMINION GRANGE MUTUAL FIRE INSURANCE ASSOCIATION.—Upon application for insurance for four years and the giving of his note for the premium, the applicant received an interim receipt containing the conditions, among others, that the insurance was subject to the approval of the directors, who should have power to cancel the contract within fifty days by letter, and that unless the receipt was followed by a policy within the fifty days the contract of insurance should wholly cease and determine. No notice of cancellation was given and no policy was issued. Held by the Court of Appeal that there was a contract of insurance, and that the provision for determination by the effluxion of time was a variation from the statutory conditions, which was not binding, not being printed in the required mode

ARTHUR V. GRAND TRUNK RY. CO.—The Court of Appeal holds that if water precipitated from the clouds, in the form of rain or snow, forms for itself a visible course or channel, and is of sufficient volume to be serviceable to the persons through or along whose lands it flows, it is a watercourse and for its diversion an action will lie. Where such a watercourse has been diverted by a railway company in constructing their line, without filing maps or giving notice, the landowner injuriously affected has a right of action, and is not limited to an arbitration. For such diversion the landowner, in the absence of an undertaking by the company to restore the watercourse to its original condition, is entitled to have damages assessed as for a permanent injury.

LAND SECURITY CO. V. WILSON.—An agreement for sale and purchase of several lots entered into between the plaintiffs and the defendant described the lots by their plan number, and, after providing for payment of the purchase money, part in cash and part at times fixed therein, with a right of payment, contained the words: "Company will discharge any of the said lots on payment of the proportion of the purchase price applicable on each." The defendant sold and assigned his interest in the agreement to a third person, who made sales of lots and parts of lots, conveyances being made to the purchasers by the plaintiffs, who also gave time to the third person for payment interest. Held, by Court of Appeal, that though the plaintiffs had no right to convey parts of lots, the defendant, even if merely a surety, was not wholly released by their doing this, and giving time for payment of interest, but that he was released as to interest in arrear when time was given, and was entitled to credit for the full proportion of purchase money of these lots of which parts had been conveyed

WOOD V. REESOR.—The Court of Appeal decides that a creditor cannot take the benefit of the consideration for a transfer of goods and at the same time attack the transfer as fraudulent, and an assignee for the benefit of the creditors has no higher right in this respect. Where therefore a creditor suing in the name of the assignee obtained judgment for the payment to him, as part of debtor's estate, of promissory notes given to the latter for, as was alleged, part of the purchase money of his stock in trade, it was held that it was then too late for the creditor to attack the sale as fraudulent

PREFERENTIAL ASSIGNMENTS

Reference was made last week, in another column, to the measure regarding assignments and preferences just adopted by the New Brunswick Legislature. Our correspondent sends us some further particulars. This measure, he says, will do something to prevent the dishonest assignments we have been used to, and will help to secure, if it does not entirely secure, to creditors equitable treatment in the distribution of estates. This new law can render void any judgment given to defraud his creditors by any insolvent person, knowing his condition. Preferences to any creditor, transfers of goods, likewise gifts and conveyances, are voidable. Provision is made for the debtor to assign to the sheriff of his county, who is compelled to give special security. Immediately upon the assignment all the estate of the insolvent passes into the hands of the assignee for distribution. The effect of the assignment is that the sheriff is in a position to proceed against any fraudulent transfers or preferences. The rights of all wage-earners are protected by the law. Provision is made for meetings of the creditors, and these may at any time appoint an assignee other than the sheriff Any proceedings authorized by the creditors at their meetings can be taken by the assignee only on the authority of a judge. In its provisions to secure the full benefit of all estates to the creditors, the measure compels the refunding of all moneys realized by the person to whom gifts or transfers have been made, if they have been disposed of. Assignments take precedence of executions

Mercantile Summary.

THE St. Thomas city council is considering the cost of an electric fire alarm system.

IMPORTS from Ontario and Quebec at the Buffalo custom house last year were $2,672,351 in value.

THE second annual dinner of the Waterloo, Ont., Board of Trade was held some days ago, the chair being taken by the president of the board, Mr. J. W. Fear.

CUSTOMS revenue at Victoria for February totalled $38,769.16. The value of the imports was $151,862, $50,907 worth of free goods and $100,955 dutiable.

A WORTHY and venerable journalist died last week, namely, Mr. Alexander Lawson, editor and proprietor of the Yarmouth *Herald*. He was over 80 years of age, and had printed and published a newspaper for over sixty years. Persons and parties unite in saying kind things of his kindness of heart, his modesty of demeanor, and his high standard of honor.

AN industrious and pushing man, W. T. Wickham, for twenty years a grocer in Brantford, is now obliged to ask his creditors to accept a compromise of 40 per cent. on liabilities of $40,000. He has nominal assets slightly exceeding $20,000. It is the old story of being anxious to do a large business with a small capital.

Watch this Space Every Week

We intend to use it for cuts descriptive of our new Folding Box, patented in Canada, the United States and Europe. A new cut will appear each week.

If you are interested in paper boxes it will pay you well to make further inquiries regarding this new style of box, as it is adaptable to nearly all requirements. We shall be issuing a full descriptive circular shortly.

THE Berlin-Waterloo Street Railway Company will introduce electricity on their system as soon as the weather permits

THE finance committee of the Hamilton city council has decided by 5 to 3 that the rate of assessment in that city for 1895 shall be 19½ mills.

MR. JAMES CRATHERN has accepted his election to the seat on the council of the Montreal Board of Trade rendered vacant by the death of Mr. W. H. Meredith.

IF, as the papers say is probable, Hiram Walker & Sons go into the manufacture of tobacco, as they have already done into its growth, and erect a large factory at Walkerville, the fact will doubtless stimulate cultivation in the County of Essex. They are said to have 60 tons of leaf on hand. Hitherto their crop has been sent to Quebec and there manufactured.

THE Intercolonial Coal Company held its annual meeting in Montreal last week, when it was decided to pay no dividend, although it had been earned. Directors were elected as under: J. P. Cleghorn, president; H. A. Budden, vice president and managing director; Harland S. Macdougall, Wm. Ramsay, E. Goff Penny, Thos. Wilson, Alex Gunn, Angus W. Hooper and R. McD. Patterson.

Mercantile Summary.

ASSIGNMENTS have been made by the following Ontario traders: Wilfred Abbs, tinsmith, Underwood; S. D. Brown, cooper, and Hugh McQueen & Co, tinsmiths, Port Dover.

WINDSOR is experiencing, or rather is about to experience, some activity in building. Two fine business blocks are to be erected, says the *Record*. Daniel Scotten, of Detroit, has decided to build a four-storey block on the corner of Ouellette avenue and London street, to cost $40,000. John Curry will erect a $50,000 building on the east corner of London street and Ouellette avenue. And several dwellings are being designed by city architects

IN St. John, N.B., the following recent failures are to be noted: W. H. Fairall, for the past twenty-five years a retail dry goods merchant, is seeking an arrangement with his general creditors at 25 cents. He owes $16,000, half of which is secured by bill of sale. He was one of the sufferers by the big fire of some years ago, when creditors accepted 50 per cent. of their claims, and since then he has done a comparatively quiet business.——T. B. O'Reilly, in the same line of business, has been closed up under bill of sale. He is a young man, formerly a clerk, who began business in the spring of 1892.——C. M. Reade, an elderly man, doing a small business in teas and coffees for the last year or two, is reported as assigned

Mercantile Summary.

A VERY handsome lithograph has been issued by David Macfarlane & Co., wholesale stationers, Montreal. It represents three horses drinking water at a trough, and is entitled, "Three Members of the Temperance League."

A. F. HECKLER, for the last three years in the fancy goods at Halifax, N.S., has assigned, making certain preferences, including one of $1,000 in favor of his brother, and he is now reported absent from the city. He had been for several years in business in Salt Lake City before starting here

AN Ottawa dry goods merchant, John Phelan, is reported to be in financial difficulty, and an investigation is being made into his affairs liabilities are placed at about $14,000, and a deficiency is feared. He was formerly of Ryan & Phelan, who compromised four years ago at 40 cents.——A. Ribout, a small trader of the same city, has failed.——J. H. McLaughlin, general dealer, Athens, Ont., has made an assignment. He had compromised a year ago at 50 cents on the dollar

A MEETING of the creditors of H. McElroy & Sons, general merchants, of Richmond, Ont., whose embarrassment we have noted, was held in Montreal a few days ago, when the liabilities were shown to be about $46,000, with assets $16,000 nominally in excess. A proposition to pay 60 cents on the dollar did not meet with much favor, creditors thinking that the offer should be increased to 75 cents, in quarterly payments over eighteen months, the last four to be secured, and they were given ten days to amend their offer and find security.

LAST week we noted that M. Quinlivan, grocer at Brantford, had offered his creditors 25 per cent on their claims This they have been good enough to accept.——A. S. Rose, a temperance hotel-keeper at Epsom, has assigned. So have Lundy & Harriman, sash manufacturers, Niagara Falls, who have had a good record and did a large business.——Three weeks ago P. A. Skinner, shoe dealer in the same place, offered his creditors 60 per cent. Since then he has carried out the desired arrangement ——Shields & Rutherford removed from Mount Pleasant to Norwood in May last, where they bought Oliver Buck's general stock, amounting to $3,500, at 60 per cent On this purchase they paid about $1 200 cash Having no business experience, coming off the farm, no one need be surprised to hear that they have at this early date assigned.

C. S. SHAW & Co., the leading Ottawa crockery firm, who have been trying to arrange a settlement at 40 cents in the dollar, have now assigned

J. J. HUNTER left the printing business in Brantford two years ago to start in the crockery line in Kingston, but has not been able to make it pay, and his assignment is reported.

THE Montreal wholesale grocers, Pigeon, Gendron & Co., whose assignment we have recently reported, are getting the signatures of their creditors to a cash settlement at the rate of 60c. on the dollar.

FIFTEEN cents in the dollar is offered to the creditors of Charles Martel, grocer, Quebec, on liabilities of $3,270. He compromised last November at 50 per cent., but was unable to carry through the arrangement.

THE funeral, on Thursday last, of Mr. Phil. J. Slatter, so well known as the city passenger agent of the Grand Trunk Railway, was attended by railway men from all parts of Canada and the States.

NEWS comes from Montreal of the suspension of the prominent firm of brokers in that city, Meredith & O'Brien, and the arrest of one of the partners, Mr. James O'Brien, jr., at the instance of the Quebec Bank, for some irregularity in connection with the renewal of a note.

A TAILOR, two years at Medicine Hat, W. H. Abrahart by name, assigns. He owes about $800. ——Since Jan., 1888, Chas. A. Moor has carried on a sash and door manufactory at Brandon, in the name of his wife, Jennie A. Now he assigns. A year ago he submitted a statement showing assets of $22,000 and liabilities just half this sum.

AXEL JOHNSON, hotel keeper, Nelson, B.C., has assigned. His effects were always mortgaged.——The sheriff of Victoria, B.C., has closed Wm. Croft's saloon, and the furniture has been seized under a chattel mortgage of $2,250. Besides this C. will owe a considerable sum, with but poor prospects of payment.

ON Wednesday, at a meeting of the creditors of E. H. Sheffield, dry goods dealer, of Walkerton, it was decided to sell the stock in a week's time.——The general stock of J. F. Ross, Coboconk, realized 60 per cent.——Hoover Bros.' stock of clothing at Port Arthur brought 15 per cent. additional.——The general stock of Pomeroy & Co., of Fullerton, will be sold to-day. Next week the stock of D. B. Pratt & Co.'s boots and shoes, Hamilton, will be sold.

IT is reported that on Monday night, March 11th, Schaffer, Rittenberg & Co., dealers in pedlar's supplies in Toronto, took their departure across the border, leaving $4,000 or $5,000 unpaid bills. Last week an incipient fire was discovered in the premises they occupied as a wareroom, and a detective was investigating the matter. This it is thought may have hastened their departure. On Monday previous to their flight a sale of their stock was made, and $800 cash paid thereon.

EDWIN MORRISH, Galt, has been in the grocery business for about ten years, but never accumulated much capital. His methods of doing business are not adapted to the present long continued depression in trade, and he has assigned.——Becoming tired of farming on the land his good mother gave him, near Goderich, Harry Brown traded his real estate about a year ago for a livery stable in London, and carried on the business in his wife's name, Letitia W. Brown. In addition to the farm, a chattel mortgage for $8,700 was given, covering his horses, carriages, etc. This is now foreclosed, and his stock seized.

THE annual meeting of shareholders in the Canada Paper Company, Ltd., was held at the company's office, Craig street, Montreal, on Tuesday, 12th March, at 3 o'clock p.m. A report and statement of affairs for the year were submitted, and a unanimous vote of thanks passed to the president and directors The following gentlemen were re-elected directors for the current year: Messrs. Andrew Allan, H. Montagu Allan, Robert Anderson, John MacFarlane, Hugh McLennan, Hugh A. Allan, and W. D. Gillean. At a subsequent meeting of the board of directors, Mr. MacFarlane was re-elected president, Mr. Andrew Allan, vice-president, and Mr. John G. Young, secretary-treasurer.

FOR nearly forty years W. B. Clark has done business as general merchant in Sarnia. He owned coal wharves and real estate and operated on a very considerable scale, and has always been in deserved repute as an intelligent and honorable merchant. In June, 1891, his two sons were admitted partners and the style of the firm became W. B. Clark & Sons. In the following year their balance sheet showed a surplus of more than $100,000. Much of this, however, was represented by such property as wharves, plant, real estate, etc., which not only showed a marked shrinkage in value of late years, but proved unrealizable assets. The firm has felt obliged to assign, a most unhappy result of such a long and creditable career. Much sympathy is felt for the senior wherever he is known.

NO stonger attestation could be given of the quality of fireproof safes and vault doors than the testimony offered by several Toronto merchants as to the manner in which their valubles were preserved by J. & J. Taylor's safes during the last great fire in Toronto. Messrs. Sutcliffe & Sons found their "books and papers preserved entirely"; Philip Jamieson, "Cannot speak too highly of the Taylor safes and vault doors; all my books, papers and cash were taken out of the safe in first-class condition"; while Robert Simpson says, "The vaults preserved their contents intact, and the contents of the safe were taken out after the fire in a perfect state of preservation, without even the smell of smoke upon them." We are told that Messrs. J. & J. Taylor had 43 safes and vault doors in the three fires, every one of which preserved their contents

LAST December we reported that the Canning Woolen Mills Co., at Canning, Ont., was in financial difficulties, owing two Hamilton firms $10,000. Their difficulties have culminated in an assignment, — F. A. Clarke, druggist, trading under the name of F. A. Clarke & Co., at Meaford, has assigned. He began business in the fall of 1892 without capital. But with the assistance of his brother he has been able to keep his store open until now.——Fitzgerald & Stanger, carriage makers for a number of years in Peterboro', have not always been successful. In 1888 we find that they compromised at 50 per cent., secured by a chattel mortgage to one Birdsall. This they succeeded in paying off, but could not make further progress thereafter to keep them from assigning, ——George Good, dealer in groceries and boots and shoes at Wingham, and who formerly had branches at Seaforth and Brussels, which proved unprofitable, is now obliged to assign.

THE failures are but few in Toronto this week and of minor importance: Six years ago Alfred Cornwell began tailoring, but never was considered a desirable customer among the wholesale trade. He has this month assigned to

Henry Barber —— E. C. Husband purchased the flour and feed stock of A. J. Vale for cash, less than a year ago. Now the premises are closed, and creditors have but poor prospects of any dividend. ——With the assistance of friends Alex. McLaren bought the drug business of J McFarlane. Lately his trade has fallen off considerably. Then the law expenses connected with a police charge have got him into trouble. He offers creditors 40 per cent. in cash. ——It is but three years since Chas. Meredith assigned as a confectioner here. Since that he has continued business under the style of Meredith & Co., his wife being the partner. Now we hear of another assignment, which shows that he did not improve his position by the change

THE Montreal failures of traders for the week are as follows: H. O. Dubois & Co., saloon, have been asked to assign. Mr. D. was originally a country storekeeper at St. Nazaire, but was not very successful; he then tried a grocery business in Montreal, but in that *role* assigned last June. ——J. B. Charest, a fairly well doing plumber, spread out into a general hardware trade a year or two, and as a consequence got into embarrassment; he is now arranging an extension. ——A. Lavallee, contractor, has made a private assignment, probably owing about $20,000. ——M. L. Landry & Co., an east end grocery concern established several years ago, have made assignment. Mr. L. was previously a farmer at L'Assomption. —— George Yon, an old time plumber who has always had the name of being a slow payer, has been served with a demand of assignment. He compromised once a good many years ago at 20 per cent. ——Morrier & Bergeron, a manufacturing shoe concern in a small way, have had to assign, owing to losses by Pratt & Co., of Hamilton, and other late failures. The liabilities are about $4,000.

COUNTRY failures in Quebec Province include the following: P. L. J. Vezina, a furniture manufacturer at St Jerome, is seeking a settlement at 50 cents on the dollar. It is alleged there have been irregularities in connection with some paper, and he has had trouble with his bankers in connection with the same. —— A demand of assignment has been made upon Joseph Petitclerc & Co., dry goods dealers, Three Rivers, by La Banque du Peuple. It was only in 1893 that Mr. P. failed before, owing some $10,000, and he has since then been doing business in a sister's name —— At Napierville, D. Z. Guay for some years a leading storekeeper, supposed well-to-do, has assigned —— D. Vinet, of Vaudreuil, doing a small grocery and baking business, has failed; he owes $1,440. —— Francois Lambert, a carriage maker of Nicolet, who added coffin manufacturing to his business, is reported in difficulties —— Poutre & Langelier, a firm of harness makers at St. Johns, have made assignment —— Desormiers Freres, a general store firm at Joliette of only a year's standing, have been asked to assign. They started with several thousand dollars of a capital, but lacking ability and business experience. One of the brothers had been a hotel yard-man, and the other had done a little clerking.

THE SITUATION.

A commercial treaty between Canada and the Cape of Good Hope, is announced to be in process of negotiation. It will be of a type peculiar to different parts of the same empire; the special privileges exchanged will not accrue to foreign countries having treaties with Great Britain, under the most favored nation clause. If, for instance, under the treaty, we were to admit the Cape wines at a nominal duty, or without duty, this fact would not alter the rights of France under her treaty with Canada; she would still have to abide by the terms in the treaty itself, without being affected by any stipulation for the most favored nation treatment, though that stipulation would apply to treaties with other countries. It is desirable that more care should be taken in making this treaty than was used in the negotiation of the treaty between Canada and France, and if Sir Charles Tupper is the negotiator, on our part, he ought to be distinctly given to understand that he is not to exceed his instructions or conclude anything without giving the Government the opportunity of knowing exactly what it is. According to one statement, the negotiations will be carried on at the Cape, and the intended envoys have even been named. The foundations of a treaty might be laid there, but the finishing touches would have to be given in London. The principal articles of export which the Cape has to offer are gold, diamonds, ostrich feathers, wool, and goat skins. Besides a commercial treaty, the Cape and Canada may soon become connected with direct steam communication. In these ways trade between the two countries may be facilitated and developed.

By degrees, the divergent lines of policy on the Manitoba school question begin dimly to shape themselves. The Dominion Government, according to present appearances, will take the ground that the decision of the Privy Council is in the nature of an instruction to provide a remedy for the grievance complained of by the Catholic minority. Mr. McCarthy, while admitting the right of appeal to the Dominion Government, regards the question as one of policy, to which the safest thing is to apply the rule of let alone. Whether the Opposition, apart from the McCarthy section, can agree upon a definite policy, remains to be seen. The same difficulty applies to the rank and file of the Government supporters in the Provinces of Quebec and Ontario, where, to a great extent, different opinions on the subject prevail. The result may be to disturb the harmony of more than one political party. In Quebec the Catholic majority will be unanimous in supporting the demands of the Manitoba minority for remedial legislation; in Ontario, the tendency, by no means universal, is to say that Manitoba should be left alone. The pressure of party cohesion will count for something in support of the policy which either of the great political parties will decide upon. The farmers' party will count for something, and the voice of the P.P.A. may once more be heard in the land.

No servant of the Grand Trunk Railway Company is made responsible for the accident at Weston, by the verdict of the coroner's jury. The blame is put on the rules of the company, which, it seems, do not inflexibly require that before a train is permitted to leave a station the despatcher shall have been informed that the preceding train has reached the next station. Nothing is said about any error committed by the despatcher of the mischief working train. The public is left in doubt whether he at first stated that the course was clear, and after the train had gone found that it was not; and yet this point, it would seem, most required to be made clear. So far as having called attention to the defect in a rule governing the despatch of trains or any uncertainty as to their application, the verdict may be of use, but even here it makes no discovery that was not before patent. If the verdict should be found not to cover the whole ground, the deficiency can be supplied in another way, so that its precise form is not matter of weighty consequence. The advantage of a general use of what is called the block system has been emphasized, and its more general use in the future is what would naturally be expected. Seventeen years ago an accident on the Holyhead and Abergele Railway, by which twenty-three lives were lost, caused the question to be asked whether there ought not to be some means of communicating with the preceding station, as a means of preventing such calamities in future. The question contained the germ of the block system, the importance of which is not less than it was on the day of its adoption.

An agrarian crime, new to Canada, has been committed in the Township of Biddulph, a township to which a number of atrocious murders, some years ago, gave an evil reputation. And it is remarkable that the farm on which the new crime was committed joins that on which a whole family were murdered twenty years ago. This would seem to leave ground for the suspicion that some of the leaven, after having long lain dormant, has become active again. The farm on which this last outrage has been committed is in possession of the Dominion Savings and Investment Company, by which a tenant was evicted, and the land was let to a farmer of the name of Herford. He had only just taken possession when he received a visit from masked men, by whom he was grossly maltreated, and would probably have been murdered if one of the gang had not given directions not to kill him "now," but he was told to leave at the peril of his life. This outrage was intended to show disapprobation of the eviction of the previous tenant. It would be easy to point out an unhappy country, on the other side of the Atlantic, in which this form of outrage has been common. It will be the duty of the authorities to use every endeavor to ferret out the perpetrators of this deed of darkness, all the more so because it is necessary that this form of crime should be crushed in the bud. The loose talk which has of late been indulged in about the rights of landed property might be expected to bear bitter fruit, if continued. The present lesson comes directly home to

mortgagees, who must suffer if the confiscation doctrine preached by cranks, and more or less countenanced by people who ought to know better, could by any possibility receive practical application. But no danger of this is within sight. The crime is distinctly of the old form of agrarianism, and as there is but a solitary instance of it in this country, it is fair to conclude that it could only have occurred in Biddulph, whence there is no reason to fear the example will spread.

Two members of the Government of Newfoundland, Premier Whiteway and Mr. Bond, if they had not been stricken by grippe, would now be on their way to Ottawa to propose for the Island terms of union with Canada. They will be listened to on their arrival, a fortnight hence, but their chance of success depends altogether on the reasonableness of their demands. They cannot expect that Canada will assume, on behalf of the islanders, obligations for which she will not be likely to get a reasonable return. The usual subsidy paid to provinces by the Dominion is an ascertainable amount, though it has been complicated with extras, in the form of better terms, subsidies for public works and the assumption of provincial debts. Any departure from the usual mode of dealing with provinces would create new demands in other directions by way of compensation. At all times there is more poverty in the Island than in any part of Canada, and provision has to be made to meet it. True, it is a local affair, but its existence would make itself unpleasantly felt in other parts of the Dominion. The revenue of the Island, derived from customs, is an ascertainable amount, and would be taken into account in making the financial arrangement. The lands, almost wholly virgin, are of very uncertain value, and their retention or surrender by the province would be a matter of agreement. If retained, the fact would lead to invidious contracts being made with other parts of the country where the lands are not the property of local authorities. Complications without number would arise from the union, as it would be necessary to see that there would be some compensation for all the trouble which would fall to the Dominion as a consequence of the new acquisition. The national consideration arising out of the island standing at the gateway of Canada can hardly be appreciated at its possible value by the present generation. There are great difficulties in the way of the proposed acquisition, though it is not impossible that they may be overcome; the danger is that some of them would survive that event and remain with us always. Nevertheless it is only right the delegates should be listened to patiently to see whether their proposals form a possible basis for discussion, modification, and finally, in some form, acceptance.

THE TORONTO "BOODLE" ENQUIRY.

Judge Macdougall having handed in his final report, the time has come for glancing at the outcome of the "boodle" enquiry. In his first report he found that "the allegations of corrupt influences having been at work, in my opinion, are only too well founded in fact." Coming to particulars, he related that "one of the [Toronto Street Railway] syndicate, George Kiely, had been a partner of the former street railway company, whose agreement with the city had just ended; he was well acquainted with many of the city aldermen and their antecedents." This knowledge was now to be put to use by the new syndicate. Mr. Kiely and one of his partners in the syndicate loaned large sums of money to Hewitt, one of the aldermen who had the granting of the railway franchise. Over $20,000 was loaned would have accepted if the loan had rested solely on the value of the security. On this head Judge Macdougall says: "I find that the money was advanced by Everett [a member of the railway syndicate] to Hewitt knowingly and corruptly, with the object of either paying him for past services or to secure his vote and influence as an alderman in the council upon all street railway questions that might arise after the date of the payment." Of another charge the commissioner, after reviewing the evidence, says: "I have, therefore, little hesitation in finding that Everett advanced $7,000 to Coleman, believing that the sum was to be corruptly used in purchasing aldermanic support and influence." Proofs of guilt against two aldermen are declared by the commissioner. "I find," says Judge Macdougall, "that Wm. M. Hall and Edward Hewitt, who were aldermen in 1891, corruptly received the sum of $1,000 from the Edison Electric Company to improperly influence them as aldermen to support in the city council a resolution for the adoption of the trolley system of supplying electricity to the street car rolling stock."

So far good progress was made. Everett, Coleman, Hall and Hewitt are declared guilty, the two former of giving, the two latter of receiving bribes. What then comes of these startling discoveries? Were the guilty parties promptly reported to the Crown authorities and placed under arrest, to prevent their escape from justice by leaving the country? Nothing of the kind. And yet there was the precedent of the Lexow committee in favor of immediate report and prompt arrest of any person against whom the evidence was such as to warrant that proceeding. By a fatal error in the procedure the Toronto commission, in not reporting in time, opportunity was given for the four incriminated persons to escape, and they did all escape beyond the Canadian jurisdiction. It is impossible to excuse the negligence or to pardon the blundering.

Very different was the proceeding in some other cases. Two men against whom not a word of evidence had been given before the commission, were reported and arrested in connection with the alleged bribing of aldermen. It is unfortunate that a contrast so pregnant with possibilities should have been left undefended, doubly unfortunate that not even an apology for it was offered. In a procedure so unusual we are prepared to hear of strange things being done; but for some of the strange things done in this enquiry, no one was prepared. The counsel for the city took upon himself to limit the enquiry: not to pursue a particular line beyond a given point, on the ground of expense. This is a matter which we submit was wholly beyond his province. This was to put himself in the position of minister of finance for the city and to usurp the functions of the council; it was to stop the wheels of justice in an arbitrary way. If such powers were permitted to be assumed by counsel prosecuting on behalf of the crown, to what abuses might it not lead? Something might be said for the refusal of Judge Macdougall to hear any evidence until either he or the counsel for the city had had it rehearsed to him; but the Lexow committee did not refuse any evidence offered to it. If this had been an ordinary commission of enquiry, in which it is not permissible to incriminate any one, the objection would have been valid, but this was a commission for incriminating anybody and everybody who could be brought into the net by the novel processes adopted.

There is a strong feeling that there has been a failure in the initial stage of clearing the ground for the administration of justice, and this conviction has broken the spell that bound the public to the belief that this form of enquiry was a sovereign remedy for evils which could in

A WAITING POLICY.

It is plain that there are incendiaries in our midst, and Toronto is still menaced with further fires. March winds are to be expected, and we cannot be sure of so still a day as Sunday, March 3rd, for the next great blaze. We have to-day only one more engine than was here on the day of the Simpson fire—two steamers in all, while Detroit has sixteen. The underwriters have raised the rates 25 cents per hundred dollars. This, of course, is one irritating way of making the citizens feel that something must be done towards enhancing fire protection, but is it the best way?

If the underwriters had gone to the city hall in a body, on the day after the last of the three great fires, and addressed the city's representatives thus: "We will give you, gentlemen of the Toronto city council, so many days in which to procure six steam fire engines, and if on the expiry of that time they are not here we shall cease to write risks in Toronto"—we venture to think something would have been done. The risk is too great to wait weeks or months for the arrival of steam fire engines from England, when they are to be had in Brantford, in Brussels, or in several cities across the lake.

PROPOSED PROVINCIAL LEGISLATION.

Among the public bills before the Local Legislature at its present session is one providing that the agreement of ten jurors in civil cases shall be sufficient to give a verdict. Of frequent occurrence is the disagreement of juries, owing to the refusal of one or two of the panel of twelve to view the evidence in the same light as the remaining jurors. No remark of counsel is oftener made to juries than that any one of them is as good as the other eleven. Altogether this change, if carried into law, will be a very desirable one. It is proposed to increase the jurisdiction of Division Courts from a limit of $200 to $300, when the debt is evidenced by the signature of the debtor. In such cases there is rarely any defence, so that the proposed reform will not conduce much to the saving of costs, which are nominal in undefended actions.

Of the three changes so far suggested to the Municipal Act, one is by a Patron member to abolish market fees on butter, eggs, and poultry, and to prevent the imposition of fees on persons selling wares on which a market fee might be charged, elsewhere in the city, town or village than at market. The farmer is apt to forget that the storekeeper pays taxes and rent in his village or town, and thereby is placed at a disadvantage with the farmer, who can go from door to door, or to the market, and sell his wares without any tribute to the municipality. To be impartial the bill should abolish peddlers' licenses, and leave the market and streets open to all comers, but the farmer does not want to see all trade on wheels, so he generously confines the scope of the proposed beneficial legislation to himself.

An amendment to the Assessment Act proposes to extend the time for paying taxes, elsewhere than in cities and towns, from the first day of July to the 15th of September. Power is asked that societies incorporated under the Benevolent and Provident Societies Act may hold, as purchasers, land exceeding the annual value of $5,000, the present limit, if the society or any branch of it has for its chief object the establishing of a seminary or institution of education. In these cases it is asked that the value of the buildings be not estimated in the annual value.

The private bills are numerous. Woodstock is asking power to issue debentures for $7,000 in each year for the next ten years, to pay outstanding debentures and the town's share of the county debt; also power to issue a like number and amount of debentures to pay off the unprovided for floating debt. Hamilton wants its $225,000 bonus by-law, passed in aid of the Toronto, Hamilton & Buffalo Railway, ratified, and its bonus by-law, granting $60,000 for the promotion of steel smelting works, and $75,000 for the promotion of iron smelting works, confirmed. An Act is wanted to allow of the construction and operating of an electric railway between London West and Springbank, and to erect and maintain a hotel at the latter place. The town of Preston lent John Ballantyne $10,000 to erect a factory for the manufacture of woodworking machinery, and asks confirmation of the by-law passed for that purpose. The town of Gananoque asks permission to grant aid, by way of loan, to the extent of $10,000, to establish industrial enterprises in the town. Acts to incorporate the London Radial Electric Railway, the St. Thomas Radial Electric Railway, and the London and Western Ontario Electric Railway companies, are sought.

A CITIZENS' ASSOCIATION.

That Toronto is an attractive place is generally conceded by those who have seen it. The best proof that strangers like the city is that they come back again to visit it. To persons who are forced to endure excessive heat inland or in southern climes, or in the American cities, there is something very delightful in our cool lake breezes. To those who devote 320 days a year to the slavery of business, it is of some moment to get a place for their six weeks' holiday, or less, where they can find real recreation without the expensive and exhaustive frippery of fashionable mountain or seaside resorts. The man gets nearer to Nature here, and Nature is the best restorative. Thus tourists like our High Park, our Rosedale ravines, our rapid street car service, our bay and the boating thereon, likewise the many Lake Ontario resorts so easy of access, Lake Simcoe, Muskoka, the Georgian Bay. And here they find cleanliness, order, and respect for law—likewise, to the intense surprise of some, a Saturday afternoon half holiday, and a quiet Sunday.

To make the city better known all over this continent and to bring more people to visit it or to live in it, is a worthy object for our citizens. And if we get the people to come here to visit or to settle, we must provide accommodation for them and likewise in the summer help to amuse them. It is satisfactory to know, therefore, that an association is being formed whose object is to place before Americans and others the many attractions and advantages that Toronto possesses as a summer resort, railway, manufacturing, monetary, educational and residential centre.

How best to achieve this object is a matter for the association to discuss. We should like to point out, however, the publicity which, to our knowledge, Toronto gained by means of an article written by Dr. Albert Shaw in the *Review of Reviews*, some months ago, on the subject of "Toronto as a Municipal Object Lesson." We are by no means all we should be in that respect, but we are better than some cities. This, however, is by the way. What is sought to be enforced is the fact that this article was widely copied and commented on, and that curiosity about Toronto was aroused by it in thousands of minds. A series of illustrated articles of the sort in some respectable periodicals might well form part of any scheme adopted by the business men's association.

Another thing we take the liberty of mentioning. A body that takes up the conduct of this scheme must be widely representative. There is room in it for the efforts of many. The list sent to us contains 81 names of business men or firms; there should be ten times that many members. No group of thirty-one busy men, however willing

and devoted to the interests of the city, should be expected to carry the burden of an enterprise such as this. Nor should wholesale dealers be the first to be applied to for the "sinews of war." Hotels, steamer lines, railways, theatres, are of those who will benefit by an influx of travel. And the large retail stores, in their own interest, should help the project. No one need be exempt from the duty of doing what he or she can to help forward this city. Private correspondence may do much—nearly every one has friends in the States, the West Indies or the Old Country —to exalt the horn of Toronto. The city of St. Louis has set an example in this direction. In a few months of 1891 no less than $750,000 was there raised to make the city known abroad and to provide needed hotel accommodation. The public spirited people "enthused," and that is what is needed here.

SPONTANEOUS COMBUSTION OF WOOL.

In June last we drew attention to the result of some examination into the subject of the spontaneous combustion of wool, citing the address of Prof. Lewes, the case of the fire on the steamer "Riverina," on her voyage from Australia, and also the experience of Mr. Edward Atkinson, of Boston, publicist and underwriter. There seemed at that time little room for doubt that wool, packed damp, is liable to spontaneous combustion, "a chemical combination taking place with the oxygen of the air, causing an increase of temperature, the process being in fact one of slow combustion."

From these various statements the London *Economist* drew the natural conclusion that wool becomes, in certain conditions, probably attributable to damp packing in the colonies, a dangerous article of cargo whilst at sea, and possibly even while in warehouse. This position the Melbourne *Argus* assailed as untenable, declaring that it was impossible to burn wool. But the *Economist* view is now confirmed by a prominent wool firm of Melbourne, Messrs. John Sanderson & Co., who have evidence to prove that in certain circumstances wool is highly inflammable. It appears that the legislature of New Zealand, finding that fires on wool laden vessels were frequent, appointed a commission of enquiry into the subject. And, still later, the Underwriters' Association of Sydney, New South Wales, procured the investigation by an expert of certain wool ready for shipment at Sydney, and also of the washing works whence it had been sent. This expert inspected thirteen bales, and this is what he said of the seven which he condemned:

1. Upon drawing sample from centre of bale it was a little warm, and must be looked upon as suspicious. Badly scoured.

2. Very dangerous. Hot, clammy, dirt not washed out, and not properly dried.

3. Heating, not clean, heavy, and sticky. Very dangerous.

4. Very bad all through, much heated, worst in centre. In a very dangerous state.

5. Heating; not clean, dangerous.

6. Hot, badly treated in scouring, and pressed damp. Very dangerous.

7. Hot, heavy, and in a dangerous state.

The washing works are next referred to by this expert, and he finds the working system in need of alteration. "I found the wool certainly damp," he says; . . . "the whole of the fault of the objectionable bales of wool is due to the manner in which the wool is rushed through the washing machines and the drying. It simply wants more ime in all stages of handling, and then all trouble will end."

The evidence being plain that Australian shippers are in the habit of shipping wool that is damp or badly scoured, or being too much smeared with foreign grease to make up for the removal of its natural oil, the *Economist* declares that official instructions as to the treatment of wool should be published, and penalties imposed for the disregard of the same. Otherwise, that journal contends, and not without reason, we shall probably hear some day of the destruction by fire of a mail steamer in mid-ocean, with frightful loss of life.

CANADIAN RAILWAYS.

An article is devoted to the two great Canadian railways in the March 2nd issue of the London *Economist*, which may probably be taken as a specimen of the manner in which recent events have affected the estimation of these roads in the British mind. As to the Grand Trunk, the conclusion of the writer is the same as that of a previous article in the same journal, that there is no hope for it unless some reconstruction of capital be made. Of the Canadian Pacific the writer thinks that while 1894 was an exceptional year for that road, as for most, yet its board has been too sanguine entirely in stating what the road could and would earn. Not only this, it is stated that "it is but natural that some doubt should be felt as to the actuality of the surplus" of the company; and the utterance of the report for 1893 that the company "is in a position to withstand a long period of depression if need be without inconvenience," is quoted with manifest derision.

It is not surprising, says the *Economist*, that the shrinkage in gross receipts of the C.P.R. has not been accompanied by a like decrease in expenditure. "The net result would appear to be, judging from the provisional figures, a loss in net revenue of about $1,350,000, which has to be deducted from the $2,612,000 available for dividend in 1893. The 2½ per cent. paid for the first half of last year represents $1,625,000, and the fixed charges were probably larger by $250,000. Putting these figures together, then, it would appear that, despite the non-payment of a dividend for the six months ended December 31st, a sum of about $613,000 has been taken from the surplus formed out of accumulated profits, which amounted at the end of 1893 to no less than $7,261,000.

"We have said that the public had come to believe very strongly in the maintenance of the company's dividends at a 5 per cent. level, and for this they certainly had ample justification in the statements of the directors themselves. For instance, even in their report for 1890 the board were bold enough to make the following statement: 'The directors believe that the surplus earnings for the present year (1891) and hereafter will be, at least, sufficient to pay regular dividends at the rate of 5 per cent. per annum on the ordinary shares of the company, without regard to the guaranteed dividend (3 per cent.), which expires in August, 1893.' The next year they were also very sanguine in regard to the future, and held that the results which had been obtained entirely disposed of those who had ventured to accuse them of undue optimism. In the report for 1892 the president committed himself to a statement, which we criticised at the time, viz., that the cost of working could be reduced to 55 per cent. of the gross receipts, or to the same ratio as that of a first-class English railway. . . . . It is very desirable, therefore, in fact, we may say, imperative that a full statement on this point [the nature of the surplus] should be made at the approaching general meeting.

"If, however, the Canadian Pacific fared badly in

1894, and so the statements and promises of the directors were brought to nought, what shall be said of the Grand Trunk and its board? This unfortunate undertaking, which has been steadily slipping back for years—proving only too conclusively the truth of the old saying, *Facilis descensus Averni*—failed to earn its fixed charges by no less than £141,200. This was exclusive of the interest on the so-called Guaranteed stock, the interest upon which, like that of the ordinary English railway preference stock, is contingent upon the profits of each year's working. At the present time Grand Trunk capital, to the nominal amount of £41,000,000 odd, is not only not receiving any return, but, as we have said, there is a huge deficit in the fixed, or debenture, &c., charges. To pay the dividend on the 4 per cent. Guaranteed stock alone the net income of last year would have to be increased by £350,000, while it would take one million sterling, all but £65,000, to meet the Preference interest in full. If, therefore, a full allowance be made for the exceptional duties of 1894, we may take it that the three so-called Preference stocks are in a perfectly hopeless position. What they may be worth is, in fact, a purely speculative question, since they have no value save as gambling counters and voting tickets. The prior Guaranteed stock is virtually an ordinary stock, which may in good years get its 4 per cent. interest, but upon which little or nothing will be distributed in periods of adversity."

TORONTO TRADE FIGURES.

We have received the Board of Trade bulletin containing statistics of foreign trade at Toronto for February last. The total imports were $1,719,098, and exports, $353,481, making in all $2,072,574. In the previous February the corresponding figures were $1,493,658 and $355,056, and the total $1,848,714. According to our usual custom we tabulate principal items side by side:

IMPORTS.

	Feb., 1895.	Feb., 1894
Brass and manufactures of	$3,474	$5,608
Copper, "	577	544
Iron and steel "	72,848	65,956
Lead, "	1,219	10,247
Metals and composition	9,834	11,169
Total metal goods	$87,952	$93,524
Cotton, and manufactures	172,297	159,250
Fancy goods	115,191	108,955
Hats, caps and bonnets	80,679	32,576
Silk, and manufactures of	103,629	74,738
Woolen manufactures	257,772	257,921
Total dry goods	$729,568	$633,440
Books and pamphlets	25,905	23,030
Bicycles	20,178	.....
Coal, bituminous	20,848	12,960
" anthracite	136,556	53,111
Drugs and medicines	16,539	14,002
Earthen, stone and chinaware	15,100	10,340
Fruits, green and dried	14,358	22,323
Furs, dressed	11,923	17,657
Glass and glassware	15,522	14,151
Jewellery and watches	29,185	21,035
Leather and m'frs of	15,277	15,631
Musical instruments	12,705	12,452
Paper and manufactures of	35,918	27,632
Wood and manufactures of	6,644	9,391

Free goods were imported to a much larger extent last month, the total being $352,053, as against $266,270 in February, 1894. The main items were anthracite coal, $136,556; hides and skins, $48,072; undressed hemp, tobacco leaf, wool, broom corn, oils and dyes.

EXPORTS OF CANADIAN PRODUCE

Produce of	Feb., 1895	Feb., 1894
The Fisheries	.....	$ 84
" Forest	$ 3,643	4,804
" Field	148,224	151,794
Animals, etc.	120,631	128,076
Manufactures	72,659	55,585
Total	$345,157	$340,343

ONTARIO LOAN SOCIETIES.

The management of the Agricultural Savings and Loan Company appear, from the tenor of their report, to have had a very satisfactory year and to be much pleased thereat. In their experience the demand for money during the year was fair, "at slightly better rates than during the previous year," an experience that we think must have been exceptional. The president congratulates the company, as well as its depositors and debenture holders, on the success of the year's business, and dwells on the trifling amount of losses on real estate, $916. This is, without doubt, an extraordinarily small sum to lose in twelve months, for a company whose loans approach very nearly $2,000,000. The Agricultural deserves to rank with the Huron and Erie in its fortunate showing in respect of losses. He also states that in spite of keen competition repayments have been on the whole promptly met. Mr. Regan concludes by a reference to "twenty-three years of uninterrupted success" as warrant for expecting satisfactory results in future. The company is economically conducted, the general expenses being less than those of a number of others of like size. The average interest earning on its mortgages and other loans in 1894 was 5.7625 per cent The net earnings, $47,606, represent 6.29 per cent. on capital and Rest, or 7.58 per cent. on capital alone. The company's dividend being at a low rate, it is happily able, after paying it, to add $10,000 to Rest and carry $1,826 forward. Mr. Thos. H. Smallman was appointed to succeed the late Lieut.-Col. Moffat on the board.

The People's Loan and Deposit Company has made the bulk of its loans on Toronto real estate. On some of these loans, made probably in a time of inflated values, there have been losses, and to meet these the directors have taken from the reserve a sum of $72,000 and placed it to a contingent account to meet shrinkage in realizing. The real estate now actually owned by the company was last year placed at $129,030, and this year is valued at $123,076, which we take to mean that foreclosure has placed it in possession of lands worth this amount: and it holds mortgages, interest-bearing, to the extent of $509,467, on which the interest collected or collectable for the year was $33,231. As the amount loaned stands in the balance sheet at $1,061,474, it follows that for something over half a million of its investments the People's has had no return in 1894, except what is represented by the item $34,272, rents collected during the year on property held or in default. Some sales of land have been made and cash payments received thereon to $29,013. No dividend is declared, a proceeding which we have already commended; expenses are reduced, and the policy of reducing the deposits, or rather changing them where possible to the form of debentures, is being continued. The report deprecates the selling of their shares at a sacrifice by some members of the company, and maintains that the true position of affairs does not warrant it. It was thought last year that the president of this company took too sanguine a view of the realizable value of some of its securities. When he says now "the shrinkage, if any, will not be great," he ventures far.

The directors of the Royal Loan & Savings Company, at Brantford, recognize the decreased interest earning possible on mortgages in Canada, and say plainly that this decrease "will render it impossible to maintain the present rate of dividend in the future." The report shows their earnings for 1894 to have been almost $10,000 less than in 1893, and after paying expenses and 7 per cent. dividend, but a few hundred dollars remained. Mr. Shenston explained to his shareholders the action of the board with respect to properties in arrears It is good policy, he considers, and in this he has the concurrence of a number of experienced loan society managers, to show forbearance rather than to foreclose mortgages, and, if they are not sold, to take over properties.

SHERBROOKE BOARD OF TRADE.

The annual meeting of the Sherbrooke Board of Trade was held on Monday, 4th March. The attendance was such as to indicate a fair degree of interest in the board. Election of officers for the ensuing year taking place, the following choice was made: President, J. S. Mitchell; vice-president, N. T. Dussault; council, W. B. Neil, G. A. Lebaron, W R Webster, Wm Farwell, Z P Cormier J Davidson, W A Morehouse J W Jenckes, D Denault and W S Dresser It is proposed to change the hour of the monthly meetings to 4 o'clock p.m.

EQUITABLE LIFE ASSURANCE SOCIETY

The thirty-fifth annual statement of the Equitable has been issued, and its figures, as usual, surprise the mind by their vastness. Two hundred and seventeen millions of new assurance in 1894; nine hundred and thirteen millions of risks in force; forty-three millions of income, and twenty-seven millions of outgo one hundred and eighty-five millions of assets, and a surplus of $27,258,000 on a 3½ per cent. standard and $37,479,000 on a 4 per cent. standard That the Equitable is a

popular company to insure in is shown by the magnitude of its new assurance last year. The amount it has paid to policyholders during 1894 is at the rate of $62,000 per working day, and of this the proportion was $11,000,000 in death claims and $8,425,000 in endowments, tontines, surrenders and dividends. In the present statement of the outstanding assurance, instalment policies issued in 1894 and before that year have been reduced to their commuted value, else the total assurance in force would be larger. But this was a proper thing to do, and there is nothing to apologize for. It would be a pleasing circumstance if the big New York companies, which have so much to be proud of, could be induced to pay less attention to volume of business and would cease publicly criticising each other's defects, real or imaginary.

HAND-IN-HAND INSURANCE CO.

This company shows an increased business during 1894 in both the fire and plate glass branches, and pays its usual ten per cent. dividend to shareholders. Its figures are not extensive ones, but the relative profits are large, and tend to make one wish that larger companies were equally successful. The chairman in his address insists upon the value to fire underwriters of selection and inspection, contending, as the management of this company has always done, that the results from it are superior to those obtained from a larger volume of business indiscriminately taken.

FIRE INSURANCE EXCHANGE

The volume of this company's business has not increased during the year, the report shows us, and this is the less remarkable when it is remembered that no agents are employed by it. Nevertheless, on a business slightly smaller than that of 1893, the company has managed to show an increased balance at the credit of revenue account and an increased surplus over liabilities. It is a tribute to the character of the company's risks and the way they have been looked after, that the fire loss of 1894, on a total at risk of a million and a quarter, was less than $2,000. This, of course, cannot always be expected to be so low—last year it paid over $10,000—but the losses and expenses of the company since it started have averaged less than 78 per cent. of its net cash premiums.

TIMBER IN GREAT BRITAIN.

The severe frost that prevailed in Great Britain all February and during part of January has affected all descriptions of business more or less, and the wood trade in marked degree. It was found by mechanics almost impossible to work out of doors in temperatures ranging from 10 above to 10 below zero Fahrenheit. Deliveries of timber or lumber were therefore limited all through February. According to the March circular of Messrs. Farnworth & Jardine, the consumption of Baltic and European woods has been small. Stocks of fir timber are ample, red and white deals quiet, with heavy supply, flooring boards in moderate demand and with no excessive stock.

No change in values of Canadian woods is reported; the sales are small at this time of year and stock inadequate. Red pine moves slowly at low prices, and although prices of pine deals are a little firmer the stock is much too heavy. Only one small parcel of N.S. or N.B. pine deals arrived in February; demand is not improved and the stock is too heavy. Stocks of oak and ash are likewise too heavy, but of elm the supply is moderate, the request fair and the prices steady. Neither logs nor planks of birch have been imported during last month. The former are rather more wanted; planks too plentiful and slow to move. Oak planks from the United States have arrived freely and mostly gone into consumption. British Columbia and Oregon pine is very dull and the stock heavy.

LUMBER AND TIMBER PIECES.

The new Fisheries Act, which prohibits the dumping of sawdust into the streams, comes into force on May 1st, and lumbermen must soon make arrangements of some kind to dispose of their sawdust. W. C. Edwards & Co., Ottawa, have led in this matter, and are to build an incinerator to burn the sawdust and refuse from their lumber mill at New Edinburgh. The incinerator will be twenty feet in diameter, eighty feet in height, and will be constructed entirely of stone and brick and of such a thickness as to endure for twenty years. Carriers of the most improved kind will be laid all through the mills to carry all edgings and sawdust to the incinerator. The mill will begin running about the first of May, and it is expected the incinerator will be ready for use by that time.

The difficulty over the boomsticks duty, which caused no little irritation last season and threatened to interrupt the harmony of our trade with the United States, has been finally settled. In fulfilment of its promise to the lumbermen's deputation, so soon as the Government had been officially assured of the free entry of similar articles into the United States ports, a report to Council was submitted by the Minister of Trade and Commerce recommending mutual concession yesterday. Accordingly, an Order-in-Council was passed authorizing the free entry into Canada of booms and chains employed in the towing of logs.

Hawey Morris' stave mill, Wallaceburg, has been purchased by the Richard Grant Company, of New York, for $5 500. Mr. Morris will manage the mill.

FOR GROCERS AND PROVISION DEALERS.

Newdale, Man., is to have a creamery.

There is talk of a creamery for Goderich.

There are indications of an early opening of the cheese season

St. John merchants have heavy stocks of onions on hand, and prices dropped 25c. to 50c. a barrel within a fortnight.

The Montreal Grocers' Association have advised the city council that they are in favor of the mooted early closing by-law.

Canadian exports of produce into Buffalo, as a result of the altered tariff, show large increases as compared with those of last year.

A small lot of new crop Barbadoes molasses is due here by next week's steamer. It will be the first to arrive, and will sell at about 32c.—*St. John Sun, 8th inst*

A car of Manitoba butter has been sent forward to the English markets by way of experiment. The home market is glutted, and dealers are looking in every direction for an outlet.

The "honest yeoman" has been exploring new fields of late London hay buyers claim that hay sold on that market is purposely soaked with water in order to increase its weight.

The St. Catharines produce market opened last Saturday with eggs at 20c. per dozen, but they dropped to 15c. before the day was over, leaving many grocers who speculated out of pocket.

The St. Croix Soap Manufacturing Company, St. Stephens, N.B., recently made shipments to the West Indies and British Guiana, via Halifax and the West India Steamship Company's ships.

The Montreal Master Bakers' Association report that the cash system is giving satisfaction to both sellers and buyers. Three or four bakers of the city are still selling below the regulation prices.

The Anglo-British Columbia Packing Company, Vancouver, will begin the erection immediately of a new salmon cannery on Rivers Inlet, which, it is expected, will be completed in time for this season's pack.

Mr. J. L. Haycock, the Patron leader in the Ontario Legislature, it is said, intends to introduce a bill allowing township councils to fix a close season for cranberries in the wild lands. It would appear that, to get ahead of each other, people pick these berries in a half-ripe condition and put them on the market in poor shape.

The dissolution of the widely known general produce and commission firm of George Wait & Co., Montreal, has taken place, in consequence of the death of the senior partner, Mr. George Wait, and the business will be continued by Mr. George S. Wait and Mr. John M. Taylor, under the old name and style of George Wait & Co.

A meeting was held in the Board of Trade rooms, Sherbrooke, last week, when the promoters of a new canning factory tried to ascertain whether farmers near by would undertake to supply sufficient sweet corn to justify the establishment of the industry. Many of the farmers present at once signed contracts for the deliverance of sweet corn in husks, the price to be paid for which is $10 a ton.

The first consignment of cattle and hogs of the 1895 season, and really the first winter shipment of live stock ever made from Manitoba, left the C. P. R. yards, Winnipeg, a week ago last Wednesday. The shipment, which comprises 300 head of cattle and 400 hogs, is to be shipped to Great Britain *via* Halifax. Messrs. Gordon and Ironsides are the consignors. The results of this shipment will be awaited with interest.

Hiram Walker & Sons are contemplating the erection of an immense tobacco factory in Walkerville, and are at present getting the estimates for the machinery. The firm for some time have been engaged in the growth of tobacco, and two years ago sold their entire crop to the tobacco factory in Joliette, in the Province of Quebec. Last year the market was dull, and they have about 120,000 pounds on hand. They have concluded that there is a large market for the home tobacco in Canada, if properly manufactured.—*Chatham Planet.*

Lobsters are not plentiful around the shores of the Bay of Fundy. A Deer Island fisherman thinking that the waters near St. John contained more shell fish than those nearer home, recently set twenty-five traps there, but was only able to get ten lobsters out of them. The same scarcity prevails all along the Bay of Fundy. But notwith-

standing this fact the packers are booking orders far ahead into the season. Under the present stringent departmental regulations it would seem almost a certainty that some one is going to lose money before the season's close

An Ontario firm, writing to a merchant in St. John, N.B., under date of March 4th, says: "The condition of the evaporated apple market, as we find it at present, is—the product is mostly held by speculators, packers own almost none; over 37 cars of the best stuff have been shipped to foreign markets, a syndicate of speculators in New York have bought all the output in that State, have stored and hold for a firm advance, firms between Rochester and Buffalo have bought freely in this district and have stored at the Bridge. Lately we have not been able to buy any in Canada at a price to allow any margin for export demand. The price to-day is 7½c. and 8c. f. o. b. point of shipment, while our cables to-day from abroad will not allow that price to be paid"

The Montreal Retail Grocers' Association decided at its last session to give its patronage to the American Food Exhibition Company, who propose to hold an exhibition in that city on the 15th of April As explained by the manager of the company, since the introduction of the telephone and order book, the ladies have ceased to visit the groceries, and novelties do not come to their knowledge without great difficulty The object of the exposition would be to unite exhibits from some fifty manufacturers of prepared foods and novelties in kitchen utensils. There will be a model kitchen, and the food will be cooked and given away to visitors, who can leave orders which will be filled by the grocers in their neighborhood; cooking lessons, concerts, competitions, and every form of entertainments, serve to attract visitors. Part of the proceeds from the door receipts are donated to charitable institutions

RETAILING DRY GOODS.

Light blue is a promising shade in spring neckwear

The New Brunswick fur trade has been unusually good this year.

Feathers promise to have a distinctive place in next winter's millinery.

In ribbons chine effects probably draw as much attention as any other pattern

Every season finds ribbed underwear more securely seated in the favor of the trade.

The rage for large sleeves is doing much to bring back the good old fashioned distinction between masculine and feminine garments. This will be noticed by a comparison of coats for the present spring, and those worn in the spring of 1893.

In the United States, ready-made dresses are becoming increasingly popular, and should this trade attain proportions equal to that of men's ready-made garments, it means an industrial revolution. An army of dressmakers must pass away and with them a host of clerks. For, of course, saleswomen will always be employed at the ready-made dress counter.

Blanket makers who made contracts early in the season at prices based upon the then existing values of coarse wools, regret their action, as the price of "rejects" has advanced fully 2 cents per lb. Those manufacturers who were not far-seeing enough to lay in a good supply of wool may lose considerable money, as competition had forced profits down to figures dangerously near the cost of production.

The next fur sales in London begin on March 16, when the Hudson's Bay Co. and C. M. Lampson & Co. have sales extending over several days. C. M. Lampson & Co. will offer at the March sale the following number of skins in the classes named: Dry fur seal, 700; red fox, 65,000; blue fox, 3,600; silver fox, 1,400; cross fox, 5,000; Russian sable, 8,000; sea otter, 1,200; wolverine, 600; fisher, 3,000; lynx, 5,000; otter, 6,000; marten, 50,000; beaver, 6,000; bear, 7,500

"Fire sales" are quite the proper thing in Toronto trade circles, and it must be with a feeling of melancholy satisfaction that a burnt out merchant watches the crowd thronging before his counters. A Yonge street retailer whose stock suffered in the Simpson fire, advertises his store as a "Roaring Furnace of Burning Bargains," which should certainly prove attractive enough to draw the masses of people who dearly love a bargain

The *Drapers' Record* of March 2nd notes the following Canadian arrivals in England: Mr. Samuel Hird (Messrs. M'Intyre, Son & Co., Montreal), Mr. J. R. Quain (Ottawa), Mr. S. H. Bethune (Messrs. Gault Bros. & Co., Montreal), and Mr James Macdonald (Messrs. John Macdonald & Co., Toronto). Among those who have returned are Messrs G. Priddis (Messrs. Priddis Bros., London, Ontario), J. Birmingham (the Thomet Fizgibbon Company, Montreal), A. Murray (Hamilton, Ontario), and Thomas Glover (Pictou, Nova Scotia)

It is all very well to incite popular opinion against the departmental stores, but we doubt that by this means their progress can be stayed. If you would hold your own in this age of competition, you must adopt the most modern business methods. Commerce is simply a war of brains and capital; if you possess neither of these essentials you had better get out of business. What you lack in capital you must make up in brains, and *vice versa*. With a combination of both your success is assured. What many Canadian merchants lack is system in business, a system that will bring out trade at all seasons of the year

Here is a calendar in use in a large dry goods store of Paris, for which we are indebted to the Paris correspondent of the *Economist*:

Feb 1 Openings of white goods
" 20, Openings of gloves, laces, flowers
Mch. 1. Openings of summer styles.
May 1. Openings of seaside and country goods.
June 1. Clearing out sale of summer goods.
July 1. Openings of flowers and feathers.
Sept. 1. Openings of carpets and furniture
Oct. 1. Openings of winter novelties
Dec. 1. Openings of Christmas goods.
Jan. 1. Clearing-out sale of winter goods

A schedule such as the foregoing, amended to suit the wants of your trade and our Canadian seasons, may be found helpful. The idea is to keep your store ever before the public, and your assistants always interested in their work.

HARDWARE AND METAL TRADES

The Ontario Natural Gas Company is said to have struck another well on the lake shore near Leamington. It is claimed to be a big one.

The Welland Vale Manufacturing Co., St. Catharines, who for thirty years have been engaged in making steel goods, have opened a bicycle department. Their machines, the "Perfect" and "Garden City," are well constructed, cheap in price, and will doubtless win instant favor with the host of cyclists in this country

Antoine Aime Charlebois, Quebec; Hector McRae, Ottawa; W. Duncan, Three Rivers; George Duval, Ottawa, and Alphonse Charlebois, are applying for incorporation as "The Three Rivers Iron Works Co.," to manufacture iron, steel and brass wares, and also to make and supply electric light, heat, and power, with a capital of $300,000.

The coal shipments from the island of Vancouver mines last month were: New Vancouver Co., 28,357 tons; Wellington, 22 796 tons; Union, 15,895 tons. These shipments totalled 67,048, being 9,000 tons less than in January. The N.V.C. Co.'s foreign exports are nearly 3,000 tons in excess of last month, the falling off being at Wellington, where there is a difference of nearly 12,000 tons.

"I will sell all the cut nails you want," said a wholesale hardware firm in this city a day or two ago, "at $2 per keg." "I can buy all the nails I want at $2," said a prominent buyer yesterday; "but I won't buy only for my immediate wants, as I am informed I will be able to buy them at lower prices later on." This is proof from a seller, confirmed by a buyer, that cut nails are selling 10c. under card rates as agreed upon by the association some weeks ago, namely, $2.10. The Lower Ports men are blamed for this cut, but others say that the trouble is in the camp at home. We were given to understand that the last agreement among the manufacturers was going to work splendidly. It is working now on a splendid cut of 10c., and with the probability of a further cut before long.—*Montreal Trade Bulletin*.

INSURANCE ITEMS

The fire committee of the Montreal council this year asks for $218,980 where they last year got $177,000.

The Intercolonial Railway Employés' Relief and Insurance Association shows six death claims for February: one from pneumonia, one from bronchitis, one from paralysis, two from inflammation of bowels, one from accident This makes a total of $3,000 to be provided

The Winnipeg *Free Press* says that a member of the Board of Trade of that city has given notice of motion that the council consider the advisability of sending a representative to England to arrange with first-class fire insurance companies to establish agencies in Manitoba, who would not enter into any agreement with regard to the iniquitous so-called provincial license tax "It was the general opinion of the members of the council that such agencies, on being established here, would receive practically the whole insurance business of the city."

A committee of the Ottawa council has been debating the building of a new fire station in the southern part of that city, the purchase of two chemical engines, and the equipping of their steam fire engine This will cost in all $46,000, and the committee seemed to think the

city could not afford to spend it out of present revenue, while it was too late to get special legislation at Toronto. But it was figured up that the citizens would have to pay $50,000 a year in fire insurance premiums by reason of the extra rates charged for lack of these appliances. So the committee will tackle the subject again.

ANSWERS TO ENQUIRERS.

R. S., Lindsay.—The head office is in Montreal. We are not aware of the date.

PATIENCE.—You have chosen a wrong name. "Impatience" would be nearer the truth. Do not do anything so foolish as give up your situation; you are very lucky to have one in these times. Add to your nightly prayers that petition of the shrewd old minister, "Teach us to know our daily bread when we see it."

INQUIRER, Paris, writes: "I notice by the Toronto papers that the National Assurance Co., of Ireland, has brought suit against Mr. Simpson to compel him to deliver and cancel an interim receipt for $10,000 insurance, the receipt having been given two days before the fire, the company, however, claiming that as the policy had not been issued they are not liable. Will you kindly let us know through your columns something of the circumstances. It is generally understood that a company's interim receipt is good until such time as a policy is issued or the application delivered. If it is not, the sooner we are informed of the fact the better."—[Our correspondent has been wrongly informed; the company does not take the ground alleged. The facts are, we are informed, that the interim receipt in question was issued on Friday, March 1st, and on Saturday, March 2nd, the head office of the company ordered the risk cancelled. Application was accordingly made to the holder of the receipt or his agent on Saturday to have the receipt returned, but it was not returned on that day, and on the next day, Sunday, the fire occurred. The company has entered suit for the recovery of the receipt. It does not contend that an interim receipt is not valid, but that in the particular circumstances of this case th holder of the receipt had no right to retain it. As to the effect of the order to cancel, see statutory condition No. 19.]

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, March 14th, compared with those of the previous week:

CLEARINGS.	March 14.	March 7.
Montreal	$9,908,413	$10,035,562
Toronto	5,366,172	5,550,139
Halifax	966,451	1,142,521
Winnipeg	655,379	762,026
Hamilton	553,800	724,915
Total	$17,450,215	$18,215,163

Aggregate balances this week, $2,367,125; last week, $2,616,228.

—The Comptroller of the United States Currency, Mr. J. H. Eckels, has an article in the March issue of the *Forum*, in which he says that in the midst of great plenty the American people to-day feel poor, and that, too, without any tariff agitation going on. "A stagnation long continued is yet upon us, and will remain until our own people impart activity to trade, and other peoples who are dealing with and extending credit to us feel confidence that they can do so with perfect safety." Mr. Eckels admits that "Unquestionably, for some years many of our business methods have been of such a character as to lessen confidence in the management of many of our great enterprises. This is especially true in the over-capitalization and the fraudulent manipulation of railroad and kindred corporations; but the effect of this has long been anticipated, and is not now so much the original source of harm." It would be foolish, he concludes, to undertake to conceal that "the source of our difficulty lies in the fear, which happily has not reached the point of a belief, that the United States cannot, in the face of existing laws, maintain the gold standard as its unit of value."

—The production of aluminum increased from fifty tons in 1890 to 2,000 tons in 1892, and the price has diminished in proportion. This we gather from the *Foreign and Colonial Importer*, of London. The metal was 60 shillings per pound in 1886 and 20 shillings in 1889, and now it is about 1s. 7d. When it is considered that a pound of aluminum is so much bigger than a pound of other metals—bulk for bulk, it weighs about one-third of ordinary metals—this price cannot be called high. No aluminum is produced in England now. Two companies were started in 1886-87, but the chemical process they employed is now obsolete. All aluminum sold in the market is now made by the aid of electricity. The largest factory is at Neuhausen in Switzerland It is capable of turning out 1,000 tons a year. The second largest is in the South of France. It turns out about 600 tons. But a company has now been formed in England, and as the soldering difficulty seems to be overcome, the metal will sell. Nothing is said about the American production.

—In the course of a conversation last week with the representative of a Montreal journal, Mr. B. T. A. Bell, of the *Canadian Mining Review*, who knows, perhaps, as well as any one in Canada, what is going on in mining circles, he stated that the prospects for mining in both Nova Scotia and British Columbia this year were really good and business in this connection was brightening up. Asbestos also was a little more active and the demand increasing. Writing at the close of February from Vancouver, Mr. Walter Taylor, formerly of Toronto, tells the editor of THE MONETARY TIMES that dull and unpromising though business of all other kinds may be, "gold mining in the Cariboo and silver mining in the Kootenay seem to be about the only exceptions, and in these I have every confidence that very large development will take place during the coming summer. From what I can gather, I do not think that Hobson, the engineer, overpainted Cariboo."

—The Legislature of New Jersey has enacted a statute abolishing the days of grace in that State. All notes, bonds, acceptances and bills of exchange drawn or accepted after 4th July, 1895, will not bear grace in that State, but will be issued and payable as therein expressed. There is a strong effort being made by members of the Illinois State Bankers' Association and others, says the Rand-McNally *Banker's Monthly*, to secure the passage of a bill by the Illinois Legislature abolishing days of grace. It is believed by Illinois bankers that uniform legislation on this point is desirable throughout the country. Several of the Eastern States have passed laws abolishing days of grace, and the tendency is believed to be in the direction of uniform legislation by all the States in that respect.

—Mr. Penfield, the United States Consul General stationed at Cairo, Egypt, is authority for the statement that during last year 3,350 vessels passed through the Suez Canal. The receipts from tolls amounted to nearly $15,000,000, and the traffic is still growing. It is worthy of note that while many cargoes belonged to America, not one mercantile vessel carrying the United States flag entered the canal. Comparing the number of vessels using it now with the traffic of 1874, when only 1,264 passed through it, the enormous growth of the trade is shown, and how completely the course of the traffic between the Orient and Europe has been revolutionized.

—There is a dispute between two parties in respect of irrigation rights in the neighborhood of Calgary, Alberta. The right is claimed by the Springbank settlers to take water from the Elbow River, which privilege had, however, been pre-empted by the Calgary Irrigation Company. The latter now offers as a compromise with the settlers to have the water divided proportionally to the area to be irrigated. These terms will prove satisfactory and will be sanctioned by the Department of the Interior at Ottawa.

—The receipts of the town of Dundas for the year 1894, including the sum of $2,988, brought over from the preceding year, were $22,106. Tax collections supplied $15,924 of this; water rates, $943; licenses, $533. The town expended $5,280 on education; $742 on waterworks; $258 on the fire department, and $547 on fire alarm; on street gas, streets and sidewalks, $2,687; salaries, $2,093; coupons, $2,792; debentures, interest and sinking fund, $2,586; charities, $492; park and cemetery, $696.

—The report for 1894 of the auditor of the town of Perth shows the receipts of that municipality to have been $30,797, and the balance on hand at the close of the year $3,862. But to show this balance there is included $5,000 borrowed from bank. The various receipts were $18,440 for taxes of 1894, and $763 for taxes of 1893; liquor licenses, $1,480; town-hall and other rents and licenses, $734, and a balance of $4,288 brought over from 1893.

—In a paper, from which we give extracts elsewhere in this issue, Mr. Henry Lye gives some suggestive points with respect to the profession of fire insurance adjusting. The paper in question was read before the Canadian Institute of Accountants.

Meetings.

HAND-IN-HAND INSURANCE CO.

MUTUAL AND STOCK.

The twenty-second general ordinary meeting of the members and shareholders was held at the offices of the company, Queen City Chambers, Church street, Toronto, on Tuesday, 26th day of February, 1895, when the following report was submitted :—

REPORT.

The directors beg to submit to the members and shareholders the revenue account for the past year, and the balance sheet, showing liabilities and assets on 31st December, 1894.

The number of policies in force at the close of the year was 1,134, covering at risk, after deducting re-insurance, the sum of $2,062,801.

The total revenue from the Fire Branch was $45,861.52, and after deducting all expenses and claims for fire losses, the balance to carry forward was $15,268 76

The balance now standing at the credit of the revenue account of the Plate Glass Branch is $11,373.25

In view of the foregoing results the usual two per cent. dividend on the capital of the company, being equal to ten per cent. on the paid up portion thereof, was declared

The retiring directors this year are: James Austin and B. Homer Dixon.

All of which is respectfully submitted

B HOMER DIXON,
President

HUGH SCOTT,
Managing-Director.

HENRY WM. EDDIS, F.C.A.,
Auditor.

Toronto, January, 1895.

The chairman, in moving the adoption of the report, said :

The very satisfactory report we are able to present to you to-day on last year's business is a matter for congratulation, especially when is taken into account the general depression which has existed more or less over the past year.

Our fixed principle of selection and inspection of all assumed hazards has proved, as in the past, the soundness of this fundamental theory on which the acceptance of our business is based, showing that the results are superior to those obtained from a large volume of business indiscriminately taken

The usual annual dividend of ten per cent. has been declared and paid to the shareholders.

The report was adopted, and at a subsequent meeting of the board B. Homer Dixon was elected president, and James Austin, vice-president.

SHAREHOLDERS.

FIRE INSURANCE EXCHANGE INSURANCE COMPANY

The annual meeting was held at the offices of the company, 32 Church street, Toronto, on Monday 25th February, 1895, the president, Fred'k Wyld, in the chair, the manager acting as secretary, when the following report was submitted.

REPORT

Your directors beg to submit the eighth general statement of the business of the company, comprising revenue and Profit and Loss accounts for the past year, and statement of assets on 31st December, 1894.

The number of policies in force at the close of the year was 565, covering, after deducting re-insurance, the sum of $1,279,147.33.

The revenue of the company for the past year amounted to $26,322.62, and after deducting re-insurance and all expenses, including claims for fire losses, the balance remaining to carry over was $19,025.43.

By referring to the Profit and Loss account it will be seen that the surplus over all liabilities, including re-insurance reserve, amounts to $24,991.96.

The retiring directors this year are: Fred'k Wyld, Andrew Darling R W Elliot, J Muckleston and A T Wood

All of which is respectfully submitted.

HUGH SCOTT, Manager and Sec. FRED'K WYLD, President.

AUDITOR'S REPORT

I hereby certify that I have audited the books and examined the vouchers and securities of the company for the year ending 31st December, 1894, and find the same correct, carefully kept and properly set forth in the above statements

HENRY WM EDDIS, F.C.A.,
Auditor

Toronto, February, 1895.

The president, in moving the adoption of the report, said :

In drawing your attention to this company's business for the past year, a year of business depression generally, it is very gratifying to be able to state that the results of our operations have been remarkably satisfactory, as the loss and expense ratio combined have amounted to only 42.12 per cent. of the net cash income of 1894; in fact, taking our whole eight years' experience, 1887 to 1894 inclusive, our loss and expense ratio combined has averaged only 72.07 per cent of the net cash income results which

must be considered as eminently satisfactory when compared with the experience of other fire insurance companies during the same period of time.

The volume of business, from the policy of our management in not employing agents, has of course been restricted; but judging from the statements shown by other companies that have been doing an aggressive business, we have lost nothing by pursuing this cautious policy; for correspondingly increased expenses and losses would have probably neutralized any benefit to be derived from business not so carefully selected.

The report was adopted, and at a subsequent meeting of the board, Fred'k Wyld was re-elected president, and R. W. Elliot, vice-president.

SHAREHOLDERS.

ADJUSTMENT OF FIRE LOSSES

We have pleasure in being able to give some extracts from the paper on this subject by Mr. Henry Lye, lately read before the Institute of Chartered Accountants of Ontario. It is Mr. Lye's second address before the Institute on this particular subject, and we think our readers will find in these extracts food for reflection:

"It is now twenty-six years since my first experience in an adjustment as assistant to Messrs. Berne, Sewell & Reed, three of the most celebrated adjusters on this continent. We had to get our information from the manager of a grain elevator, which twice within three years had been burnt for the purpose of hiding shortages arising from the issue to confederates of false warehouse receipts. This manager invariably gave surly or insulting answers to every question. On one occasion I asked Mr. Sewell why he took such brutal answers so quietly? His answer was: 'It is my business to obtain information, not to take offence.' This was a valuable lesson to me, and may be of use to some of my hearers. I may mention, incidentally, that our churlish friend afterwards spent several years in prison, and that the reconstructed elevator has not subsequently burnt, but has remained uninjured by fire during the last quarter of a century.

"Stock lists or inventories should always be very thoroughly scrutinized, because they are seldom, if ever, correct. A very amusing instance of an error in a stock list and its consequences occurred in one of our country towns a few years ago. At the foot of one of the pages was an error of $1,000 in the additions, which made the stock on hand appear as $1,000 more than the fact. This of course made the apparent profits of the year $1,000 more than the fact also; but the merchant impressed the favorable showing of his business upon the parents of his ladylove, and so won their consent to the marriage of their daughter to this prosperous (on paper) merchant. I have every reason to believe that the error was unintentional, as it was not discovered until an investigation caused by a fire, which did not originate upon the premises of the bridegroom

"Many errors in stock lists arise from the computations of broken quantities, the extensions being as of grosses instead of as dozens of pieces, as of dozens instead of hundreds, and so on. But it is not unusual to come across stock lists which have been wilfully 'stuffed' or falsified, either to hide shortages, or enable the securing of a partner or a purchaser, or to obtain bank advances or indorsements or renewals, or a rating from the mercantile agencies.

"A very peculiar experience of inventorying occurred some years ago when the owner of a partially damaged and partly destroyed stock conspired with his bookkeeper to produce an inventory of salvage goods, on which the percentage of damage was to be based, with prices materially lower than the real value of the goods.

"You will perceive that the less the sound value of the salvages the greater deficiency in the stock, and consequently the greater the apparent total destruction by fire.

"These parties, however, furnished a weapon for their own confusion, because, to avoid an indictment for an attempt to obtain moneys by fraud and false swearing, they were obliged to reconstruct their previous (or ante balance sheet) inventory so as to make its prices correspond with those in the salvage inventory, which partly reduced the apparent stock on hand, and also to reconstruct their profit ratio on sales made subsequent to the balance sheet, so that they raised a mound of salvage instead of digging the pit of total loss which they had so cunningly devised.

"In several instances, the appraisers have valued the damage on the very same goods several times over, the owner cunningly contriving such confusion as prevented the appraisers from certainty, day by day, as to the goods previously appraised. In one case, the damages exceeded the sound value of the stock.

"Another experience of the adjustment by appraisers resulting in a total of appraised damages exceeding the sound value of the damaged goods, is still on record in my possession. The *modus operandi* was the basing of the percentages of values upon the list prices, without first deducting the trade discounts As these trade discounts ran from 5 to 95 per cent., a 50 per cent. damage on these latter resulted in a damage nearly twice the amount of the value

"This was a skilful fraud, the success of which was only prevented by a warning as to the consequences, as the sufferer had determined to avail himself of the stupidity of the companies' appraiser who had joined in a sworn award.

"In *all* cases the adjuster should be wary of hasty impressions or conclusions—should always refrain from making assertions, and should require all assertions by others to be established by proper proofs

"The axioms 'Goods are bought to be sold,' 'Goods well bought are half sold,' 'Goods ill bought cannot be sold,' are not infallible guides, because the proverb 'Fools for luck' may affect the problem, and because of other contingencies of unfavorable seasons, of bankrupt stocks and a reckless competition. Yet the wise merchant is now-a-days very rarely seriously affected by these calamities, because the railways, the express companies, the electric telegraph and the telephone afford such facilities for the continuous replenishment of stocks as to do away with most of the excuses for overstocking.

"The ordinary retail stock of dry goods in a

NOTICE TO SHAREHOLDERS

The Fourteenth Annual Meeting of the Shareholders of this Company for the election of directors and the transaction of business generally, will be held on WEDNESDAY, the THIRD DAY OF APRIL next, at the principal office of the company, at Montreal, at 12 o'clock noon. The Common Stock Transfer Books of the company will close in Montreal and New York on March 23, and in London on March 12. The Preference Stock Books will close on March 7th. All books will be reopened on Thursday, April 4th.

By order of the Board.

CHARLES DRINKWATER,
Secretary.

Montreal, Feb'y 23rd, 1895.

TENDERS

INDIAN SUPPLIES

Sealed Tenders addressed to the undersigned and endorsed "Tender for Indian Supplies," will be received at this office up to noon of Tuesday, 9th April, 1895, for the delivery of Indian Supplies, during the fiscal year ending 30th June, 1896, at various points in Manitoba and the North-West Territories.

Forms of tender, containing full particulars, may be had by applying to the undersigned, or to the Assistant Indian Commissioner at Regina, or to the Indian Office, Winnipeg. The lowest or any tender not necessarily accepted.

This advertisement is not to be inserted by any newspaper without the authority of the Queen's Printer, and no claim for payment by any newspaper not having had such authority will be admitted.

HAYTER REED,
Deputy Superintendent-General
of Indian Affairs.

Department of Indian Affairs,
Ottawa, February, 1895.

CHURCH'S ALABASTINE

The Permanent Wall-Coating.
Does not RUB or SCALE from any hard surface.
Coat over coat can be applied.
No more washing or scraping of walls necessary.
Alabastine is The Sanitary Wall-Coating.
Displaces Kalsomines, which decay on the wall.
Equally adapted for Ornamental work and plain Tinting.
Pleases Painters as well as the general public.
Easily applied by anyone who can handle a brush.
Sixteen beautiful tints and White.
Put up in Five-pound packages, and never sold in bulk.
The only Wall-Coating that can be mixed in cold Water.
No hot water being needed. SAVES TIME AND WASTE.
Full directions for use on every package.
Sold by leading Hardware and Paint dealers everywhere.
Our book "The Decorator's Aid," furnished Painters.
Ask your dealer for Tint-Circular showing colors.
BEWARE OF IMITATIONS bearing similar names.

PROFIT RESULTS in the ÆTNA LIFE

Measured by those of two of the Largest Companies.

The large and steady annual increase of the Cash Dividends to Policy-holders in the ÆTNA is clearly shown when placed alongside of those paid by the New York Life and the Equitable, both of New York City:—

ÆTNA LIFE AND EQUITABLE LIFE

$10,000 15 Year Endowment - Age 31. (Raised to $10,000 for the purpose of comparison).

ÆTNA LIFE. No. 140,118.			EQUITABLE LIFE, No. 261,406.

W. H. ORR & SONS, Managers.

city should not average ten per cent. of the annual purchases. In a town easy of access such a stock should not average more than fifteen per cent. of the turn-over. In a village, except in very remote places where the stock has to be laid in before the closing of navigation, the stock should not average more than 25 per cent. of the annual cost of the goods sold.

"The times when the stocks may properly exceed the average quantity are after the arrival and before the opening of the spring and fall goods, but some retail merchants allow themselves to be used for the economy and convenience of the wholesale merchants and the manufacturers, who by shipping goods to their customers in advance of the proper seasons, save themselves from warehouse and insurance expenses and obtain promissory notes for discount collateral. So there may be exceptions to any rule, however sensible it may be in fact as well as in theory.

"A stock of groceries should turn over twice as quickly as a stock of dry goods. Flour and feed should turn over weekly. Hardware will depend on the class of custom, or the shelf goods be very slow in the summer in comparison to the rails and iron. There are, however, retail merchants who speculate in nails, iron, sugar, teas and other commodities, but there is little danger of any competent adjuster being led very far astray by any of these, unless there be falsification of accounts, or, as is too often the case, some of the sales and shipping books are so modest as to hide themselves from his gaze.

"As a general rule, however, stocks should be fresh and new and clean, so if the stocks, as stated, appear too large in proportion to the annual sales, or if it is found necessary to search ancient invoices and records to find their original price, you may be reasonably assured either that the goods were not in existence or that they were comparatively valueless, because now-a-days nobody wants antiques in the shape of dry goods, groceries, hardware or any other form of merchandise.

FURNITURE MANUFACTURERS.

The Canadian Furniture Manufacturers' Association held their regular quarterly meeting in Stratford, on March 12th inst. The president of the association, E. R. Zoellner, of Mount Forest, presided. Among the manufacturers who attended the meeting were George McLagan and Joseph Orr, Stratford; J. R. Shaw, Toronto; J. S. Anthes, Berlin; Charles G. Pease, Toronto; W. S. Hudson, Preston; James Cichen, Toronto; S. Snider, Waterloo; H. Krug, Berlin; M. W. Burr' Guelph; James Baird, Plattsville. A number of questions of interest to the trade were brought up and discussed during the session. It was thought advisable that members of the association should agree upon a uniform time of giving credit. This question was, after discussion, left in the hands of the executive committee. In the matter of the winding up of insolvent estates it was considered necessary that some arrangement should be made with a view to allowing compromises only to those deserving of such. This matter was left in the hands of the executive committee. Some discussion took place in regard to the Retail Manufacturers' Association, and as to the effect this organization would have upon the trade. The next meeting of the association will be held on the second Tuesday in June, the place to be settled upon by the executive committee.

TEN DOLLARS A MINUTE!

This is the average amount being paid to the Policy-holders every minute of every hour, o every day, of every week, the year through, by the

METROPOLITAN

Life Insurance Co. of New York

Assets, ... $22,326,622.16

Its great feature is its INDUSTRIAL PLAN OF LIFE INSURANCE

5 Cents per week (and upwards) will secure a policy.
All ages from 2 to 70 are taken.
Males and Females insure at same cost.
Only healthful lives are eligible.
All policies in immediate benefit.

CLAIMS paid immediately at death.
No initiation fee charged.
Premiums collected by the company weekly at the homes of policy-holders.
No uncertain assessments—no increase of premiums.

Think of it! The daily saving of FIVE CENTS will carry policies on the lives of every member of a family of SEVEN PERSONS.

Sixty Thousand Families will receive the proceeds of its Policies this year

Ordinary Department. The Company in this Department issues all the approved forms of insurance (and some novel forms of Policies) for from $1,000 to $20,000, premiums payable yearly, half-yearly or quarterly. The policies are liberal in their provisions, contain no restrictions as to travel and residence, provide for **immediate payment** of claims, and the premium rates are extremely low. We invite comparison of rates with the rates of other companies.

Of Highest Quality, and Having Greatest Durability are Therefore CHEAPEST.

THE total premium receipts of all the insurance companies doing business in the State of Ohio last year were $7,336,656. Of this sum $4,489,823 was paid claimants for loss by fire. From this it will be seen that 61.2 per cent. of the total premium income from Ohio has been wiped out by fire. The percentage of loss paid by the local joint stock companies was 72.8, while the Ohio mutuals were more fortunate, their ratio being 56.4. The foreign companies lost 68.7 per cent. of their premiums.

Commercial.

MONTREAL MARKETS

MONTREAL, March 13th, 1895

ASHES.—Receipts have been very limited since last writing, and values are a shade firmer No. 1 pots are quoted at $4 05, second quality $3.75, and pearls $6.10. There have been no shipments since those noted last week

CEMENTS AND FIREBRICKS.—Cable quotations for spring shipments of English cements range from 5s. 7d. to 6s. as to brand, figures about equal to those of last spring. Quotations from stock are: for British $2.05 to 2.15; Belgian, $1 85 to 2, though we hear of a 50 brl. lot being done at quite a little under the inside figure Bricks are easier at $16 to 20; Glenboig, $22

DAIRY PRODUCTS.—Cheese has taken a turn for the better, and there were shipments last week of about 29,000 boxes. The total export from this city since May 1st, 1894, now aggregates 2,075,341 boxes, as against 1,902,321 for the previous season. The cable quotation has advanced to 49s. for white, and 50s. for colored. Fine late made goods are now held at 9⅞ to 10c per lb. A good demand exists for fine new-made creamery butter at 21 to 21½c., but other sorts are dull and hard to sell. Eggs have shown much decline from the strong position of ten days ago, and fresh laid are quoted down to 17 to 18c.; limed, 14 to 15c. per dozen.

DRY GOODS.—There is little that is novel to be picked up in this line. A fair sprinkling of outside buyers have been visiting the market, but they have made but moderate selections First letters just received from buyers now in Britain report nothing of special interest in the markets there.

MONTREAL GRAIN STOCKS IN STORE.

	Mar. 4, '95.	Mar. 11, '95

Total grain	894,682	876,326
Flour	19,816	20,101
Buckwheat	1,980	4,079

GROCERIES.—In this line of business we hear of little that is striking. Some fair sales of sugars are reported to rail points, but general country orders are neither numerous nor large. A fair block of Japan teas went to Chicago the other day, but apart from this there is not much movement to report; prices continue very steady. Sugars are reported firmer in New York, granulated being quoted there at 3 and thirteen-sixteenths; the local factory quotation is 3⅜c., with some little tendency to firmness; yellows, 2⅝c. upwards. It is said Lower Province yellows have been offered here a shade under 2½c. Syrups are quiet. Barbadoes molasses is quoted firm, first hands at 28½c to 32½c as to quality, with the supply limited. In other lines there is nothing new

LEATHER.—Sole leather men are talking of firmer prices, and some fair sales of No. 1 slaughter are reported at 21 cents, and of No. 1 Spanish B.A. at 19c. per lb. An advance of half a cent is reported in the American market. Splits are scarce and firm. We quote:—Spanish sole B.A. No. 1, 18 to 20c; do No 2 to 18 A, 17 to 18c; No 1 ordinary Spanish, 17 to 18c; No 2, 16 to 17c; No 1 slaughter, 19 to 21c No 2 do, 17 to 18c common, 15 to 16c.; American oaksole, 39 to 43c; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; western splits, 15 to 16c.; Quebec do. 13c.; juniors, 11 to 13c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c; Canadian, 19 to 21c colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c; harness, 18 to 23c buffed

cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—A fair proportion of hardware orders is reported, but they are mostly small in character. The movement in heavy metals is a dull one. But little enquiry is heard for Scotch pig iron, which is rather easier in price, owing to the approach of the season of navigation, but it is said that import orders for even 100 tons have not been yet placed. Warrants are cabled at 41s. 4d. The shipments of iron from Glasgow from January 1st to March 1st, 1895, were 35,788 tons, just about the same figures as for same month, 1894, which were 35,249. The stock in Connal's yards, February 28, 1895, was 285,999 tons, as compared with 316,844 tons at same date last year. A little is being done in American pig iron, namely, in No. 2 Niagara at $18; domestic iron is dull. The Londonderry furnace was fired up last Thursday night, after having been closed down for some months. In bars, hoops and bands nothing new is reported. Canners are reported to be making enquiries for tin plates, but there is little resulting business so far. Canadas are very dull. Ingot tin is again easier, being quoted as low as 13¾c. per lb. in New York, and locally from 15 to 15½c. would be a fair quotation; it is even said a lot has been offered at 14½c. Copper and other metals show no new features. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $14.00 to $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $2 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates — Blaina, or Garth, $2.05; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to $6.00. Black sheet iron, No. 28, $2.15 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.25 to $3.50; P.D. Crown, $3.75 to 4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.65 to 2.90; coke wasters, $2.65; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6¼ to 6¾c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.85 to 3.00; sheet, $4 to 4.25, shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2 75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15 to 15½c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 8c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards

OILS, PAINTS AND GLASS.—Business is described as fairly good in the way of orders for shipments when summer freight rates come into force, but spot business is slow. The main interest still centres in turpentine, which is again advanced to 52c. for single barrels, and stocks are difficult to get South owing to the late severe cold there. Cod oil is a little firmer, but hardly quotably so. Other lines are without new feature. We quote:—Turpentine 52c. per gallon for single barrels; two to four barrels, 50 to 51c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6¼; tins, 6½c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2, $4 to 4.25; No. 3, $3.75 to 4; dry white lead, 4¼ to 4½c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; Paris green 12½ to 13c. in bulk, 14 to 14½c. in small packages; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.60.

WOOL.—The London wool sales, which began last week, show an advance of from 4 to 5 per cent., according to cables received, and French manufacturers are said to be liberal buyers. There is not a great deal of stock here to offer, and prices are steady. The market at the Cape of Good Hope is reported stronger. The local range for Cape wools is from 13½ to 16c.; some cheap B.A.'s are available at 25c., ranging up to 32c.; British Columbia is hard to sell even at 9 to 10c.; a little Australian can be had at 15c.; domestics without change.

TORONTO MARKETS.

TORONTO, Mar. 14th, 1895.

GRAIN.—The week's trading has favored the bulls. The U. S. Government report, which was issued on the 10th, estimates that but 73,000,000 bushels of wheat remain in the farmers' hands. Merchants had estimated the amount at about 120,000,000 bushels, and naturally this had the effect of strengthening their views. An advance of 3c. per bush. took effect almost immediately, but later the market has eased off somewhat, and Toronto quotations at the time of writing are on a basis 2c. higher than a week ago. It is the general impression of dealers that Canadian farmers are not holding any considerable stocks. This appears to be a natural conclusion, in face of the depression which has extended throughout the urban and agricultural districts alike. Prices have been so low that it has been necessary to deliver a large quantity of grain in roder to obtain the means necessary to cover the running expenses of the farm. Whatever be the stocks in farmers' hands, certain it is that offerings have been gradually tapering off this last fortnight. Merchants report a fairly brisk trade with local millers. The barley season is now pretty well over. American brewers, however, are making a limited demand for Canadian descriptions, while the local trade has also modest requirements. Peas are scarce, and, in consequence, firm. Any available stock can be disposed of to good advantage. There is good demand for oats, but offerings are limited. Last week an advance of 2c. per bush. was recorded, and at this point the market continues firm. The demand from the Maritime Provinces and Quebec is holding up well. Rye and corn remain nominal.

The stocks of grain in store at Port Arthur on Mar. 5th were 724,960 bushels. During the week there were received 24,598 bushels, and shipped 2,654 bushels, leaving in store on March 9th, 706,999 bushels.

GROCERIES.—The week has been uneventful. Raisins remain unchanged. Currants are firm. Stocks of lower grade currants on the local market are small and prices have advanced. Retailers will find better satisfaction in handling a better grade of currants worth, say, 4½c. in barrels or 4⅝c. in ½ barrels. Sugars show no prospect of any immediate advance from their present range of low prices. The market is almost bare of Ceylon teas of 19c. to 20c. per lb. in value The same may be said of Indias worth 18c. to 20c. lb., while stocks of common, good to choice Moning Congous are almost exhausted. Good Japan tea siftings are in small compass. The tea market in consequence

These prices are wholesale by the car-load.

is very firm. A London market report dated March 2nd, says: "In lobsters there has been a good trade doing, and parcels of tall tins in importers' hands are practically cleared and finished for the season, no further consignments being counted upon until the new pack begins to arrive in June next, the most recent prices having been 25s. to 29s. 6d. per case, with Liverpool buyers appearing in the London market. Flat tins of lobster are not much inquired for, and the value is not above 35s. to 37s.; but halves are quite used up, and if available would perhaps fetch 46s. per case.

HIDES AND SKINS.—A week last Tuesday an advance of 50c. a hundred was made in the price of hides, much to the disgust of tanners who have been working on a basis of lower values. And in comparison with the price of leather there is no question that hides are beyond their true value. On March 15th, 1894, we quoted hides as follows: Cows, green, 3c.; steers, 60 to 90 lbs., 3½c.; cured and inspected, 3¾ to 3¾c. per lb. Present quotations are: Cows, green, 4½c.; steers, 60 to 90 lbs., 5c.; cured and inspected, 5½c. per lb. Comparison of these prices will reveal a material advance in the hide market. The question naturally follows, do present industrial conditions warrant these increased values? Any one acquainted with the situation must answer in the negative. Shoe manufacturers have found it impossible to pass the advance on to the consumer, and in shifting the burden from shoulder to shoulder it has been left resting mainly upon the unfortunate tanner. At the beginning of the season now closing Ontario tanners made an honest endeavor to better their condition. But for the most part their efforts bore little fruit. The shoe manufacturers apparently resolved to fight any advance. They pursued a policy of "wait" and bought their supplies from hand to mouth. The tanners were prepared to enforce an advance early in the season, but as time wore on they grew less sanguine and gradually let their stock go at prices very near the old basis. On the 4th inst. sheepskins were advanced to 90c., and at this figure they are likely to remain the month through. Quotations of sheepskins on March 15th, 1894, were 75 to 80c., and merchants have no reason to complain of values.

LEATHER.—We have elsewhere referred to the leather situation, and the market is so bound up with that of hides that little remains to be said. The fall trade will soon open up, and winter samples may be expected almost immediately. The present season has not been a success, although some houses report having done a trade in advance of that of a year ago. Heavy harness, splits and upper leathers have averaged the season through probably from 2½ to 5 per cent. better than the old basis of prices, but a complete response to the hide market would mean an advance of at least 10 per cent.

PROVISIONS.—Again this week have merchants received large quantities of butter, and nothing has taken place to relieve the situation. Sales of low grade have been made at 7c., rolls selling at 12 to 14c., and choice dairy tubs at 12 to 14c.; but even at these figures trade is very slow. The local cheese market is quiet and easy. Hogs are undoubtedly scarce, and receipts not at all free. Dressed hogs are quoted at $5 75 to 5.80. In consequence of this strength there is a better feeling in hog products, long clear selling at 7½c., and hams at 10 to 10½c. Some of the retailers have been speculating in lard in a modest way of late, but their ideas have not as yet been realized. Lard is quoted at 8¼ to 8½c. per lb New laid eggs are offering at 14c., but there is poor demand and slow sales. Dried and evaporated apples remain unchanged. We elsewhere print a letter relative to this market.

WOOL.—Merchants express some difference of opinion as to the condition of our trade with the United States. One large dealer says: "The demand for combing fleece wool from the United States is not so brisk as it was a fortnight ago, and quotations are a trifle less." Another merchant reports a good business, and submits the following statement from the letter of a Philadelphia wool broker dealing with the worsted trade: "Your coarse and low combing wools are in great demand, and washed Western Canada is especially wanted. We have just sold two car loads at 23¼ cents—an advance of ¼ cent. We could place several hundred thousand pounds now at full market rates." The latest quotations of Canadian wools in Boston and New Yerk are 23 to 23½ cents. Whatever be the nature of the demand American dealers will find it difficult to obtain concessions here, as all the stock is in the hands of two or three persons who are in a position to hold for some weeks to come. Other wools for Canadian mills are firm and meet with good enquiry. Blanket manufacturers who contracted to deliver upon the basis of prices at the beginning of the season regret their action, as "rejects" have advanced fully 2c. per lb. The New York *Journal and Bulletin of Commerce*, March 13th, says: "Foreign fine grades are a somewhat unknown quantity in the situation, yet there has been no special local pressure of late and the progress of the London sales rather carries an impression that purchases for this country are not making to an extent calculated to bring out any great quantity, especially for open market purposes. Carpet wools are somewhat irregular, both in movement and tone, yet on the whole securing a greater general measure of attention than heretofore. Buyers seem to feel that they will get no more bargains this season, and therefore at a cost that is probably as low as they are likely to find for current run of orders against production of mills, it is just as well to pick up supplies, even against somewhat distant future consumption, which is about the only form of speculation extant. Altogether each newly applied test gives evidence of a conservatively healthy undertone, and while there is room for much improvement before the market becomes solid, wool generally is recuperating."

" " " 1894, $4,239,050 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

MONTREAL FOOD FAIRS— HOW TO COOK.

No less than two food fairs are proposed to be held in Montreal. One is to be held by the American Exposition Company, in Windsor Hall, on April 15th to 30th, and the manager of that company, Col. C. P. DeGarrus, appeared last week before the Wholesale Grocers' Association and also before the Retail Grocers' Association to explain the project. Both associations gave their sanction to this fair, and promised to assist it in any way possible. Another proposition was made by Mr. J. B. Monier, of *Le Prix Courant*, viz., to hold a food exhibition in the summer on the Exhibition grounds, provided that the retail association would hold its picnic there. In return for their patronage he would give the association a bonus of $500. The retail grocers will discuss the proposal at their next meeting.

The Colonel says that his food fair is intended to embrace exhibits of all the different varieties of canned goods, baking powders, yeasts, in fact everything in the shape of prepared foods. Besides this, a corps of skilled lecturers on cookery will be in attendance, who will give practical illustrations of their methods. Would it not be a good scheme for these lecturers to make a common sense explanation of some simple but important facts in dietetics. Thousands of people don't know how to make coffee, nor do they know how to make toast properly. Soft, soggy, uncrisped toast is not properly made. Here is the explanation as given by an American paper: "The principal constituent of ordinary wheaten bread is starch. When starch is subjected to a high temperature, it is changed into the easily digested substance, dextrine. In the ordinary cooking of a loaf of bread, the starch in the outer layer is changed into dextrine, which helps to give the crust that peculiar agreeable flavor which we call 'Sweet.' Slices of bread undergo a similar change when toast is made.

"To make toast successfully, one should endeavor to convert as much as possible of the starch into dextrine. To do this, cut the bread one-third of an inch thick, place the slices in a toaster or wire broiler, and dry them slowly, either in a moderate oven or by holding the broiler some distance from the fire. The object is to give the heat time to penetrate to the centre of the slice before the outside has begun to change color. If a sheath be formed over the outside at once, the moisture will be shut in, and the middle of the slice will be prevented from becoming sufficiently heated to change its starch, for the temperature will not rise much above 212 Fahrenheit until the water is dried out. Starch is changed into dextrine at 401 Fahrenheit."

THE WOOL TRADE.

Messrs. Justice Bateman & Co., Philadelphia, report March 1st: The supply of American wool is greatly reduced and prices for most grades are firm. No. 1 or fine medium with a decided merino cross, and fine or merino wools, are however slightly lower in competition with fine foreign wools. With the exception of merino combings, the clean value of most grades of American wool centres round 30c. per pound scoured. We now have the anomaly of coarse, medium and fine wool under free trade selling practically on the same scoured basis, viz., 30c. Previous to March, 1893, the scoured cost of Ohio fine unwashed was 65c., or 35c. per pound higher than it is to-day with free trade; the scoured cost of Michigan medium washed was 55c., or 25c. per pound higher than it is to day, and the scoured cost of ¼ blood was 45c., or 15c. per pound higher than it is to-day. The foregoing relates only to the scoured value.

Messrs. Coates Bros., Philadelphia, in their March circular, say: Prices are practically unchanged since our last issue. The short supply now in the market has made a strong feeling in some grades, while those not especially wanted can be had at concessions. The worsted spinners are busy and many are refusing orders, while the woolen yarn mills are doing but little. Prices of all yarns and goods are low and margins small, so that those buying wool are necessarily close purchasers. During the latter part of this month the first early wools will be shorn, and "fat-sheep" stock will make its appearance, but until next month there will not be sufficient new wool to influence markets, and the current demand must be supplied from the remainder of the old clip, reinforced by such importations of foreign stock as may be necessary. The general business outlook continues without any material improvement, and while the adjournment of Congress will make a more settled feeling of confidence, yet the situation will probably for some time remain unchanged from present conditions.

Mr. J. Stone Blomfield, of London, in speaking of the London auctions, which closed on the 15th February, says: "One-fifth of the net available wool is carried forward in first hands, and of this quantity over three-fifths were not catalogued. Excepting for better greasies and a few scoured suitable for America, the competition was at no time brisk. It is estimated that the continent of Europe took 92,000 bales, America 16,000 bales, and the home trade 94,000 bales.

MONTREAL LOAN AND MORTGAGE COMPANY.

The annual general meeting of the shareholders of the Montreal Loan and Mortgage Company was held in Montreal last week for the reception of the annual report and statements and the election of directors. Mr. Richard Bolton, president, occupied the chair, and there were present Hon. A. W. Ogilvie, vice-president; Messrs. J. L. Morris, Q.C.; W. E. Cheese, C. E. Gault and F. Caverhill, directors, and others. The thirty-seventh annual report stated that the total profits resulting from the year's business exceeded expectations, and justified, besides the semi-annual dividend of three and one-half per cent., a bonus of one per cent. The company has sold during the year a number of small properties for the sum of $57,166.55, making thereon a profit of $6,180.90, and from revenue and all other sources $52,595.74 has been made, a total profit for the year of $58,176.64, which, added to the balances at credit of Profit and Loss account on 31st December, 1893, makes a total of $82,027.75. From this was taken two semi-annual dividends of 3½ per cent. each, a bonus of one per cent., and the sum of $40,000 transferred to Rest account, leaving a balance of $2,027.75 to the credit of Profit and Loss account, and increasing the rest account to $340,000. The contingent account remains the same as last year. During the year the sum of $246,607.51 has been received in repayment of mortgages and interest, and $169,054.15 has been loaned on real estate.

The former directors were re-elected.

AN EFFECT OF DULL TIMES.

The misfortune of the railways is the misfortune of the public, says the *Railway Age* in commenting upon the figures in the following item. The number of employes on the five principal railways in Pennsylvania, and the amounts paid them for services, compare as follows for the last two years:

	1893.	1894.
Number of employes..	133,196	109,405
Compensation of employes.....	$79,738,931	$61,301,359

Here is a decrease of nearly 24,000 in numbers of employes and of nearly $18,500,000 in wages paid by five railway companies in a single year. The average earning per individual is lowered from $600 in round figures in 1893 to about $560 in 1894.

—The town of St. Johns, Que., cannot afford, says the *News*, to give the proprietor of the Empire Tobacco Factory the $30,000 cash bonus he asks for pitching his manufacturing tent in that place.

—By the report of the Nova Scotia Building Society, submitted last week, we learn that it has taken deposits amounting, with interest, to $639,931, and issued debentures to $94,419, its paid-up shares and monthly shares aggregating $639,931. It owns real estate valued at $41,588, in addition to the society's premises on Hollis street worth $8,500. It puts down as the leading item of assets "balance of advances due on mortgages, $808,363," and "balance of loans due on mortgages, $17,898"; while "balance of assessment on shares" [1886 and 1887] and "balance due on properties sold" make up together $9,768. Mr. J. W. Allison was re-elected president, and Mr. Adam Burns, vice-president.

JUDICIOUS ADVERTISING

Has created many a new business;
Has enlarged many an old business;
Has revived many a dull business;
Has rescued many a lost business;
Has saved many a failing business;
Has preserved many a large business;
And secures success in any business.
—*Texas Reporter.*

—Single Tax Crank—"How is the earth divided?" New Convert—"Between those that have it and those that want it."

—She (on her voyage)—"What is that place down there?"
He—"Why, that is the steerage."
She—"And does it take all those people to make the boat go straight?"—*Tit-Bits.*

—Sportsey—"I see they have been making changes in the game laws."
Pokerby—"Is that so? They haven't altered the rule about four aces being good for the pot, have they?"—*Brooklyn Eagle.*

—The first annual general meeting of the Colonial Mutual Life Association was held at its office, 180 St. James street, Montreal, some days ago. Lieut.-Col. Chas. King is president, Mr. J. F. Mathieson, general manager, Mr. E. A. Baynes, secretary.

—The annual meeting of the Montreal Warehousing Company was held last week. The usual reports were presented and accepted. The old board of directors was re-elected as follows: Messrs. L. J. Seargeant, president, W. M. Ramsay, vice-president, Thos. Davidson and Chas. Percy. The manager and secretary is Mr. G. A. Hanna.

—Before the dissolution last week of the U.S. Senate, Mr. Allison introduced a bill to incorporate the Maritime Canal of North America, to authorize the building of navigable canals through the territory of the United States between the great lakes, the St. Lawrence river and tidewater in the Hudson river, to regulate commerce on and over such canals, and to establish the same as military and post roads. The capital stock to be $10,000,000, and a bonded indebtedness of $200,000,000 is authorized. Be it remembered this is only a bill.

—A telegram of February 28th from Yarmouth, N.S., said that the Broad Gauge Railway Company had writs served on them for hire of mules, return of same to Baltimore, feed, maintenance, insurance, etc., $19,650; account rendered, $7,900; Jacob Bingay, cash lent, $62,000: Savage, Bridges & Jones, engineers, salaries, $710. The laborers have not been paid for January yet, and a number of small bills are owed to farmers, village merchants, etc., for supplies of hay, vegetables. etc.

—A subscriber, who had read the story told on page 1,041 of THE MONETARY TIMES of February 8th, about the English solicitor who proposed the health of the man who makes his own will as the greatest benefactor of the legal profession, sends us a clipping from the St Thomas *Journal*, headed "A Case of Poor Economy." Thus: The Hindmarsh-Comfort will case, which came to a rather unexpected and abrupt termination at the London assize court this week, ought to teach a lesson to those persons who are possessors of this world's wealth in any large quantity, and who wish when, they are dead and gone, that some special disposition shall be made of the wealth, other than would be done in the case they died intestate. They should learn by it that it is not safe to prepare and execute their wills themselves, but that they should intrust that important matter to a lawyer if they want to leave a will which will withstand the assaults of dissatisfied heirs. If it would have afforded the late Hiram Comfort any special pleasure to have his money divided as his will provided, and if he could know anything about what took place in London this week, he would deeply regret that he did not pay a lawyer $10 to draw and execute the will. But it is a good thing for the lawyers that he did not. If he had done so only one of them would have earned a $10 fee. As it is, nine of them will make a pretty good thing, even for a lawyer, out of it, and there will be some ciphers added to the wrong end of that $10 bill before their claims are satisfied.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co.
of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Deposit at Ottawa, $3,541,617 00

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

WHAT IS THE 7% Guaranteed Income Bond

OF THE

North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents or to

Gen. Agent for Toronto and Co. of York

City Agents—**G. R. Hargraft, T. C. Blogg, W. E. Wickens.**

Caledonian Insurance Co.

Of Edinburgh

ESTABLISHED 1805.

The Oldest Scottish Fire Office

Canadian Branch, 185 St. James St., MONTREAL.

A. M. NAIRN, Inspector. **LANSING LEWIS,** Manager.

MUNTZ & BEATTY, Agents, Toronto.

Queen City Fire Insurance Co'y.

ESTABLISHED 1871.

No. 32 Church Street - - TORONTO

DIRECTORS

J. AUSTIN (Founder Dominion Bank), **President.**
Hon. Justice Maclennan. James Scott, Merchant.

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office—Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses** and **contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

HUGH SCOTT, Managing Director. **THOS. WALMSLEY,** Treasurer.

Northern Assurance Company of London, Eng.

Branch Office for Canada, 1724 Notre Dame Street, Montreal. Income and Funds (1893): Capital and Accumulated Funds, $36,465,000; Annual Revenue from Fire and Life Premiums and from interest upon Invested Funds, $5,455,000; deposited with the Dominion Government for security of Canadian Policyholders, $200,000.

G. E. MOBERLY, Inspector. E. P. PEARSON, Agent. Toronto

ROBT. W. TYRE, Manager for Canada.

J. LORNE CAMPBELL. H. F. WYATT.

Campbell & Wyatt,

(Members Toronto Stock Exchange.)

AT THE ONTARIO LEGISLATIVE BUILDINGS.

There are many private bills before the Local House this session. One by the Irondale, Bancroft & Ottawa Railway Company, asking an extension of time till January 1st, 1905, for the building and completion of the company's lines of railway and its branches or extensions. Incorporation of the Grand Valley Railway Co. is sought, with power to construct steam or electric railways from the town of Berlin southerly in the valley of the Grand River to Brantford, and from Berlin to Listowel, or, in the alternative, Stratford or Elora. Incorporation of the Brantford, Port Dover and Galt Radial Electric Company is asked for the purpose of constructing electric railways from Brantford to Paris, thence to Galt, and from Brantford to Simcoe, thence to Port Dover. The Toronto, Hamilton and Niagara Falls Electrical Railway Company desires incorporation, with power to construct electric railways from Toronto along Dundas street to Hamilton, thence to some point on the Niagara River near the Niagara Falls, and from Grimsby to Dunnville. The Hamilton & Dundas Street Railway Company are asking power to operate their road by electricity, provided the council of the city of Hamilton consents.

The village of Oil Springs asks power to consolidate its debts at the sum of $17,943.01, and to raise a loan on the credit of debentures to pay off the said debt.

The Hamilton and Lake Erie Power Company seeks incorporation, with leave to construct a water-course and raceway from a point on the shore of Lake Erie, near the village of Dunnville, to some point on the Welland River, passing through the counties of Haldimand, Lincoln, Welland and Wentworth, to a point on Lake Ontario, and to erect and operate by water power electrical works thereon for the purpose of producing electrical energy.

The Georgian Bay Ship Canal and Power Aqueduct Co. wishes to so amend their Act as to have power to construct, maintain and operate between Lake Ontario, at a point in the County of York to some point on the Georgian Bay, a ship canal, for the purpose of conveying vessels, barges and other water craft and their passengers and their cargoes from the upper Lakes to Lake Ontario; to lay out and equip aqueducts between the same points, and by water conveyed to the said aqueducts to generate and develop electricity and to sell and dispose thereof for heat, light, power and other purposes. Changes are also asked in the borrowing powers of the company.

The Guelph Railway Co. seeks incorporation and power to enable them to construct and operate a surface street railway in the city of Guelph. The Kingston and Gananoque Railway Co. wish to be incorporated for the purpose of constructing and operating an electric railway between Kingston and Gananoque, with power to extend as far east as Brockville and as far north as Perth. The Hamilton, Burlington and Lake Shore Electric Railway Co. seek incorporation for the purpose of constructing and operating an electric railway, from Hamilton, by the north shore of Burlington Bay to the village of Burlington, and thence to Oakville; and from Burlington to Hamilton, by way of Hamilton Beach.

The city of Toronto asks that the county of York may assign to the corporation of the city of Toronto the agreement between the county of York and the Toronto & Mimico Electric Railway Co., made in 1890. The city also seeks power to enter into an agreement with the Toronto Railway Co. to haul the material removed by the scavenger department of the city for a period of ten years, with the option of renewal for further periods of ten years or less. Power to issue 4 per cent. instead of 3½ per cent. debentures is requested. The city also asks the right and privilege to run ferry boats between the mainland of the city and the Island, or between any two or more points in the city, with right to let or lease any such ferry or privileges. A long list of debenture by-laws is asked to be confirmed. This is legislation that should never be granted as early in the life of the by-laws as is usually asked. The Municipal Act gives one year in which to move against a money by-lay, if not promulgated. The time is short enough, and Parliament should not abridge the time by special legislation, as it is in the habit of doing, for the city of Toronto.

It is proposed to extend the time for taking the assessments in cities of over 30,000 inhabitants to the 30th day of September.

Port Hope wants power to issue $10,000 in debentures for the erection of a High School

—A bill has been introduced into the Minnesota Legislature by Representative Sander to amend the laws relating to interest and usury. It is now in the hands of the committee on banking. Another bill has been introduced by Representative J. D. Jones to revise the laws relating to the establishment of banks of deposit

—Aunt Cynthia (as her husband and nephew go to the door)—"That's jess one reason I hate to bring Josiah to town to visit any of his nephews. The very first night they allers take him out to see the sights of the city."

Her city niece.—"Oh, don't worry, aunty he'll be all right."

Aunt Cynthia.—"Yes; but he allers has to bring his nephews home in a carriage."

CANADA PAPER CO.

15 Front St. West, TORONTO | 578 Craig Street, MONTREAL.

Mercantile Summary.

A VERY pretty piece of coloring is the calendar for 1895 of the Canada Printing Ink Company. We congratulate Messrs. Corcoran & Lee.

THE west end of Lake Erie must be more like spring than the west end of Lake Ontario, for we hear from Detroit that the managers of the Detroit and Cleveland steamer line propose to start their first boat for Cleveland this week. There was a good deal of ice in sight from Amherstburg on Saturday last.

A LONDON paper says that the McClary Manufacturing Company, of London, have successfully established the first enamel factory in the country. A large amount of money has been expended in the preparatory stages of the industry, and skilled workmen have been brought from Germany to operate the plant. Work is now being carried on, and a line of enamelled goods is being produced which is equal in quality to the goods hitherto imported from England, Germany and the United States.

JOHN T. STOCK, general storekeeper at Waterdown, and also County Treasurer of Wentworth, is reported financially embarrassed. A fortnight ago it was ascertained that his funds as treasurer were short nearly $9,000. This, however, it is stated has been made good by his bondsmen. Since he has been in business he was supposed to be worth several thousand dollars.——After hotel keeping about ten years at Walton and at Blyth, J. P. Fischer assigns. For some time past he has been tardy in his payments.——Another hotel keeper in trouble is J. Zinger, of Eden Mills, who formerly farmed, and lately was supposed to be doing pretty well in the hotel. Now we hear that he is endeavoring to make a compromise at 50 per cent.

MORRIER & BERGERON, shoe manufacturers in Montreal in a small way, reported failed last week, have made an offer of 20 cents on the dollar.——Leandre Beaucaire, grocer, of the same city, has made an assignment. He owes some $3,000.——E. Sylvain, of Quebec, for some years past a dealer in groceries and liquors, is in trouble. He proposed a settlement at 75 cents a week or so ago, but has now reduced his offer to 40 cents in the dollar. He owes some $23,528.

HECTOR MCRAE & Co., of Ottawa, large dealers in cements and contractors' supplies generally, are in embarrassed circumstances, and are reported to be seeking an extension of time. Mr. McRae, who has always been a particularly active business man, has interested himself in a variety of outside schemes, including Government contracts, mining, lumbering operations, etc., in which a large proportion of capital is locked up, and cannot be realized on to advantage these dull times. The liabilities are stated at about $45,000, and quite a fair surplus is shown.

IN 1889 the Toronto firm of W. H. Bleasdell & Co. decided to retire from mercantile trade, and sold their wholesale fancy goods store to Hickson, Duncan & Co. After this Mr. Bleasdell made quite extensive purchases of real estate, and in May, 1891, he decided to resume business in the old line. Now he finds that his real estate operations are too heavy a burden to carry and continue his fancy goods trade with success. The services of E. R. C. Clarkson have been secured, and the business will be liquidated. A rough estimate of the liabilities and assets makes them about $35,000 each.

T. A. MACPHERSON has been twelve years in business as a general dealer at Omemee. At one time he extended his trade entirely beyond his capital, and was obliged, two years ago, to compromise with his creditors at 50 per cent. secured on liabilities of $3,500. This was paid. Since then he has found it very difficult to make any progress and now assigns. ——A compromise of 50 per cent. is offered to the creditors of James McIntosh, shoe dealer, Tilsonburg. ——An assignment has been made by J. H Ross and Richard Ross, both implement agents at Aurora.

Watch this Space Every Week

We intend to use it for cuts descriptive of our new Folding Box, patented in Canada, the United States and Europe. A new cut will appear each week.

If you are interested in paper boxes it will pay you well to make further inquiries regarding this new style of box, as it is adaptable to nearly all requirements. We shall be issuing a full descriptive circular shortly.

Mercantile Summary.

THE Ingersoll Electric Light and Power Co are applying for incorporation.

AN Ottawa cigar dealer, G. W. Stacey, in business about two years, is trying to effect an arrangement with creditors. He owes between $900 and $1,000, a part of which is secured by chattel mortgage.——Buckley & Co., furniture dealers, Cornwall, are offering 50 per cent.

THE Chancery Court of Ontario, on Saturday last, upheld the conviction of James Giles for running a pool room in Ontario. The judge said it does not appear to be material whether the race is run in Canada or elsewhere as long as the betting-house is opened and maintained in Ontario. Hereafter no pool rooms will be allowed to open in the province.

THE following are among the latest failures among traders in the Province of Quebec: Benjamin Coté, who has done a small general business at Hebertville for the last three years, has made an assignment. He started on a small capital made in the States.——J. A. Bernardin, of Hull, has been unable to carry through a 50 per cent. composition he arranged last fall, and has turned his estate over to the assignee. His liabilities at the time of his suspension were, for merchandise $17,000, mortgage indebtedness $14,000. —— F. S. Wetherall, a young Englishman, who came to this country several years ago with considerable means, which he subsequently lost to a large extent, and then engaged in hotel keeping about eighteen months ago at Compton, has now assigned.—— The failure of Desormiers freres, Joliette, noted last week, is likely to prove a bad one, though the business was only started a year ago. The liabilities are figured at about $15,000. The brother who had all the business experience there was in the concern, and which he brought from the United States, has been arrested on a *capias*. ——L. Taschereau, of Notre Dame de Lourdes, already reported in trouble, has assigned; liabilities $2,700, assets apparent $1,800.—— Broizal & Frere, a couple of Frenchmen, doing a peddling business in cheap jewelry at St Hyacinthe, profess to have been recently robbed of $900 worth of stock, and have been interviewing creditors with the view of getting a settlement.——V. Mailloux, dry goods, St. John's, who failed some weeks ago, has managed to make a settlement at 50 cents. Though until recently a farmer, and without any business capabilities, there were those ready to trust him to the extent of $10,400, and this in a town done to death in the dry goods line.

A Halifax telegram states that L. G. Crosby, commission merchant of Yarmouth, has assigned. Liabilities about $15,000.

The St. John firm of George Robertson & Co. will retire from the retail grocery business about May 1st, and confine their attention entirely to the wholesale trade.

R. Russell & Co., dealers in dry goods at Pembroke, Ont., finding themselves in tied-up shape, have arranged an extension of time on merchandise liabilities of about $8,000.

Torney, Georgeson & Co., an Ottawa plumbing firm, are reported to be in difficulties, and Georgeson has left the city. The remaining partner is trying to arrange the firm's liabilities at 50 cents on the dollar.

An old and well-reputed house in St. John is Jardine & Co., wholesale grocers. But they have been compelled to suspend, with liabilities, it is said, close upon $50,000. It is likely an effort will be made to compromise and carry on the wholesale business, but the retail business will be closed.

J. N. Verge, formerly master of a vessel, began business in 1892 as a liquor dealer in Halifax. He assigns, and the stock is partly covered by bill of sale.——In the same province, D. J. Morrison, of Baddeck Bay; J. Keddy, of Mahone Bay, and Alex. McRae, sen., of Middle River, all small traders, have also assigned.

A general store firm of Souris, P.E.I., Knight & Morrow, write their creditors that owing to losses on shipments to Newfoundland, and on some transactions in lobsters, they find themselves unable to pay in full, and make an offer of 45 cents on the dollar, in two payments at six and twelve months. They state their liabilities at $10,838.

Three years ago J. A. Skinner & Co., crockery dealers, came from Hamilton and opened a wholesale store in Toronto, claiming to be worth $75,000. In December last the senior member of the firm died. This with the fact that the firm seems to have made no money for two years, has no doubt influenced their banker in declining to give them further assistance. Now the business will be liquidated. They owe $59,000.— -Aikenhead & Sloan, who have a cold storage warehouse in Toronto, have assigned to E. R. C. Clarkson. When they started in Feb., 1893, they claimed to be worth $10,000. A portion of this was in real estate, but they stated that their storage plant was worth $4,500.

A grocer in Montreal, named William J Delaney, has made an assignment of his estate to the court, owing some $4,500, a brother figuring as a creditor for $2,500. He has only been a year or so in business, and during the past several months there has been a steady record of suits entered against him.——A. C. St. Amour, a roofer of the same city, has also assigned. He owes $8,646, and shows apparent assets of $5,972.

In noticing the new buildings erected, or about to be erected, in Berlin this spring, the *Record* mentions Trinity Methodist parsonage, George Potter's and George Philips' dwellings on Ahrens avenue, Albrecht's, Kimmel's and Pink's houses, the new Margaret avenue school. The Breithaupt estate, that journal adds, has done much in regard to the building operations on that side of the track, having laid out their building lots and sold them at reasonable rates.

The New York Supreme Court has decided, wo judges concurring, one dissenting, that Erastus Wiman shall have a new trial. And as a consequence Mr. Wiman is at liberty under $40,000 bail. The district attorney, Mr. Fellows, declares that the case, which is one for forgery in the second degree, will be carried to the Supreme Court. The district attorney who prosecuted last year, Mr. Wellman, having resigned, a new man will in that case have to prepare the case.

The collections of internal revenue in the United States for eight months ended with February of the current fiscal year, were $100,532,464, an increase over the previous eight months of $5,180,622. The principal sources of revenue were: Spirits, $59,095,538, an increase of four millions; tobacco, $19,761,741, increase of a million; fermented liquors, $20,118,768, a trifling decrease of $129,099; oleomargarine, $1,108,276, a decrease of $228,184. Among the items for February there appears one of $11,818 on account of income tax. This is the first time any receipts from this source have been reported.

It was determined, at a meeting a month ago of the Dunnville Electric Light Company, Ltd., to build a 200 horse-power power house, and to instal an alternating incandescent light plant of 1,000 16-candle power capacity. That the enterprise is a paying one in Dunnville appears from an audited statement, dated 5th February, signed by Arthur Boyle, also by W. F. Haskins, president, and James Rolston, treasurer, showing surplus earnings of $7,117 in addition to a paid capital of $2,500—equal, the statement says, to 13 per cent. of the capital. Mr. Rolston holds, as trustee, assets of $6,588 in bank and gas stock, besides the value of plant, which is placed at $3,000.

In May, 1893, D. McMurphy opened a grocery at Rat Portage, with but little capital. He assigned the other day, and creditors need not expect a large dividend.——Adam Falk retired from the general store firm of Krug & Falk at Tavistock, ten years ago, taking $18,000 out of the business. Then he moved to Wiarton where he started a furniture factory, and there lost nearly all his capital. About a year ago he moved to Shakespeare, where he bought the general stock of Mowat & McLean. During the past three months, owing to ill health, he has been entirely unfit for business, and now makes an assignment.

The business outlook for 1895 in Truro is encouraging, according to a circular from the Board of Trade of that town. Two new industries, one the manufacture of hats, another a woodworking establishment, started there with the new year. Three already existing factories, one making knitted underwear, another hats, a third milk condensing and canning, propose extensive additions. Building operations estimated to cost $85,000 are projected for the coming season. Some exceptional facilities are offered by this place to manufacturers, by reason of the near vicinity of the great coal and iron deposits of Nova Scotia. Cheap electric power is also, we are told, available for small establishments. Being the railway centre of the province, special advantages exist for the distributing trade. Truro has now fourteen manufactories and thirteen wholesale establishments, nine hotels, eight churches, three banks, three weekly and one daily newspaper. It also has good water supply and fire service; squares and public parks, and an excellent school system. In fact it is a live and progressive town.

Four years ago Henry Carter succeeded Jas. Mitchell as a druggist in Sundridge, but apparently made no progress. Now we hear of his assignment.——A compromise at 40 per cent. is offered the creditors of Benj. Lipsett, blacksmith at Mount Brydges. About a year ago he began making farm implements in addition to his usual business, and thus became involved.

PARLIAMENT has been summoned to meet on the 18th April

THE Toronto Brass Plating Company, composed of Edward Dawson and F. D. Chick, was started in December, 1893, and their plant has been mortgaged since that date. Not able to redeem it, a bailiff has taken possession and the stock will be sold

NEARLY twenty years ago R. H. Ramsay succeeded to the wholesale provision business of Gardner & Ramsay in this city, who failed For several years he was very prosperous. In December, 1890, his son was admitted to the firm, and the style was changed to R. H. Ramsay & Son. As recently as two years ago a surplus of $30,000 was claimed by them. For some time past strong competition and dull trade have been eating up their profits. At last their banker declined to make further advances, and the firm was obliged to suspend payment yesterday. The store has been closed An assignment has been made to Henry Barber.

THERE were sixteen tenderers last week for the city of Ottawa bonds, $301,000 four per cents. Among them were the Trusts Corporation of Ontario, the Canadian Bank of Commerce, Messrs. H. O'Hara & Co. and G. A. Stimson, Toronto; the Standard Life Company, the Bank of Ottawa, and various Montreal and Toronto firms. The tenders accepted were: Wm. Mackey, Ottawa, $150,000 at 102½. Canadian Bank of Commerce, $100,000 at 101 74. It was agreed to offer the remaining $51,000 to the Canadian Bank of Commerce at the same price. Their tender for a second $100,000 was 101.30.

ONE feature of the late boodle investigation in Toronto failed, amid the multitude of novelties, to attract the attention it deserved. Witnesses were sometimes required to give dumb testimony, not being permitted to breathe the names of individuals whom they implicated These names were written on bits of paper and handed to the prosecuting counsel or the commissioner, and sometimes no more was heard of them. In like manner, a name in a book produced would be passed over without pause or explanation. The novel method of partial suppression pursued in these cases does not recommend itself to the approbation of reasonable people. These are among the reasons which have caused the enquiry to be generally regarded as falling far short of what it should have attained and what is reasonably considered to be attainable.

LONDON LIFE INSURANCE COMPANY.

An increase of business and satisfactory additions to assets, to risks in force and to surplus, are shown by the London Life Company in the report for 1894 Net premiums and interest income was nearly $17,000 larger, and the amount at risk was half a million more than in the previous year. Industrial policies now number 25,229, and general policies 1,623, covering more than $3,724,000. The new business of the year amounted to no less than $1,459,000, the bulk of which appears to have been industrial assurance Death claims, endowments, etc., accounted for $44,000 of the outgo for the year Of the sum thus paid policy-holders $28 200 was for death claims, the balance going for cash profits, surrenders and matured endowments. The increase in assets amounts to $67,945, part of which was supplied by a call of five per cent made on the capital stock, making it twenty per cent. paid. The position of the company has therefore been strengthened by the business of last year The mortality has been very favorable, whether in the general or the industrial branch, and the rate of interest on the company's assets is more than 5½ per cent. The exhibit is creditable, and the company's prospects are good

TORONTO, FRIDAY, MARCH 22, 1895.

THE SITUATION.

From Spain the United States demands apology and reparation for firing upon the "Allianca," an American vessel, off the coast of Cuba. And to back this demand with force, if necessary, hasty preparations are being made in the dockyards of the Republic to get all the available war vessels ready for action. There has recently been some disturbance in Cuba, in the nature of insurrection, and the theory of the Spanish Minister at Washington, before receiving official reports of the transaction, was that a filli-bustering vessel, decked out so as to look like a Spanish war ship, may have fired the shot. The incident is a revival of the old and long-disputed right of visit. That Spain and the United States reciprocally had such right, under a treaty, which is a century old, is admitted; only the contention of the United States is that the exercise of the right is to be confined to time of war, on the ground that among other vessels "privateers" are mentioned. But a ship of war could do what a privateer could do, and might still be within her right. It is not at all certain that Spain is technically in the wrong in firing to compel the "Allianca" to heave to for the purpose of being searched. It is true that the Congress of the United States, in 1858, made a renewed declaration against the right of visitation, and England then, for the first time, acknowledged the principle. But what the United States should have done, and what she did not do, was to renounce the treaty with Spain which gave each country a reciprocal right of visiting the vessels of the other. She remains bound by her treaty obligation, and the only question is whether the treaty is operative in peace as well as in war. There will be no war, because Spain cannot afford to go to war with the Republic.

It would naturally have been expected that the crushing commercial disaster which has overtaken Newfoundland would have had a sobering effect on the whole population, and that visionary schemes of securing greatness at a single stroke would be discarded for workable plans of industrial progress. But the event proves otherwise. One of the proposed conditions of union to Canada which is talked about is a railway tunnel across the Strait of Belle Isle, a distance of 12½ miles, as a means of abridging the water connection with Canada. If this were done, a railway would have to be built from the Labrador coast till it connected with some existing system in Canada, over a country much of which has been in vain awaiting settlement for nearly four hundred years. The scheme is too preposterous to be admitted to discussion. It belongs to the visionary category, the pursuance of which has entrapped the islanders in the impassible strait in which they now find themselves. If Newfoundland desires to join its fortunes to Canada, her inhabitants must discard all magnificent nonsense of the nature of tunnelling the Strait of Belle Isle. A $20,000,000 lottery scheme having for its object the evolution of a company intended to take up the vocation of the "planters," as the suppliers and handlers of the fishery were called, is another symptom which it is impossible to look upon with favor or even with much patience. The child of desperation, it ought to be strangled, instead of fondled and encouraged.

Few could have been taken by surprise when the announcement was made that the Ottawa Government had decided to take steps in the direction of intervention in the Manitoba school question, for ever since the judgment of the Privy Council was delivered, indications have pointed in that direction. The first step will be to ask Manitoba to reform her school law, and it is known in advance that she will refuse to do so, to an extent that would satisfy the Roman Catholic minority. Whether she will ultimately refuse any concession whatever is not so certain, but the question will come back for action by the Ottawa Government. Parliament will have to be consulted, and it is already certain that some Conservative votes from Ontario will be cast against intervention. But should the measure carry, as it probably will, this will unfortunately not be the end of the difficulty. Manitoba, it is to be feared, will come into collision with the Dominion, and experience of the railway question gives us some idea of how intense the friction may become. Manitoba has a constitutional right to uphold her present school law, but the Government and Parliament at Ottawa have authority to contravene that law to some extent. The anomaly from which good is expected may result disastrously. The Dominion law intended to have a remedial effect will be irrepealable by the authority which will have enacted it, and it will require a very strong case, strongly backed, to ensure the intervention of the Imperial Parliament. We can only hope that the darker possibilities of the problem will fail in practice to be evolved.

The Fees Commission of Ontario, with Chancellor Boyd at its head, has reported. It favors the present mode of appointing a class of provincial officials by the Government, in preference either to direct election or appointment by the county councils. The application of a maximum income, which could not be exceeded, to officers paid by fees, is recommended. Fixed salaries for certain assistants in these offices are recommended; casual work to be paid in another way. The maximum would in fact represent a fixed salary. The Patrons in the House have, this session, declared in words and proved by their votes that they are opposed to the appointment of the officers in question by the county councils; they favor direct election, which, if granted, would make the officers independent of the Government, since their mandate would rest on the same authority as that of members of Parliament; whatever responsibility they might acknowledge would be to the caucus that could pull the strings when the time for re-election came round. The question must sooner or later come to a vote in the House; at present there is a clear majority in favor of continuing appointment by the Government, and it is on the increase. The question of electing these

officers would never have arisen if the governing party had not, by retaining office for an unusual length of time, driven the Opposition to expedients which would not otherwise have been resorted to.

The entrancing story of the mountain of gold discovered in Australia had better be put down to exaggeration bordering on the fabulous, till, if ever, confirmation comes. It is contrary to all experience, and is therefore presumably inaccurate. But this scepticism is not incompatible with the existence of a really rich, even an unusually rich, discovery. The whole truth, whatever it is, will come out, sooner or later. The alleged location of the mountain of gold is represented as nearly inaccessible; no one can attempt to reach it except at the risk of his life, and several lives were actually lost in the traverse. Such is the story. Where the truth begins and ends, we cannot know at present.

THE TORONTO STREET RAILWAY COMPANY.

A somewhat feverish movement of Toronto Street Railway stock has been taking place for some time past. It was first listed on the Exchange here in the middle of January, and has been forced into preternatural activity, more transactions in it taking place, from day to day, than in any other stock on the market. The price has within that time fluctuated between 67½ and 80¼. This has directed attention to the financial fabric on which the securities rest. The report of the company for 1894 puts among the liabilities, stock $6,000,000, first mortgage bonds $2,200,000, debentures $600,000. Three other items, including accounts payable and profit and loss, bring the whole liabilities up to $9,562,818. In the assets, cost of road, equipment and real estate figure for $8,744,079. What is meant by "cost," as here used? The cost of the road, properly speaking, would be the amount paid to build it; but as the building was, for the most part, not done by the company, the price paid for it to the city, with additional improvements, should correspond pretty closely with the actual cost. It is obvious, however, that this is not the "cost" given in the statement, but that the word is used to represent a price which contains a good deal of something in addition to prime or actual cost. A syndicate was spoken of when the road was taken over from the city; did this syndicate sell at a large profit to the company, that is, chiefly to themselves? It is difficult to understand in what other way the alleged "cost" can be put at nearly nine millions. There can be no doubt that the road is heavily overstocked, and that the swollen figures represent a large dilution such as generally goes by the name of water. It will scarcely be pretended that $8,771,097 has been expended on the construction and equipment and appurtenances of the road. Is it credible that the Toronto road has cost more than double what the Montreal road was built for? According to official figures given, the relative cost of the Toronto as compared with the Montreal road was as 100 to 57 per cent. A company overweighted with capital, real or fictitious, far beyond its needs, is unhealthy to the extent of the excess.

That the road has good earning power need not be questioned, but can it fairly be expected continuously to earn dividends on millions of capital beyond what the cost of construction and equipment represents? The profits for 1894 are put down at $250,695, having increased from $212,859 in the previous year. The fact that no dividend was paid last year makes it plain that the present price of the stock is purely speculative and is not a safe guide as to its value to investors. Of the proceeds of the capital stock of $6,000,000 practically nothing is available for extensions, which do not depend upon the volition of the company, but upon an order of the city corporation; and the company's report makes it plain that extensions must depend upon a further bond issue, which there is legal power to make to the extent of $35,000 a mile. That amount, it is stated, would suffice for extensions. The company has here provided a test by which they estimate the actual cost of the road. If we apply it to the existing road, in what light does it place the financial structure of the company? $35,000 a mile applied to the existing mileage, 81 miles, would require in round numbers $3,000,000, which is only about one-third the amount charged against cost of road, equipment, real estate, bridges, etc. But some allowance must be made for the cost of the power that has been provided; still, taking this into account, the figures given represent more than twice what the company admits the road can be built and equipped for. What has become of the balance?

PROPOSED ONTARIO LEGISLATION.

The Attorney-General has introduced a bill re-enacting here the English Act relating to leases and sales of settled estates, adding power to make mortgages for the purposes of improving such estates. Settled estates are those which are entailed and otherwise disposed of by will or other document, to various persons in succession for different periods of time, often to persons not yet in existence. In such cases life tenants and others find difficulty in dealing with them, and this bill will be welcome to many who have hitherto found it impossible to enjoy to the full estates in which they had only a limited interest, and their successors will find their interest in these estates, when they come to possess them, of more value than hitherto.

A suggested amendment to the Municipal Act is one that will be welcomed by insurance companies. Trustees of any police village may apply for the purchase of fire engines and other appliances for the purposes of fire protection or for lighting the streets of the village, or supplying light and heat to the inhabitants. The council of the township shall then submit a by-law for the purpose of issuing debentures to raise the amount necessary for the purchase, and if the ratepayers vote the money, then debentures are to issue and the appliances to be purchased.

One of the Patron bills is aimed at excessive charges of arbitrators, and provides for the payment by any party to the award of the arbitrator's fees into the office of the Local Registrar of the High Court for the county where the lands arbitrated about are situated. Taxation of the fees is to take place, and if the arbitrator's charge is sustained, then he gets the costs of taxation; if not, then he loses the costs of taxation and whatever is taxed off his bill.

A difficulty which all municipal corporations have to contend with is the laying out on plans by persons owning lands of shallow lots and narrow streets. It is now proposed to prevent the registration of any plan in any city, town or village, until the municipal corporation has first assented to the plan by by-law, so that an end may be put to the laying out of narrow streets and shallow lots. Jurors have frequently to spend Sunday away from home. It is proposed to give them pay for the Sundays intervening between the Saturdays and Mondays on which they attend at court. The alleged tampering with juries is the reason for the introduction of a bill designed to minimize this practice. The sheriff is to keep the names of the jury drafted for any panel under lock and key until four days before the sitting of the court for which the list is drafted. Anyone on filing affidavits that he desires to examine the

panel in order to discern whether a special jury should be struck in a special suit to which he is a party, may be given the names, but not otherwise.

An important change is suggested by the Attorney-General with regard to the law respecting dower, in mortgaged or other property. Where land is mortgaged and a wife has joined in the mortgage to bar her dower and the land is subsequently sold under the power of sale contained in the mortgage or under any legal process, the wife is to be entitled to dower in any surplus of the purchase money arising from the sale over and above the mortgage, to the same extent as she would have been entitled to dower, in the land, had the same not been sold; calculating the amount to which she shall be entitled on the basis of the amount realized from the sale of the land, and not on the amount realized on the sale over and above the amount of the mortgage only. This provision, however, is not to apply to a mortgage given back in part payment of purchase money.

BANK STATEMENT.

We give below a condensation of the figures of the statement of Canadian banks for the month of February, which bears date Ottawa, 19th March. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

Canadian Bank Statement.

LIABILITIES.

	Feb., 1895.	Jan., 1895.
Capital authorized	$ 73,458,685	$ 73,458,685
Capital paid up	61,687,571	61,685,329
Reserve Funds	27,545,341	27,545,341
Notes in circulation	28,315,434	28,917,276
Dominion and Provincial Government deposits	8,754,475	8,502,928
Public deposits on demand	64,555,403	66,601,119
Public deposits after notice	115,083,710	114,269,862
Bank loans or deposits from other banks secured	67,981	69,103
Bank loans or deposits from other banks unsecured	2,999,779	3,384,740
Due other banks in Canada in daily balances	234,293	151,324
Due other banks in foreign countries	156,427	153,708
Due other banks in Great Britain	3,691,063	3,627,031
Other liabilities	781,024	268,431
Total liabilities	$225,139,473	$225,945,606

ASSETS.

Specie	$ 8,058,278	$ 8,466,410
Dominion notes	15,863,550	15,579,051
Deposits to secure note circulation	1,812,301	1,810,736
Notes and cheques of other banks	5,865,781	6,935,631
Loans to other banks secured	217,728	69,103
Deposits made with other banks	3,305,977	3,653,529
Due from other banks in foreign countries	23,508,848	23,949,166
Due from other banks in Great Britain	3,106,880	3,452,532
Dominion Government debentures or stock	3,096,917	3,093,674
Other securities	18,477,478	18,238,007
Call loans on bonds and stock	18,054,628	18,086,905
	$101,368,366	$103,334,744
Loans to Dominion and Provincial Governments	1,277,675	1,100,140
Current loans and discounts	195,622,122	193,754,865
Due from other banks in Canada in daily exchanges	169,637	96,441
Overdue debts	3,216,112	3,406,348
Real estate	1 051,068	927,269
Mortgages on real estate sold	564,182	575,028
Bank premises	5,482,995	5,486,265
Other assets	1,932,393	2,058,462
Total assets	$310,684,728	$310,742,757
Average amount of specie held during the month	8,189,027	8,358,817
Average Dominion notes held during the month	15,671,774	15,102,715
Greatest amount notes in circulation during month	29,875,664	32,146,473
Loans to directors or their firms	7,618,378	7,734,021

TRADE WITH AUSTRALASIA.

Canadian manufacturers and exporters will find it worth while to peruse the letter of our Sydney correspondent in to-day's issue. He tells what is being done towards cultivating a trade with the Australian continent, and makes some suggestions as to the islands *en route* touched at by the steamers. Traffic returns show that while in 1892 New South Wales imported from us goods to the value of $50,000, she bought in the following year $150,000 worth, and last year $260,000 worth. If this rate of increase can be kept up we shall have in ten years an export trade of $2,500,000 to that one Australian colony. Her exports to us are as yet small, but show a marked disposition to grow. And some products of both countries now exchanged indirectly by way of American ports may be carried direct.

Stress is laid by our correspondent upon some hindrances to development of trade, such as the long intervals of mail communication and the heavy expense of cable messages. The first of these is likely to be modified in the course of a few months; the other may be cured when we get a Canadian Pacific cable. A further circumstance found to militate against intimacy of commerce is the high rates charged by banks for collection and exchange. But this is a matter which can be made to yield as soon as the grounds for a steady trade can be demonstrated.

What the letter narrates concerning the doings of merchants or their representatives who have visited Victoria and New South Wales is of especial interest. When such people as the Galt manufacturers go in person to the antipodes and get orders, and when commercial travellers who know their business report such sales as we have heard of in the last few months, there is strong reason to believe in a successful future for Canadian-Australian trade.

LIFE ASSURANCE IN 1894.

There are forty life assurance companies taking premiums in Canada, although ten of them, six British and four American, are not seeking any new business. Of the thirty that issue new policies there are twelve Canadian organizations, ten American and eight British, whose tota net business in force at the close of 1894 amounted to $302,541,319 under 237,182 policies, which is equal to an average of $1,275 for each policy. Of the ten companies which do not take new business the amount in force is only $6,254,562 (about 2½ per cent. of the whole), and of this $3,490,000 is in the four American, $2,764,000 in the six British companies.

The proportion of the total life underwriting done by Canadian companies continues year by year to increase. This is as it should be. In 1894 the Canadian companies took more than half the total premiums. Thus:

Canadian companies	$5,434,880	or 54 83 per cent
American "	3,398,700	" 34 29 "
British "	1,078,000	" 10 88 "

If the amount in force be taken as a basis for the proportion, Canadian companies have 57.52 per cent., American 31.50 per cent., and British 10.98 per cent. of the whole. The new business went in still larger share to the home companies, for out of the forty-nine millions of new business written

Canadian companies took	$28,419,381	or 57 68 per cent
American " "	17,624 984.	" 35 77 "
British " "	3,219 583.	" 6 55 "

The number of policies new last year, as compared with 1893, shows a noticeable increase; it is more than 100,000, where in the previous year it was only 40,279, while the increase in amount is only four millions. This is largely owing to the development of industrial life assurance,

which has been pushed by the London Life and the Metropolitan Life Companies.

With regard to death claims last year, the mortality was less than in the year preceding in the proportion of 38 per cent. of the premiums, as compared with 41¼ per cent. The aggregate of the policies become claims was $3,766,886, divided thus :

Canadian companies' death claims..	$1,627,917
American " "	1,568,059
British " "	570,910
Total	$3,766,886

In proportion to premiums, the share of the mortality falling upon Canadian companies during the year 1894 was much less than the average ; in the British and American it was much more.

CANADIAN TRADE WITH AUSTRALASIA.

(MONETARY TIMES *Special Correspondence.*)

SYDNEY, New South Wales, Feb. 16.

The establishment of the Canadian-Australian steamship line, besides putting Canada in direct communication with Australia, has given access to the Fiji Islands, of which advantage has hardly yet been taken by the exporters of the Dominion. Necessarily the market of these islands is a limited one : the total population of the group scarcely exceeds 120,000, of which only 2,036 are whites. In spite of this fact the annual imports, which are steadily increasing now, reach the amount of $1,250,000, principally made up of goods of English, European and American manufacture, brought to Fiji almost entirely through Sydney houses.

Canada is practically the only manufacturing country which has direct steamship connection with the islands, and goods can be laid down in Suva, the capital, more quickly and at a less cost than from any other country. As most of imports pay an Australian middleman's profits, the Canadian manufacturer dealing directly with a Fiji house should have no difficulty in quoting satisfactory prices. The Canadian steamers remain for some hours at Suva, and commercial travellers, on trips to Australia, will have the opportunity of canvassing the merchants of that city without loss of time. Should they wish to visit Levuka, the only other important point, they can remain over and continue the journey on a local steamer. Arrangements will probably be made by the Canadian-Australian Company to enable this to be done.

Returns have just been compiled of the direct trade between New South Wales and Canada, which show considerable progress. The returns for 1894 and the two preceding years are :

	1892.	1893.	1894.
Imports from Canada to New South Wales £10,655		£33,706 .	£52,740
Exports from New South Wales to Canada	38	8,374	14,520

Unfortunately these figures are not entirely reliable, as details of the trade show goods credited to Canada which are obviously the product of the United States and shipped by way of Vancouver. On the other hand, the above statement does not include some articles that came from Canada through the United States, nor some productions, such as wool, sent to Canada by way of New York. These errors characterize returns of previous years as well, so that the table may be accepted as being useful for comparison.

A look at the retail prices of some articles sold in New South Wales would lead one to believe that there could not be the slightest dfficulty in Canadian manufacturers doing business out there. On examination, it is found, however, that in many lines the retail profits charged in the shops are much higher than in Canada, partly due no doubt to the larger expense of doing business in Australian cities. This applies more to Sydney than to Melbourne, where the financial depression has been much more keenly felt In the latter city rent and wages have been greatly reduced, and keen competition has reduced prices to the lowest figure. The United States are sending in goods to Sydney, and there is no reason why we should not follow them in many lines.

There are some difficulties, which until overcome will affect the development of the Canadian trade. One is the length of time which elapses before the replies can be received to letters sent to Canada. During the next few months the two lines of boats which connect America and Australia leave and return at about the same dates. This arises from the fact that the Canadian steamers sail once a month, while the San Francisco line dispatches a boat every four weeks, making a difference of one sailing a year. Negotiations are now in progress which may lead to the Canadian line making an additional sailing in the year, with the dates so arranged as to alternate with the American boats, thus giving a fortnightly mail service. This would shorten communication with eastern points of Canada by three weeks. A second difficulty is the high rates charged for cable messages between Australia and Canada. Should Great Britain agree to assist in construction of proposed Pacific cable, there can be no doubt that a sufficient number of the Australian colonies would join in the project to assure the success of the scheme, in which case present rates will be reduced to one-half.

Another drawback is the excessive cost of collections and exchange when made through Canadian and Australian banks. The ordinary charge for small amounts has been 2 per cent. Where consignees remit direct to Canada it can be done at a much less cost by means of a draft on London. As in the majority of cases the business will be done by means of drafts, as is the custom in Canada, the banks should be urged to arrange for a substantial reduction in these rates

A number of Canadians have visited Australia recently as the representatives of prominent houses. In December Mr. Girvin came to Sydney with commissions from the Canada Rubber Co. and other industries. Without going beyond Sydney he succeeded in making excellent contracts with large firms to handle the rubber goods in the Australian colonies, and was able to return by the next steamer. Mr H. McLaren, travelling for D Morrice & Co., came over in January. He found in some lines of cotton and knitted goods competition against the cheap manufactures of Germany was hopeless. So far he has devoted himself to Melbourne ; and though hard times have affected it more than any other city of the colonies, he has effected sales to some of the best wholesale houses in Australia Mr. H. J. Boswell also is in Sydney, having arrived some three months ago. He has entered into partnership with a gentleman of that city, has sold some sample lots of hardware, and reports prospects in several of the lines which he represents as excellent. He has been hindered by the non-receipt of samples of edge tools, hardware, etc., promised him. The "Miowera," which arrived on the 10th inst., brought as passengers Mr. Dietrich, of the firm Shurley & Dietrich ; Mr. R. MacGregor, of MacGregor, Gourlay & Co.; Mr. R. Scott, of the Victoria Wheel Works, all of Galt, and Mr. A. B. Petrie, of Guelph. The three Galt manufacturers brought quantities of their wares with them, and immediately, on arrival, devoted themselves to business. Mr. Scott succeeded in disposing of his goods to the leading firm in the trade, who will act as his agents for Australia. On some of the goods brought not suited to this market Mr. Scott will nett a loss, but the articles suitable to the trade realized satisfactory, though moderate, prices. Mr. Dietrich has arranged with the same firm to handle the well-known Maple Leaf saws. The stagnation of the building and timber trade has prevented Mr. MacGregor from being so successful as the other gentlemen. As he has yet met only a limited number of buyers, he may be able to make a very encouraging report before he returns. The trade of the Massey-Harris company, under the pushing management of its branches, is steadily increasing. The leading house in Tasmania, we are informed, has just abandoned the binders of a firm which they have sold for years to take up the Canadian implements. After competing against the Massey-Harris machines for four years, this firm came to the conclusion that to hold their trade they must handle these machines.

To be continued

TRURO, N.S., BOARD OF TRADE.

This board, which was organized in 1889, and incorporated in 1890, held a meeting recently and elected officers for the current year. It is a live body, and on the 1st January last numbered 100 members. The present officers are :

C. E. Bentley, president.
E. E. McNutt, 1st vice-president
W. E. Bligh, 2nd vice-president
G. A. Hall, sec.-treasurer.

Council.—T. G. McMullen, P. McG. Archibald, R. J. Turner, S M. Bentley, J. E. Bigelow, G. W. Smith, R. T. Craig, Wm. Craig, F McClure, D. J. Thomas.

ÆTNA LIFE INSURANCE COMPANY

The forty-fifth annual statement of this well known company has appeared in print. It speaks for itself showing large assets, so productive that the mere interest therefrom more than meets the company's death claims. Of few companies can this be said. But a somewhat new departure will be found side by side with the annual report. A statement of the actual payments made to the Ætna Life by persons aged 27 and 31 at entry is given ; and then a means of measuring these by the payments required upon exactly similar policies in two of the largest companies, is afforded. There is but little wonder that the Ætna should produce satisfactory results for insurants. It is long established ; its assets ($38,000,000) are well invested ; it has been conducted with economy and without spread-eagleism. Such companies always give good satisfaction to the investor.

FOR GROCERS AND PROVISION DEALERS

During February we imported $88,893 worth of tea

Ottawa grocery clerks have organized an assembly of the Knights of Labor.

Nearly 7,000,000 fry, all sockeye salmon, is the result of the Fraser River hatchery's output last season.

The cold storage plant at New Westminster, B.C., is now completed and in full running order. It is provided with apparatus to store fish, fruit and vegetables.

There is considerable difference of opinion as to the amount of cheese carried over in Montreal from last season, estimates ranging all the way from 35,000 to 60,000 boxes

On the 11th inst. fresh eggs were quoted at 20 to 21c. in Montreal, but a week later, on the 18th, quotations had fallen to 15c. a dozen. The market remains depressed, and without signs of improvement

The Portage La Prairie oatmeal mill, owned by the Hon. Joseph Martin, has been sold to Messrs. Alex. McKinnon and Andrew Kennedy. This mill made several successful consignments to England last summer.

St. John fish dealers complain of depressed trade with the West Indies, and say that the recent return to the old duty, with the addition of ten per cent. more, practically closes the market to Canadian fish in the Spanish West Indies

A new fish company has been organized to operate on the Lake of the Woods, to be known as the Lake of the Woods Fish Company. Mr. F. W. Colcleugh, M.P.P., is manager, and has ordered the erection of a mammoth ice-house and fish-house near Rat Portage

Hon. Thos. Ballantyne & Sons, of Stratford, disposed of their herd of Shorthorns, twenty-seven in number, last Saturday. The lot brought about $3,000. Messrs. Ballantyne find Ayrshires best for creamery purposes and will limit their herd to this breed.

The Fraser River canners are petitioning the Dominion Government to allow them to retain the 7½-inch mesh net in use last year instead of the 7⅞-inch mesh net which the new regulations provide for. The canners say that they are not in a position to incur the expense of buying new nets this season

Notice of incorporation of the Provincial Canning Company is contained in the British Columbia *Gazette*. The incorporators are: Norman McLean, of Vancouver; J. W. Sexsmith, Richmond, and Robert Wilson Harris, of Vancouver. Capital stock, $100,000. The principal place is Eburne B.C.

Mr. John M. Shand has just concluded a contract with Capt. Howard, of Gatling gun fame, to take charge of a very extensive lobster-packing plant to be erected on the coast of Labrador. It will contain the latest machinery for the packing business, together with steamers and other vessels for the fishing grounds. Sixty operatives from Halifax and Gaspe will be engaged, and no expense spared to conduct the industry on a large scale.—*Bridgewater Bulletin.*

At the close of last month the stock of currants in London amounted to 19,420 tons, against 16,540 tons at the corresponding date in 1894 and 17,350 tons in 1893. The stock of raisins there included 900 tons Valencias, against 695 tons last year; Turkey, Chesme and Eleme, 215 tons, against 210 tons; Sultana, 3,655 tons, against 2,325 tons; muscatels, 135 tons, against 75 tons. The stock of prunes was 15,630 tons, against 7,190 tons last year and 3,390 tons two years ago.—*N. Y. Journal and Bulletin of Commerce*

Why should Canadians not engage more extensively in the growing of tobacco? In several provinces tobacco culture has been successfully carried on, and yet it has not, save in a few districts, passed the experimental stage. Mr. Craig, the Dominion Horticulturist, conducted last summer at the Guelph farm a series of practical experiments in the culture and cure of tobacco. Samples of 27 of the best sorts were sent to a Montreal manufacturer who has thoroughly tested them and will make a report on the result

The Grand Trunk authorities have given notice that in the case of shipments of flour from Ontario *via* Montreal, shippers will have the privilege of bringing the flour to Montreal for export, to arrive on the 1st of April, at current rates, which will include storage to the 15th of May and cartage to the wharf, owners to pay wharfage. In the case of United States flour, shippers will have the privilege of bringing such shipments to Montreal for export and storage until the opening of navigation at current tariff rates, plus actual cost of storage at Montreal, owners to pass custom's entries and pay wharfage. The railway will do the cartage to the wharf free of charge

The fruit steamers are always the first arrivals of the season's fleet at Montreal, and already information comes to hand in reference to their appearance. The steamship "Fremona" is now loading at the Mediterranean ports of Messina and Palermo, and will sail so as to arrive in Montreal as soon after the first of May as the opening of navigation will allow. Ten days afterward the "Avlona" will sail with 30,000 boxes, and will be followed by the "Dracona" commencing to load at Marseilles on April 3rd. The cargoes of the "Fremona" will be oranges and lemons exclusively, amounting to about 70,000 boxes. The steamship "Escalona" will sail from Charente and Bordeaux for Montreal, and will commence loading at those ports about April 10, arriving in Montreal as soon after as possible.

RETAILING DRY GOODS

The Palmerston flax mills finished the season's work on Saturday last.

Cape manufacturers are introducing high collars lined with a thick ruche of silk.

A letter from Belfast advises us of a good trade with Canadian merchants in linens and every prospect of its continuance.

Mrs. Hicks—"I have been shopping all day and came home completely worn out." Hicks—"You do look just a bit shop-worn."

Winnipeg dry goods merchants have been almost unanimous in signing an early closing petition, and the city council, it is said, will take immediate action to secure this end

The Central Dry Goods Company, Limited, Winnipeg, has been incorporated according to the laws of the Province of Manitoba. The capital stock of the company has been placed at $25,000

The woolen mill owned by Mr. Wm. Faint in Ashburnham, near Peterborough, had a close call from fire last week. The flames were extinguished after damages estimated at $500 had been done

A fabric known as "Fiberine" is in good favor with dressmakers to perform that all-important function of puffing sleeves. It is light in weight and cheap in price. Do you keep it? If not, write to The Ever Ready Dress Stay Co., Windsor, Ont

There is a strong feeling in Manitoba that the provincial legislature should enact laws protecting fur-bearing animals out of season. Agricultural interests would prevent such laws from extending to all fur-bearing animals, but some attempt should certainly be made to secure the permanency of an industry so important to the commercial interests of this western province

February imports were smaller than those of the same month last year. During the month the following items were chronicled in the list of textile imports: fringes, laces, etc, $68,500; hats and bonnets, $71,167; fine worsteds and coatings, $101,326; woolen dress goods, $102,973; manufactures of silk, $69,825; cotton $115,398. All but the latter item were subject to customs duty

The raw silk season is now drawing to a close and despite the fact that stocks are neither large nor small. In Milan, quotations have remained unchanged for some considerable time. In Yokohama stocks of desirable grades are within small compass. The unsold stock in Yokohama on February 14th was reported 6,725 piculs, as against 13,950 piculs unsold stock on February 14, 1894. Native manufacturers who work on the export trade are active buyers

The new parasols, remarks the Paris correspondent of the *Draper's Record*, are plain, in fact, *en tout cas*, but much larger than usual. The handles are in iris wood, embellished with a flower climbing up. Of course these are only spring sunshades. Later on we shall see a revival of the Louis XVI. sunshade, with its long handle. It remains to be seen whether this style will take; the stick will certainly be useful to walk with, but no one can certify as to any *mode* in Paris until it is out

A live retailer we know is preparing for his Easter windows. Although he is always pushing for trade he never loses an opportunity for a special effort. What say you to windows trimmed with Easter goods, millinery, hosiery, neckwear and dress goods? Don't make it an opportunity to show off how much of last season's stock you are carrying over; bring forward your newest goods, surround them with Easter lilies and neatly ticket everything "Our Easter Sale."

Writing of millinery, the Paris correspondent of the *Dry Goods Economist* says: In the matter of broad brims two conflicting influences are at work: on one side the straw hat manufacturers, and on the other the milliners. The prophecy in respect to very broad brims may be traced back to the former, who have every reason to wish to provoke a demand for shapes, which are much more profitable than braids, whereas the milliners—I mean those who stand at the top of the tree and who have a great reputation at stake—would rather see medium-sized hats the fashion, as they are susceptible of greater variety

"Halifax tweed" is not, as is popularly supposed, an English textile, having originated in our own Halifax the capital of Nova Scotia. For many years the officers stationed in this Canadian gar-

son town have worn hunting suits made of coarse domestic-made tweeds. The fame of these suitings for durability and comfort spread abroad until English and Scotch looms were soon busily making "Halifax tweed." However, some of the high-class London tailors are not satisfied with anything but the "genuine" article, and annually import into Great Britain from the original centre of production.

SHOES AND LEATHER.

The wholesale shoe firm of G. Boivin & Co., Montreal, in which Mr. P. A. Boivin, son of the original founder, has for several years past been the only partner, announce that they are retiring from business.

Profuseness of ornamentation is the principal feature in women's shoes for the summer of 1895. The vamps are designed with pinking of the most intense kind, the facing caps and bindings all being perforated.

Settled weather is the one thing merchants pray for now. While the rubber trade is not without its advantages, overshoes form too convenient a covering for old shoes to make them an object of favor with the trade in early spring. A few warm Saturdays will do much to usher in the new season with all its possibilities.

The merchants of the larger towns and smaller cities of Ontario complain that the cream of their trade is being taken from them by canvassers for a Toronto maker. Men are being sent to many of the stylish dressed young men of the country, and carrying the latest English styles, they meet with good success in their canvass for orders.

A general storekeeper in the county of Peterborough writes: "I read the article on 'The Boot and Shoe Counter' in your issue of March 8th, and followed your suggestion in so far as to dress both of my windows with boots and shoes and keep them there for one week. The result was a supriser, and I believe I can work my boot and shoe trade up to double its present size."

The rubber goods trade is brisk. Excessive snows mean an active demand for the lighter rubbers in spring as well as for heavy overshoes in the winter. The clumsy, ill-fitting rubber is now a thing of the past. Although not so diversified in shape as the leather shoe, the designer has done much to prevent one from calling the rubber shoe a nuisance only to be put up with on rainy days.

. Colored shoes have not given the best service in winter wear. The sales of these goods, however, have been large, and promise, with improved manufacture, to increase next winter. There is but little doubt that the early spring will witness a "boom" in this trade. The lighter the color the more promising the sale, the trade having apparently passed almost completely away from the dark chocolate shades so popular two years ago.

It is proposed to form a joint stock company to take over the leather belting and mill supply business of the J. C. McLaren Belting Co., Montreal, which has hitherto been carried on as a private enterprise. Notice is given that an application for a charter will be made to the Quebec Legislature, authorizing a capital of $99,000. The principal applicants are D. W. McLaren, Alex. Walker, B. S. Sharing, Joseph Ryan and Gordon W. McDougall.

The rage for narrow toe shoes has been compelled to struggle with opposition from many quarters. Unkind references have been made to heathen Chinese practices; scientists have talked about hindrances in the development of the race, while others have sought to settle the question by proving that "Trilby" could not have worn shoes with pointed toes. But the narrow toes are still with us, and the spring shoes prove that instead of abating, this style is more pronounced than ever.

"Are you busy these days, Mr. Finlay?" was asked of a repairer of footwear the other day. "No so very," was the reply, "ye see, the weet season's comin', an' the folk that ye wad expec tae buy new shoon or get their auld anes cobbled jist pits on rubbers on the tap o' their auld shoon. Ye wad be surprised hoo mony folk hide the cracks in the uppers or the worn oot soles wi' rubbers." May be that is because so many people are feeling hard up these days, was suggested. "Na, that hasna muckle to dae wi't. It's the same way ivry spring. Folk whiles buys a pair o' new rubbers an' pits on over auld shoon. But gin it come warm they get sair fashed with the rubber things an' then they'll come tae the like o' me."

There are some queer phases in trade to-day. The March hide market, with its dirty, wet, grubby offerings, is points ahead of the November market, when hides were in good condition. Who bears the burden of the advance? Clearly not the butcher or the broker, while the shoe man, manufacturer, jobber and retailer have merely talked of higher prices, the burden having rested in an intermediate stage upon the tanner. The evident unfairness of this but illustrates the Scripture text, "Unto him that hath shall be given; but from him that hath not shall be taken away even that which he hath." This saying might well be incorporated in the economic text books. Hides are in comparatively scant supply, and hide merchants hold with strong hand; tanners are numerous, competition is keen, and it is either work for nothing or work not at all.

TRANSPORTATION NEWS.

The first Liverpool steamer from Montreal for the season will be the "Sardinian," in charge of Captain Moore, and is dated to sail on May 4th.

The "Pomeranian," from Glasgow, is scheduled to sail for the port of Montreal on April 18th. This would indicate a prospective early opening of Gulf navigation.

The service of the Donaldson Line from Montreal to Glasgow will be stronger this season than last, the weekly sailing to be taken by the steamships "Alcides," "Hestia," "Indrani," "Amarynthia" and "Tritonia."

The returns of the Galt and Preston Street Railway for February show that seven thousand passengers were carried during the month. This, we believe, is the smallest number carried during any month since the road has been in full operation; the decrease is probably due to snow blocades.

Steamship lines running between San Francisco, the Puget Sound ports, and Alaska, have been cutting rates. Cabin passage from San Francisco to Sitka has been as low as $15, and steerage half that amount. This seems little money for so long a voyage; the profit lies presumably in the homeward trip.

A regular fortnightly service from Montreal to London and Newcastle for the coming season, has been arranged by the Thomson S.S Line. The steamships "Gerona," "Hurona," and "Iona," will be used in this service, also a service at regular intervals to Leith, Dundee and Aberdeen, and direct from the Mediterranean, French and Spanish ports to suit the spring and autumn trade.

Notwithstanding the severity of the winter just past, marine authorities expect an early opening of navigation on the great lakes. The Canadian department of marine affairs has received a communication that the lights on the United States side of Lake Erie and the Detroit River would be put in operation on the 15th of the month, and asking that the lights be lit on the Canadian side.

It is said the various steamship lines between Boston, St. John, Halifax and other ports have gone into a combine whereby rates of travel are to be increased. The Yarmouth-Boston direct passengers already pay a higher rate than on any other transportation company in America. It is to be hoped any new arrangement will not further discriminate against Yarmouth.—*Yarmouth Times*

The questions of sampling grain in cars and the grain shortages were discussed at a meeting of the Montreal Corn Exchange on Tuesday, and it was decided to have both questions brought before the railway companies. The following gentlemen were present: D. G. Thompson, president; Wm. Stewart, treasurer; R. M. Esdaile, E. F. Craig, James Allen, James Robillard and A G. Thompson

For the year 1894 the net earnings of the Calgary and Edmonton Railway Company were $33,454, as against $41,575 for 1893. This falling off in the revenue of a road running through so new a country cannot be deemed satisfactory. Possibly it is an evidence that that part of the Canadian North-West has not been showing activity or material advancement during the last year. On the other hand, the working of the Qu'Applle, Long Lake and Saskatchewan Railway this year resulted in a profit of $872, as against a loss of $14,753 for 1893

Many changes will take place, says the Montreal *Star*, this season in the shipping business of the Hamburg-American Packet Co. James Thom will still retain the position of manager; Capt. Shuck, formerly shore superintendent here, has been transferred to Baltimore, and it is probable that Capt Spliedt, of the S.S. "Pickhuben," will succeed Capt Shuck. This vessel has had her name changed to the "Georgia," and will sail from Antwerp on April 16th for this port, in charge of Capt. Meyrrdiercks. The S.S. "Grimm," under her new name of "Scotia," will sail here again this season.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, March 21st, compared with those of the previous week:

Clearings.	March 21.	March 14.
Montreal	$11,031,140	$9,908,413
Toronto	4,996,259	5,366,172
Halifax	695,454	966,451
Winnipeg	695,454	655,379
Hamilton	524,657	553,800
Total	$18,118,958	$17,450,215

Aggregate balances this week, $2,734,131; last week, $2,867,125.

ABSTRACT OF

LIFE INSURANCE IN CANADA FOR THE YEAR 1894,

Being Preliminary Statements of the Business of Life Insurance Companies Doing Business in the Dominion.

J. M. COURTNEY, *Deputy Minister of Finance.*

Correspondence.

FIRE LOSSES MONTREAL AND TORONTO

Editor MONETARY TIMES

SIR,—Attention has been called to a recent editorial in the Montreal *Insurance Chronicle*, animadverting in a somewhat severe tone upon Toronto generally and upon our municipal authorities particularly. Now, I have nothing to say in palliation of the do-nothing policy of our aldermen; to apply no harsher term, their utter indifference and inaction is deserving of the severest condemnation. The chief of our fire brigade, now, alas, in his grave, the Underwriters' Association, the Board of Trade and the citizens through the press have again and again called the attention of the council to Toronto's deficiency in water supply and appliances to cope with an extensive conflagration, but without avail. Our brigade have done nobly with such means as were available; in nine years and a half we have had nothing (since the Esplanade fire in August, 1885) approaching a conflagration. All fires have, with scarcely an exception, been confined to the building or premises where they originated.

Our city has been singularly fortunate, beyond any city in the Dominion, but I don't think on this account Toronto has shown any disposition to sneer at Montreal's inability to grapple with fires, as the sapient writer affirms. If there has he has certainly repaid it with the succession of loud sneers which runs through the whole article in question. It is often said that Montreal loses no opportunity of sneering at and depreciating Toronto as nothing more than a big village. Well, we can afford to listen to this kind of guff from Montreal. As the Yankee said in his Fourth of July oration referring to England, "We can feed her with one hand and lick her with t'other."

However, joking aside, let us look at facts and figures. The *Chronicle* started in April, 1892, to give a monthly report of all fires that had occurred in Canada during the previous month. I have taken the trouble to go carefully over every number of that journal from the above date to the close of 1894, and the following are the comparative results of fire loss in Montreal and the "Big Village" respectively:

Nine mos.	Montreal losses		Big Village
1892.....	$318 000	1892.....	$ 69 100
1893.....	788,330	1893.....	135 000
1894.....	533,450	1894	86,100
	$1,634,780		$290 200

I think these figures are correct, but I am open to correction. They show the fire loss of Montreal in three years nearly six times that of Toronto. Now, Mr. Editor, I think you will agree with me that Montreal has the pre-eminent right in this connection to the claim of being the "Big Village" for losses at all events.

Very truly yours,

SCOTT.

Toronto, March 21st, 1895

Meetings.

LONDON LIFE INSURANCE COMPANY

The twentieth annual meeting of the shareholders and policy-holders of the London Life Insurance Company was held at the company's office, London, Ont., on Thursday, the 7th day of March 1895.

There were present: The president, Mr. John McClary, in the chair; A. O. Jeffery, William Bowman, G. M. Harrison, W. F. Bullen, Geo. C. Gibbons, A. S. Emery, T. H. Smallman, H. Tatham, A. Bretz, J. W. Humphrey, B. Allen, J. E. Jeffery, Geo. F. Jewell, P. McAlpine the secretary, J. G. Richter, and others.

After reading the notice calling the meeting, the minutes of the last annual meeting were read and confirmed, and the directors' report and financial statement submitted, as follows:

REPORT

The directors of the London Life Insurance Company beg to submit their annual report and duly audited financial statement for year ending December 31st, 1894.

During the year 13,716 applications for insurance of $1,484,826 were received, of which 13,658 applications for insurance of $1,459,181.50 were approved of and policies issued therefor.

The net premium and interest income of the year were respectively $132,580.49 and $21,479.71, making together $154,060.20, an increase over the previous year of $16,816.93.

The sum of $28,604.48 was paid for death claims, and $15,653.64 additional for matured endowments, surrendered policies, and cash profits to policy-holders, making a total of $44,258.12 paid policy-holders or their heirs during the year.

The insurance in force on the company's books at the close of the year, after deducting all re-insurance, amounted to $3,724,505.21, under 1,623 "General" and 23,606 "Industrial," or a total of 25,229 policies, an increase of 5,476 policies for insurance of $507,031.86 for the year.

During the year 250 new shares of the capital stock of the company for $25,000 were issued, and a call of twenty per cent. with twenty per cent. premium thereon, was made. A further call of five per cent. was also made in respect of all shares previously allotted. The new shares were duly subscribed for, and all calls promptly paid. The company's subscribed capital is now $250,000, of which twenty per cent., or $50,000, has been paid up.

The assets of the company, exclusive of uncalled but subscribed capital, now amount to $470,608.11, an increase of $67,945.26 for the year. The interest and other payments falling due during the year were in the main satisfactorily met. No losses on investments have been incurred during the year, and no real estate came into the company's possession by foreclosure or otherwise.

We have to record, with much regret, the removal by death since last annual meeting of Mr. Joseph Jeffery, president, who had been a director of the company from its inception, and was greatly esteemed.

JOHN MCCLARY,
President.

TWENTIETH ANNUAL FINANCIAL STATEMENT FOR THE YEAR ENDING 31ST DECEMBER, 1894.

Net invested assets, 31st Dec., 1893		$382,742 15

Surplus security to policy-holders		$63,085 12
Capital paid-up		50,000 00
Divisible surplus		$13,085 12

To the Shareholders of the London Life Insurance Company.

GENTLEMEN,—I hereby certify that I have completed a careful audit of the books and accounts of the London Life Insurance Company for the year ending December 31st, 1894, and find the same correct and in accordance with the above statement, the Reserve Fund and all other liabilities being fully provided for. The securities are in order, and the books of the company are in their usual condition, correctly and neatly kept.

GEO. F. JEWELL, F.C.A.,
Auditor.

London, Ont., Feby. 15th, 1895.

The president, Mr. John McClary, in moving the adoption of the report, said:—

GENTLEMEN—On behalf of my fellow directors, as well as for myself, I desire to express our pleasure in meeting so many of the shareholders and policy-holders of the company at this annual meeting.

The report of the directors and accompanying financial statement before us can hardly fail to convey a full, fair and intelligible exposition of the affairs of the company. The business transacted during the year and in force on the company's books at the close of the year, the several items of income and outgo, the assets and liabilities, are all plainly set forth in such detail that no one is left in the dark as to any feature of the company's business about which information can reasonably be desired.

I am not unmindful that such comprehensive exhibits are seemingly not altogether fashionable, if I may use the expression, but be this as it may, there can be no question as to the right of the shareholders and policyholders of the company to know the whole truth, and any annual or other periodical statement purporting to convey such, but falling short of this, cannot be considered as fulfilling the legitimate purpose of such a statement.

Comparing the results of the past year with those of the previous year, I find premium and interest receipts show an increase of $16,816.93, or about 12 per cent. over the like receipts for 1893. In payment to policy-holders or heirs, there is also an increase of $12,993.28, or about 41 per cent., resulting chiefly from a larger number of endowment policies having matured during 1894 than during the previous year. The further items of disbursements are also somewhat in excess of 1893, but considering that the new business transacted during 1894 exceeded the new business of 1893 by about 40 per cent., the increase in this respect is considerably less than might have been expected. The assets of the company, none of which have been taken into account at more than their actual value, while some of the items have been taken in at considerably less than their market value, have increased $67,945.26, or about 17 per cent., and the increase in the reserve fund and all other liabilities is $49,172.59, or about 14 per cent.

Included in the statement of liabilities are several items, viz., shareholders' special account, contingent fund, and accumulating profits, aggregating $19,819.79, which need not necessarily have been entered under this heading; but notwithstanding the strict manner in which the accounts have been treated, and the fact that in computing the reserve liability in respect of the whole of the company's industrial business a standard one-half of one per cent per annum more stringent than the Government standard has been adopted, the surplus security to policy-holders, not including uncalled but subscribed capital, is $63,085.12, and the divisible surplus over all liabilities and capital is $13,085.12. I am sure you will all agree that the company occupies a strong position financially, and that the record of the year is one that we have every reason to be proud of.

Before moving the adoption of the report, I would also refer to the death of our late much esteemed president, Mr. Joseph Jeffery. The loss which the company sustained by his demise was fully realized by his colleagues, and at the first opportunity the directors gave expression to their feelings in the following resolution:

"That the board of directors of the London Life Insurance Company desire to record their deep sense of the great loss the company has sustained in the death of Mr. Jeffery. He was an active participant in the formation of the company, was elected president at the first meeting of the board of directors, April 29th, 1874, and continued so up to the time of his death, rendering great and valuable assistance by his sound and able counsel and advice. His well-known integrity and devotion to the interests of the company were fully appreciated in life, and now that he has passed away we feelingly honor his memory with this tribute to his many virtues."

With these remarks I beg to move the adoption of the report.

The vice president, Mr. A. O. Jeffery, in seconding the adoption of the report, said: The satisfactory character of the company's assets was evidenced by the fact that the amount of overdue interest at the close of 1894 was only $1,684.03, or about one-third of one per cent. of the assets.

The rates of interest obtainable on high class securities such as we hold have ruled somewhat lower during the past year than were formerly obtainable, nevertheless the per cent. of interest earned upon the average amount of invested assets for the year was 5.63 per cent

The directors have aimed at a steady and solid increase of business, selected with care and obtained at a moderate outlay, rather than a large volume of business less carefully selected and costing much more in proportion. The wisdom of this course is manifested in the almost uniformly favorable death rate which the company has experienced and the liberal profits which have been paid to participating policy-holders.

During the past year only 4 General policies for $5,000 became claims, giving a mortality rate of 2.46 per 1,000 in number, and $3.28 per $1,000 in amount. This would be considered a very favorable death rate for a company whose risks were but a few years removed from the medical examiner's hands, but for a company in its twentieth year, the experience is certainly a most remarkable one In our Industrial branch the claims were 305 for $19,401, giving a mortality rate of 12.95 per 1,000 in number, and $8.79 per $1,000 in amount, which, when allowance is made for the fact that in this branch we insure both males and females between the ages of 1 and 65, and are thus subject to the higher mortality incident to childhood and old age, and that at the younger ages and for certain amounts no medical examination is required, the mortality rate experienced in this branch was also considerably below what might have been expected. For the very favorable results in this connection much credit is due to the agents, assistant superintendents and superintendents of the company for the manner in which they have observed the rules of the company, and their zeal to advance its interests.

Before closing, I would suggest that during the current year both shareholders and policyholders avail themselves of every opportunity to extend the business of the company among their acquaintances, and thus assist the manager and staff to make the record of 1895 even better than the one under consideration.

Before the adoption of the report, the president called on Mr. George F. Jewell, the company's auditor, to offer any remarks which he might wish to make. In responding to the invitation, Mr. Jewell called attention to the fact that from an auditor's standpoint, which was one of critical examination, the affairs of the company were in excellent condition, the securities bearing evidence of being of a substantial character and valued upon the lowest reasonable basis, and were well looked after. The very satisfactory showing of the report was the result of no fictitious methods of busi-

ness, but the legitimate consequence of diligent and brainy effort, and that such steady and substantial increase of both income and assets was matter for congratulation to both the shareholders and policy-holders of the company; and further, that such accumulations of the people's wealth as were represented by the insurance reserve of a company like this, was evidence not only of financial prosperity, but also of the high moral tone of the community, evidencing a recognition of the duty and importance of such provision for the dependent ones, the neglect of which is characterized in Holy Writ as a denial of the faith and worse than infidelity.

The report was unanimously adopted by the meeting.

Mr. Geo. C. Gibbons moved, seconded by G. M. Harrison: That the thanks of this meeting is hereby tendered to the agents and other employees of the company, for the very satisfactory manner in which they have discharged their several duties during the past year. Both the mover and seconder spoke of the dependence which this and every like company had to place in their field force, and those who were responsible for the proper carrying on of the business of the company. It was a great satisfaction to the directors to feel that the company's employees are gentlemen of high character and that all have done their duty

The vote of thanks to the agents, etc., was heartily adopted and suitably acknowledged, after which the balloting for directors was proceeded with, resulting in the unanimous re-election of John McClary, A. O. Jeffery, W. Bowman, Geo. C. Gibbons, W. F. Bullen, A. S. Emery, T. H. Smallman, G. M. Harrison and Judge Bell.

At a subsequent meeting of the directors, John McClary was re-elected president, and A. G. Jeffery, vice-president.

BANK OF BRITISH COLUMBIA.

A general meeting of the proprietors of this bank was held at the City Terminus Hotel, Cannon street, London, on Wednesday, 20th February, 1895.

The directors, in submitting to the shareholders the statement of accounts for the half year ended with December, reported that after paying all charges and deducting rebate of interest on bills not due, the balance at the credit of profit and loss account at that date was £39,164 14s. 11d., proposed to be dealt with as follows, viz.: £24,000 in payment of a dividend at the rate of 6 per cent. per annum, and bonus of 1 per cent (free of income tax), making a total distribution of 8 per cent. for the year; adding £10,000 to the Reserve Fund, which will then amount to £285,000, leaving £5,164 14s 11d to be carried forward. The retiring directors, Mr. Gillespie and Sir Charles Tupper, were re-elected, and the directors are now as follows Sir Robert Gillespie, chairman; Messrs. James Anderson, C. W. Benson, T. G. Gillespie, Guy Oswald Smith, Sir Charles Tupper, Bart., G.C.M.G., C.B. The secretary and manager is Mr. S. Cameron Alexander.

The bank has branches at Victoria, New Westminster, Vancouver, Nanaimo, Kamloops, Nelson (Kootenay Lake), in British Columbia, and at San Francisco, California, Portland, Oregon, Seattle and Tacoma, Washington (Puget Sound).

KINGS COUNTY, N.B., LUMBER OPERATIONS

The output of Kings County, N.B., this year is estimated by the Sussex *Record* as much larger than usual. A painstaking report is made of the operations of different lumbermen, which in part we reproduce:

On the head waters of the Kennebeccasis, Mr. Robert L. Moore, of Mechanic Settlement, will put out and saw into deals upwards of half a million of spruce, and on the South Branch stream, Mr. John Collins will get out more than 500,000

Messrs. C. & S. Goggin, who have the mill formerly owned by Freeze Bros. at Penobsquis, will get out and saw about one million This will include a quantity held over from last year.

Messrs. Hiram and Wm Godard, of Springdale, are getting out lumber at Penobsquis, which will be stream drove to Hampton

Mr. Joseph Campbell is engaged in lumber operations at Smith's Creek, Penobsquis and Markhamville. The total quantity he expects to send to market will be about four millions.

Mr. James A. Moore, of Waterford, who owns mills on the Trout Creek stream, will get out and cut a large quantity both of deals and scantling

Mr. John E. McAuley, of Lower Millstream, is getting out about one and one half million feet, which will be sawn by a portable and thence hauled to the railway at Apohaqui.

At Norton, Messrs. Joseph and James Sherwood expect to get about three-quarters of a million for Messrs. White and Pickles. Mr. George Robertson, also of Norton, will put out between 100,000 and 200,000 Mr George G Scovil is quite extensively engaged in getting out lumber, which will be sawn by Mr John Byrne.

Mr C J Keith, of Havelock is getting out upwards of 500,000 feet of lumber Mr Floyd is engaged in lumber operations at Bloomfield, where he will probably get out about half a million

Messrs G & C. Hewelling & Co., of Hampton, saw 6,000,000 feet of lumber every year, and give employment to 160 hands This firm does the largest business in the county in sawing lumber, making boxes, cases and making matches.

Mr. John Jamieson, of Clover Hill, expects to put out nearly 1,000,000 feet Mr William Jamieson, of Hillsdale, is putting out over 80,000 feet of lumber

FOR SALE

103 bonds of the town of Minnedosa, $100 each, issued under By-law No 71, dated 16th July 1890 and authorized by Manitoba Statute Chapter 32 Victoria, payable 20 years from date, with interest at the rate of 3% per annum, said interest guaranteed by the Province of Manitoba, payable half-yearly on 1st February and 1st August in each year.

Minnedosa is a prosperous town of 760 population, located at the junction of the Manitoba and North-Western Railway and the Saskatchewan and Western Railway being on the Little Saskatchewan River The total debt of the town is $70,000. The assessment is $265,000, the current rate of taxes 4% There is no floating debt The town has promptly met the interest on these bonds, which were issued in extinguishment of their old debt.

NOTICE TO SHAREHOLDERS

The Fourteenth Annual Meeting of the Shareholders of this Company for the election of directors and the transaction of business generally, will be held on WEDNESDAY, the THIRD DAY OF APRIL next, at the principal office of the company, at Montreal, at 12 o'clock noon. The Common Stock Transfer Books of the company will close in Montreal and New York on March 23, and in London on March 12. The Preference Stock Books will close on March 7th. All books will be re-opened on Thursday, April 4th.

By order of the Board.

CHARLES DRINKWATER,
Secretary.

Montreal, Feb'y 23rd, 1895.

CHURCH'S ALABASTINE

The Permanent Wall-Coating.
Does not RUB or SCALE from any hard surface.
Coat over coat can be applied.
No more washing or scraping of walls necessary.
Alabastine is The Sanitary Wall-Coating.
Displaces Kalsomines, which decay on the wall.
Equally adapted for Ornamental work and plain Tinting.
Pleases Painters as well as the general public.
Easily applied by anyone who can handle a brush.
Sixteen beautiful tints and White.
Put up in Five-pound packages, and never sold in bulk.
The only Wall-Coating that can be mixed in cold Water.
No hot water being needed. SAVES TIME AND WASTE.
Full directions for use on every package.
Sold by leading Hardware and Paint dealers everywhere.
Our book "The Decorator's Aid," furnished Painters.
Ask your dealer for Tint-Circular showing colors.
BEWARE OF IMITATIONS bearing similar names.

SOLE MANUFACTURERS - - PARIS, ONTARIO

WHOLESALE AGENTS:

Hill & Forbes, Montreal, P.Q.
Sanderson Pearcy & Co., Toronto, Ontario.
G. F. Stephens & Co., Winnipeg, Man.
A. J. Grant & Co., Halifax, N. S.
A. M. Bell, Halifax, N. S.

Mr. W. E. S. Flewelling, of the Dutch Valley, is engaged getting out about 50,000 feet, and Mr. W. F. Howe, of Hammond, will probably get out about a quarter of a million feet. Mr. Johnson is getting out about a million feet of lumber at the Moose Horn.

AN INTERESTING DECISION.

Chief Justice Armour, of Ontario, recently delivered a judgment which is of some interest. Ontario has an act securing to wives and children the benefit of life insurance effected by the husband and father. It provides that a man may declare by an "instrument in writing" an insurance policy to be for the benefit of his wife and children, and that he may by such an instrument vary the apportionment as between wife and children. One George R. Grant, a commercial traveller, had a life insurance policy, the value of which was payable to his wife on his death. Before he died Grant willed the whole of this money to his children. Mrs. Grant brought a suit in court asking that she might be allowed a share with the children. Chief Justice Armour held that she was entitled to the whole of the money, as the husband could not by will deprive the wife of her benefit and transfer it to the children. He drew a somewhat subtle distinction between "an instrument in writing" and a will. The policy of life insurance is payable as its face denotes, but under the Ontario law a man may, during his life, by an instrument in writing, attached to or endorsed on, or identifying the policy by its number, transfer the benefit from the wife alone to the children alone, or *vice versa*, or vary the apportionment. Grant did not do this, and the Chief Justice decided as stated.

COST OF NEW LIFE BUSINESS.

The cost of new business to a life insurance company is a live question. The several insurance commissioners who examined the New York Life give their opinion of it as follows:

"We have entered into some inquiry as to the relative cost of new and old business, and the former is undoubtedly too large, whenever the cost to any company of getting new business exceeds the premiums paid thereon. Death losses occurring during the first year and the excess of expense falls upon other members. If the new policy pays its second year's premium the reserve at the end of the first year must be borrowed from other members. These new policies do not even themselves for several years, especially in those cases where dividends are allowed upon paying the premium subsequent to the first year. By the time they have caught up with their own expenses, the benefit of medical examination has passed away, and they do not contribute toward reducing the average expense per policy. It is difficult to see what benefit new business is to the old members, when obtained at such excessive expense, or what possible justification there can be for such an unwise practice."

MINING IN NOVA SCOTIA.

The secretary of the Canadian Mining Association, Mr. B. T. A. Bell, of Ottawa, has been telling the Montreal *Gazette* about the meeting of that body in Halifax, and is enthusiastic over the mining and business outlook generally in the lower provinces. "Up here," he continued, "some people talk of hard times, and we must admit that things are slow in certain sections, but down by the sea there is nothing like depression. In fact, the four great industries of Nova Scotia, viz., coal, iron, gold and gypsum, are on the boom." Mr. Bell then went on to tell what a splendid effect the operations of the Dominion Coal Company had upon the several towns outside of Halifax. The activity at Amherst was in fact found to be remarkable, and Mr. Bell instanced the establishment of Rhodes, Curry & Co., that was little more than a planing mill a few years ago, but now employs nearly 300 men, and they have an order on hand for 300 coal cars and 425 pit tubs, besides passenger carriages, all destined for the use of the Sydney & Louisburg Railway.

"Last year the Dominion Coal Company spent one million dollars," added Mr Bell, "in plant and equipment, and a very large expenditure will likewise be made this season, the towns of Amherst, Truro, New Glasgow and a good many manufacturing centres in Quebec and Ontario benefiting largely thereby Last year the output of the company was almost a million tons, and they expect to exceed that figure this season. With all the improved cutting, mining and shipping facilities now at the company's disposition, they have been able to greatly reduce the cost of production."

The company, he adds, will be able to ship largely to the States as well as increase the sales at the St. Lawrence ports.

"Did you hear of any new coal mining enterprises?" asked the reporter.

"Yes. I met W. Penn Hussy, of Massachusetts, who, as you know, is interested in the Broad Cove coal mines, and what I saw convinces me that active operations in the way of railway building and running will be pushed at that place this summer."

PROPOSED BLAST FURNACE.

The American projectors of a steel and blast furnace company, who made a proposition to the city of Belleville, have been conferring with the Kingston City Council and Board of Trade. The plant, it is estimated, will cost $600,000, and the municipality securing its location is expected to give it a site, exemption from taxation and free water (for a term of years), and guarantee the interest on the bonds of the company to the extent of $300,000, taking a first mortgage on the plant as security; or otherwise granting aid to the company and being recouped by the Government bounty, which is figured at $100,000 a year. In addition to any assistance given by the municipality the company wants the assurance of protection from the Government, in the way of duty of at least $5 per ton.

—The crude oil market, says the Petrolia *Topic* of February 14th, is decidedly firm, with rising prices. Petrolea crude is worth $1.26 per bbl. and Oil Springs $1.28. That is the price on 'Change, although private sales have been made at even higher figures. The effects of the cold winter are still in evidence, and there is a decided scarcity of the greasy, which probably will not be relieved till a general thaw comes along. Refined is worth 10¼c. in barrels and 7½c. in bulk.

The annual meeting of the Consumers Cordage Company produced some important changes in the directorate. The following were elected: J. F. Stairs and George Stairs, Halifax; W. G. Whitlock, J. M. Waterbury and E M. Fulton, Sr., New York; H. L. Rutherford, New York, R. D. McGibbon, Q.C., Montreal. The last three replace Hon. A. W. Morris, M.P.P., formerly vice-president; Charles B. Morris, secretary, and E. M Fulton, Jr., treasurer. A good deal of dissatisfaction was expressed at the annual report, and a committee consisting of Messrs. James Crathern, Thomas Davidson and James Wilson, Jr., were appointed to make a full investigation into the company's affairs. It is expected that this will take about three or four weeks.—*Montreal Herald, 16th inst.*

—The shipments of crude oil, and refined reduced to crude equivalent, over the G.T.R. and M.C.R. from Petrolia for the month of February, together with a comparative statement for the same month of the two preceding years, are as follows:

	Crude.	Refined.	Equivalent.
GRAND TRUNK	15,560 bbls.	15,550 bbls.	54,435 bbls.
MICHIGAN CENTRAL	3,250 bbls.	10,325 bbls.	29,063 bbls.
Total equivalent,			83,498 bbls
	1893.	1894.	1895.
	77,072 bbls	76,183 bbls.	83,498 bbls

Commercial.

MONTREAL MARKETS

MONTREAL, March 20th, 1895

ASHES.—We hear of a little lot being shipped to the United States and another to Australia, but the demand from Britain is very light at the moment. Values remain steady at $4 to 4.05 for first quality pots; seconds, $3.70 to 3.75; pearls, $6 to 6.10. Stock in store today 156 brls.

CEMENTS AND FIREBRICKS.—The demand for cements is still light, but, unlike last year, stocks in store here are comparatively small, and prices are fairly steady at last quotations. Reports from England would indicate the probability of an advance in prices for spring import. Firebricks are in moderate request at $16 to 20.00 for ordinary brands.

DAIRY PRODUCTS.—The cheese market holds the firmness noted last week. There were some 30,000 boxes shipped last week, leaving the stock on spot quite moderate. For finest qualities the quotation is now 10 to 10½c. per lb. In butter there is little change; the only stock moving is winter creamery at 21 to 21½c. in small lots; other lines are dull and weak. Eggs, 15 to 16c. for new laid.

DRY GOODS.—Matters are comparatively quiet in this line so far. Some travellers have started out on the sorting trip, but orders are not numerous. The chill March winds of the past week have been unfavorable to much activity in retail trade. A letter from a Montreal buyer, who is now in the British worsted district, reports some scarcity of stock, owing to immense purchases on American account, and expresses a belief in the probability of an advance in prices.

GROCERIES.—The trade movement in this line is still of a quiet, uneventful character, and there is little in the way of change to note. The Lower Province sugar refineries have been

Fine Electric . . Street Cars

OUR SPECIALTY

We also manufacture **Horse and Trail Cars** of every description.

PATTERSON & CORBIN
ST. CATHARINES, Ont.

making some bids for business in this market during the past week or so, but we do not hear of any large transactions in that quarter. Local refineries report a pretty steady outgo at 3⅝c. per lb. for standard granulated; yellows from 2½ to 3c. Some new Barbadoes molasses is reported on the way to St. John, N.B. The quotation at the island is reported at 11c. first cost. Teas are quiet at the moment, but according to all indications stocks in the country are small. There is no news from Japan as to the prospects for the coming season. In London China blacks are reported easy, but Indians and Ceylons are pretty stiff. Some moderate business is reported in coffees, principally in Rios at 19 to 21c., and Maracaibo at 20½ to 22c. per lb. Mill prices for new crop rice have not yet been made. Dried fruits and canned goods continue dull.

HIDES.—The market has been quiet of late, but values are very steadily held here, and are reported firming up in the United States, while local supplies are light and the quality largely affected by the grub. Dealers generally are paying 5c. for green No. 1 light, though a little more has been paid in some cases; sales to tanners are reported of cured at 6 to 6¼c. Heavies are bought at 5½c. and sold to tanners at 6½c. Calfskins are coming in more freely than usual at this time of the year. Sheepskins are quoted at 65c.; new lambs, 10c. each.

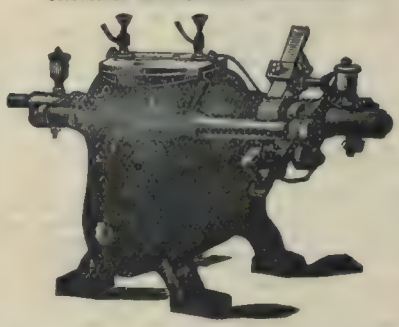
LEATHER.—No more is doing in this line than was the case a week ago. Prices rule very steady, and western tanners, in view of the prices of hides, profess not to be anxious sellers at present prices. The extensive shoe operatives' strike now on in England will likely affect the market there, but will not be felt here, as there is little stock here to go over. We quote:—Spanish sole B.A. No. 1, 18 to 20c.; do No. 2 to B. A., 17 to 18c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter, 19 to 21c. No. 2 do., 17 to 18c.; common, 15 to 16c.; American oaksole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; western splits, 15 to 16c.; Quebec do. 13c.; juniors, 11 to 13c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 10 to 12c.; extra heavy buff, 12½c.; pebbled cow, 9 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle. 40 to 50c.

METALS AND HARDWARE.—There have been some recent striking changes in prices, notably in tinplates and sheets, and also in boiler plate and tank steel. Bradley charcoals are offered at $5; I.C. charcoal at $2.90 to 3.00; P.D. Crown at $3.25; ditto I.X. at $3.85 to 4.00; coke I.C. at $2.60 to 2.75; tinned sheets are down to 5½c. for No. 24, and 6c. for No. 26. American steel boiler plates can be bought at $1.90, and tank steel at $1.70. Canada plates could doubtless be got at $1.95 to 2.00 in fair quantity. Ingot tin has taken a jump upwards, according to the cable, there being an advance of £2 5s. within the last week or so, and lead is also stiffer. Cut nails have sold down to $2, and there has been another meeting to try and patch up the combination, but it is understood that nothing much was accomplished. We hear of no new developments in pig iron, and sales of this article have been very limited; the cabled quotation for Scotch warrants is 41s. 7d. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $21.00 to 21.50; Eglinton, $19.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.00 to 19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.00 to 18.50; Siemens, pig, No. 1, $16.75 to $17.00; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $14.00 to $15.00; common do., $12.00; bar iron, Canadian, $1.60; British, $2 to 2.15; best refined, $2.40; Low Moor, $5.00; Canada plates—Blaina, or Garth, $2 to 2.05; all polished Canadas, $2.75; Terne roofing plate, 20x28, $5.75 to $6.00. Black sheet iron, No. 28, $2.20 to 2.30; No. 26, $2.15 to 2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5; charcoal I.C., $2.90 to 3.00; P.D. Crown, $3.25; do. I.X., $3.85 to 4.00; Coke I.C., $2.60 to 2.75; coke wasters, none offering; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¼ to 5½c.; tinned sheets, coke, No. 24, 5½c.; No. 26, 6c.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.85; English ditto, $2; hoops, $2.10 to 2.15. Steel boiler plate, ¼ inch and upwards, $1.90 to 2.00 for Dalzell, and equal; American steel plates, $1.90; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65; tank steel, $1.70; heads, $2; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $3; sheet, $4 to 4.25; shot, $6 to 6.50; best cast steel, 10½ to 12c.; toe calk, $2.50; spring, $2.50 to $2.75; tire, $2 to 2.25; sleigh shoe, $2; round machinery steel, $2.50; ingot tin, 15½ to 16c.; bar tin, 25c.; ingot copper, 9¾ to 11c.; sheet zinc, $4.50; Silesian spelter, $4 to 4.25; American do, $4 to 4.25. Antimony 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2 65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 8c. for Quebec province, for Ontario $2.80 to 2.87½. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards

OILS, PAINTS AND GLASS.—Turpentine keeps mounting upwards, and the quotation for single brls. is now up to 54c. per gal., with a probability of still higher prices. Oils are without change. Importations of glass this spring will be up to the average; local prices remain the same, though the market is firmer in Europe, and manufacturers are withholding quotations at the moment. We quote:—Turpentine 54c. per gallon for single barrels; two to four barrels, 52 to 53c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6c.; single cases, 6½; tins, 6¾c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 4.75; No. 1, $4.25 to 4.50; No. 2, $4 to 4.25; No. 3, $3.75 to 4; dry white lead, 4½ to 4¾c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; Paris green, 12½ to 13c. in bulk, 14 to 14½c. in small packages; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

STEAM'S NOT IN IT

Either as to cost or efficiency, with one of our celebrated **ELECTRIC MOTORS.**



See the one that runs the MONETARY TIMES big presses and freight elevator. Not the slightest jar and almost noiseless.

Write and we will call and see you.

TORONTO MARKETS.

TORONTO, March 21st, 1895.

DRUGS.—Business has been very fair. The general tendency is in the direction of an advance in foreign goods, such as camphor, morphia and glycerine, which are all quoted at advanced figures. Cocaine advanced towards the end of the last week and is now held firm at $7.75. Ipecac root is inclined to be easier abroad, but no influence is felt as yet on the local market.

DRY GOODS.—There is an impression in several quarters that country storekeepers are bare of stock in various lines. At any rate a better feeling is manifest, and both letter orders and personal visits show improvement. One house tells us, "This is the best March we have had since 1891." Another house says referring to the blocking up of the alley-ways of their warehouse with ordered goods: "Look here, if you want to know whether we are busy or not." We find in dress goods much attention paid to tweed effects, fancy weaves; for instance, cheviots in various delicate shades. One house has a special line of what are called Alsace and Loraine checks, resembling a delicate tartan. A great many French and English coating serges are moving in black and navy; repeats are coming in already for these, which are natty and of good value. Some lovely colored henrietta cloth is seen at extrardinarily low prices; this will be worn, we are told, in both blacks and colors in conjunction with cotton blouses; black or dark skirts will be worn with crepon blouses; belts are a feature of the season, in silk with silver ouckles, and the variety of the latter is great. For summer dresses Swiss spot muslins and Scotch ones too are largely in request, together with check muslins and a variety of ribbed Scotch zephyrs, checked and striped, of dainty colors; linen scrim for sleeves, fibre chamois and fiberine for skirts are of course in good supply and equal demand; in hosiery and underwear values have gone very low; ladies' vests are offered at 48 cents per dozen, enough to make manufacturers weep. A good season for dress goods is expected. In men's woolens we find striking novelties in bronze, plum-color, and green, of cheviot makes; there are delicate fawn, worsteds, also checks, diagonals and a great variety of greys and drabs. These are imported goods, in tweeds and worsteds, but we also find some most creditable patterns and makes of Canadian tweeds, at prices, however, which imply no profit to the maker, so far as we can judge. It is agreeable to learn, however, that there is a revival of interest in Canadian tweeds, and that a better class of them is in demand.

FLOUR.—There was an advance of ten cents on Manitoba Patent, and this is about the only noticeable feature in connection with the week's trade.

GRAIN.—The market has been more active, and prices are firmer. There is a good demand from millers for wheat. Oats are strong, at about one cent higher. Barley a little weaker, with quotations unchanged. The brighter weather during the week has brought on a very good jobbing demand for clover and timothy seeds, and small lots are offered. Red clover is quoted at from $6.30 to 6.60 per bushel. Alsike has advanced, and is quoted from $4.80 to $6.50, and timothy is steady at from $3 to $3.60.

HIDES AND SKINS.—Stocks are about sold out, and hides are in good demand, with prices firm, but unchanged. Tallow continues dull, dealers paying from $5 to 5.25 and asking from $5.50 to 5.75. There is not much doing in wool, for the bulk of it has been pretty well cleaned up.

METALS AND HARDWARE.—Houses in this line are very busy, mostly with orders in advance of opening of navigation. Travellers say that retail stocks in the country are low, and with the warm weather demand must ensue. Blacksmiths' and foundrymen's orders are coming in, and there seem to be in this market some smaller houses who sell goods at cost or below. Cut nails are shaded, we are told, below our quotation; ordinary bar iron is sold at $1.65 per 100 lbs. and boiler plate at $2. The demand for bicycles keeps up, and one house which imports supplies for the makers of them is deluged with orders. In metals much the same conditions prevail as are mentioned in our Montreal market report of yesterday.

PROVISIONS.—Butter still continues slow. Poor grades are offered down to 7 cents, with a very limited demand. Rolls bring from 12 to 14c. Cheese is quiet and steady. In hog products the market is firm, some holders asking for long clear 7¼ to 7½c.; other quotations unchanged. Eggs are steady at 12½ to 13c. There is no change in the quotations for dried or evaporated apples.

" " " 1894, $4,239,050 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

ADJUSTMENT OF FIRE LOSSES.

Continued from last issue.

"Stores are now so plentiful and their attractions so new and so many as to prevent the patronage of an establishment filled with musty tea, dusty sugar, fly-blown fruits, dry goods of antediluvian form or pattern, flint muskets, etc., etc., and if goods are not of value for legitimate sale, the fact of a fire should not be allowed to add to their actual cash value.

"The engraved plates and negatives of a publisher, the electro-plates and stereotypes of a printer, the negatives of a photographer, the patterns of a foundry, the order-books of a tailor, and such like temporary or uncertain values are nearly always the property of the person from whom the original orders were received. Yet after a fire it is usual for the person in whose possession they were found, to make a claim for their original cost of production. The possession as in trust might confer an insurable interest, if insured as in trust, but there would then follow the liability to account to the real owner, a fact which it is sometimes necessary to make use of in order to defeat an exorbitant claim for comparatively valueless goods, and I take it the adjuster is justified in buying up the claims of the real owners, if it be necessary to an adjustment in fact.

"Machines, machinery and appliances are as varied as men and manners, so that no general rules can be laid down for their treatment. I believe, however, that there are very few manufactories which are wholly satisfactory to their owners and managers, or which can long remain so because of the continuous improvements in machines and methods preventing any such thing as a standard machine of any class.

"Therefore, in arriving at the actual cash value of any machine it is necessary to make an allowance for its comparative recession from 'up-to-date' as well as for wear and tear.

"I have an authoritative table of wear and tear of machines and machinery, but unless the special circumstances of use are known and duly considered, I think all these tables are of little real value.

"The most beautiful machinery ever erected in Canada was for the manufacture of beet sugar. In Ontario we have had glucose factories. There are several abandoned pressed brick factories. The Furniture Trust was followed by the burning of superfluous furniture factories. There are factories of other descriptions not necessary to the trade of the country. It was proposed to form a Tannery Combine, whereby production would be curtailed and present places of production become idle.

"In such cases the value of the machinery and machines is that of scrap iron less the cost of marketing it. These are hard facts for the adjuster to face, and when he faces them he has a very hard row to hoe in making a true adjustment, failing which he promotes realization by fire as the most profitable method of capitalizing surplus machinery, surplus buildings and surplus stocks.

"The subject is too serious a one to be the subject of satire, because whatever affords opportunity for dishonest gain lessens the moral tone of the community, creating a loss which no money can make good, preventing the success of honest men and methods.

"Anybody may start a fire, but the fire when started may become uncontrollable by all the efforts and all the appliances of all the people. So it is with the demoralization of a people; anybody may institute the means, but neither laws nor precepts may avail for its abatement.

"Some of my hearers may object that accountants are persons whose duties lie in the compilation of figures and of balance sheets. If so, I must reply that the expert accountant is one whose brains and habits of thought and mind give value to his figures and his balance sheets; so that it is necessary to study the principles of things, and also the facts and circumstances which affect motives and produce results. Therefore it is that in this address I have used few figures and have not set forth any hard and fast rules for use in the adjustment of fire losses.

"Since my last address on this subject I have seen no reason to change my views as to the proper method of apportionment of non-con current policies, so will not dwell on this part of an adjuster's duties longer than to mention the complete vindication of my views and advices in the McCausland suit before the High Court of Judicature in Ontario, which vindicated the freedom of contract between assured and assurer free from complication because of the variation in the several contracts.

"To conclude. The adjuster shall be a just man, regardless of persons. Yet you will remember that Aristides was sent into exile because some fellow was tired of hearing him styled 'The Just.'

"The adjuster should not be litigious. You will remember the litigants who disputed about a fat oyster, of which each got a shell.

"The adjuster, when he makes a proposition, should be sure it is a fair one. In an English case the insurance company defended on the ground of excessive claim. The successful reply was that the adjuster (in England styled the assessor) always offered to pay about one-half the claim, so it was necessary to ask double to get even.

"Finally, it is the duty of an adjuster to adjust."—*Henry Lye, before the Ontario Institute of Accountants.*

TAXES IN ENGLAND

In England birth is taxed, marriage is taxed, death is taxed. Commodities are taxed, manufacturers are taxed, trades are taxed, houses are taxed, incomes are taxed We are taxed for our butler, if we are prosperous enough to keep one. We are taxed for our footman, groom or gardener. The carriage we keep is taxed, the omnibus we take is taxed, the cab we hire is taxed, the railway train we travel by is taxed. The house dog is taxed, and so also is the heraldic device on our note paper. Everything we drink is taxed — beer, spirits, wine, tea, coffee—and even for water we drink there is the water rate. Light is taxed through the medium of the gas rate. The land we walk upon is taxed, the tobacco we smoke is taxed, the gold or silver jewellery we wear, the eau de Cologne perfuming our handkerchief, the figs we eat on Palm Sunday, the Christmas plum-pudding, these are all taxed. Even our anti-bilious pills are not free.

All these, and they are but a few of the taxes that exist, are mostly imperial taxes for the purpose of government; some of them, however, are assigned to the county councils. There are also local rates, which are but local taxes for the poor. County council, police, voting lists, street lighting, paving, watering, etc., sewer, school board and vestry. Householders, lodgers, married and single men, women and children, are all taxed in some form or other, for taxation is devised to reach everyone. The late Lord Sherbrooke (Robert Lowe), when Chancellor of the Exchequer, calculated that one-ninth of our income is taken from us for imperial taxation; but the proportion is more now, and is growing. Local taxation is not much less.—*Temple Bar.*

THE WORLD'S SHIPBUILDING IN 1894.

The statistics of shipbuilding in Great Britain, published by Lloyd's Register, show that during the year 1894 the output of the shipyards of the United Kingdom amounted to 645 vessels of 1,079,479 tons, distributed among the following classes:

	Tons.
549 steamers	964,926
65 sailing vessels	81,582
31 war ships	32,971

The total production of the world in 1894 was about 1,324,000 tons (1,168,000 steam, 156,000 sail). The tonnage totally lost, broken up, etc., in the course of twelve months amounts to about 692,000 tons (278,000 steam, 414 sail). There has been a net increase in the world's mercantile tonnage of upward of 632,000 tons. Of this total the net increase in the tonnage of Great Britain represents about 68 per cent., or 430,000 tons.

The statistics of colonial and foreign shipping during 1894 indicate that, excluding war vessels, there have been built outside of Great Britain 148 steamers of 203,279 tons, and 170 sailing vessels of 73,751 tons.

The report of the commissioner of Navigation of the United States for the fiscal year ending June 30, 1894, states that for the ocean-carrying trade we built during the year 1893 only 28 steam vessels of 56,402 tons and 36 sailing vessels of 13,437 tons The building of ships in the United States for ocean commerce is still an "infant industry," and yet how hard we have worked and what losses we have sustained to bring that infant to maturity.—*N.Y. World.*

TRAMP HAZARD OF FARM RISKS.

Extreme cold weather is always marked by a large increase in losses on farm property. The recent severe cold snaps have had this effect, and thus early the prospect of profit on this class during the year is discouraging. The snow-bound condition of large sections of the country makes it probable that there are numerous claims which have not as yet been presented owing to the difficulty of communication, but undoubtedly the opening of spring will find each of these snowed up claims fully engrossed on the loss books of some of the companies still writing this class of business. The thawing out of these claims and the re-establishment of communication between the city and country will also make the annual exodus of tramps possible.

These highly appreciated and prominent members of the winter population will soon leave their places in the Bowery cellars and diffuse their presence along the highways of our country. They will not burden the railroads with their baggage, as their supply of clothing is limited to the amount required by their modesty, and the remainder of their baggage, consisting of pipes and matches, must be at hand for ready use. Hotels will not be required to keep them at even theatrical rates, but farmers will unconsciously entertain these angels of the highway, and the insurance companies will as usual foot the bills. Farm-writing companies have from time to time issued circular suggestions to their patrons advising them as to danger points to be guarded as well as precautions to be taken, but none of these circulars have touched upon the tramp hazard, which is now recognized as an important and prolific source of farm losses — *N. Y. Journal and Bulletin*

VOLUNTARY AND INVOLUNTARY

A peculiar fire-insurance case of the kind which occur only in France was published in the New York *Evening Post* last month, being translated from the *Chronique des Assurances*, as follows:—

While an actress was engaged at her toilet on the evening of the 13th of April last, her maid carelessly gathered up some scraps of paper from the dressing-case and thrust them into the burning grate. A few moments later it was discovered that along with the paper she had thrown to the flames a pair of superb pearl earrings worth 10,000 francs The effects of the actress were insured in a fire-insurance company for 4,500 francs. She at once notified the company of her loss, and claimed the full amount of her insurance. The company denied all liability except from fire as an involuntary act, alleging that the maid had voluntarily thrown the earrings into the fire "Not so," replied the actress; "the scraps of paper were thrown voluntarily, but not the earrings;" and the court sustains the actress, awarding her the full amount of her insurance and costs.

SEARCH LIGHT SIGNALLING.

Experiments have finally been made in Chicago with a search light for announcing the approach of a gale or cold wave, and they are said to have proven quite successful. The light, operated by weather bureau officials, was mounted on the tower of the Auditorium. A white flash was succeeded by a green light, and the rays are said to have extended over a circle forty miles in diameter. Similar experiments have been made in New York. According to present plans the signals will not be used as rain or snow signals. The red light alone will indicate easterly winds and hurricanes, and the white light, a frosty morning; red and white, high westerly winds; a flash light with green shade, will indicate a cold wave

—The manufacturers of lumber in the North-West, including the Fort William and the Lake of the Woods firms, says the *News-Advertiser*, have decided to reduce the price of pine lumber ranging from 50 cents to $1.50 per 1,000. This applies to all points in Manitoba, and there will consequently be a reduction by the retailers in harmony with the wholesalers. This cut applies particularly to the lumber used in buildings. In ordinary dwellings this reduction will amount to from $25 to $50; in warehouse construction the amount saved will be larger.

CANADA LIFE ASSURANCE CO.

Sun Life

Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

SURPLUS RESERVE

Ratio of Surplus Assets over all liabilities, including re-insurance reserve, to amount of risks in force, 3·66 per cent.

A ratio of Surplus Reserve Funds unequalled by any other fire insurance company transacting business in the Dominion.

SCOTT & WALMSLEY, Underwriters

Millers' and Manufacturers' Ins. Co.

Head Office--Queen City Chambers, 32 Church Street, TORONTO.

JAMES GOLDIE, President. **J. L. SPINK,** Vice-President.

AIMS

This company was organized in 1885 expressly for the purpose of insuring only **manufacturing industries, warehouses** and **contents.** The primary object being to give protection against losses by fire at a minimum cost, consistent with absolute security.

RESULTS

The average Ratio, to net cash premium income, of the Losses and Expenses combined, has been only 69·32 per cent.

A record unprecedented in the history of fire insurance underwriting. As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please communicate direct with the company.

DECISIONS IN COMMERCIAL LAW.

SCHMIDT v. THE TOWN OF BERLIN.—A municipal corporation, owner of a public park and building therein, is not liable, according to the Court of Queen's Bench, to a mere license for personal injuries sustained owing to want of repair of the building, at all events where knowledge of the want of repair is shown.

PORT ELGIN PUBLIC SCHOOL BOARD v. EBY.—The plaintiffs' treasurer, who died before action, and two sureties on his behalf, executed a joint and several bond in favor of the plaintiffs conditioned that he should receive, safely keep, and faithfully disburse all school moneys collected, and deliver up to the plaintiffs, on demand, all moneys not paid out. In an action against the sureties the Court of Queen's Bench held that there could be no recovery upon the bond without showing a demand personally made upon the treasurer; and a demand upon the administrators of the estate was of no avail.

DOLEN v. METROPOLITAN LIFE INSURANCE CO.—Where an insurance was effected upon the life of a person for the benefit of her father, brothers and sisters, the plaintiffs, the Court of Queen's Bench decided that the beneficial interest in the policy, as soon as it was issued, vested in the plaintiffs, and the contract of the insurers being to pay them the moneys payable under the policy, the insured could not, by any act of her's, deprive them of the interest so vested in them, or of their right to call upon the insurers for payment; and an assignment made by her to a stranger to secure a debt had no effect upon such interest or right of the plaintiffs; but an assignment made by the father to such stranger was effectual to transfer his individual beneficial interest and right: and the assignee, under the circumstances in evidence, became the mortgagee of such interest and right; and the recovery of a judgment by the assignee against the father for the amount of the debt did not prejudicially affect the security.

SHANNON SHINGLING MANUFACTURING CO. v. CITY OF TORONTO.—A contractor who had certain contracts with a city corporation in 1888 by writing, assigned to one who supplied him with funds to perform the work under the contracts, all money due or coming due thereunder, and lodged the writing with the corporation. The assignor at this time expected to enter into other contracts with the corporation, and subsequently did so; and at this time, and prior to it, a standing arrangement, not evidenced by any writing, existed between him and the assignee by which the latter was to supply money and material to the former, as security for which the former was to give the latter an order for all moneys coming to him from the corporation upon all his contracts, and this arrangement was to continue until he saw fit to stop it. The corporation had no notice of this arrangement, but they treated the writing as applicable to future contracts, and made payments to the assignee, with the assent of the assignor, until they received notice of other assignments of portions of the moneys. The Court of Queen's Bench decided that although the written assignment applied only to the contracts in force at its date, the verbal arrangement was a good equitable assignment of all moneys which became due under future contracts; but, in the absence of notice to the corporation of the verbal arrangement, the other assignees, who gave the corporation notice, were entitled to priority as to moneys due under future contracts at the time they gave such notice.

CULLERTON v. MILLER.—The defendant, being the owner of certain water lots upon a lake front, subject to a reservation in favor of the Crown of free passage over all navigable waters thereon, refused to allow the plaintiff to haul ice, cut from the lake, over such lots, when frozen, to the wharf, from which the plaintiff desired to ship the ice for the purposes of his business, unless the plaintiff paid toll, which he refused to do. Rose, J., decided that the plaintiff had the right without payment to cross the defendant's lot, whether the water upon it was fluid or frozen; and, having a cause of complaint, and a right of action for his personal loss, he was entitled to come to the court for a declaration of right.

VILLAGE OF LONDON WEST v. BARTRAM.—The removal of a clerk of a municipal corporation may be, says the Court of Common Pleas, by a resolution of council, it not being essential that a by-law should be passed for such purpose.

REGINA v. SLATTERY.—The section of the Liquor License Act which forbids the keeping or having in any house, etc., any liquors for the purpose of selling, etc, by any person unless duly licensed thereto under the provisions of the Act, does not justify a conviction of the manager of a club incorporated under the Ontario Joint Stock Companies' Letters Patent Act, who has the charge or control of the liquor, merely in his capacity of manager; the act of keeping being that of the club, and not of the manager, according to the Court of Common Pleas.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE assets of Harvey Morris, stave manufacturer, Wallaceburg, are to be sold on the 4th April.

HAY was selling in St. Stephen, N.B., last week at from $8 to $10 per ton, a lower rate than has been known there for years. Butter sells at about 15 cents.

ACCORDING to the Leamington *Post*, R. H Graham intends to establish his evaporating and cheese factory in Leamington. He has engaged J. T. Ketcheson, of Belleville.

MCSWEEN & RUSSELL, who have carried on a hardware business at Leamington for two years, have dissolved partnership. Mr. McSween is to continue the business, and Mr. Russell will devote his time to the foundry business at Windsor.

A BOAT from Grand Manan brought over to Eastport, Maine, one day last week, 700 pounds of dulse, valued at $300. This delicacy finds its best market in Boston, and is said to be in high favor with the swells of that city.

P. MCD. FRASER'S dry goods stock realized 67 per cent.; the general stock of W. A. Maricle, at Staples, 67½ per cent.; G. A. Maguire's dry goods stock, Tilsonburg, 53 per cent.; the general stock of Pomeroy, of Fullerton, only 44 per cent.; E. H. Sheffield's stock of dry goods at Walkerton sold for 51 per cent.

Mercantile Summary.

A BONUS of $15,000 having been granted to the firm of J. C. McFarlane & Co. by the ratepayers of Acton Vale, it is expected the cigar factory of that firm will be in working order by April 1st, and will employ from 50 to 70 boys and girls.

THE sheriff has taken possession of the premises of B. F. Heney, harness maker, at Vancouver, B.C. He removed thither from Ottawa, where he had managed the business of Heney & Co.——At Enderby, B.C., J. M. Campbell, butcher, has assigned.

THE Windsor Board of Trade has elected the following officers: President, J. E. Durand; vice-president, John Foster; secretary, W. A. Hanrahan; treasurer, Geo. E. Copeland; council, Geo. Mair, G. Bartlett, A. N. McLean, H. V. Gaylor, A. S. Kerby, H. B. Walker, D. C McKeon, A. McNee and W. J. Bulling.

THE C.P.R. announce an important reduction in the pay of all its employes. After the 1st April 10 per cent. will be deducted from all receiving under $2,000, and 20 per cent. from all salaries over that amount. Sir William Van Horne will have to suffer with the rest, and he will hereafter have to struggle along as best he can on $48,000 a year and contingencies, instead of $60,000, which is his present salary. Conductors and engineers are not affected.

CANADA PAPER CO.

TORONTO and MONTREAL.

Mercantile Summary.

A TABLE which will indicate at a glance and with the minimum amount of labor, interest on any sum, for any time, and at any rate per cent., are the features of a new interest table compiled by Mr. C. L. Benedict, Peterboro'. It is printed on white paper, in clear type, and is encased between cloth covers which measure when opened 17 x 20 inches. We do not think the size is a good feature, because an accountant's desk is generally reserved for calendar and file. But if a space can be made for it, it will certainly prevent many a headache to a person who has much computing to do.

MONTREAL failures of traders for the week are few and insignificant in extent. A. H. Ouimet & Co., a small dry goods concern, of which Mrs. Ouimet is the registered proprietress, has assigned, owing about $1,000.——Jos. Guilbault, a butcher, has compromised liabilities of $5,300 at 25 cents on the dollar. ——A. Lalonde & Co., dry goods, have assigned to the Court; liabilities, $2,975. Mr. L. was originally in business in Vaudreuil, unsuccessfully Only last spring he made a settlement at 40 cents.——M. L. Landry & Co., grocers, have arranged a settlement at 20 cents, on liabilities of $2,642.——A demand of assignment has been made upon Marcus Auerbach, a small west-end jeweller.——Arthur Lavallee, contractor, has also been asked to assign.

THIS CUT shows the Birley Patent Folding Container made up ready to receive the goods. It will be noticed that the printing is done on the box itself—which does away with the necessity of printed labels or wrappers—and a very much better effect can thus be produced in one or more colors, either by means of printing or lithographing. This Container is specially uitable for package goods, and will be found to have many advantages over hand made boxes. Write for Samples.

MONTREAL & VANCOUVER, B. C.

Mercantile Summary.

THE reported embarrassment of the well-known Montreal wholesale clothing house of J W MacKedie & Co will be heard of with general regret It is understood they are submitting a statement of affairs to their creditors, and that an arrangement is in train which will enable them to continue business

A MEETING was held last week of the creditors of D. Clement, of Alfred, Ont., formerly clerk for his father, whom he succeeded in 1892 An offer of 50 cents in the dollar, payable in six months. Liabilities are, in round figures, $4,000, assets nominally $3,500 — A. A McIntosh, hotel keeper, Cornwall, Ont., and previously at Mille Roches, has made an assignment — G W. Steacy, the Ottawa cigar dealer reported in trouble last week, has arranged a compromise at 40 cents on the dollar.

FIVE years ago Alex. Maclennan, tailor, failed, and his son then succeeded him in Stratford, but he evidently has met with no better success, as we now hear of his assignment — O & F Shoemaker, dealers in hardware at Chatham, have assigned About a year ago they claimed a surplus of $2,000 over liabilities of $8,000 This was entirely too small a margin for them to work on. Their stock will be sold on Monday next — About six years ago James Harrison started blacksmithing at Cannington Two years later George Francis was admitted a partner under the style of Harrison & Francis They met with some reverses which brought about their assignment.

THE Mullen-Gatfield Coal Co at Amherstburg, have been treating with Capt. W. Caldwell for land, and will now purchase 405 feet of the river front below Wigle's mill and construct a wharf 325 feet long and 65 or 70 feet wide, with a slip in the rear for unloading vessels, which will give them 650 ft. of wharf front. This dock will adjoin Wigle's wharf, which is 120 feet in length. The cost will likely be $5,000. They do not intend to build shutes, but will use steam derricks, doing all the unloading from the inside of the dock, and thus not interfere with the coaling of steamboats on the outside. They will also rebuild their wharves at the foot of Murray and Richmond streets, which they will use in case of a rush Forty years ago Amherstburg was a famous place for supplying wood fuel to steamers. Now it is to be scarcely less convenient for coaling them.

As a specimen of the size of New Brunswick granite pillars or monoliths, Messrs. Epps, Dodds & Co., of St. George, hauled a large piece of granite to their mill last week. It measured 17 by 3 by 3 feet, and weighed about thirteen tons.

THE sheriff has disposed of the assets of Alfred C. Wilson, manufacturer of pottery, New Westminster, B.C.——Rob. Oschner, bricklayer by trade, started a brewery in Vernon, B.C., about four years ago. He had no knowledge of the business, and it ended by the sheriff selling him out.

WE observe that the Standard Life has issued its sixty-ninth annual statement, showing the great revenue of $5,139,000 and the large amount of nearly nine millions of new risks taken last year. Close upon three millions of dollars was paid out in the shape of death claims or matured endowments and bonus additions. The Standard is a strong and a liberal company, never heard of as disputing claims. It has the large amount of $11,000,000 invested in Canada, in the shape of real estate, mortgages, government and municipal bonds.

AFTER disposing of his stock to Crawford & Deeds, compromise is asked by W. E. Milner, grocer, Brampton, at 33⅓ per cent. When he succeeded his father in June, 1886, he was believed to have a surplus of about $6,000, but it does not appear that he improved his position, for we learn that he assigned in Oct., 1893. At that time he compromised at 40 per cent. This arrangement was carried out. Now, as above stated, he is again in difficulty.——Two years ago John Allard started a grocery at North Bay, with but small capital. Since then he has continued to pile up liabilities until an assignment is in order.

WE hear of the assignment of L. G. Crosby, of Yarmouth, N.S., engaged in the shipping and commission business with the West Indies. He is understood to have made some serious losses in that trade during the last nine months. Direct liabilities are estimated at about $20,000, and it is expected he will make an offer of 50 per cent.——Anthony J. Crosby, grocer, &c., of Halifax and Waverly, N.S., whose troubles we have already noted, is offering 25 per cent. cash.——Mrs. M. G Sabourin, general store, Glen Sandfield, wife of J. H. Sabourin, who was in trouble in 1890, is reported to have compromised at the rate of 25 cents in the dollar.

ON Friday next the general stock of J. F. Showler, Arkona, will be sold.——C. S. Shaw & Co.'s wholesale crockery stock will be disposed of on the same day.——Mrs. Doggett, St Thomas, has bought the marble stock of her husband at 51 per cent.——J. Sutcliffe & Sons, of this city, have bought the dry goods stock of Garland & Co., which was formerly owned by C. S. Herbert.——The general stock of James Allan & Co., Beamsville, will be sold on the 3rd prox.

THE firm of John McGillivray & Co., Montreal, has made a judicial abandonment of its estate at the instance of Th. Michau & Co., of London. The creditors are eight in number and are all in Europe. From the firm's persistent endeavor to meet its obligations to the last, the direct liability has been brought down, it is said, to about $12,000. The amount under discount and secured by customers' paper is also very small. Th. Michau's & Co.'s claim is the largest, but was reduced considerably by the voluntary surrender of a number of cases in bond last November. The Messrs. Michau appear to have done quite a business with this house, as by the books of the firm the purchases since the initiation of the business come to within a little of $300,000

THE assignment is reported of J. F. Poirier, of Bonaventure River, or Caplin, Que., whose name it has been supposed is used as a cover for O. Forest, who failed some years ago. — Mrs. Virginie Robichand, doing business at St. Perpetue, on the Old Elgin Road, has made a voluntary assignment; liabilities about $1,500. ——A harnessmaker and tanner on a small scale at Hull, Que., A. E. Leblanc, is reported to be in embarrassed circumstances and to be offering 50 cents on the dollar.——A demand of assignment has been served upon L. W. Brissette, general dealer at St. Eustache. He was formerly of the firm of Gauthier & Brissette, who dissolved in December, 1893, after ten years partnership; they had a short time previous arranged an extension, and at dissolution Mr. B. assumed all the assets and liabilities.

JACKSON & Co., dealers in pianos, etc., Peterboro, after six years find they cannot make any money, and assign.——McLean & Griffith, general storekeepers at Port Elgin, were succeeded by McLean & McKay. In the fall of 1891 the latter firm moved to Underwood. The business not being sufficient to maintain two families, they have assigned.——Assignments are made by Nich. Sehel, carriage maker at Baden, and R. B. Hamilton, baker, Attwood.——In January last the Kay Electric Works at Hamilton got an extension of nine months, but being unable to meet the first payment, about due, they assign. It is probable that the business will be disposed of.

THE Dominion Organ and Piano Company, of Bowmanville, have opened branch warerooms at 244 Yonge street, Toronto. Mr. Wm. Fralick will have charge of the new branch The premises, while not large, are convenient, and the new branch will undoubtedly have the effect of increasing the favor which the citizens of Toronto have already extended to these instruments.

IN 1888, Thompson Bros. began business in Orangeville as general dealers. Previous to this they had been dealing in bankrupt stocks They have had branch stores in Shelburne, Durham, Walkerton, Mount Forest and Lucknow. All of these they claim have been closed, resulting in loss. This, with dull trade, slow collections, etc., has obliged them to consult with creditors to-day in this city.

FROM Quebec Province the following failures are reported: A demand of assignment is made upon E. St. Amour, Acton Vale, a dealer in dry goods and shoes. It was only in August of 1893 that he made a settlement with creditors at 40 cents in the dollar.——The creditors of Napoleon Latraverse, a hotelman of Sorel, had a meeting last week, after which he made an assignment; he owes $2,470.——Philippe Cossette, formerly a horse trader of Champlain, who started storekeeping in a limited way in the fall of 1893, has had to put his affairs into the hands of an assignee; liabilities are only $815. — J. B. Poirier, dealing in sewing machines at Ste. Scholastique, has been asked to assign.——T. Allard, a butcher, of Sherbrooke, is reported offering a compromise; liabilities mostly local.——A demand of assignment has been served upon A. I. Gravel, general dealer, of Louiseville. He compromised liabilities of some $16,000 last summer at 60 cents on the dollar.——J. B. Godin, crockery, etc., Three Rivers, is reported failed, owing $1,680. — L. A. Corbiere, of Lacolle, who has been doing quite an active business for several years, a good deal of it on a credit basis, has arranged an extension with his larger creditors. He shows a fair margin over liabilities of about $13,000.
